

TECHNICAL INSTRUCTIONS IMPLEMENTATION OF AGREEMENT SUITABILITY OF ACTIVITIES UTILIZATION OF SPACE FOR BUSINESS ACTIVITIES

**Number: 6/Juknis-PF.01/VIII/2023 Date:
August 3, 2023**

**TECHNICAL INSTRUCTIONS
IMPLEMENTATION OF CONFORMITY APPROVAL
SPACE UTILIZATION ACTIVITIES
FOR BUSINESS ACTIVITIES**

Number: 6 /Juknis – PF.01/VIII/2023

Date: August 3, 2023

**MINISTRY OF AGRARIAN AND SPATIAL PLANNING/
NATIONAL LAND AGENCY**

KATA PENGANTAR

Puji syukur kami panjatkan kepada Tuhan Yang Maha Esa yang telah memberikan kemudahan dalam penyelesaian penyusunan Petunjuk Teknis Pelaksanaan Persetujuan Kesesuaian Kegiatan Pemanfaatan Ruang untuk Kegiatan Berusaha, sehingga pada tahun 2023 ini kami dapat menerbitkan acuan untuk mendukung pelaksanaan pelayanan KKPR bagi para pemangku kepentingan di pusat dan di daerah.

Petunjuk Teknis Pelaksanaan Persetujuan Kesesuaian Kegiatan Pemanfaatan Ruang untuk Kegiatan Berusaha disusun sebagai turunan Peraturan Menteri Agraria dan Tata Ruang/Kepala Badan Pertanahan Nasional Nomor 13 Tahun 2021 tentang Pelaksanaan Kesesuaian Kegiatan Pemanfaatan Ruang dan Sinkronisasi Program Pemanfaatan Ruang. Petunjuk teknis menjelaskan lebih detail terkait ketentuan pendaftaran, penilaian, dan penerbitan Persetujuan Kesesuaian Kegiatan Pemanfaatan Ruang untuk Kegiatan Berusaha.

Dengan ditetapkannya Petunjuk Teknis ini maka diharapkan dapat terwujud penguatan kapasitas pelaksanaan penerbitan Kesesuaian Kegiatan Pemanfaatan Ruang dan peningkatan layanan Kesesuaian Kegiatan Pemanfaatan Ruang baik di pusat maupun di daerah.

Jakarta, 3 Agustus 2023

a.n. Menteri Agraria dan Tata Ruang/
Kepala Badan Pertanahan Nasional,
Direktur Jenderal Tata Ruang

Gabriel Triwibawa

PIG

INTRODUCTION

1.1 Background

Based on Law Number 6 of 2023 concerning the Determination Government Regulation in Lieu of Law Number 2 of 2022 concerning Job Creation, which amends Law Number 26 of 2007 concerning Spatial Planning, contains several substantial changes to regulations related to spatial planning. Regarding the ease of doing business aspect, a breakthrough has been made in simplifying licensing requirements.

Businesses can do business through the Spatial Utilization Activity Suitability (KKPR) service provided by the Ministry that handles government affairs in the field of Spatial Planning and local governments in accordance with their authority, while Environmental Approval services are carried out by the Ministry that handles government affairs in the field of environment and forestry, and Building Approval services are carried out by the Ministry of Public Works and Public Housing. These three services meet the basic requirements for business licensing.

applied for through the *Online Single Submission* (OSS) system managed by the Ministry that organizes government affairs in the investment sector.

Following the enactment of Law Number 6 of 2023, Government Regulation Number 21 of 2021 concerning the Implementation of Spatial Planning (PP 21/2021) was issued as its implementing regulation. The substance of the KKPR regulations is divided into three types: KKPR for business activities, KKPR for non-business activities, and KKPR for public services.

which are of a national strategic nature. Furthermore, as an operational regulation for the implementation of the KKPR, a Regulation of the Minister of Agrarian Affairs and Spatial Planning has been established. (ATR)/Head of the National Land Agency (BPN) Number 13 of 2021 concerning the Implementation of Conformity of Spatial Utilization Activities and Synchronization of Spatial Utilization Programs. There are several regulatory contents in the Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 13 of 2021 that require detail, including regulations related to KKPR Approval (PKKPR) for business activities in Article 11 paragraph (1) and paragraph (7); Article 12 paragraph (1), paragraph (2), and paragraph (4); Article 14 paragraph (1) and paragraph (5); Article 15 paragraph (1); Article 17 paragraph (1); and Appendix I letter b.

Based on Article 16 of the Regulation of the Minister of ATR/Head of the National Land Agency Number 13 of 2021 concerning the Implementation of Conformity of Spatial Utilization Activities and the Synchronization of Spatial Utilization Programs, the development of technical guidelines for the registration and assessment of Spatial Utilization Activity Conformity Approval (PKKPR) documents for Business Activities is mandated. In light of this background, it is necessary to develop "Technical Guidelines for the Implementation of Conformity Approval of Spatial Utilization Activities for Business Activities."

1.2 Legal basis

The legal basis underlying these Technical Instructions includes:

1. Law Number 5 of 1960 concerning Basic Agrarian Principles (State Gazette of the Republic of Indonesia 1960 Number 104, Supplement to the State Gazette of the Republic of Indonesia Number 2043);
2. Law Number 26 of 2007 concerning Spatial Planning (State Gazette of the Republic of Indonesia of 2007 Number 68, Supplement to the State Gazette of the Republic of Indonesia Number 4725); as amended by Law Number 6 of 2023 concerning the Stipulation of Government Regulation in Lieu of Law Number 2 of 2022 concerning Job Creation to Become Law (State Gazette of the Republic of Indonesia of 2023 Number 41);
3. Law Number 39 of 2008 concerning State Ministries (State Gazette of the Republic of Indonesia 2008 Number 166, Supplement to the State Gazette of the Republic of Indonesia Number 4916);
4. Government Regulation Number 5 of 2021 concerning the Implementation of Risk-Based Business Licensing (State Gazette of the Republic of Indonesia Number 6617);
5. Government Regulation Number 21 of 2021 concerning the Implementation of Spatial Planning (State Gazette of the Republic of Indonesia 2021 Number 31, Supplement to the State Gazette of the Republic of Indonesia Number 6633);
6. Presidential Regulation Number 47 of 2020 concerning the Ministry of Agrarian Affairs and Spatial Planning (State Gazette of the Republic of Indonesia 2020 Number 83);
7. Presidential Regulation Number 48 of 2020 concerning the National Land Agency (State Gazette of the Republic of Indonesia 2020 Number 84);
8. Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 16 of 2020 concerning the Organization and Work Procedures of the Ministry of Agrarian Affairs and Spatial Planning/National Land Agency (State Gazette of the Republic of Indonesia 2020 Number 985);
9. Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 17 of 2020 concerning the Organization and Work Procedures of the Regional Offices of the National Land Agency and Land Offices (State Gazette of the Republic of Indonesia 2020 Number 986); and
10. Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 13 of 2021 concerning the Implementation of Conformity of Spatial Utilization Activities and Synchronization of Spatial Utilization Programs (State Gazette of the Republic of Indonesia 2021 Number 330).

1.3 Purpose and objectives

These Technical Guidelines are intended as a reference for the central government (including vertical agencies within the Ministry of Agrarian Affairs and Spatial Planning/National Land Agency), regional governments, and other stakeholders in understanding the implementation of the PKKPR for business activities. The purpose of these Technical Guidelines is to ensure effective and efficient implementation of the KKPR.

1.4 Scope

The scope of these Technical Instructions includes the implementation of PKKPR for business activities as depicted in the chart below.

Figure 1. 1. Scope Chart of Contents of Technical Instructions for Implementing Approval of Conformity of Spatial Utilization Activities

Based on the provisions in Government Regulation Number 5 of 2021 concerning the Implementation of Risk-Based Business Licensing, it is stated that the OSS System carries out inspections of business locations based on the Spatial Planning Plan (RTR). This is further reinforced by the provisions in Government Regulation 21/2021, KKPR. For business activities, a KKPR Confirmation (KKKPR) or PKKPR is issued. In addition to KKPRs issued based on business locations that comply with the Spatial Planning (RTR), Article 181 of Government Regulation 5/2021 stipulates that the OSS System will automatically review and approve PKKPRs for business locations under certain conditions. The scope of these Technical Instructions covers the implementation of PKKPRs issued based on the RTR or PKKPRs with assessment.

Table 1. 1. Scheme for Issuance of Conformity of Space Utilization Activities

Activity	OSS System					Electronic System of the Minister of ATR/BPN*				
	RDTR Integrated with OSS System	RDTR Not yet Integrated with OSS System	PP5 Article 181	RTR besides RDTR	Non RTR	RDTR Integrated with OSS System	RDTR Not yet Integrated with OSS System	PP5 Article 181	RTR besides RDTR	Non RTR
Try	K-KKPR	P-KKPR Evaluation	P-KKPR 181	P-KKPR Evaluation	X	X	X	X	X	X
Non-effort	X	X	X	X	X	K-KKPR	P-KKPR Evaluation	X	P-KKPR Evaluation	X
Stranas	X	X	X	X	X	K-KKPR	P-KKPR Evaluation	X	P-KKPR Evaluation	R-KKPR

*In the event that the Minister of ATR/BPN Electronic System is not yet available, the implementation of KKPR will be carried out non-electronically.

1.5 Technical Instructions User

The users of these Technical Instructions are the central government (including vertical agencies of the Ministry of ATR/BPN) and regional governments according to their authority in implementing spatial utilization, as well as related stakeholders.

1.6 Use of Technical Instructions

These Technical Instructions are used as a technical reference in implementation. PKKPR for business activities both at the central and regional levels.

1.7 Terms and Definitions

1. Space is a container that includes land space, sea space and air space, including space within the earth as a single territorial unit, where humans and other creatures live, carry out activities and maintain their survival.
2. Spatial planning is a form of spatial structure and spatial pattern.
3. Spatial Planning is a system of processes for Spatial Planning, Space Utilization, and Space Utilization Control.
4. Spatial Planning is a process for determining Spatial Structure and Spatial Pattern which includes the preparation and determination of RTR.
5. Spatial Utilization is an effort to realize Spatial Structure and Spatial Pattern in accordance with the RTR through the preparation and implementation of programs and their financing.
6. Controlling the Utilization of Space is an effort to create order.
Spatial.
7. Implementation of Spatial Planning is an activity that includes the regulation, guidance, implementation and supervision of Spatial Planning.
8. Spatial Structure is the arrangement of settlement centers and infrastructure and facility network systems that function to support the socio-economic activities of the community which hierarchically have functional relationships.
9. Spatial Pattern is the distribution of spatial allocation in an area which includes the allocation of space for protective functions and the allocation of space for cultivation functions.
10. Spatial Planning, hereinafter abbreviated as RTR, is the result of spatial planning.
11. A region is a space which is a geographical unit along with all related elements whose boundaries and systems are determined based on administrative and/or functional aspects.
12. The Regional Spatial Planning Plan, hereinafter abbreviated as RTRW, is the result of spatial planning in an area which is a geographical unit along with all related elements whose boundaries and systems are determined based on administrative aspects.
13. The National Spatial Planning Plan, hereinafter abbreviated as RTRWN, is a policy directive and strategy for the Utilization of National Spatial Space.
14. The Island/Archipelago Spatial Plan, hereinafter referred to as the Island/Archipelago RTR, is a detailed plan prepared as an elaboration and operational tool of the RTRWN.
15. The National Strategic Area Spatial Planning Plan, hereinafter abbreviated as RTR KSN, is a detailed plan of the RTRWN which contains objectives, policies and strategies for spatial planning, spatial structure plans, spatial pattern plans, directions for spatial utilization, directions for controlling spatial utilization, and area management.

16. The Provincial Spatial Planning Plan, hereinafter abbreviated as RTRWP, is a general spatial planning plan for the provincial area, which refers to the RTRWN, RTR Island/Island, and RTR KSN.
17. The Regency/City Spatial Planning Plan, hereinafter referred to as the Regency/City RTRW, is a general spatial planning plan for the regency/city area, which refers to the RTRWN, RTR Island/Island, RTR KSN, and RTRWP.
18. Detailed Spatial Planning Plan, hereinafter abbreviated as RDTR, is a detailed plan regarding the spatial planning of a district/city area which is supplemented by district/city zoning regulations.
19. Conformity of Spatial Utilization Activities, hereinafter abbreviated as KKPR, is the conformity between the Spatial Utilization activity plan and the RTR.
20. Approval of Conformity of Spatial Utilization Activities, hereinafter abbreviated as PKKPR, is a document that states the conformity between the Spatial Utilization activity plan and the RTR in addition to the RDTR.
21. Business actors are individuals or business entities that carry out business and/or activities in a particular field.
22. Business Licensing is the legality granted to Business Actors to start and run their businesses and/or activities.
23. Business Activities are activities that utilize space that require a Business Permit.
24. A region is a space which is a geographical unit along with all related elements whose boundaries and systems are determined based on administrative and/or functional aspects.
25. An area is an area that has the main function of protection or cultivation.
Power.
26. National Strategic Areas, hereinafter abbreviated as KSN, are areas whose spatial planning is prioritized because they have a very important influence nationally on state sovereignty, state defense and security, economy, social, culture and/or environment, including areas that have been designated as world heritage.
27. The Spatial Planning Forum is a forum at the central and regional levels whose task is to assist the Central Government and Regional Governments by providing considerations in the Implementation of Spatial Planning.
28. The Electronically Integrated Business Licensing System (*Online Single Submission*) , hereinafter referred to as the OSS System, is an integrated electronic system managed and organized by the OSS Institution for the implementation of Risk-Based Business Licensing.
29. The Indonesian Standard Classification of Industrial Fields, hereinafter abbreviated as KBLI, is a classification code regulated by a non-ministerial government agency that organizes government affairs in the field of statistics.
30. Person is an individual and/or corporation.

31. Stakeholders are people or parties who have an interest in the implementation of spatial planning, including the Central Government, Provincial Regional Government, District/City Regional Government, Provincial, District or City Regional Representative Council, and the Community.
32. The Central Government is the President of the Republic of Indonesia who holds the power to govern the Republic of Indonesia, assisted by the Vice President and ministers as referred to in the 1945 Constitution of the Republic of Indonesia.
33. The Regional Government is the regional head as an element of the regional government administration which leads the implementation of government affairs which are the authority of the autonomous region.
34. Community is an individual, group of people including customary law communities, corporations, and/or other non-government stakeholders in the implementation of spatial planning.
35. Validation of proposed documents for Spatial Utilization activities, hereinafter referred to as Validation, is the activity of checking the completeness of data and the quality of proposed documents for Spatial Utilization activities.
36. Non-Tax State Revenue, hereinafter referred to as PNBPN, is a levy paid by individuals or bodies who obtain direct or indirect benefits from services or utilization of resources and rights obtained by the state, based on statutory regulations, which becomes central government revenue outside of tax and grant revenue and is managed within the state revenue and expenditure budget mechanism.
37. KKPR officers are employees, functional officials, structural officials who provide KKPR services according to their duties, functions and authority.
38. The Director is the director who handles the implementation of KKPR.
39. The Minister is the minister who organizes government affairs in spatial planning field.
40. Today is a working day.

1.8 KKPR for Business Activities

KKPR for business activities is a Space Utilization Activity that requires a Business Permit as a legality given to Business Actors to run their business. KKPR for business activities is intended for **Non-Micro and Small Business Actors (Non-UMK)**, which are businesses owned by Indonesian Citizens (WNI) or Foreign Citizens (WNA), both individuals and business entities, with business capital of more than IDR 5,000,000,000.00 (five billion rupiah), excluding land and buildings for business premises based on the provisions of investment laws and regulations.

