

**MINISTER OF AGRARIAN AND SPATIAL PLANNING/
HEAD OF THE NATIONAL LAND AGENCY**

REGULATION OF THE MINISTER OF AGRARIAN AFFAIRS AND SPATIAL PLANNING/
HEAD OF THE NATIONAL LAND AGENCY
REPUBLIC OF INDONESIA
NUMBER 10 OF 2024
ABOUT
PACITAN REGENCY SPATIAL PLAN

BY THE GRACE OF GOD ALMIGHTY

MINISTER OF AGRARIAN AND SPATIAL PLANNING/
HEAD OF THE NATIONAL LAND AGENCY
REPUBLIC OF INDONESIA,

Considering: that in order to implement the provisions of Article 75 paragraph (4), paragraph (5), paragraph (6), and paragraph (7) of Government Regulation Number 21 of 2021 concerning the Implementation of Spatial Planning, it is necessary to stipulate a Regulation of the Minister of Agrarian Affairs and Spatial Planning Room/Head of the National Land Agency regarding Pacitan Regency Spatial Planning Plan;

Considering: 1. Article 17 paragraph (3) of the 1945 Constitution of the Republic of Indonesia;

2. Law Number 26 of 2007 concerning Spatial Planning (State Gazette of the Republic of Indonesia of 2007 Number 68, Supplement to the State Gazette of the Republic of Indonesia Number 4725) as amended by Law Number 6 of 2023 concerning the Stipulation of Government Regulation in Lieu of Law Number 2 of 2022 concerning Job Creation to Become Law (State Gazette of the Republic of Indonesia of 2023 Number 41, Supplement to the State Gazette of the Republic of Indonesia Number 6856);
3. Law Number 39 of 2008 concerning State Ministries (State Gazette of the Republic of Indonesia 2008 Number 166, Supplement to the State Gazette of the Republic of Indonesia Number 4916);
4. Government Regulation Number 21 of 2021 concerning the Implementation of Spatial Planning (State Gazette of the Republic of Indonesia 2021 Number 31, Supplement to the State Gazette of the Republic of Indonesia Number 6633);

5. Presidential Regulation Number 47 of 2020 concerning the Ministry of Agrarian Affairs and Spatial Planning (State Gazette of the Republic of Indonesia 2020 Number 83);
6. Presidential Regulation Number 48 of 2020 concerning the National Land Agency (State Gazette of the Republic of Indonesia 2020 Number 84);
7. Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 16 of 2020 concerning the Organization and Work Procedures of the Ministry of Agrarian Affairs and Spatial Planning/ National Land Agency (State Gazette of the Republic of Indonesia 2020 Number 985);
8. Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 17 of 2020 concerning the Organization and Work Procedures of the Regional Offices of the National Land Agency and Land Offices (State Gazette of the Republic of Indonesia 2020 Number 986);
9. Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 11 of 2021 concerning Procedures for the Preparation, Review, Revision, and Issuance of Approval of the Substance of Spatial Planning Plans for Provinces, Regencies, Cities, and Detailed Spatial Planning Plans (State Gazette of the Republic of Indonesia 2021 Number 329);

DECIDE:

To stipulate: REGULATION OF THE MINISTER OF AGRARIAN AFFAIRS AND SPATIAL PLANNING/ HEAD OF THE NATIONAL LAND AGENCY CONCERNING THE PACITAN REGENCY SPATIAL PLAN.

article 1

- (1) Pacitan Regency Spatial Planning Plan
determined by this Ministerial Regulation.
- (2) Pacitan Regency Spatial Planning Plan
as referred to in paragraph (1) consists of:
 - a. The contents of the Regional Spatial Planning Plan as listed in Attachment I
which is an integral part of this Ministerial Regulation;
 - b. Planning Area Map as listed in Attachment II which is an integral part of this
Ministerial Regulation;
 - c. Spatial Structure Plan Map as listed in Attachment III which is an integral part
of this Ministerial Regulation;
 - d. Spatial Structure Plan Map of the Settlement Center System as stated in
Attachment IV which is an integral part of this Ministerial Regulation;

- e. Spatial Structure Plan Map of the Transportation Network System as listed in Attachment V which is an integral part of this Ministerial Regulation;
- f. List of Primary Local Roads and Secondary Local Roads as listed in Attachment VI which is an integral part of this Ministerial Regulation;
- g. Spatial Structure Plan Map of the Energy Network System as listed in Attachment VII which is an integral part of this Ministerial Regulation;
- h. Telecommunication Network System Spatial Structure Plan Map as listed in Attachment VIII which is an integral part of this Ministerial Regulation;
- i. Spatial Structure Plan Map of the Water Resources Network System as listed in Attachment IX which is an integral part of this Ministerial Regulation;
- j. Spatial Structure Plan Map for Other Infrastructure Network Systems as listed in Attachment X which is an integral part of this Ministerial Regulation;
- k. Spatial Planning Map as listed in Attachment XI which is an integral part of this Ministerial Regulation;
- l. Strategic Area Determination Map as listed in Attachment XII which is an integral part of this Ministerial Regulation;
- m. Table of Indications of the Main Five-Year Medium-Term Program as listed in Attachment XIII which is an integral part of this Ministerial Regulation;
- n. Map of Special Provisions for the Spatial Pattern Plan for Border Areas as listed in Attachment XIV which is an integral part of this Ministerial Regulation;
- o. Map of Special Provisions for the Karst Area Spatial Plan as listed in Attachment XV which is an integral part of this Ministerial Regulation;
- p. Map of Special Provisions for Spatial Planning of Disaster-Prone Areas as listed in Attachment XVI which is an integral part of this Ministerial Regulation;
- q. Map of Special Provisions for the Sustainable Food Agriculture Area Spatial Pattern Plan as listed in Attachment XVII which is an integral part of this Ministerial Regulation;