2.1.1. Quality Requirements for Proposed Space Utilization Activity Documents

Business actors register through the OSS System and upload documents for proposed Space Utilization activities with the following document quality requirements:

a. Location Coordinates

The location coordinates are in the form of a polygon *shapefile* (SHP) which provides information on the area and shape of the land or the plot identification number for land that has been certified, with the following provisions:

- 1) coordinate points of longitude (x) and latitude (y), using a coordinate system WGS 84, for area calculations using *the Web Mercator (auxiliary sphere) projection*;
- 2) in the case that the OSS System can already serve KKPR for the space below land coordinate points of longitude (x) and latitude (y), using the WGS 84 coordinate system, for area calculations using the *Web Mercator projection (auxiliary sphere)* as well as the minimum depth and maximum depth of space required underground in meters which is calculated from the highest point on the ground surface. Example of depth space can be seen in Figure 2.2;
- 3) in the case that the OSS System can already serve KKPR for the above space land, the location coordinates consist of longitude (x) and latitude (y) coordinate points, using the WGS 84 coordinate system, for area calculations using the *Web Mercator projection (auxiliary sphere)* and the minimum and maximum height of the space required above ground in meters calculated from the lowest point on the ground surface. An example of the space height can be seen in Figure 2.2;

Figure 2. 2. Illustration of Minimum Depth/Height and Maximum Depth/Height for KKPR Applications Underground/Above Ground

- 4) The coordinates submitted correspond to the location of the proposed activity.
Utilization of the requested space;
- 5) located in one area that is not separated by geographical features (such as roads or rivers) or located in several areas that are connected and integrated in 1 (one) polygon in accordance with the System
OSS;
- 6) located in one district/city administrative area;
- 7) Polygon data can be added with *point* or *polyline* data as needed.
activity plan;
- 8) there must be no unclaimed areas within a polygon
application;
- 9) the location coordinate data format consists of a minimum of 4 (four) extensions in the form of *.shp, *.shx, *.dbf, and *.prj., which are loaded in *.zip format with a document size of no more than 25 (twenty five) MB (*mega bytes*); and
- 10) Information related to location coordinates, SHP descriptions, information on KKPR that has been issued, the existence of Industrial Areas (KI) or Special Economic Zones (KEK), and the availability of RDTR can be checked via the Interactive GISTARU-RDTR portal.

b. Land Area Requirements for Space Utilization Activities

The land area requirements for Spatial Utilization activities are in the form of information on the requested land area in m² (square meters) or ha (hectares).

c. Land Ownership Information

Land ownership information is information about the legal relationship between individuals, groups of people or legal entities and land, with the following provisions:

- 1) In the event that the Business Actor does not yet control/own the land, then the Business Actor does not
Business provide information need upload documents
control/ownership of land;
- 2) In the event that the Business Actor already controls/owns the land, then the Business Actor
Businesses need to attach proof of land ownership/control documents in the form of:
 - a) certificate or other valid proof of ownership for Business Actors
as the party who owns the land;
 - b) deed made by the Land Deed Official;
 - c) proof of a valid land lease or loan agreement in accordance with statutory
provisions between the Business Actor and the party who owns or controls the
land; or
 - d) letter of acknowledgement/release/transfer of rights or similar letter
which is valid in accordance with the provisions of laws and regulations.
- 3) Attach other supporting documents as needed for the activity plan;
- 4) land ownership information documents and their attachments can be read clearly and
uploaded completely in one document; and
- 5) The format for land ownership information and its attachments is in the form of *.pdf and
document size is not more than 25 (twenty five) MB.

d. Business Type Information

Information on the type of business in the form of KBLI that will be implemented by the Business Actor, with the following conditions:

- 1) information on the type of business requested in accordance with statutory regulations;
- 2) using 5 (five) digit KBLI; and
- 3) KBLI must be in accordance with the activity information in the technical building plan and/or master plan for the area submitted.

e. Existing Building Information

Existing building information includes information on the current existence of buildings at the requested business location, with the following provisions:

- 1) If there is an existing building at the requested business location, the Business Actor must fill in 'Yes' in the existing building information column;
- 2) If there is no building at the requested business location, the Business Actor must fill in 'No' in the existing building information column; and/or
- 3) Existing building information must be filled in according to the factual conditions there.

f. New Building Plan Information

New building plan information in the form of information on building plans to be constructed by the Business Actor at the requested location, with the following provisions:

- 1) If the Business Actor requires a new building, the Business Actor must fill in 'Yes' in the new building plan information column;
- 2) If the Business Actor does not require a new building, the Business Actor fills in 'No' in the new building plan information column; and/or
- 3) New building plan information must be in accordance with the plan Utilization of the requested space.

g. Number of Planned Buildings

The number of planned buildings is information on the number of buildings to be built by the Business Actor at the requested location, with the following provisions:

- 1) only filled in if the Business Actor fills in 'Yes' in letter f; and/or
- 2) The planned building information column is filled in with a number format according to the number of planned buildings.

h. Planned Number of Building Floors

The planned number of building floors is information on the number of floors of the highest building to be built by the Business Actor at the requested business location, with the following provisions:

- 1) only filled in if the Business Actor fills in 'Yes' in letter f; and/or
- 2) The Building Floor Plan Information column is filled in with a number format according to the number of floors of the highest planned building.

i. Building Floor Plan

The building floor area plan is information on the total floor area of the building to be built by the Business Actor at the requested business location, with the following provisions:

- 1) only filled in if the Business Actor fills in 'Yes' in letter f; and/or

- 2) The Building Floor Area Plan Information column is filled in according to the planned building floor area, filled in with a numerical format in m² (square meters).

j. Technical Building Plan and/or Master Plan for the Area

- 1) The provisions regarding technical building plans and/or master plans for areas are as follows:
 - a) The technical building plan must at least include a plan drawing of the existing building or buildings at the application location. The technical building plan may include the actual shape of the plot, the building's appearance and a section of the building that shows the number of floors and the height of the building; and/or
 - b) the master plan for the area contains a description and *master plan* drawings or *block plan* which shows the details of the plans made for the application location.
- 2) The master plan for the area must be uploaded by Business Actors and can be equipped with technical building plans;
- 3) The technical building plan map and/or master plan for the area must contain at least:
 - a) map face;
 - b) name of activity/Business Actor;
 - c) wind direction and scale;
 - d) legend/caption; e) map inset (if needed);
 - f) location orientation information; and
 - g) data storage link containing location coordinate data in the form of outermost delineation SHP and other required information in *.zip format with a document size of no more than 25 (twenty five) MB.
- 4) the technical building plan and/or master plan for the area is clearly legible and uploaded in full in one document; 5) the format of the technical building plan and/or master plan for the area is *.pdf and the document size is no more than 25 (twenty five) MB; and
- 6) can be accompanied by a document on the plan for the use of raw water/clean water in the event that the spatial utilization activities have an impact/influence on the availability and quality of raw water/clean water, which includes, among other things, a plan for the need for raw water/clean water, a plan for the availability of raw water/clean water and an analysis related to the impact of spatial utilization activities on the availability of raw water/clean water.

Example of technical building plan format and/or area master plan listed in Attachment I which is an integral part of these Technical Instructions.

The material accuracy of the proposed space utilization documents uploaded to the OSS System is the responsibility of the Business Actor.

2.1.2. Validation of Proposed Space Utilization Activity Documents

Validation includes checking the completeness and quality of documents. proposed Space Utilization activities.

a. Validation of Completeness of Documents for Proposed Space Utilization Activities

The validation process for the completeness of proposed Spatial Utilization activity documents is carried out by checking the availability of data and information in the proposed Spatial Utilization activity documents. Validation of the completeness of proposed Spatial Utilization activity documents is carried out through the GISTARU-KKPR portal.

The provisions for validating the completeness of the proposed documents for Space Utilization activities are as follows:

- 1) Data is considered complete if the data column in the GISTARU-KKPR portal contains the word '*download*' or contains information related to the data.

The KKPR officer selects 'Yes' in the complete status column; and

- 2) data is considered incomplete in terms of the data column in the portal GISTARU-KKPR does not display the word '*download*' or is not loaded

Information related to the data. The KKPR officer selects 'No' in the complete status column.

b. Validation of the Quality of Documents for Proposed Space Utilization Activities

KKPR officers download all the complete documents for proposed Space Utilization activities via the GISTARU-KKPR portal.

The provisions for validating the quality of documents for proposed spatial utilization activities are as follows:

- 1) If the documents are deemed complete and of good quality, the KKPR officer will press the 'approved' button on the GISTARU-KKPR portal and the application will proceed to the PNPB service fee payment stage; or
- 2) If the document is deemed incomplete and/or of poor quality, the KKPR Officer will submit notes on improvements to the proposed KKPR document to the Business Actor via the OSS System.

Example of notes on improvements to proposed Spatial Utilization activity documents listed in Appendix II which is an integral part of these Technical Instructions.

Provisions for improving documents for proposed spatial utilization activities:

- a. The process of improving the proposed documents for Space Utilization activities is carried out a maximum of 1 (one) time by the Business Actor;
- b. Improvements to the proposed Spatial Utilization activity documents can be done independently or by conducting a face-to-face consultation through the Spatial Planning *Customer Care* (CETAR) first;

- c. In the case of consultations conducted via CETAR, the consultation can be carried out with agreement or without agreement:

- 1) consultation by agreement

Business actors contact the Ministry of ATR/BPN Complaints *hotline* via *WhatsApp* (0811-1068-0000), select the Face-to-Face Consultation menu via CETAR and fill in the required data, as well as the obstacles faced in the format that will be sent via *the Hotline*.

Complaints from the Ministry of ATR/BPN. Business actors then visit the CETAR counter and present their in-person ticket agreement.

2) consultation without an agreement

Business actors visit the CETAR counter, receive a queue number without an appointment from a CETAR officer, and wait for their queue number to be called.

- d. the process of improving the proposed documents for Space Utilization activities is carried out maximum 7 (seven) days;
- e. If the Business Actor does not send the revised document for the proposed Spatial Utilization activity within 7 (seven) days, the KKPR application will be automatically rejected by the OSS System and the KKPR application cannot be processed further; and
- f. Business actors can re-submit KKPR applications with re-register through the OSS System.

2.1.3. Payment of Non-Tax State Revenue Service Fees

Payment of Non-Tax State Revenue (PNBP) service fees carried out in terms of the validation process for proposed documents for Space Utilization activities has been completed, with the following stages:

- a. Business actors receive a Deposit Order Letter (SPS).
The SPS contains details of the costs of Land Technical Considerations (PTP) services. and KKPR Issuance Services accompanied by a payment code from the *Online* PNBP Information System (SIMPONI) consisting of 15 (fifteen) digits.
- b. Business actors must pay the KKPR service fee according to the amount stated on the deposit order (SPS) that has been issued no later than 7 (seven) days after the SPS is received by the Business Actor.
- c. If the Business Actor has not made payment for more than 7 (seven) days, the Business Actor is given 7 (seven) days to request a *recreate of the billing* code a maximum of 1 (one) time which can be done via the Business Actor *dashboard* on the OSS System;
- d. Business actors make payments a maximum of 7 (seven) days after the new *billing* code is received by the Business Actor, with the following provisions: 1) after the Business Actor makes payment of the service fee or payment after *recreating* the billing code , the GISTARU-KKPR portal will receive a notification "Paid", so that the application continues to the assessment stage; or

- 2) If after *recreating* the *billing* code the Business Actor has not made payment, the application will be automatically rejected by the OSS System.

2.2. Assessment Stage

The assessment of proposed documents for spatial utilization activities is carried out through an assessment of the Spatial Plan as well as an assessment of land and sector aspects. Proposed documents for spatial utilization activities that are included in the assessment stage are data that has been validated completely and of high quality in accordance with the quality provisions for proposed documents for spatial utilization during the registration stage, and the PNBP service fee has been received by the GISTARU-KKPR Portal.

The stages of PKKPR assessment by the Central Government are depicted in Figure 2.3 below.

Figure 2.3. Stages of Assessment of Approval of Suitability of Spatial Utilization Activities for Business Activities by the Central Government

2.2.1. Preparation of Assessment Materials for Approval of Conformity of Spatial Utilization Activities

Documents required in preparing assessment materials include:

- Documents for proposed spatial utilization activities downloaded from the portal GISTARU-KKPR;
- RTR documents and *shapefiles* that can be displayed from the GISTARU-RTR portal *Online* or other sources that can be accounted for;
- PTP result documents downloaded from the GISTARU-KKPR portal in the event that they have been available; and
- Other sector regulatory documents as needed for PKKPR assessment.

After the PKKPR assessment materials are prepared, a recheck is performed to ensure the availability of the RDTR integrated with the OSS system at the activity location. If an RDTR integrated with the OSS system is available at the planned activity location, then:

- in the case that all planned activity locations are within the RDTR delineation that has been integrated with the OSS System, then a PKKPR assessment is not required and the requested activity plan will be issued with the following message: "PKKPR rejected with reasons and needs to be re-applied through the KKKPR mechanism"; or
- In the case where some of the planned activity locations are within the RDTR delineation that has been integrated with the OSS System, the PKKPR assessment will only be carried out for the planned activity locations that are outside the RDTR delineation that has been integrated with the OSS System.

integrated with the OSS System. A "PKKPR partially approved" notification will be issued for the proposed activity location.

After re-checking the availability of the RDTR which has been integrated with the OSS System at the activity location, the process then continues with an assessment of the RTR.

Figure 2.4. Illustration of Assessment of Spatial Planning and Assessment of Land and Sector Aspects

2.2.2. Assessment of Spatial Planning

Assessment of the RTR is carried out using a tiered and complementary principle by reviewing Spatial Utilization activities in stages and/or comprehensively starting from the district/city RTRW, provincial RTRW, KSN RTR, island/archipelago RTR, up to the RTRWN.

2.2.2.1. Study of Spatial Plan Content and Determination of Spatial Plan as the Basis for Issuing Approval of Suitability of Spatial Utilization Activities

The study of RTR content was carried out, among other things, by:

- check the availability of activity plans in the body;
 - overlay* activity plans with the Spatial Structure plan map;
 - overlay* activity plans with Spatial Pattern plan maps;
 - checking the availability of provisions on the intensity of spatial utilization;
 - pay attention to the arrangement of activity plans based on general zoning provisions/zoning directives/zoning directive indications in the Spatial Pattern requested;
- And
- check the availability of activity plans in the main program indications.

A comprehensive review of all RTR contents is conducted until the regulatory contents in the RTR are identified and can be used as a reference in issuing the KKPR. The review of the RTR contents uses the principle

hierarchical and complementary can be done based on the provisions in Figure 2.5 as follows.

Figure 2.5. Study of RTR Content Using the Hierarchical and Complementary Principles

A review of the contents of the RTR which will be used as the basis for issuing the PKKPR is carried out to ensure that the proposed activity plan is regulated and permitted based on the RTR, with the following provisions:

- a. Assessment of proposed documents for Spatial Utilization activities against the RTR can be carried out through Stage 1 (assessment of the contents of the RTRW) and Stage 2. (assessment of the national RTR).
- b. Assessment in Stage 1 begins with an examination of the suitability of the planned activity location with the RTRW which has a more recent determination time, with the following provisions:
 - 1) If the location of the planned activity is regulated in the RTRW which has a more recent determination time, then the following assessment provisions apply:
 - a) if the entire location of the planned activity is permitted, then the assessment of land and sector aspects will continue;
 - b) if the location of the planned activity is partially permitted, then it will be continued assessment of other RTRW; or
 - c) if the location of the planned activity is not permitted, then the assessment of other RTRW will continue.
 - 2) If the location of the planned activity is not regulated in the RTRW which has a more recent determination time, then the assessment will continue with the other RTRW.
 - 3) If the location of the planned activity is regulated in another RTRW, the following assessment provisions apply:
 - a) if the entire location of the planned activity is permitted, then the assessment of land and sector aspects will continue;
 - b) if the location of the planned activity is partially permitted, then a check will be carried out on the type of activity with the following provisions:
 - (1) If the activity plan is regulated in the national RTR, then it will be continued assessment of the national RTR; or
 - (2) If the activity plan is not regulated in the national RTR, then a comparison of the areas between A and B is carried out and the one with the larger area is selected, then an assessment is continued regarding land and sector aspects;
 - c) if the location of the planned activity is not permitted, then it will be carried out checking the type of activity with the following provisions:
 - (1) If the activity plan is regulated in the national RTR, then it will be continued assessment of the national RTR; or
 - (2) If the activity plan is not regulated in the national RTR, the PKKPR will be rejected with reasons and taking into account the results of the assessment of land aspects.
 - 4) If the location of the planned activity is not regulated in another RTRW, then a check is carried out on the type of activity with the following provisions:
 - a) in the case of activity plans regulated in the national RTR, then continued assessment of the national RTR; or
 - b) In the event that the activity plan is not regulated in the national RTR, the PKKPR will be rejected along with reasons and taking into account the results of the assessment of land aspects.

- c. Stage 2 assessment begins with an examination of the suitability of the proposed activity plan with the national RTR which has a more recent determination time.
- 1) If the location of the planned activity is regulated in the national RTR which has a more recent determination time, then the following assessment provisions apply:
 - a) if the entire location of the planned activity is permitted, then the assessment of land and sector aspects will continue;
 - b) if the location of the planned activity is partially permitted, then the assessment of other national RTRs will continue; or
 - c) if the location of the planned activity is not permitted, then it will be continued assessment of other national RTRs.
 - 2) If the location of the planned activity is not regulated in the national RTR which has a more recent determination time, then the assessment will continue with other national RTRs.
 - 3) if the location of the planned activity is regulated in another national RTR, then
The following assessment conditions apply:
 - a) if the entire location of the planned activity is permitted, then the assessment of land and sector aspects will continue;
 - b) in the case where the location of the planned activity is partially permitted, then D is comparison of the area between ABC and a target area, then carried out and suitability is selected continued with an assessment of land and sector aspects; or
 - c) If the location of the planned activity is not permitted, the PKKPR will be rejected along with the reasons and taking into account the results of the assessment of the land aspects.
 - 4) If the location of the planned activity is not regulated, the PKKPR will be rejected along with reasons and taking into account the results of the assessment of land aspects.

2.2.2.2. Provisions for the Approval Assessment Process for the Conformity of Spatial Utilization Activities Using the Hierarchical and Complementary Principles

The provisions for the document assessment process use hierarchical and complementary principles, including:

- a. in the case of RTRWN and/or RTR of islands/archipelagos being taken into consideration
In the assessment, the following provisions must be taken into account:
 - 1) The contents of the RTRWN and RTR of islands/archipelagos that can be referred to include all provisions of the main body and contents of the attachments except for the spatial structure plan map because the scale of detail is too small;
 - 2) Overlays on the RTRWN spatial plan map and/or RTR of islands/archipelagos are carried out only if the proposed activity is located in a forest area that has undergone a change in designation and function and a Decree on Release of Forest Areas and/or Decree on Confirmation of Released Forest Areas has been issued, but is not yet included in the RDTR;
 - 3) The RTRWN and RTR of islands/archipelagos cannot be used as an indication of specific activity locations; and/or

4) If necessary, checks can be carried out on existing conditions in the field.

b. the requested activity plan is stated to have been regulated and permitted in accordance with the spatial planning in terms of:

1) listed in the spatial structure plan, spatial pattern plan, and/or

main program indications; 2) in

accordance with the Spatial Utilization directives; and/or

3) in accordance with general zoning provisions/zoning directives/direction indications zoning.

The requested activity is declared to be included in the RTR if it is regulated in at least one of the contents of the RTR.

An example of an activity plan regulated in the main body can be seen in Figure 2.6. An example of an activity plan regulated only in general zoning provisions/zoning directives/zoning directive indications can be seen in Figure 2.7 below.

Figure 2.6. Example of an Activity Plan Arranged in the Body

Figure 2.7. Example of an Activity Plan that is Only Regulated in General Zoning Provisions/Zoning Directives/
Zoning Directive Indications

- c. Other provisions that need to be taken into account in the study of the contents of the RTR, namely that water bodies and roads are not always reducing factors in the PKKPR assessment, so it is necessary to check the general zoning provisions regarding whether or not the requested activity is permitted.
- d. In the case where the provisions on the intensity of spatial utilization and building layout provisions are not included in the RTR, these contents can be formulated using the provisions in Figure 2.8.

Figure 2.8. Determination of Reference Provisions for Intensity of Spatial Utilization

- e. In the case of the proposed activity plan being underground or above ground, it is necessary to pay attention to the directions for underground or above ground space in the RTR.

Examples of directions for underground or above ground spaces in RTR can be seen in Figure 2.9. following.

Figure 2.9. Example of Directions for Underground or Above Ground Space in a Spatial Plan

- f. to formulate the Requirements for Implementing Space Utilization Activities, this is done by taking into account the arrangement of activity plans based on:
- 1) general provisions of zoning/zoning directives/indications of zoning directives in the pattern the requested space;
 - 2) technical provisions in the RTB/RIK documents uploaded by Business Actors;
 - 3) results of technical land considerations; and/or
 - 4) other sectoral technical regulations or policies.

Examples of content that can be used as a formulation of requirements for implementing Space Utilization activities can be seen in Table 2.1.

Table 2.1. Contents that can be used as a formulation of requirements for implementing spatial utilization activities

No	Example Source	Example of Terms
1 RTRW	Regency	On less productive agricultural land, food crops can be converted while maintaining the regional productivity level.
2 PTP		- Land use is only permitted for the activities of generating, transmitting, distributing and selling electricity in one business entity and is not permitted to be transferred to other types of land use without permission from the authorized agency. - The use of land at the requested location must not disrupt public interests and must not cause environmental damage or pollution. - The applicant is required to construct drainage and sanitation channels and undertake efforts to plant plants.

No	Example Source	Example of Terms
		reforestation on undeveloped land as an effort to improve water absorption function. • Development/activities must comply with building boundaries, roads and other boundaries in accordance with applicable laws and regulations. • In terms of land use and utilization in order to create and realize the Principles of Sustainability, Optimality, Harmony and Balance (LOSS).
3 Rules	about Building Building	• Simple building with a single residential function with a maximum total building area of 100 m² whose structure does not use steel materials must meet the criteria of shallow foundations, a maximum distance between columns of 3 m (three meters), etc. • Special building structures with the function of laboratory buildings, train stations, sports stadiums are built on land with a slope of more than 100% (above 450) using non-portal structures, foundations using special earthquake-dampening technology, column heights above 9 m (nine meters), etc.
4 Other	related regulations	<i>(contains substances that can be used as content for the Implementation Requirements for Utilization Activities Room)</i>

2.2.3. Assessment of Land and Sector Aspects

2.2.3.1. Checking with the Results of Land Technical Considerations

Checks are carried out on the activity plan with the PTP results for the purpose of issuing PKKPR. KKPR officers receive PTP from the land office through the GISTARU-KKPR portal within a maximum of 10 days from the notification of payment of PNPB service fees received by the GISTARU-KKPR portal. The data used for PTP issuance must be the same as the proposed Spatial Utilization activity document submitted by the Business Actor in the OSS System.

The PTP contains information regarding the inventory of land ownership, control, use, and utilization (IP4T), valid Location Permits, and previously issued PTPs. The required PTP data includes:

- PTP results documents for the purpose of issuing PKKPR; and
- PTP result *shapefile* document obtained from the Gistaru-KKPR portal.

Checks are carried out on the activity plans requested against the PTP results in the context of issuing PKKPR, carried out with the following provisions:

- pay attention to the PTP results in the following sections:
 - consideration of the suitability of the proposed activity plan for all or part of the land to be used is reviewed based on

aspects of control, ownership, use and utilization of land and land capacity;

- 2) terms and conditions in control, ownership, use, and land use for all or part of the land requested;
- 3) indications of the existence of disputes, conflicts and/or land cases in all or part of the land to be used;
- 4) the land's ability to support planned activities;
- 5) recognition of land rights and other civil rights of the community; and/or
- 6) other information deemed necessary.

b. in the event that there is a difference in area and coordinate points between the applications PKKPR through the OSS System with PTP results for Business Actors who do not upload proof of land ownership, the following provisions apply:

- 1) In the event that there is an overlapping area and coordinate points between the PKKPR application and the PTP results, the non-overlapping area will be a reducing factor for the approved area of the planned activity location.

An example of the delineation of the PKKPR application and PTP results which have different areas and coordinate points can be seen in Figure 2.10.

Figure 2.10. Example of KKPR Application Delineation and PTP Results that Have Differences in Area and Coordinate Points

- 2) If the area and coordinate points between the application area and the PTP results do not overlap, then the entire area of the planned activity location cannot be approved and a PKKPR will be issued stating that it is rejected, accompanied by reasons.

c. in the event that there is a difference in area and coordinate points between the applications PKKPR through the OSS System with PTP results for business actors who upload proof of land ownership, the following provisions apply:

- 1) In the event that there is an area and coordinate points that overlap between the PKKPR application and the PTP results, then the area that can be approved is the overlapping area and the PTP results area outside the PKKPR application.

as long as it is still covered by land ownership. The approved area must have a total area not exceeding the area of the PKKPR application in the OSS System , accompanied by the Minutes of the coordination meeting. If the total area exceeds the area of the PKKPR application in the OSS System , an underpayment SPS must be issued in accordance with the provisions in the Issuance of the PKKPR PNPB Underpayment Payment Order.

An example of a PKKPR application polygon and PTP results that overlap in terms of land ownership coverage can be seen in Figure 2.11.

Figure 2.11. Example of KKPR Application Polygons and PTP Results that Intersect and are Within the Scope of Land Control

- 2) In the case where the area and coordinate points between the PKKPR application and the PTP results do not overlap, then the entire area requested for the PKKPR will be replaced by the PTP results area as long as it is still covered by land ownership. The total area approved must not exceed the area of the PKKPR application in the OSS System, accompanied by the Minutes of the coordination meeting. If the resulting PTP area is larger than the application area

PKKPR on the OSS System, it is necessary to issue an underpayment SPS in accordance with the provisions in the Issuance of the PKKPR PNPB Underpayment Deposit Order.

An example of a PKKPR application polygon and PTP results that do not overlap in terms of land ownership coverage can be seen in Figure 2.12.

Figure 2.12. Example of PKKPR Application Polygons and PTP Results that Do Not Intersect in Land Control Scope

- 3) Regarding the area approved as stipulated in points 1) and 2), an assessment of the RTR and an assessment of land and sector aspects are carried out.
- d. In the event that the PTP results indicate a discrepancy based on aspects of control, ownership, use and utilization of land and land capability, the PTP results are used as consideration material.
PKKPR issuance;
- e. In the event that the PTP results indicate a discrepancy based on the Spatial Planning Plan, the PTP results will not be used as a consideration for issuing a PKKPR;

- f. If the KKPR officer finds an error in uploading the PTP results document on the GISTARU-KKPR portal, the KKPR officer will inform land office to write to the Director in charge implementation of KKPR regarding the submission of appropriate PTP result documents;
- g. in the event that the Business Actor cannot be contacted, provided that there is evidence of business for communication between the land office and the Business Actor; the SPS is issued at a land office that does not serve the application location; the location of the activity requested is in a different district/city from the location of the SHP *upload*; and/or the Business Actor requests the closure of the PTP file, then the PTP file closure mechanism can be carried out by the land office;
- h. In the event that the land office carries out a mechanism to close PTP files, the land office needs to send a letter to the Secretary of the Directorate General of Spatial Planning. with a copy to the Director in charge of KKPR and the Director in charge of land use, notifying that the PTP file application is closed and attaching proof of file closure. Next, the Data and Information Working Group will upload the letter to the GISTARU KKPR portal so that the file *upload* will appear on *the dashboard* . The format for the PTP file closure mechanism letter is listed in Attachment III; and/or
- i. In the event that the PTP file has been closed, the KKPR assessment process will continue and a statement will be issued stating "PKKPR rejected with reasons for closing the PTP file."

2.2.3.2. Analysis of Sector Policies

a. Overlay of the Requested Activity Plan with Sector Policy

1) Forestry Sector Policy

- a) for planned activities in forest areas, the planned activities in question must be removed from the application location;
- b) for activity plans whose location is in a forest area that has undergone a change in designation and function based on the Decree on Releasing Forest Areas and/or Decree on Confirmation of Forest Areas but which has not yet been included in the RTR, a KKPR can be issued with the following provisions:
 - (1) In the case of the Decree on the Release of Forest Areas and/or the Decree on the Confirmation of Forest Areas already stating the activity designation, a PKKPR can be issued for the requested activity with the activity designation in accordance with the Decree on the Release of Forest Areas and acknowledged by the Spatial Planning Forum; or
 - (2) In the event that the Decree on the Release of Forest Areas and/or the Decree on the Confirmation of Forest Areas does not state the designated activity, a PKKPR may be issued for the activity requested and approved by the Spatial Planning Forum by taking into account the surrounding spatial patterns.
- c) regarding activity plans whose location is at the Map location Indicative of Termination of Granting of New Permits (PIPPIB), then the plan

the activities in question follow the provisions as stipulated in the regulations regarding PIPPIB.

- 2) Mining Sector Policy Production Operation Mining Business Permit (IUP-OP) through Minerba *One Map* Indonesia (MOMI), with the provision that in the case of the location of the approved KKPR application overlapping with the IUP-OP, then in the Requirements for Implementation of Spatial Utilization Activities, the obligation to cooperate/lease/borrow with the IUP-OP owner is included.
- 3) Other sectoral regulations and permits that have been issued according to the PKKPR assessment requirements.

b. Review of activity plans against sector policies that regulate underground and above ground space

In the event that the OSS System can already serve PKKPR applications for underground and/or above-ground space, but the RTR has not yet regulated the provisions for underground and/or above-ground Space Utilization plans, it is necessary to review sector policies and other technical policies that can be accounted for.

2.2.3.3. Coordination Meeting and/or Field Inspection

Coordination meetings and/or field reviews can be held at this stage assessment of proposed documents for spatial utilization activities in terms of:

- a. there are differences in the administrative boundaries of the area in the spatial planning for applications located in border areas. The administrative boundaries of the area used as a reference are in accordance with the spatial planning;
- b. there is a discrepancy in the data between the proposed Utilization activity documents Space for PTP results.;
- c. in the case of the location requested, the provisions on the intensity of Spatial Utilization and building layout provisions are not included in the district/city RTRW, the RDTR is not yet available, the RDTR has not been compiled and there are no regulations or policies governing building construction;
- d. proposed Spatial Utilization activities are in forest areas that have undergone changes in designation and function but are not yet included in the RTR;
- e. the proposed Spatial Utilization activity is located or intersects with sectoral policies and/or permits that are still valid (location permit, Spatial Utilization permit, etc.);
- f. proposed spatial utilization activities that have the potential to cause social vulnerability, security disturbances, environmental damage, and/or disruption to the function of national vital objects; and/or
- g. other conditions that require a coordination meeting and/or review field.

2.2.4. Preparation of the Results of the Assessment of Approval of Conformity of Spatial Utilization Activities

The PKKPR study is prepared in presentation format and stored in the extension .ppt or .pdf. The format of the PKKPR study framework is listed in Appendix IV, which is an integral part of these Technical Instructions.

The preparation of the PKKPR assessment results is a summary of the assessment of the RTR as well as the assessment of land and sector aspects, set out in the format of an official memo from the Director who handles the implementation of the PKKPR addressed to the Director General of Spatial Planning regarding the Application.

Signing

The issuance of PKKPR with the attachment of the PKKPR document concept and PKKPR study. The format of the official note requesting the signing of the PKKPR study concept under the authority of the Central Government is listed in Appendix V which is an integral part of these Technical Instructions.

2.2.5. Determination of the Validity Period and Purpose of the Approval of Conformity of Spatial Utilization Activities

PKKPR as one of the basic requirements for licensing in the context of utilization of space and used for land acquisition purposes. The validity period of the PKKPR is determined based on the availability of evidence of land ownership.

For Business Actors who already control/own the entire land for the planned activity location, the validity period of the PKKPR follows the period of land control/ownership. Meanwhile, for Business Actors who do not yet control/own the entire land for the planned activity location, the validity period of the PKKPR is 3 (three) years.

The provisions for the objectives of PKKPR with overlapping PKKPR conditions are listed in table 2.2 below.

Table 2. 2. Provisions for the Purpose of PKKPR with the Condition of KKPR Overlaying on the Ground Surface

No	Parties Involved			KKPR		Information
	The party that Mastering the Land*	Businessmen	Other Business Actors KKPR in	land acquisition framework	KKPR in the context of Utilization Room	
	A	B	C

4	Do not have KKPR	B has a KKPR in the context of Utilization of Space	C begged KKPR	KKPR Application C can be issued	-	KKPR C applications can be issued through the following mechanisms: KKPR without assessment in accordance with the provisions of the Regulation Legislation

Information:

* The party that controls/owns the land is an individual/business entity that has proof of ownership documents.
land

In the event that there are several PKKPR applications with different KBLIs at the same time and the application location is the same, a PKKPR can be issued for the purpose of utilizing space or acquiring land for each KBLI with the provision that the Business Actor is the same person.

An example of a PKKPR application with several KBLIs can be seen in Figure 2.13 below.

Figure 2.13. Example of PKKPR Application with Several KBLI

PKKPR objective provisions for underground and above ground space:

1. The purpose of PKKPR for underground or above ground space is not differentiated into PKKPR for the purpose of land acquisition or PKKPR for the purpose of Space Utilization;
2. PKKPR for underground or above ground space cannot be issued at a location where a KKPR has been issued;
3. PKKPR for underground space can be issued under the KKPR which rising at ground level; And
4. PKKPR for space above the land can be issued on top of the KKPR issued on the ground surface.

Figure 2.14. Illustration of Space Utilization Activities Above Ground, Ground Surface, and Underground

2.2.6. Preparation of Maps for Issuance of Approval of Conformity of Spatial Utilization Activities

2.2.6.1. Provisions for Maps Issuance Approval of Conformity of Spatial Utilization Activities

The PKKPR publishing concept presents a map consisting of:

- a. Delineation Map which provides information related to the outermost delineation of the application which is displayed with the Spatial Plan referred to in the assessment; and
- b. PKKPR Map which produces the results of the interpretation of Spatial Utilization of zone/sub-zone plan at the approved application location.

If the PKKPR application is rejected, only the delineation map will be included in the PKKPR publication.

2.2.6.2. Contents of the Activity Conformity Approval Issuance Map Utilization of Space

The preparation of the PKKPR Publication Map is carried out using mapping software. The contents of the PKKPR published map consist of two parts: the map face and the map margin information. The map face is the part of the map that depicts the area to be mapped. The map margin information is the part that contains captions/information related to the map content.

a. Delineation Map Contents

1) Map front load:

- a) Delineation of the application;
- b) If the PKKPR is approved, the RTR map symbol will be in the form of a spatial pattern plan and/or spatial structure plan;

- c) Data elements consist of administrative area boundaries and toponymy.
(name of waters and name of region); and
 - d) Coordinates.
- 2) Map edge information load:
- a) Wind direction;
 - b) Scale;
 - c) Projection description;
 - d) Description
Provides information about the symbols on the map face.
- (1) Delineation of the application;
 - (2) Administrative area boundaries;
 - (3) RTR; and
- e) Data sources.

In addition to the delineation map, there is a map location description that provides information on the application area on a smaller scale, including:

- a) Symbolization of administrative areas;
- b) Coordinates;
- c) Delineation of the application and a box indicating the location application; and
- d) Data elements consist of administrative area boundaries and toponymy.
(name of waters and name of administrative area).

b. PKKPR Map Contents

- 1) Map front load:
- a) Symbolization of administrative areas;
 - b) Data elements consist of administrative area boundaries and toponymy.
(name of waters and name of region);
 - c) Activity plans translated into RDTR zone/sub-zone scales with RDTR zone/sub-zone scale provisions; and
 - d) Coordinates.
- 2) Map edge information load:
- a) Wind direction;
 - b) Scale;
 - c) Projection description; and
 - d) Description
Explaining the activity plan that has been translated into zone/sub-zone scale.

Example: the activity plan "Road" is translated into "Sub-Zone"
Road Agency (BJ)", the activity plan for "power generation and electricity transmission" is translated into "Power Generation Sub-Zone"
Electric Power (PTL), and so on

Provisions regarding the preparation of PKKPR Publication Maps refer to statutory regulations regarding the preparation of databases and presentation of spatial planning maps.

The Map Presentation Format is listed in Appendix VI which is part of inseparable from these Technical Instructions.

2.2.7. Preparation and Finalization of the Concept for Approval of Suitability of Spatial Utilization Activities

If the assessment process has been carried out, the PKKPR Concept is prepared. which contains the results of the assessment and the decision to approve/partially approve/ reject, along with the reasons for the rejection and is accompanied by a PKKPR Map. The PKKPR concept is initialed by the Director in charge of KKPR implementation and his/her staff. The PKKPR concept is then submitted to the Director General of Spatial Planning to be signed on behalf of the Minister of ATR/Head of BPN.

Provisions that need to be considered in preparing the PKKPR concept:

- a. If the Business Actor has acquired all the land for his business activities, then the PKKPR received is **the PKKPR in the context of Utilization of Space** by including Other Provisions as follows.
 - 1) This PKKPR is given with considerations as stated in attachment;
 - 2) This PKKPR is a document stating the conformity between the Spatial Utilization activity plan and the RTR in addition to the RDTR and as a basis for processing Business Permits in accordance with the provisions of laws and regulations;
 - 3) In the event that the PKKPR Business Actor has obtained land for its activities, the validity period of the PKKPR follows the period of control over the land that has been obtained by the Business Actor and is in accordance with the area of land that has been obtained and agreed upon in the PKKPR;
 - 4) PKKPR holders can only carry out activities according to the location specified. approved;
 - 5) PKKPR is the basis for processing further permits at the authorized agency; and
 - 6) PKKPR holders are obliged to comply with the laws and regulations that applies.
- b. If the Business Actor has not yet obtained the land requested in part/in full for his business activities, then the PKKPR received is **the PKKPR for the purpose of land acquisition**, containing the following other provisions:
 - 1) This PKKPR is given with considerations as stated in attachment;
 - 2) This PKKPR is a document stating the conformity between the Spatial Utilization activity plan and the RTR in addition to the RDTR and as a basis for processing Business Permits in accordance with the provisions of laws and regulations;
 - 3) This PKKPR is valid for 3 (three) years from the date of issuance and can be extended in accordance with applicable laws and regulations;
 - 4) If the business actor is unable to obtain all the land in accordance with the PKKPR issued, they can submit a request.

application for extension of PKKPR for business activities or cooperation with land banks;

- 5) If an update has been made, the validity period of the PKKPR follows the time period and land area according to the control over the land that has been obtained;
- 6) PKKPR holders can only carry out activities according to the location specified.
approved;
- 7) PKKPR is the basis for acquiring land required for business and/or activities, and also serves as a permit for transferring land rights and for managing subsequent permits at the authorized agency;
- 8) PKKPR holders are required to report periodically every 3 (three) months to the head of the land office regarding land acquisitions that have been carried out based on the KKPR; and
- 9) PKKPR holders are obliged to comply with the laws and regulations that applies.

c. If a Business Actor requests a KKPR for his business activities located in the basement and/or above ground, then the PKKPR received contains the following Other Provisions:

- 1) This PKKPR is given with considerations as stated in attachment;
- 2) This PKKPR is a document stating the conformity between the Spatial Utilization activity plan and the RTR in addition to the RDTR and as a basis for processing Business Permits in accordance with the provisions of laws and regulations;
- 3) In the event that the PKKPR Business Actor has obtained land for its activities, the validity period of the PKKPR follows the period of control over the land that has been obtained by the Business Actor and is in accordance with the area of land that has been obtained and agreed upon in the PKKPR;
- 4) PKKPR holders can only carry out activities according to the location specified.
approved;
- 5) PKKPR is the basis for acquiring land required for activities, and also serves as a permit for transferring land rights, as well as for managing subsequent permits at the authorized agency; and
- 6) PKKPR holders are obliged to comply with the laws and regulations that applies.

PKKPR concept format for business activities for government authority

The center is listed in Appendix VII and the format of the PKKPR map attachment is listed in Appendix VIII which is an integral part of these Technical Instructions.

2.2.8. Issuance of a Payment Order for Underpayment of Non-Tax State Revenue Approval of Conformity of Space Utilization Activities

Reasons for issuing a Payment Order (SPS) for underpayment of PNB
PKKPR, among others:

- a. If the uploaded proof of land ownership does not cover the entire area of the location requested, the issuance of the PKKPR will be suspended until the Business Actor pays the underpayment of PNPB; and/or
- b. There is a difference in the area of the PKKPR application through the OSS System with the PTP results, where the area of the PTP results is wider than the area of the PKKPR application in the OSS System but is still included in land ownership.

Based on the above, the issuance of PKKPR is suspended until the Business Actor pays the PKKPR PNPB underpayment. To process the payment of the PKKPR PNPB underpayment, the following provisions apply:

- a. in the case where the GISTARU-KKPR portal does not yet have the SPS issuance feature pay PNPB PKKPR.
 - 1) The Director in charge of the implementation of the KKPR writes a letter to the Secretary of the Directorate General of Spatial Planning with a copy to the minister in charge of government affairs in the investment sector and the director in charge of land use notifying the indication of underpayment of PNPB PKKPR. Next, the head of the data and information working group will process the *billing* code request for payment of underpayment of PNPB PKKPR. The format of the notification letter of indication of underpayment of PNPB PKKPR implementation from the Director in charge of the implementation of the KKPR to the Business Actor is listed in Appendix IX; and 2) The Director in charge of the implementation of the KKPR writes a letter to the Business Actor regarding notification of underpayment of PNPB attached with an SPS containing details of underpayment of KKPR issuance services. Next, the Business Actor makes payment a maximum of 7 (seven) days after the new *billing* code is received by the Business Actor. The format of the notification letter of underpayment of PNPB PKKPR implementation from the Director in charge of the implementation of the KKPR to the Business Actor is listed in Appendix X.
- b. in the case where the GISTARU-KKPR portal already has an SPS issuance feature, it is less pay PNPB PKKPR.
 - 1) KKPR officers select the underpayment SPS issuance feature that has been available in the GISTARU-KKPR portal;
 - 2) Business actors receive a SPS for underpayment of PNPB PKKPR; and
 - 3) Business actors make payments a maximum of 7 (seven) days after the code *billing* that has just been received by the Business Actor.

2.3. Publishing Stage

The issuance of PKKPR is carried out by the Minister through the Director General of Administrative and Bureaucratic Reform. Space. This publication stage includes the provisions/format for filling in the PKKPR assessment results *field* on the GISTARU-KKPR portal. Before filling in *the field* PKKPR assessment results on the GISTARU-KKPR portal, KKPR officers re-check the PKKPR information that has been published and availability RDTR that has been integrated with the OSS System at the activity location because it is possible that during the PKKPR assessment process there is an RDTR that has been integrated with the OSS System .

In the event that there is an RDTR that has been integrated with the OSS System at the planned activity location, then:

- a. In the event that all planned activity locations are within the RDTR delineation that has been integrated with the OSS System, the PKKPR assessment results cannot be published and the requested activity plan will be issued with the following message: "PKKPR rejected with reasons and needs to be re-applied through the KKKPR mechanism"; or
- b. In the event that some of the planned activity locations are within the RDTR delineation that has been integrated with the OSS System, the PKKPR assessment results that can be issued are only for the planned activity locations that are outside the RDTR delineation that has been integrated with the OSS System . For the requested activity plan, a "PKKPR partially approved" will be issued.

If the entire activity plan does not yet have an RDTR that has been integrated with the OSS System, then the process for the requested activity plan can be continued to the issuance of PKKPR.

Table 2.3. Provisions/Format for Filling in the PKKPR Assessment Results Field on the GISTARU-KKPR Portal

No	Field	Provision
1.	Geographic Coordinates	The SHP <i>file</i> contains the approved area delineation based on the results of the assessment stage. The SHP <i>file</i> is uploaded in *.zip format without folder.
2.	PTP Number	a. The PTP number will be listed when the PTP has been uploaded by the land office; or b. PTP numbers that are not listed can make a " <i>Pusdatin</i> Notification Request" on the "Pertek Results" tab and contact the relevant land office to upload the PTP.
3.	Number Regulation	a. filled in with reference to the RTR which is the basis for conformity; b. the system already has the text "Regulation _____ regarding RTR _____"; and c. filled in manually in the Name information column RTR (National/Island/Archipelago/Province/Regency/City then Number and Year of Regulation (PP/Perpres/Perda), example of filling in: "ABC Regency Number 1 of 2022".
4.	Land Area Which Approved	a. adjusted to the approved area according to the SHP uploaded in Number 1; and b. area units follow the proposal by the Business Actor (m2 or hectares).
5.	Types of Space Utilization Designation	filled with the requested activities located in the designated area according to the interpretation of Spatial Utilization of the zone/sub-zone plan at the approved application location.

No	Field	Provision
6.	KBLI code (5 digits)	filled in automatically by the system following the KBLI code submitted by the Business Actor.
7.	The KBLI title is filled in	in automatically by the system following the KBLI title submitted by the Business Actor.
8.	Maximum KDB	a. filled in with reference to the RTRW, SNI, BG Regional Regulation, Mayoral Regulation/Regent Regulation on building regulations, RTBL, Spatial Utilization Permit, or City Planning Information (KRK) that have been issued previously for similar business activities; b. not filled with a strip (-); and/or c. filled with numbers without units of calculation (percent (%), meters (m), etc.).
9.	Maximum Extraordinary Congress	in accordance with the provisions in Number 8.
10.	Indications of Space Utilization Program	a. filled with an indication of the main program of the related RTR; or b. If there is no indication of the main program, in the system click <i>"template"</i>, then select one.
11.	Requirements for Implementing KKPR	a. filled with the requirements that must be complied with before or when carrying out Space Utilization activities; in b. filled in with reference to the requirements KUZ/KUPZ/APZ/IAPZ in the RTR, and/or technical provisions in the RTB/RIK documents uploaded by business actors; c. filled in with proof of cooperation/rental/borrowing requirements with the IUP-OP owner if the PKKPR issued is in the IUP-OP area; and/or d. filled with technical provisions of the related sector and other technical requirements as needed.
12.	Additional Information In case available	includes minimum GSB, minimum JBB, minimum KDH, maximum KTB, and/or City Utility Network, with the provisions in accordance with Number 8.
13.	Attachment Files Map	a. Map attachments include: 1) Consideration of PKKPR approval; 2) Delineation Map containing the outermost delineation of the PKKPR application using the RTR referred to in the assessment as the basis for the map (<i>basemap</i>); and 3) APZ/KUPZ content; 4) PKKPR map containing the results of the interpretation of Spatial Utilization; 5) Provisions on the intensity of space utilization; and b. The <i>file</i> format follows the OSS System format, including: 1) A4 paper size; 2) Top/bottom margin 2.5 cm;

No	Field	Provision
		3) Left/right margin 1.5 cm; 4) <i>Font</i> type 'Times New Roman'; 5) Title <i>font</i> size 12 pt; 6) The <i>font</i> size is 12 pt; 7) Footer <i>font</i> size 7.5 pt; and 8) <i>The layout</i> is in 'Portrait' form. c. The map attachment contains an <i>overlay</i> map which is the basis for the conformity and the agreed coordinates; and d. The <i>file</i> format is *.pdf and the document size is not more than 25 (twenty five) MB.
14.	Map Description	a. load the status of polygon changes; or b. can be filled in with the available <i>template</i> or filled in with other information.
15.	KKPR Approval Attachment File	a. in the form of a KKPR Approval document that has been signed by the Minister of ATR/Head of BPN through Director General of Spatial Planning; and b. The <i>file</i> format is *.pdf and the document size is not more than 25 (twenty five) MB.
16.	Status	a. contains the decision to approve or reject; b. if the application is approved in its entirety, then the selected is the decision approved; c. If the application is partially approved, then the one selected is the decision approved; and/or d. If the application is rejected, then the choice is decision rejected.
17.	Reason for Rejection	Fill in the reasons that cause the application to be rejected (if in Number 16 (sixteen) the decision chosen is the decision to be rejected).

After the process of filling in numbers 1 (one) to 17 (seventeen) is complete and the PTP results have been received by the GISTARU-KKPR portal, then the process is saved and it is necessary to re-ensure that all files that have been uploaded can be downloaded. Before filling in the PKKPR assessment results *field* is sent to the OSS System, a *preview* can be done first. KKPR officers need to check the availability of RDTR integrated with the OSS System at the application location, because it is possible that during the KKPR assessment process there is an RDTR integrated with the OSS System. In the case of an RDTR integrated with the OSS System, then:

- a. in the event that all planned activity locations are within the RDTR delineation integrated with the OSS System, the PKKPR Assessment results cannot be published and the requested activity plan will be issued with the following statement: "PKKPR rejected with the reason that an application needs to be made through the KKKPR mechanism"; or
- b. In the case where some of the planned activity locations are within the RDTR delineation which is integrated with the OSS System, adjustments are required to the results.

PKKPR Assessment. PKKPR can only be issued for planned activity locations that are outside the RDTR delineation integrated with the OSS System .

For the requested activity plan, a statement will be issued saying "PKKPR partially approved".

The issuance of PKKPR will be carried out no later than 20 (twenty) days after the application requirements have been received in full and payment of the PNB service fee has been received by the GISTARU-KKPR portal.

CHAPTER III

APPROVAL OF SUITABILITY OF SPACE UTILIZATION ACTIVITIES FOR BUSINESS ACTIVITIES BY LOCAL GOVERNMENT

The implementation of KKPR, which is the authority of the regional government, is carried out based on the following provisions:

- proposals for spatial utilization activities within 1 (one) district/city administrative area are submitted to the regent/mayor or appointed official;
- proposals for spatial utilization activities in the Special Capital Region (DKI) of Jakarta and across district/city administrative areas in 1 (one) province are submitted to the governor or appointed official;
- Domestic Investment (PMDN); and/or
- business risks based on the latest KBLI provisions.

PKKPR for business activities is granted in the event that in the planned location of the Spatial Utilization activity: a. an RDTR is not yet available; or
b. the available RDTR is not yet integrated in the OSS System.

The PKKPR process is carried out through registration, assessment, and issuance stages. The process for implementing the KKPR Business Approval by the local government can be seen in Figure 3.1 below.

Figure 3.1. Process of Implementing PKKPR Business by Regional Government

3.1. Registration Stage

The registration stage consists of provisions on the quality of documents for proposed spatial utilization activities, validation of documents for proposed spatial utilization activities, and payment of PNPB service fees.

3.1.1. Quality Requirements for Proposed Space Utilization Activity Documents

Business actors register through the OSS System and upload documents for proposed Space Utilization activities with the following document quality requirements:

a. Location Coordinates

The location coordinates are in the form of a polygon *shapefile* (SHP) which provides information on the area and shape of the land or the plot identification number for land that has been certified, with the following provisions:

- 1) coordinate points of longitude (x) and latitude (y), using the WGS 84 coordinate system, for area calculations using the *Web Mercator projection (auxiliary sphere)*;
- 2) If the OSS System can serve KKPR for underground spaces, the location coordinates consist of longitude (x) and latitude coordinate points.
(y), using the WGS 84 coordinate system, for area calculations using the *Web Mercator projection (auxiliary sphere)* as well as the minimum and maximum depths of space required underground in meters calculated from the highest point on the ground surface.

An example of depth of field can be seen in Figure 3.2;

- 3) If the OSS System can already serve KKPR for space above ground, the location coordinates consist of longitude (x) and latitude coordinate points.
(y), using the WGS 84 coordinate system, for area calculations using the *Web Mercator projection (auxiliary sphere)* as well as the minimum and maximum heights of the space required above ground in meters calculated from the lowest ground surface point. An example of the height of the space can be seen in Figure 3.2.;

Figure 3.2. Illustration of Minimum Depth/Height and Maximum Depth/Height for KKPR Applications Underground/Above Ground

- 4) The coordinates submitted correspond to the location of the proposed activity.
Utilization of the requested space;
- 5) located in one area that is not separated by geographical features (such as roads or rivers) or located in several areas that are connected and integrated in 1 (one) polygon in accordance with the System
OSS;
- 6) located in one district/city administrative area;
- 7) Polygon data can be added with *point* or *polyline* data as needed.
activity plan;
- 8) there must be no unclaimed areas within a polygon
application;
- 9) there must be no areas within the proposed activity location that are not included in the
application;
- 10) The location coordinate data format consists of a minimum of 4 (four) extensions in the form of *.shp, *.shx, *.dbf, and *.prj., which are loaded in *.zip format with a document size of no more than 25 (twenty five) MB (*mega bytes*); and
- 11) Information related to location coordinates, SHP descriptions, information on KKPR that has been issued, the existence of Industrial Areas (KI) or Special Economic Zones (KEK), and the availability of RDTR can be checked via the Interactive GISTARU-RDTR portal.

b. Land Area Requirements for Space Utilization Activities

The land area requirements for Spatial Utilization activities are in the form of information on the requested land area in m² (square meters) or ha (hectares).

c. Land Ownership Information

Land ownership information is information about the legal relationship between individuals, groups of people or legal entities and land, with the following provisions:

- 1) If the Business Actor does not yet control/own the land, the Business Actor does not need to upload documents providing information on land control/ownership;
- 2) In the event that the Business Actor already controls/owns the land, then the Business Actor Businesses need to attach proof of land ownership/control documents in the form of:
 - a) certificate or other valid proof of ownership for Business Actors as
the party who owns the land;
 - b) deed made by the Land Deed Official;
 - c) proof of a valid land lease or loan agreement in accordance with statutory provisions
between the parties.
Business with parties who own or control land; or
 - d) letter of acknowledgement/release/transfer of rights or similar letter
valid according to the provisions of laws and regulations. -
- 3) Attach other supporting documents as needed for the activity plan;
- 4) land ownership information documents and their attachments can be read clearly and
uploaded completely in one document; and
- 5) The format for land ownership information and its attachments is in the form of *.pdf and
document size is not more than 25 (twenty five) MB.

d. Business Type Information

Information on the type of business in the form of KBLI that will be implemented by the Business Actor, with the following provisions:

- 1) information on the type of business requested in accordance with statutory regulations;
- 2) using 5 (five) digit KBLI; and
- 3) KBLI must be in accordance with the activity information in the technical building plan and/or master plan for the area submitted.

e. Existing Building Information

Existing building information includes information on the current existence of buildings at the requested business location, with the following provisions:

- 1) If there is an existing building at the requested business location, the Business Actor must fill in 'Yes' in the existing building information column;
- 2) If there is no building at the requested business location, the Business Actor must fill in 'No' in the existing building information column; and/or
- 3) Existing building information must be filled in according to the factual conditions there. field.

f. New Building Plan Information

New building plan information in the form of information on building plans to be constructed by the Business Actor at the requested location, with the following provisions:

- 1) In the event that the Business Actor requires a new building, then the Business Actor Attempt to fill in 'Yes' in the new building plan information column;
- 2) In the event that the Business Actor does not require a new building, then the Business Actor Attempt to fill in 'No' in the new building plan information column; and/or
- 3) New building plan information must be in accordance with the plan Utilization of the requested space.

g. Number of Planned Buildings

The number of planned buildings is information on the number of buildings to be built by the Business Actor at the requested location, with the following provisions:

- 1) only filled in if the Business Actor fills in 'Yes' in letter f; and/or
- 2) The planned building information column is filled in with a number format. according to the number of planned buildings.

h. Planned Number of Building Floors

The planned number of building floors is information on the number of floors of the highest building to be built by the Business Actor at the requested business location, with the following provisions:

- 1) only filled in if the Business Actor fills in 'Yes' in letter f; and/or
- 2) The Building Floor Plan Information column is filled in with a number format according to the number of floors of the highest planned building.

i. Building Floor Plan

The building floor area plan is information on the total floor area of the building to be built by the Business Actor at the requested business location, with the following provisions:

- 1) only filled in if the Business Actor fills in 'Yes' in letter f; and/or
- 2) The Building Floor Area Plan Information column is filled in according to the planned building floor area, filled in with a numerical format in m² (square meters).

j. Technical Building Plan and/or Master Plan for the Area

- 1) The provisions regarding technical building plans and/or master plans for areas are as follows:
 - a) The technical building plan must at least include a plan drawing of the existing building or buildings at the application location. The technical building plan may include the actual shape of the plot, the building's appearance and a section of the building that shows the number of floors and the height of the building; and/or
 - b) The master plan for the area contains a description and drawings of *the master plan* or *block plan* which show the details of the plans carried out for the application location.
- 2) The master plan for the area must be uploaded by Business Actors and can be equipped with technical building plans;
- 3) The technical building plan map and/or master plan for the area must contain at least:
 - a) map face;
 - b) name of activity/Business Actor;
 - c) wind direction and scale;
 - d) legend/caption; e) map inset (if needed);
 - f) location orientation information; and
 - g) data storage link containing location coordinate data in the form of outermost delineation SHP and other required information in *.zip format with a document size of no more than 25 (twenty five) MB.
- 4) the technical plan for the building and/or the master plan for the area can be read clearly clear and completely uploaded in one document;
- 5) the format of the technical building plan document and/or master plan for the area is *.pdf and the document size is no more than 25 (twenty five) MB; and
- 6) can be equipped with a document on the plan for using raw water/clean water required in the spatial utilization activities that have an impact/influence on the availability and quality of raw water/clean water, which includes, among other things, plans for raw water/clean water needs, plans for the availability of raw water/clean water and analysis related to the impact of spatial utilization activities on the availability of raw water/clean water.

Example of technical building plan format and/or area master plan listed in Attachment I which is an integral part of these Technical Instructions.

The material accuracy of the proposed space utilization documents uploaded to the OSS System is the responsibility of the Business Actor.

3.1.2. Validation of Proposed Space Utilization Activity Documents

Validation includes checking the completeness and quality of documents.
proposed Space Utilization activities.

a. Validation of Completeness of Documents for Proposed Space Utilization Activities

The validation process for the completeness of proposed Spatial Utilization activity documents is carried out by checking the availability of data and information in the proposed Spatial Utilization activity documents. Validation of the completeness of proposed Spatial Utilization activity documents is carried out through the GISTARU-KKPR portal.

The provisions for validating the completeness of the proposed documents for Space Utilization activities are as follows:

- 1) Data is considered complete if the data column in the GISTARU-KKPR portal contains the word '*download*' or contains information related to the data.

The KKPR officer selects 'Yes' in the complete status column; and

- 2) data is considered incomplete in terms of the data column in the portal

GISTARU-KKPR does not display the '*download*' text or does not contain any information related to the data. The KKPR officer selects 'No' in the complete status column.

b. Validation of the Quality of Documents for Proposed Space Utilization Activities

KKPR officers download all the complete documents for proposed Space Utilization activities via the GISTARU-KKPR portal.

Provisions for validating the quality of documents for proposed spatial utilization activities as follows:

- 1) If the documents are deemed complete and of good quality, the KKPR officer will press the 'approved' button on the GISTARU-KKPR portal and the application will proceed to the PNB service fee payment stage; or

- 2) If the document is deemed incomplete and/or of poor quality, the KKPR Officer will submit notes on improvements to the proposed KKPR document to the Business Actor via the OSS System.

Examples of notes on improvements to proposed Spatial Utilization activity documents are listed in Attachment II, which is an integral part of these Technical Instructions.

Provisions for improving documents for proposed spatial utilization activities:

- a. the process of improving the proposed documents for Space Utilization activities is carried out a maximum of 1 (one) time by the Business Actor;
- b. Improvements to the proposed Spatial Utilization activity documents can be done independently or by conducting offline consultations through *the Spatial Planning Service* first;
- c. the process of improving the proposed documents for Space Utilization activities is carried out maximum 7 (seven) days;
- d. If the Business Actor does not send the revised documents for the proposed Spatial Utilization activity within 7 (seven) days, the KKPR application will be automatically rejected by the OSS System and the KKPR application cannot be processed further; and
- e. Business actors can re-apply for KKPR by re-registering through the OSS System.

3.1.3. Payment of Non-Tax State Revenue Service Fees

Payment of Non-Tax State Revenue (PNBP) service fees carried out in terms of the validation process for proposed documents for Space Utilization activities has been completed, with the following stages:

- a. Business actors receive a Deposit Order Letter (SPS).

The SPS contains details of the costs of Land Technical Considerations (PTP) services. and KKPR Issuance Services accompanied by a Payment Code from the *Online* PNBP Information System (SIMPONI) consisting of 15 (fifteen) digits.

- b. Business actors must pay the KKPR service fee according to the amount stated on the deposit order (SPS) that has been issued no later than 7 (seven) days after the SPS is received by the Business Actor.
- c. If the Business Actor has not made payment for more than 7 (seven) days, the Business Actor is given 7 (seven) days to request a *recreate of the billing* code a maximum of 1 (one) time which can be done via the Business Actor *dashboard* on the OSS System;
- d. Business actors make payments a maximum of 7 (seven) days after the new *billing* code is received by the Business Actor, with the following provisions: 1) after the Business Actor makes payment of the service fee or payment after *recreating* the billing code , the GISTARU-KKPR portal will receive a notification "Paid", so that the application continues to the assessment stage; or

2) If after *recreating* the *billing* code the Business Actor has not made payment, the application will be automatically rejected by the OSS System.

3.2. Assessment Stage

The assessment of proposed documents for spatial utilization activities is carried out through an assessment of the Spatial Plan as well as an assessment of land and sector aspects. Proposed documents for spatial utilization activities that are included in the assessment stage are data that has been validated completely and of high quality in accordance with the quality provisions for proposed documents for spatial utilization during the registration stage, and the PNBP service fee has been received by the GISTARU-KKPR Portal.

The stages of PKKPR assessment by the Central Government are depicted in Figure 3.3 below.

Figure 3. 3. Stages of Assessment of Approval of Suitability of Spatial Utilization Activities for Business Activities by Regional Governments

3.2.1. Preparation of Assessment Materials for Approval of Conformity of Spatial Utilization Activities

Documents required in preparing assessment materials include:

- Documents for proposed spatial utilization activities downloaded from the GISTARU-KKPR portal;
- RTR documents and *shapefiles* that can be displayed from the GISTARU-RTR portal
Online or other sources that can be accounted for;
- PTP result documents downloaded from the GISTARU-KKPR portal in the event that they have been available; and
- Other sector regulatory documents as needed for PKKPR assessment.

After the PKKPR assessment materials are prepared, a recheck is performed to ensure the availability of the RDTR integrated with the OSS system at the activity location. If an RDTR integrated with the OSS system is available at the planned activity location, then:

- In the event that all planned activity locations are within the RDTR delineation that has been integrated with the OSS System, then a PKKPR assessment is not required and the requested activity plan will be issued with a statement "PKKPR rejected" accompanied by the reasons and the need for a re-application through the KKKPR mechanism"; or
- In the event that some of the planned activity locations are within the RDTR delineation that has been integrated with the OSS System, the PKKPR assessment will only be carried out for the planned activity locations that are outside the RDTR delineation that has been integrated with the OSS System. For the proposed activity locations, a "PKKPR partially approved" will be issued.

After re-checking the availability of the RDTR which has been integrated with the OSS System at the activity location, the process then continues with an assessment of the RTR.

Figure 3.4. Illustration of Assessment of Spatial Planning and Assessment of Land and Sector Aspects

3.2.2. Assessment of Spatial Planning

Assessment of the RTR is carried out using a tiered and complementary principle by reviewing Spatial Utilization activities in stages and/or comprehensively starting from the district/city RTRW, provincial RTRW, KSN RTR, island/archipelago RTR, up to the RTRWN.

3.2.2.1. Study of Spatial Planning Content and Determination of Spatial Planning as the Basis for Issuing KKPR

The study of RTR content was carried out, among other things, by:

- check the availability of activity plans in the body;
 - overlay* activity plans with the Spatial Structure plan map;
 - overlay* activity plans with Spatial Pattern plan maps;
 - checking the availability of provisions on the intensity of spatial utilization;
 - pay attention to the arrangement of activity plans based on general zoning provisions/zoning directives/zoning directive indications in the Spatial Pattern requested;
- And
- check the availability of activity plans in the main program indications.

A comprehensive review of all RTR contents is conducted until the regulatory contents within the RTR are identified and can be used as a reference in issuing the KKPR. The review of RTR contents using hierarchical and complementary principles can be conducted based on the provisions in Figure 3.5 as follows.

Figure 3.5 . Study of RTR Content Using the Hierarchical and Complementary Principles

A review of the contents of the RTR which will be used as the basis for issuing the PKKPR is carried out to ensure that the proposed activity plan is regulated and permitted based on the RTR, with the following provisions:

- a. Assessment of proposed documents for Spatial Utilization activities against the RTR can be carried out through Stage 1 (assessment of the contents of the RTRW) and Stage 2 (assessment of the national RTR).
- b. Assessment in Stage 1 begins with an examination of the conformity of the activity plan with the RTRW which has a more recent determination time, with the following provisions:
 - 1) If the location of the planned activity is regulated in the RTRW which has a more recent determination time, then the following assessment provisions apply:
 - a) in the case where the entire location of the planned activity is permitted, then continued assessment of land and sector aspects;
 - b) if the location of the planned activity is partially permitted, then it will be continued assessment of other RTRW; or
 - c) if the location of the planned activity is not permitted, then the assessment of other RTRW will continue.
 - 2) If the location of the planned activity is not regulated in the RTRW which has a more recent determination time, then the assessment will continue with the other RTRW.
- 3) If the location of the planned activity is regulated in another RTRW, the following assessment provisions apply:
 - a) if the entire location of the planned activity is permitted, then the assessment of land and sector aspects will continue;
 - b) if the location of the planned activity is partially permitted, then a check will be carried out on the type of activity with the following provisions:
 - (1) If the activity plan is regulated in the national RTR, it will be continued. assessment of the national RTR; or
 - (2) If the activity plan is not regulated in the national RTR, then a comparison of the areas between A and B is carried out and the one with the larger area is selected, then an assessment is continued regarding land and sector aspects;
 - c) if the location of the planned activity is not permitted, then it will be carried out checking the type of activity with the following provisions:
 - (1) If the activity plan is regulated in the national RTR, it will be continued. assessment of the national RTR; or
 - (2) If the activity plan is not regulated in the national RTR, the PKKPR will be rejected with reasons and taking into account the results of the assessment of land aspects.
- 4) If the location of the planned activity is not regulated in another RTRW, then a check is carried out on the type of activity with the following provisions:
 - a) in the case of activity plans regulated in the national RTR, then continued assessment of the national RTR; or
 - b) In the event that the activity plan is not regulated in the national RTR, the PKKPR will be rejected along with reasons and taking into account the results of the assessment of land aspects.

- c. Stage 2 assessment begins with an examination of the suitability of the proposed activity plan with the national RTR which has a more recent determination time.
- 1) If the location of the planned activity is regulated in the national RTR which has a more recent determination time, then the following assessment provisions apply:
 - a) if the entire location of the planned activity is permitted, then the assessment of land and sector aspects will continue;
 - b) if the location of the planned activity is partially permitted, then the assessment of other national RTRs will continue; or
 - c) if the location of the planned activity is not permitted, then it will be continued assessment of other national RTRs.
 - 2) If the location of the planned activity is not regulated based on the national RTR which has a more recent determination time, then the assessment will continue with respect to other national RTRs.
 - 3) if the location of the planned activity is regulated in another national RTR, then The following assessment conditions apply:
 - a) if the entire location of the planned activity is permitted, then the assessment of land and sector aspects will continue;
 - b) in the case where the location of the planned activity is partially permitted, then D is comparison of the area between ABC and a target area, then carried out and suitability is selected continued with an assessment of land and sector aspects; or
 - c) If the location of the planned activity is not permitted, the PKKPR will be rejected along with the reasons and taking into account the results of the assessment of the land aspects.
 - 4) If the location of the planned activity is not regulated, the PKKPR will be rejected along with reasons and taking into account the results of the assessment of land aspects.

3.2.2.2. Provisions for the PKKPR Assessment Process Based on the Hierarchical and Complementary Principles

The provisions for the document assessment process use hierarchical and complementary principles, including:

- a. in the case of RTRWN and/or RTR of islands/archipelagos being taken into consideration
In the assessment, the following provisions must be taken into account:
 - 1) The contents of the RTRWN and RTR of islands/archipelagos that can be referred to include all provisions of the main body and contents of the attachments except for the spatial structure plan map because the scale of detail is too small;
 - 2) Overlays on the RTRWN spatial plan map and/or RTR of islands/archipelagos are carried out only if the proposed activity is located in a forest area that has undergone a change in designation and function and a Decree on Release of Forest Areas and/or Decree on Confirmation of Released Forest Areas has been issued, but is not yet included in the RDTR;
 - 3) The RTRWN and RTR of islands/archipelagos cannot be used as an indication of specific activity locations; and/or
 - 4) If necessary, checks can be carried out on existing conditions in the field.

b. the activity plan is stated to have been included and permitted in accordance with spatial planning in terms of:

- 1) listed in the spatial structure plan, spatial pattern plan, and/or main program indication;
- 2) in accordance with the directions for Spatial Utilization; and 3) in accordance with general zoning provisions/zoning directions/direction indications zoning.

The requested activity is declared to be included in the RTR if it is regulated in at least one of the contents of the RTR.

An example of an activity plan regulated in the main body can be seen in Figure 3.6. An example of an activity plan regulated only in general zoning provisions/zoning directives/zoning directive indications can be seen in Figure 3.7 below.

Figure 3.6. Example of an Activity Plan Arranged in the Body

Figure 3.7. Example of an Activity Plan that is Only Regulated in General Zoning Provisions/Zoning Directives/
Zoning Directive Indications

- Other provisions that need to be taken into account in the study of the contents of the RTR, namely that water bodies and roads are not always reducing factors in the PKKPR assessment, so it is necessary to check the general zoning provisions regarding whether or not the requested activity is permitted.
- In the case where the provisions on the intensity of spatial utilization and building layout provisions are not included in the RTR, these contents can be formulated using the provisions in Figure 3.8.

Figure 3.8. Determination of Reference Provisions for Intensity of Spatial Utilization

- e. In the case of the proposed activity plan being underground or above ground, it is necessary to pay attention to the directions for underground or above ground space in the RTR.

Examples of directions for underground or above ground spaces in RTR can be seen in Figure 3.9. following.

Selain ketentuan umum zonasi Pola Ruang sebagaimana dimaksud dalam Pasal 66 sampai Pasal 81, pemanfaatan ruang di [REDACTED] juga dilakukan dengan memperhatikan arahan sebagai berikut:

- pemanfaatan ruang dalam bumi untuk bangunan gedung dibatasi maksimal dua lantai dan bila lebih dilengkapi dengan kajian sepanjang memungkinkan untuk itu dan tidak bertentangan dengan ketentuan Perundang-undangan;
- pemanfaatan ruang dalam bumi untuk infrastruktur Kota dan Wilayah sesuai ketentuan Peraturan Perundang-undangan dan kearifan lokal.

Figure 3.9. Example of Directions for Underground or Above Ground Space in a Spatial Plan

- f. to formulate the Requirements for Implementing Space Utilization Activities, this is done by taking into account the arrangement of activity plans based on:
- 1) general provisions of zoning/zoning directives/indications of zoning directives in the pattern the requested space;
 - 2) technical provisions in the RTB/RIK documents uploaded by Business Actors;
 - 3) results of technical land considerations; and/or
 - 4) other sectoral technical regulations or policies.

Examples of content that can be used as a formulation of requirements for implementing Space Utilization activities can be seen in Table 3.1.

Table 3.1. Contents that can be used as requirements formulations

Implementation of Space Utilization Activities		
No	Example Source	Example of Terms
1 RTRW	Regency	On less productive agricultural land, food crops can be converted while maintaining the regional productivity level.
2 PTP		- Land use is only permitted for the activities of generating, transmitting, distributing and selling electricity in one business entity and is not permitted to be transferred to other types of land use without permission from the authorized agency. - The use of land at the requested location must not disrupt public interests and must not cause environmental damage or pollution. - The applicant is required to construct drainage and sanitation channels and undertake efforts to plant greenery on undeveloped land as an effort to improve the water absorption function. - Development/activities must comply with building boundaries, roads and other boundaries in accordance with applicable laws and regulations. - In terms of land use and utilization in order to create and realize the Principles of Sustainability, Optimality, Harmony and Balance (LOSS).
3 Rules	about Building Building	- Simple building with a single residential function with a maximum total building area of 100 m² whose structure does not use steel materials must meet the criteria of shallow foundations, a maximum distance between columns of 3 m (three meters), etc. - Special building with the function of a laboratory building, train station, stadium Sports facilities are built on land with a slope of over 100% (over 450) using a non-portal structure, foundations using special earthquake-dampening technology, column heights over 9 m (nine meters), etc.
4 Other	related regulations	<i>(contains substances that can be used as content for the Implementation Requirements for Utilization Activities Room)</i>

3.2.3. Assessment of Land and Sector Aspects

3.2.3.1. Checking with the Results of Land Technical Considerations

Checks are carried out on the activity plan and the PTP results for the purpose of issuing the PKKPR. KKPR officers receive the PTP from the land office via the GISTARU-KKPR portal within a maximum of 10 days from the notification date.

Payment of PNPB service fees is received through the GISTARU-KKPR portal. The data used for PTP issuance must be the same as the proposed Spatial Utilization activity document submitted by the Business Actor to the OSS System.

The PTP contains information regarding the inventory of land ownership, control, use, and utilization (IP4T), valid Location Permits, and previously issued PTPs. The required PTP data includes:

- a. Documents resulting from PTP in the context of issuing PKKPR; and
- b. PTP result *shapefile* document obtained from the Gistaru-KKPR portal.

Checks are carried out on the activity plans requested against the PTP results in the context of issuing PKKPR, carried out with the following provisions:

a. pay attention to the PTP results in the following sections:

- 1) consideration of the suitability of the proposed activity plan for all or part of the land to be used is reviewed based on aspects of control, ownership, use and utilization of the land and land capability;
- 2) terms and conditions in control, ownership, use, and land use for all or part of the land requested;
- 3) indications of the existence of disputes, conflicts and/or land cases in all or part of the land to be used;
- 4) the land's ability to support planned activities;
- 5) recognition of land rights and other civil rights of the community; and/or
- 6) other information deemed necessary.

b. in the event that there is a difference in area and coordinate points between the applications PKKPR through the OSS System with PTP results for Business Actors who do not upload proof of land ownership, the following provisions apply:

- 1) In the case of overlapping areas and coordinate points between the PKKPR application and the PTP results, the overlapping areas and coordinate points are the reference points. An example of the delineation of the PKKPR application and PTP results that have different areas and coordinate points can be seen in Figure 3.10.

Figure 3.10. Example of PKKPR Application Delineation and PTP Results that Have Differences in Area and Coordinate Points

Based on the example, the area of the application considered for approval is the overlapping delineation.

2) in the case where the area and coordinate points in letter b do not overlap, a PKKPR will be issued which is declared rejected along with the reasons;

c. in the event that there is a difference in area and coordinate points between the applications

PKKPR through the OSS System with PTP results for business actors who upload proof of land ownership, the following provisions apply:

- 1) In the event that there is an overlapping area and coordinate points between the PKKPR application and the PTP results, then the area that can be approved is the overlapping area and the PTP result area outside the PKKPR application as long as it is still included in land control. The approved area has a total area that does not exceed the area of the PKKPR application in the OSS System and a coordination meeting is held involving the OPD that handles affairs in the field of spatial planning, the district/city land office, and the applicant accompanied by the Minutes of the coordination meeting. In the event that the total area exceeds the area of the PKKPR application in the OSS System, it is necessary to issue an underpayment SPS in accordance with the provisions in the Issuance of the PKKPR PNPB Underpayment Deposit Order.

Examples of Intersecting and Located KKPR Application Polygons and PTP Results in the Land Control Scope can be seen in Figure 3.11.

Figure 3.11. Example of KKPR Application Polygons and PTP Results that Intersect and are Within the Scope of Land Control

- 2) In the case where the area and coordinate points between the PKKPR application and the PTP results do not overlap, then the entire area requested for PKKPR is replaced by the PTP area as long as it is still covered by land ownership. The approved area has a total area that does not exceed the PKKPR application area in the OSS System and a coordination meeting is held involving the OPD that handles affairs in the spatial planning sector, the district/city land office, and the applicant accompanied by the Minutes of the coordination meeting. In the case where the PTP area is larger than the PKKPR application area in the OSS System, it is necessary to issue an underpayment SPS in accordance with the provisions in the Issuance of the PKKPR PNBP Underpayment Payment Order.

Example of a PKKPR application polygon and PTP results that do not overlap in the scope of land ownership can be seen in Figure 3.12.

Figure 3.12. Example of PKKPR Application Polygons and PTP Results that Do Not Intersect in Land Control Scope

- 3) Regarding the area approved as stipulated in points 1) and 2), an assessment of the RTR and an assessment of land and sector aspects will be carried out.
- d. In the event that the PTP results indicate a discrepancy based on aspects of control, ownership, use and utilization of land and land capability, the PTP results are used as consideration material.
PKKPR issuance;
- e. In the event that the PTP results indicate a discrepancy based on the Spatial Planning Plan, the PTP results will not be used as a consideration for issuing a PKKPR;
- f. If the KKPR officer finds an error in uploading the PTP results document on the GISTARU-KKPR portal, the KKPR officer will inform land office to write to the Director in charge implementation of KKPR regarding the submission of appropriate PTP result documents;
- g. in the event that the Business Actor cannot be contacted, provided that there is evidence of business for communication between the land office and the Business Actor; the SPS is issued at a land office that does not serve the application location; the location of the activity requested is in a different district/city from the location of the SHP *upload*; and/or the Business Actor requests the closure of the PTP file, then the PTP file closure mechanism can be carried out by the land office;

If the land office implements the PTP file closure mechanism, the land office needs to send a letter to the Secretary of the Directorate General of Spatial Planning with a copy to the OPD handling KKPR and the Director handling land use, notifying that the PTP file application is closed and attaching proof of file closure. Furthermore, the Data and Information Working Group will upload the letter to the GISTARU KKPR portal so that the file *upload* will appear on *the dashboard*. The letter format for the file closure mechanism is listed in Attachment III; and/or

- h. In the event that the PTP file has been closed, the KKPR assessment process will continue and a statement will be issued stating "PKKPR rejected with reasons for closing the PTP file."

3.2.3.2. Analysis of Sector Policies

a. *Overlay of the Requested Activity Plan with Sector Policy*

1) Forestry Sector Policy

- a) for planned activities in forest areas, the planned activities in question must be removed from the application location;
- b) for planned activities located in forest areas that have undergone changes in designation and function based on the Decree on Release of Forest Areas and/or Decree on Confirmation of Forest Areas but not yet included in the RTR, a KKPR can be issued with the following provisions: (1) in the case that the Decree on Release of Forest Areas and/or Decree on Confirmation of Forest Areas already states the designation of the activity, a PKKPR can be issued for the requested activity with the designation of the activity in accordance with the Decree on Release of Forest Areas and acknowledged by the Spatial Planning Forum; or (2) in the case that the Decree on Release of Forest Areas and/or Decree on Confirmation of Forest Areas has not yet stated the designation of the activity, a PKKPR can be issued for the requested activity and approved by the Spatial Planning Forum by taking into account the surrounding spatial patterns.

- c) for activity plans whose location is on the Indicative Map for Termination of New Permit Granting (PIPPIB), the activity plan in question must follow the provisions as stipulated in the regulations regarding PIPPIB.

2) Mining Sector Policy Mining Business Permit for Production Operations (IUP-OP) through *Minerba One Map* Indonesia (MOMI), with the following provisions:

In the case where the location of the approved KKPR application overlaps with the IUP-OP, the Requirements for Implementing Spatial Utilization Activities include an obligation to cooperate/lease/borrow with the IUP-OP owner.

3) Other sectoral regulations and permits that have been issued according to the PKKPR assessment requirements.

- b. Review of activity plans against sector policies that regulate underground and above ground space

In the event that the OSS System can already serve PKKPR applications for underground and/or above-ground space, but the RTR has not yet regulated the provisions for underground and/or above-ground Space Utilization plans, it is necessary to review sector policies and other technical policies that can be accounted for.

3.2.3.3. Field Review

Field reviews can be conducted at the stage of assessing the proposed documents. Space Utilization activities in terms of:

- a. there are differences in the administrative boundaries of the area in the spatial planning for applications located in border areas. The administrative boundaries of the area used as a reference are in accordance with the spatial planning;
- b. there is a data discrepancy between the proposed Spatial Utilization activity document and the PTP results. If the Business Actor submits a change to the proposed Spatial Utilization activity data, the data used as a reference for the KKPR assessment process is the proposed Spatial Utilization activity document data in the OSS System;
- c. in the case of the location requested, the provisions on the intensity of Spatial Utilization and building layout provisions are not included in the district/city RTRW, the RDTR is not yet available, the RDTR has not been compiled and there are no regulations or policies governing building construction;
- d. proposed Spatial Utilization activities are in forest areas that have undergone changes in designation and function but are not yet included in the RTR;
- e. the proposed Spatial Utilization activity is located or intersects with sectoral policies and/or permits that are still valid (location permit, Spatial Utilization permit, etc.);
- f. proposed spatial utilization activities that have the potential to cause social vulnerability, security disturbances, environmental damage, and/or disruption to the function of national vital objects; and/or
- g. other conditions that require a coordination meeting and/or review field.

3.2.4. Preparation of the Results of the Assessment of Approval of Conformity of Spatial Utilization Activities

3.2.4.1. Regions That Already Have an Electronic System for Compliance Services for Spatial Utilization Activities

KKPR officers compile the study in a presentation format and save it as a .ppt or .pdf file. The study is then uploaded to the regional electronic system for review by the Spatial Planning Forum. The PKKPR assessment results, used to draft the PKKPR issuance, are input into a *field* through the regional electronic system.

3.2.4.2. Regions That Do Not Yet Have an Electronic System for Services for Compliance with Spatial Utilization Activities

KKPR officers prepare the study in a presentation format and save it with a .ppt or .pdf extension. The study is then discussed by members of the Spatial Planning Forum. The results of the Spatial Planning Forum discussions are outlined in the Spatial Planning Forum Minutes, the contents of which are used as material for developing the PKKPR issuance concept. The PKKPR issuance concept is sent to the regional apparatus in charge of licensing and investment affairs. The KKPR study framework format is listed in Appendix IV, which is an integral part of these Technical Instructions.

3.2.5. Discussion by the Spatial Planning Forum

The Spatial Planning Forum (FPR) is tasked with discussing the results of the study in the assessment stage. Required assessment issues

The discussion of the Spatial Planning Forum includes the following:

- a. there are differences in the administrative boundaries of the area in the spatial planning for applications located in border areas. The administrative boundaries of the area used as a reference are in accordance with the spatial planning;
- b. there is a discrepancy in the data between the proposed Utilization activity documents Space for PTP results;
- c. in the case of the location requested, the provisions on the intensity of Spatial Utilization and building layout provisions are not included in the district/city RTRW, the RDTR is not yet available, the RDTR has not been compiled and there are no regulations or policies governing building construction;
- d. proposed Spatial Utilization activities are in forest areas that have undergone changes in designation and function but are not yet included in the RTR;
- e. the proposed Spatial Utilization activity is located or intersects with sectoral policies and/or permits that are still valid (location permit, Spatial Utilization permit, etc.);
- f. proposed spatial utilization activities that have the potential to cause social vulnerability, security disturbances, environmental damage, and/or disruption to the function of national vital objects; and/or
- g. other conditions that require FPR discussion.

The provisions for discussion by the Spatial Planning Forum are as follows:

- a. Discussion of the PKKPR by the FPR is carried out in accordance with the provisions of laws and regulations regarding the FPR;
- b. Discussion of PKKPR by FPR can be done for more than one PKKPR application;
- c. If necessary, FPR discussions at the district/city level can be held. involving provincial FPR;
- d. The results of the FPR discussions are set out in the Minutes (BA) signed by the regional secretary as the head of the FPR and the head of the regional apparatus that carries out government affairs in the field of spatial planning as the secretary of the FPR; and

- e. In the event that there are no problems with the PKKPR assessment, the FPR review can be carried out by the FPR secretariat and reported to the FPR chairman and stated in the BA.

An example of the FPR Minutes format is listed in Appendix XI.
is an integral part of these Technical Instructions.

3.2.6. Determination of the Validity Period and Purpose of the Approval of Conformity of Spatial Utilization Activities

The PKKPR is one of the basic licensing requirements for spatial utilization and is used for land acquisition. The validity period of the PKKPR is determined based on the availability of proof of land ownership.

For Business Actors who already control/own the entire land for the planned activity location, the validity period of the PKKPR follows the period of land control/ownership. Meanwhile, for Business Actors who do not yet control/own the entire land for the planned activity location, the validity period of the PKKPR is 3 (three) years.

The provisions for the objectives of the PKKPR with the conditions of the overlapping PKKPR are listed in the table.
3.2. following.

Table 3.2. Provisions for the Purpose of PKKPR with the Condition of KKPR Overlaying on the Ground Surface

No	Parties Involved			KKPR		Information
	The party that Mastering the Land*	Businessmen	Other Business Actors KKPR in	Acquisition framework Land	KKPR in the context of Utilization Room	
KKPR has been issued for land acquisition purposes						
1	Do not have KKPR	B has a KKPR in the context of land acquisition	C begged KKPR	-	-	KKPR C application cannot be issued
2	A applies for KKPR	B has a KKPR in the context of land acquisition	-	-	KKPR Application A can be published	-
KKPR has been issued for the purpose of Space Utilization						
3	A has a KKPR in the context of Utilization of Space	B applies for KKPR	-	KKPR Application B can be published	-	KKPR B applications can be issued through the following mechanisms: KKPR without assessment in accordance with the provisions of the Regulation Legislation
4	Do not have KKPR	B has a KKPR in the context of Utilization of Space	C begged KKPR	KKPR Application C can be issued	-	KKPR C applications can be issued through the following mechanisms: KKPR without assessment in accordance with the provisions of the Regulation Legislation

Information:

* The party that controls/owns the land is an individual/business entity that has documentary evidence of control/ownership of the land.

In the event that there are several PKKPR applications with different KBLIs at the same time and the application location is the same, a PKKPR can be issued for the purpose of utilizing space or acquiring land for each KBLI with the provision that the Business Actor is the same person.

An example of a PKKPR application with several KBLIs can be seen in Figure 3.13 below.

Figure 3.13. Example of PKKPR Application with Several KBLI

PKKPR objective provisions for Underground and Above Ground Space:

1. The purpose of PKKPR for underground or above ground space is not differentiated into PKKPR for the purpose of land acquisition or PKKPR for the purpose of Space Utilization;
2. PKKPR for underground or above ground space cannot be issued at a location where a KKPR has been issued;
3. PKKPR for underground space can be issued under the PKKPR rising at ground level; And
4. PKKPR for space above ground can be issued above the PKKPR issued at ground level.

Figure 3.14. Illustration of Space Utilization Activities on the Ground, Surface Ground, and Underground

3.2.7. Preparation of Maps for Issuance of Approval of Conformity of Spatial Utilization Activities

3.2.7.1. Provisions for Maps Issuance Approval of Conformity of Spatial Utilization Activities

The PKKPR Publishing Concept presents a map consisting of:

- a. Delineation Map which provides information related to the outermost delineation of the application which is displayed with the Spatial Plan referred to in the assessment; and
- b. PKKPR map which produces the results of the interpretation of Spatial Utilization of the zone/sub-zone plan at the approved application location.

If the PKKPR application is rejected, only the delineation map will be included in the PKKPR publication.

3.2.7.2. Contents of the Map for Issuance of Approval of Suitability of Spatial Utilization Activities

The preparation of the PKKPR Publication Map is carried out using mapping software. The PKKPR Publication Map consists of two parts: the map face and the map margin. The map face is the part of the map that depicts the area to be mapped. The map margin contains information related to the map content.

1) Map front load:

- a) Delineation of the application;
- b) If the PKKPR is approved, the RTR map symbol will be in the form of a spatial pattern plan and/or spatial structure plan;
- c) Data elements consist of administrative area boundaries and toponymy. (name of waters and name of region); and

- d) Coordinates.
- 2) Map edge information load:
 - a) Wind direction;
 - b) Scale;
 - c) Projection description;
 - d) Description
 - Provides information about the symbols on the map face (1) Delineation of the application;
 - (2) Administrative area boundaries;
 - (3) RTR; and
- a) Data sources.

In addition to the delineation map, there is a map location description which provides information on the application area on a smaller scale, including:

- a) Administrative areas and administrative boundaries;
- b) Coordinates;
- c) Delineation of the application and a box indicating the location application; and
- d) Data elements consist of administrative area boundaries and toponymy. (name of waters and name of administrative area).

b. PKKPR Map Contents

- 1) Map front load:
 - a) Symbolization of administrative areas;
 - b) Data elements consist of administrative area boundaries and toponymy. (name of waters and name of region);
 - c) The listed activity plans are translated into the RDTR zone/sub-zone scale with the provisions of the RDTR zone/sub-zone scale; and
 - d) Coordinates.
- 2) Map edge information load:
 - a) Wind direction;
 - b) Scale;
 - c) Projection description; and
 - d) Description
 - Explaining the activity plan that has been translated into zone/sub-zone scale.

Example: the activity plan "Road" is translated into "Sub-Zone" Road Agency (BJ)", the activity plan for "power generation and electricity transmission" is translated into "Power Generation Sub-Zone" Electric Power (PTL), and so on

Provisions regarding the preparation of PKKPR Publication Maps refer to statutory regulations regarding the preparation of databases and presentation of spatial planning maps.

The format of the PKKPR Map Attachment for Business Activities for the authority of the Regional Government is listed in Attachment VI which is an integral part of these Technical Instructions.

3.2.8. Preparation and Finalization of the Concept for Approval of Suitability of Spatial Utilization Activities

If the assessment process has been carried out by the FPR, a PKKPR Concept is prepared containing the assessment results and the decision to approve/partially approve/reject, accompanied by the reasons for the rejection and accompanied by a PKKPR Map. The PKKPR Concept is approved by an authorized official on behalf of the regional head.

Provisions that need to be considered in preparing the PKKPR concept:

a. If the Business Actor has acquired all the land for his business activities, then the PKKPR received is **the PKKPR in the context of**

Utilization of Space, by including other provisions as follows.

- 1) This PKKPR is given with considerations as stated in attachment;
- 2) This PKKPR is a document stating the conformity between the Spatial Utilization activity plan and the RTR in addition to the RDTR and as a basis for processing Business Permits in accordance with the provisions of laws and regulations;
- 3) In the event that the PKKPR Business Actor has obtained land for its activities, the validity period of the PKKPR follows the period of control over the land that has been obtained by the Business Actor and is in accordance with the area of land that has been obtained and agreed upon in the PKKPR;
- 4) PKKPR holders can only carry out activities according to the location specified.
approved;
- 5) PKKPR is the basis for managing subsequent permits.
authorized agency; and
- 6) PKKPR holders are obliged to comply with the laws and regulations that applies.

b. If the Business Actor has not yet obtained the land requested in part/in full for his business activities, then the PKKPR received is **the PKKPR for the purpose of Land Acquisition**, containing the following Other Provisions:

- 1) This PKKPR is given with considerations as stated in attachment;
- 2) This PKKPR is a document stating the conformity between the Spatial Utilization activity plan and the RTR in addition to the RDTR and as a basis for processing Business Permits in accordance with the provisions of laws and regulations;
- 3) This PKKPR is valid for 3 (three) years from the date of issuance and can be extended in accordance with applicable laws and regulations;
- 4) If the business actor is unable to obtain all the land in accordance with the PKKPR issued, they can submit a request.

application for extension of PKKPR for business activities or cooperation with land banks;

5) If an update has been made, the validity period of the PKKPR follows the time period and land area according to the control over the land that has been obtained;

6) PKKPR holders can only carry out activities according to the location specified.
approved;

7) PKKPR is the basis for acquiring land required for business and/or activities, and also serves as a permit for transferring land rights and for managing subsequent permits at the authorized agency;

8) PKKPR holders are required to report periodically every 3 (three) months to the head of the land office regarding land acquisitions that have been carried out based on the KKPR; and

9) PKKPR holders are obliged to comply with the laws and regulations that applies.

c. If a Business Actor requests a KKPR for his business activities located in the basement and/or above ground, then the PKKPR received contains the following Other Provisions:

1) This PKKPR is given with considerations as stated in
attachment;

2) This PKKPR is a document stating the conformity between the Spatial Utilization activity plan and the RTR in addition to the RDTR and as a basis for processing Business Permits in accordance with the provisions of laws and regulations;

3) In the event that the PKKPR Business Actor has obtained land for its activities, the validity period of the PKKPR follows the period of control over the land that has been obtained by the Business Actor and is in accordance with the area of land that has been obtained and agreed upon in the PKKPR.

4) PKKPR holders can only carry out activities according to the location specified.
approved.

5) PKKPR is the basis for acquiring land required for activities, and also serves as a permit for transferring land rights, as well as for managing subsequent permits at the authorized agency; and

6) PKKPR holders are obliged to comply with the laws and regulations that applies.

The format of the PKKPR concept for business activities for regional government authority is listed in Attachment XII and the format of the PKKPR map attachment for business activities for regional government authority is in Attachment XIII which is an integral part of these Technical Instructions.

3.2.9. Issuance of a Payment Order for Underpayment of Non-Tax State Revenue Approval of Conformity of Space Utilization Activities

The reasons for issuing an SPS for underpayment of PNBPKPR include:

- a. If the uploaded proof of land ownership does not cover the entire area of the location requested, the issuance of the PKKPR will be suspended until the Business Actor pays the underpayment of PNPB; and/or
- b. There is a difference in the area of the PKKPR application through the OSS System with the PTP results, where the area of the PTP results is wider than the area of the PKKPR application in the OSS System but is still included in land ownership.

Based on the above, the issuance of PKKPR is suspended until the Business Actor pays the PKKPR PNPB underpayment. To process the payment of the PKKPR PNPB underpayment, the following provisions apply:

- a. in the case where the GISTARU-KKPR portal does not yet have the SPS issuance feature pay PNPB PKKPR.
 - 1) The OPD handling the implementation of KKPR writes a letter to the Secretary of the Directorate General of Spatial Planning with a copy to the minister in charge of government affairs in the investment sector and the director in charge of land use notifying the indication of underpayment of PNPB PKKPR. Next, the head of the data and information working group will process the *billing* code request for payment of underpayment of PNPB PKKPR. The format of the notification letter for indication of underpayment of PNPB PKKPR implementation from the Director handling the implementation of KKPR to Business Actors is listed in Attachment VIII; and
 - 2) The OPD handling the implementation of KKPR writes a letter to the Business Actor regarding notification of underpayment of PNPB attached with an SPS containing details of underpayment of KKPR issuance services. Next, the Business Actor makes payment a maximum of 7 (seven) days after the new *billing* code is received by the Business Actor. The format of the letter of notification of underpayment of PNPB for the implementation of PKKPR from the Director handling the implementation of KKPR to the Business Actor is listed in Appendix IX.
- b. in the case where the GISTARU-KKPR portal already has an SPS issuance feature, it is less pay PNPB PKKPR.
 - 1) KKPR officers select the underpayment SPS issuance feature that has been available in the GISTARU-KKPR portal;
 - 2) Business actors receive a SPS for underpayment of PNPB PKKPR; and
 - 3) Business actors make payments a maximum of 7 (seven) days after the code *billing* that has just been received by the Business Actor.

3.3. Publishing Stage

The issuance of PKKPR is carried out by the Regional Head through the OPD that handles Investment and One-Stop Integrated Services. This issuance stage includes provisions/formats for filling in the PKKPR assessment results *field* on the GISTARU-KKPR portal. Before filling in the PKKPR assessment results *field* on the GISTARU-KKPR portal, KKPR officers re-check the issued PKKPR information and the availability of RDTRs that have been integrated with the OSS System at the activity location because it is possible that during the PKKPR assessment process there are RDTRs that have been integrated with the OSS System.

In the event that there is an RDTR that has been integrated with the OSS System at the planned activity location, then:

- a. In the event that all planned activity locations are within the RDTR delineation that has been integrated with the OSS System, the PKKPR assessment results cannot be published and the requested activity plan will be issued with the following message: "PKKPR rejected with reasons and needs to be re-applied through the KKKPR mechanism"; or
- b. In the event that some of the planned activity locations are within the RDTR delineation that has been integrated with the OSS System, the PKKPR assessment results that can be issued are only for the planned activity locations that are outside the RDTR delineation that has been integrated with the OSS System. For the requested activity plan, a "PKKPR partially approved" will be issued.

If the entire activity plan does not yet have an RDTR that has been integrated with the OSS System, then the process for the requested activity plan can be continued to the issuance of PKKPR.

Table 3. 3. Provisions/Format for Filling in the PKKPR Assessment Results Field on the GISTARU-KKPR Portal

No	Field	Provision
1.	Geographic Coordinates	The SHP <i>file</i> contains the approved area delineation based on the results of the assessment stage. The SHP <i>file</i> is uploaded. in *.zip format without folder.
2.	PTP Number	a. The PTP number will be listed when the PTP has been uploaded. by the land office; or b. PTP numbers that are not listed can make a "Pusdatin Notification Request" on the "Pertek Results" tab and contact the relevant land office to upload the PTP.
3.	Regulation Number	a. filled in with reference to the RTR which is the basis for conformity; b. The system already has the text "Regulations" available. _____ about RTR _____"; and c. filled in manually in the Name information column RTR (National/Island/Archipelago/Province/Regency/City then Number and Year of Regulation (PP/Perpres/Perda), example of filling in: "ABC Regency Number 1 of 2022".
4.	Land Area Which Approved	a. adjusted to the approved area according to the SHP uploaded in Number 1; and b. area units follow the proposal by the Business Actor (m2 or hectares).
5.	Type of Allocation	filled with the requested activities located in the designated area according to the interpretation of Spatial Utilization

No	Field	Provision
	Utilization of Space	to the zone/sub-zone plan at the approved application location.
6. KBLI code (5 digits)		filled in automatically by the system following the KBLI code submitted by the Business Actor.
7. The KBLI title is filled in automatically by the system following the KBLI title submitted by the Business Actor.		
8. Maximum KDB		a. filled in with reference to the RTRW, SNI, BG Regional Regulation, Mayoral Regulation/Regent Regulation on building regulations, RTBL, Spatial Utilization Permit, or City Planning Information (KRK) that have been issued previously for similar business activities; b. not filled with a strip (-); and/or c. filled with numbers without units of calculation (percent (%), meters (m), etc.).
9. Extraordinary Congress	Maximum	in accordance with the provisions in Number 8.
10. Indications of Space Utilization Program		a. filled with an indication of the main program of the related RTR; or b. If there is no indication of the main program, in the system click "<i>template</i>", then select one.
11. Requirements for Implementing KKPR		a. filled with the requirements that must be complied with before or when carrying out Spatial Utilization activities; b. filled with reference to the requirements in the KUZ/KUPZ/APZ/IAPZ in the RTR, and/or technical provisions in the RTB/RIK documents uploaded by the business actor; c. filled with proof of cooperation/rental requirements renting/borrowing from the IUP-OP owner if the PKKPR issued is in the IUP-OP area; and/or d. filled with technical provisions of the related sector and other technical requirements as needed.
12. Additional Information In case available		includes minimum GSB, minimum JBB, minimum KDH, maximum KTB, and/or City Utility Network, with the provisions in accordance with Number 8.
13. File Attachment Map		a. Map attachments include: 1) Consideration of KKPR approval; 2) Delineation Map containing the outermost delineation of the KKPR application using the RTR referred to in the assessment as the basis for the map (<i>basemap</i>); and 3) APZ/KUPZ content; 4) KKPR map containing the results of the interpretation of Spatial Utilization; 5) Provisions on the intensity of space utilization; and b. The <i>file</i> format follows the OSS System format, including: 1) A4 paper size;

No	Field	Provision
		2) Top/bottom margin 2.5 cm; 3) Left/right margin 1.5 cm; 4) Font type 'Times New Roman'; 5) Title <i>font</i> size 12 pt; 6) The <i>font</i> size is 12 pt; 7) Footer <i>font</i> size 7.5 pt; and 8) The layout is in ' <i>Portrait</i> ' form. c. The map attachment contains an <i>overlay</i> map which is the basis for the conformity and the agreed coordinates; and d. The file format is *.pdf and the document size is no more than 5 (five) MB.
14.	Map Description	a. load the status of polygon changes; or b. can be filled with the available <i>template</i> or filled with other information.
15.	File Attachment Agreement KKPR	a. in the form of a KKPR Approval document that has been signed by the Minister of ATR/Head of BPN through the Director General of Spatial Planning; and b. The <i>file</i> format is *.pdf and the document size is no more than 5 (five) MB.
16.	Status	a. contains the decision to approve or reject; b. if the application is approved in its entirety, then the decision selected is approved; c. If the application is partially approved, then the one selected is the decision approved; and/or d. If the application is rejected, then the choice is decision rejected.
17.	Reason for Rejection	Fill in the reasons that cause the application to be rejected (if in Number 16 (sixteen) the decision chosen is the decision to be rejected).

After the process of filling in numbers 1 (one) to 17 (seventeen) is complete and the PTP results have been received by the GISTARU-KKPR portal, the process is then saved and it is necessary to re-ensure that all files that have been uploaded can be downloaded. Before filling in the PKKPR assessment results *field*, it is sent to the System.

OSS, a *preview* can be performed first. KKPR officers need to check the availability of RDTRs integrated with the OSS system at the application location, as it is possible that during the KKPR assessment process, some RDTRs are integrated with the OSS system. If an RDTR is integrated with the OSS system, then:

- a. in the event that all planned activity locations are within the RDTR delineation integrated with the OSS System, the PKKPR Assessment results cannot be published and the requested activity plan will be issued with the following statement: "PKKPR rejected with the reason that an application needs to be made through the KKKPR mechanism"; or

- b. If some of the planned activity locations are within the RDTR delineation integrated with the OSS System, adjustments are required to the PKKPR Assessment results. PKKPR can only be issued for planned activity locations that are outside the RDTR delineation integrated with the OSS System.

For the requested activity plan, a statement will be issued saying "PKKPR partially approved".

The issuance of PKKPR will be carried out no later than 20 (twenty) days after the application requirements have been received in full and payment of the PNPB service fee has been received by the GISTARU-KKPR portal.

BAB IV

PENUTUP

1. Petunjuk teknis ini berlaku sepanjang tidak ada perubahan peraturan perundang-undangan terkait Kesesuaian Kegiatan Pemanfaatan Ruang.
2. Dalam hal terdapat perubahan peraturan perundang-undangan sebagaimana dimaksud pada Angka 1, maka yang menjadi acuan adalah peraturan perundang-undangan terbaru, yang mana kemudian petunjuk teknis ini akan ditinjau kembali.
3. Demikian petunjuk teknis ini menjadi ketentuan dalam pelaksanaan Persetujuan Kesesuaian Kegiatan Pemanfaatan Ruang untuk Kegiatan Berusaha.
4. Petunjuk teknis ini mulai berlaku sejak tanggal ditetapkan.

UTILIZATION OF SPACE

Completeness Document	Information	Example of a Repair Note <i>*in case of rejection (No)</i>
1. Geojson Location Coordinates	• If there is a "download" icon, then select "YES"; or • If there is no "download" icon, then select "NO".	• Location coordinates have not been uploaded, are not correct, or cannot be opened (<i>missing files</i>); or • Location coordinates are not precise.
2. SHP Location Coordinates	• If there is a "download" icon and a complete SHP file (at least .shp, .dbf, .prj, and .shx), then select "YES"; • If there is a "download" icon and the SHP file is incomplete (only .shp), then select "NO"; - or • If there is no "download" icon, then select "NO".	
3. Land Area Requirements	• If there is "land area information", then select "YES"; or • If there is no "land area information", then select "NO".	The land area has not been filled by the Business Actor
4. Land Ownership Information (Ownership/Control Certificate)	• If filled with "Y" or "N" information, then select "YES"; or • If there is no "land ownership information", then select "NO".	-
5. File Proof of Land Tenure	First, check Number 4 "Land Ownership Information". • If Number 4 is filled in with "N", then select "Yes"; or • If number 4 is filled in with "Y", the conditions are: - If there is a download icon, the document can be read clearly and completely, then select "YES"; or - If there is no download icon and/or the document cannot be read clearly and completely, then select "NO".	Land ownership proof information data cannot be downloaded/cannot be read clearly/is incomplete.
6. Information on Type of Business Activity	• If there is "KBLI information", then select "YES"; or • If there is no "KBLI information"; then select "NO".	• KBLI information is not yet available in accordance • There is no KBLI or type activity/business information

Completeness Document	Information	Example of a Repair Note *in case of rejection (No)
7. Is there a building already?	Answered Y or N	• Not yet filled in information on whether there is an existing building • Existing building information must be filled in, Y/N
8. Does it Require a New Building	• If filled with "Y" or "N" information, then select "YES"; or • If not filled with information "Y" or "N", then select "NO". • If filled in with Y or N, then point 12 must be filled in by the Business Actor • If you fill in Y then point 9 must be filled	• Have not filled in information on whether a building is required new • Information on whether a new building is required must be filled in, Y/N. Business Actor You must answer Y if you are planning to build a new building.
9. Number of buildings planned	Filled with the number of planned buildings. If point 8 is filled in "Y", then point 9 must be filled in.	Has not provided data on the number of planned buildings
10. Building Floor Plan	• If there is "Number information" Building Floor", then select "YES" • If there is no "information Number of Building Floors", then select "NO"	No planned information on Number of Floors Building
11. Building Floor Plan	• If there is "Broad information Building Floor", then select "YES" • If there is no "information Building Floor Area", then select "NO"	No Floor Area plan information Building
12. Building Technical Plan and/or Regional Master Plan	• If there is a download icon, the document is clearly readable. and complete, then select "YES"; or • If there is no download icon and/or the document cannot be read clearly and completely, then select "NO".	• Documents RTB and/or RIK must be uploaded and read clearly and completely when correcting data. • Documents RTB (pdf)/RIK (shp) is not yet appropriate or has not been uploaded
11. PNBP KKPR Issuance Services	Click "calc", then always select "YES".	-

APPENDIX III
FILE CLOSURE NOTIFICATION LETTER FORMAT
LAND TECHNICAL CONSIDERATIONS FROM THE LAND OFFICE
TO THE SECRETARY OF THE DIRECTORATE GENERAL OF SPATIAL PLANNING

LETTERHEAD

Number : Jakarta, (date, month, year)
 Attachment : files
 Regarding : Notification of Closing of Technical Consideration File
 Land

Dear Sir/Madam,

Secretary of the Directorate General of Spatial
 Planning cq Chair of the Data and Information Working Group
 Ministry of Agrarian Affairs and Spatial Planning/National Land Agency
 in place

In connection with the implementation of the assessment of the Conformity of Spatial Utilization Activities (KKPR) in accordance with the Regulation of the Minister of ATR/KBPN Number 13 of 2021 concerning the Implementation of Conformity of Spatial Utilization Activities and Synchronization of Spatial Utilization Programs, there are several applications for which the application files for Land Technical Consideration have been closed by the District Land Office Herewith submitted the names of Business Actors along with the closing files for the Land Technical Consideration application (attached) as follows:

No	Businessmen	KKPR Application Data
1	 <i>(filled with identity Businessmen)</i>	NIB: OSS ID: Project ID: Project Location ID: Permit ID:
2 etc.		

In relation to the above, further processing of the file closure can be carried out in accordance with the provisions so as not to disrupt the KKPR assessment process in Regency.

Thus conveyed, thank you for your attention and cooperation.
Thank You.

Head of the Regency/City Land Office

APPENDIX IV

FORMAT OF ACTIVITY CONFORMITY APPROVAL ASSESSMENT FRAMEWORK

UTILIZATION OF SPACE

COVER/TITLE OF THE STUDY

Presentation Outline

1. Application Data

a. Chronology of Application and Coordination

1) Information on the description of the activities and the date of implementation of the activities.

presented in the form of a table, which contains at least:

- Application via the OSS system;
- Validation of Data Completeness and Quality;
- Receipt of PNPB Payments;
- Data Processing (date since PNPB Payment was received until the KKPR assessment is completed);
- Receipt of Land Technical Consideration Results (PTP); and
- Description of other activities.

2) Completeness of Application Data

- Contains information about Business Actors consisting of name, address, contact (telephone and email), business scale, location of activities and information other necessary things.
- Contains a complete list of the KKPR application which consists of:
 - requested geographic coordinates, land area requirements,
 - land ownership information, information on types of activities/types of businesses, planned number of building floors, planned floor area of the building,
 - plans, Technical Building Plans and/or Master Area Plans,
 - PNBP status.

Business Actor Information and a list of application requirements can be presented in a screenshot from the GISTARU-KKPR portal.

2. Description of Application Location

Contains a location map and detailed explanation of the requested activity.

3. KKPR Assessment

a. Assessment Using Tiered and Complementary Principles

- 1) Study of Regency/City RTRW
- 2) Study of the Provincial RTRW
- 3) Study of national level RTR (if necessary)

b. Further Assessment

1) Review of Sectoral Regulations

2) Results of the Implementation of Land Technical Considerations (PTP)

c. Results of Field Review/Coordination Meeting/Discussion Meeting

Spatial Planning Forum (if needed)

d. Study of the Intensity of Space Utilization

Contains provisions on the intensity of use of space and resources.

used as a basis for determining the intensity of space utilization.

4. Recapitulation of KKPR Assessment Results

Contains a summary of the KKPR assessment results presented in tabular form.

FORMAT OF OFFICE NOTE FOR REQUEST FOR SIGNING OF CONCEPT
PKKPR STUDY ON CENTRAL GOVERNMENT AUTHORITY

LETTERHEAD

OFFICIAL MEMO

Number

Dear Sir/Madam, : Director General of Spatial Planning ...

From : (filled in by the Director in Charge of KKPR Implementation)

Date : ... (fill in the date, month, and year)

Attachment : ... files (filled with the number of files attached)

Regarding : Application for Signing in the Framework of Approval of Space Utilization Activities in Publishing the name of ... (filled with the name of the Business Actor) with the Indonesian Standard Classification of Business Fields ... (*KBLI Number*) in the Regency/City of ..., Province ...

Following up on the application for Approval of Suitability of Business Space Utilization Activities (PKKPR) via the *Online Single Submission* (OSS) system and has been declared to have fulfilled the data completeness requirements and has been

A study was conducted to assess the Conformity of Spatial Utilization Activities (KKPR) based on the Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 13 of 2021 concerning the Implementation of Conformity of Spatial Utilization Activities and Synchronization of Spatial Utilization Programs. It is hereby submitted:

I. Chronology and Data Completeness

a. Activity plan with the Indonesian Standard Classification of Industrial Fields (KBLI) ...

(*KBLI Number*) (*KBLI Name*) in the Regency/City

....., Province

1) Application to enter OSS: ... (example: 13 July 2023);

2) Complete validation: ... (example: August 3, 2023);

3) PNPB Payment: ... (example: August 7, 2023);

4) PTP Issuance: ... (example: August 25, 2023);

5) Upload PTP into OSS: ... (example: August 25, 2023);

6) Project Number Location ID 7) :

Location : Village/Sub-district,

Subdistrict,

Regency/City,

Province

8) Application area : $\pm$ ha/m² (*choose one*); and

9) Investment status:.... (*PMA and/or PMDN*).

b. Application (*filled with the name of the business actor*) is declared complete and validated by attaching the following documents:

- 1) Location coordinates: complete *shapefile* ;
- 2) Land area requirements for space utilization activities: ha/m² ; (*choose one*)
- 3) Land ownership information: control/own ... (*not yet/ already*) land;
(*if you already own/control the land, you need to write down the proof of land ownership information*)
- 4) Business type information: KBLI ... (*KBLI Number*) (*KBLI Name*);
- 5) There is already a building: ... (*not yet/ already*);
- 6) Number of planned buildings: (*filled in with number*);
- 7) Building floor plan:;
- 8) Planned floor area of the building:;
- 9) Minimum requested depth/height*: (m);
- 10) Maximum requested depth/height*: (m);
- 11) Technical building plan and/or master plan for the area: PDF format.
(*Please indicate the type of activity requested*)

*) for PKKPR applications above or below ground, you can deleted if not needed

c. Based on coordination meetings and/or field visits

in the context of issuing PKKPR for the type of activity ... in the name of on the date ... the following agreement was reached**:

**) is included in the event of a coordination meeting and/or field visit (*if necessary*)

II. Analysis Results

The PKKPR application for the activity plan in the name of ...(*filled in with the name of the business actor*) has been reviewed with the results analysis as follows:

a. (*for applications that do not have proof of land ownership, in the event that there is a difference in the area and coordinate points of the polygon between the OSS System and the PTP results and there is no overlap at all, resulting in this application being rejected,*

then it is necessary to provide general and brief information at this point - before the results of the analysis of the RTR)

b. *(information is provided regarding the RTRW which has a more recent determination time)*

Example: The RTRW available at the planned activity location is the RTRW of Province (Regional Regulation Number ... Year ... concerning) and the RTRW of Regency/City (Regional Regulation Number ... Year ... concerning). Based on this, the KKPR assessment begins with a study of the RTRW

c. Based on Provincial/District/City Regional Regulations

Number ... Year ... regarding the Regional Spatial Planning :
(RTRW which has a more recent determination time)

1) The requested location is on the spatial plan:

- a. Spatial pattern 1 is... ha/m² *(choose one)* (...%);
- b. Spatial pattern 2 with an area of ... ha/m² *(choose one)* (...%); c. etc.

2) Contents of the spatial structure plan: ...

3) Contents of general zoning provisions:

- a. *KUZ spatial pattern 1;*
- b. *KUZ spatial pattern 2;*
- c. *KUZ spatial structure;*
- d. *etc.*

4) Contents of special provisions *(if any)*;

5) Contents of the program indication attachment;

6) The appropriate application area based on the RTR is ... ha/m² (...%);

7) etc.

(in the case of a RTRW which has a more recent determination time which does not permit/ does not regulate the proposed activity plan, an analysis of the other RTRW shall be carried out)

d. Based on the Presidential Regulation concerning the National Strategic Area Spatial Planning *(if used as a consideration and sorted by the most recent time of determination)*:

1) The requested location is on the spatial plan:

- a. Spatial pattern 1 is... ha/m² *(choose one)* (...%);
- b. Spatial pattern 2 with an area of ... ha/m² *(choose one)* (...%);
- c. etc.

2) Contents of the spatial structure plan: ...

3) Zoning directive indication content:

- a. *IAZ spatial pattern 1;*
- b. *IAZ spatial pattern 2;*
- c. *IAZ spatial structure;*
- d. *etc.*

- 4) Contents of special provisions *(if any)*;
- 5) Contents of the program indication attachment;
- 6) The appropriate application area based on the RTR is ... ha/m² (...%);
- 7) etc.
(in the case of a national RTR which has a more recent determination time not permitting/ not regulating the requested activity plan, an analysis of other national RTRs will be carried out)
- e. Based on the Presidential Regulation concerning Island/Archipelago Spatial Planning *(if used as a consideration)*:
 - 1) *(adjusted to the contents of the Island/ Archipelago RTR)*
 - 2) etc.
- f. Based on the Government Regulation on National Spatial Planning *(if used as a consideration)*:
 - 1) *(adjusted to the RTRWN content)*
 - 2) etc.
- g. Based on *(RDTR that has not been integrated with the OSS System/ RDTR around in one district/ city administrative area/ RDTR Technical Material/ statutory regulations and/ or policies related to the intensity of spatial utilization/ statutory regulations and/ or policies related to building layout/ sectoral technical provisions)* *(choose one)* are directed to the Provisions on Intensity of Spatial Utilization:
 - 1) Maximum KDB: %
 - 2) Maximum KLB:
 - 3) Minimum KDH:%
- h. Based on the Land Technical Considerations for PKKPR Issuance Activities Number date from the District/City Land Office, the analysis of Land Control, Ownership, Use, Utilization (P4T) and land capability is stated to be *(suitable/ conditionally suitable/ not suitable)* with an area of ± ha/m² *(choose one)* (... %) with the current land use being
- i. *(in the event that there is a difference in the area and/ or coordinate points in the polygon shapefile between the KKPR application via the OSS System and the PTP results, then information needs to be provided (if any)***)*:
 - 1) *the difference in area and the difference in coordinate points of the polygon (for intersecting polygons); or*
 - 2) *difference in coordinate points for non-intersecting polygons*

****) taking into account the provisions stipulated in the technical instructions*

Example of OSS polygon overlay analysis map and PTP results

- j. Based on the results of the alignment of the activity plan with the Decree of the Minister of Environment and Forestry (LHK)
Number regarding the Map of Development of Confirmation and/or Determination of Forest Areas of Province/Approval of Release of Forest Areas/ up to the Year the requested location is,
- k. Based on the results of the alignment of the activity plan with the Decree of the Minister of Environment and Forestry Number concerning the Determination of the Indicative Map for the Termination of the Issuance of New Permits (PIPPIB) for the Year Period, the requested location is
- l. Based on the results of checking the activity plan with the Minerba One Map Indonesia (MOMI) Portal as of the date, the location requested overlaps/does not overlap with
(in the case where the location requested overlaps with the IUP-OP, it is necessary to provide the name of the holder and the term of the IUP-OP)
- m. Based on the review of (fill in the assessment results)
to other sector provisions)
- n. Based on checking the spatial data of the KKPR that has been published and embedded in the GISTARU KKPR Portal (Central and Regional Authority) of the Data and Information Working Group of the Directorate General of Spatial Planning as of the date, the location of the application does not overlap with other KKPR.
- o. And so on (filled in if the results of the overlay are carried out with other sectoral maps, other permits, and so on).
- p. This PKKPR is a PKKPR in the context of obtaining
land/space utilization (choose one).
- q. The table of study results and PKKPR concepts is attached.

III. Recommendations

- a. Regarding the KPKPR application for Business Activities in the name of with KBLI.....
(KBLI Number) (KBLI Name) with an area of ha/m² (choose one) in the Regency/City
....., Province ... it is recommended to be able to (choose one 1) or 2)):

1) *approved in full/ approved in part* for an area of $\pm$ ha/m² (choose one) through
KKPR Approval, with reference to Regional/Presidential/Government Regulation
Number of concerning Spatial Planning (.....); or

2) *rejected* by Regional/Presidential/Government Regulation Number of concerning
Spatial Planning (.....) and/or Land Technical Considerations**** (.....).

****) *for applications that do not have proof of land ownership, in the event that there is
a difference in the area and coordinate points of the polygon between the OSS System
and the PTP results and there is no overlap at all.*

- b. Reducing factors (overlay with spatial structure plan map, overlay with PTP results, overlay
with sector policies, and/or overlay with KKPR that has been issued) (if any).

IV. Implementer

Composition of the team responsible for the document:

Name	Tasks in Team
(Head of Echelon III Unit)	Finalize the PKKPR assessment study and PKKPR documents
(Functional Position)	Checking application administration PKKPR PKKPR assessment study, and PKKPR documents
(Position Functional/Individual PWK Field Contract)	Analyzing PKKPR applications
(Individual Contract) Mapping Field)	Analyzing application spatial data PKKPR

Thus we convey, and we request your guidance and approval. Thank you for your attention.