r. Map of Special Provisions for Spatial Planning of Mineral and Coal Mining Areas as listed in Attachment XVIII which is an integral part of this Ministerial Regulation; and

s. Map of Special Provisions for the Aviation Operations Safety Area Spatial Pattern Plan as listed in Attachment XIX

which is an integral part of this Ministerial Regulation.

(3) Pacitan Regency Spatial Planning Plan as referred to in paragraph (2) shall be a reference for the use of space and control of the use of space in Pacitan Regency.

Article 2

(1) The Regent of Pacitan is obliged to determine the Pacitan Regency Spatial Planning Plan as referred to in Article 1 by Regional Regulation within a maximum period of 15 (fifteen) working days from when this Ministerial Regulation comes into effect.

(2) Within a maximum period of 15 (fifteen) working days since this Ministerial Regulation comes into effect, the procedures for determining the Pacitan Regency Regional Regulation concerning the Pacitan Regency Spatial Planning Plan that must be carried out include:

a. submission of a letter of request for the implementation of consultation by the Governor of East Java to the minister who oversees domestic government affairs in order to continue the evaluation process of the draft Regional Regulation on the Pacitan Regency Spatial Planning Plan; and

b. promulgation of the Pacitan Regency Regional Regulation concerning the Pacitan Regency Spatial Planning in the regional gazette by the Regional Secretary of Pacitan Regency.

(3) The Pacitan Regency Regional Regulation concerning the Regional Spatial Planning Plan as referred to in paragraph (1) is stipulated in accordance with the substance of the Pacitan Regency Regional Spatial Planning Plan as stated in Attachment I, Attachment II, Attachment III, Attachment IV, Attachment V, Attachment VI, Attachment VII, Attachment VIII, Attachment IX, Attachment X, Attachment XI, Attachment XII, Attachment XIII, Attachment XIV, Attachment XV, Attachment XVI, Attachment XVII, Attachment XVIII, and Attachment XIX of this Ministerial Regulation in accordance with the provisions of laws and regulations.

(4) In the case of the Pacitan Regency Regional Regulation concerning the Pacitan Regency Spatial Planning Plan as referred to in paragraph (2) letter b

has been promulgated by the Regional Secretary of Pacitan Regency, this Ministerial Regulation is declared invalid.

- (5) In the event that the Pacitan Regency Regional Regulation concerning the Pacitan Regency Spatial Planning Plan as referred to in paragraph (1) is not stipulated by the Pacitan Regent and/or is not promulgated by the Pacitan Regency Regional Secretary within the stipulated time limit, the Pacitan Regency Spatial Planning Plan stipulated in this Ministerial Regulation shall be the reference for the use of space and control of the use of space.
- (6) The Regent of Pacitan shall review the Pacitan Regency Spatial Planning Plan as referred to in paragraph (5) in accordance with the provisions of statutory regulations.
- (7) If the results of the review as referred to in paragraph (6) recommend that the Pacitan Regency Spatial Planning Plan needs to be revised, the Regent of Pacitan will prepare and determine a draft Pacitan Regency Regional Regulation concerning the Pacitan Regency Spatial Planning Plan in accordance with the provisions of laws and regulations.
- (8) In the event that the Pacitan Regency Regional Regulation concerning the Pacitan Regency Spatial Planning Plan as referred to in paragraph (7) has been promulgated, this Ministerial Regulation is declared no longer valid.

Article 3

With the enactment of this Ministerial Regulation:

- a. permits for the use of space or the conformity of space utilization activities that have been issued and are in accordance with the provisions of this Ministerial Regulation remain valid in accordance with their validity period; b. permits for the use of space or the conformity of space utilization activities that have been issued but are not in accordance with the provisions of this Ministerial Regulation, adjustments are made in accordance with the provisions of laws and regulations; and
- c. the suitability of spatial utilization activities currently in the process of being published refers to the provisions in this Ministerial Regulation.

Article 4

When this Ministerial Regulation comes into force, laws and regulations that serve as a reference in the utilization of space and control of the utilization of space in Pacitan Regency that are in conflict with this Ministerial Regulation are declared null and void.

Article 5

This Ministerial Regulation shall come into force 15 (fifteen) days after the date of promulgation.

So that everyone knows, it is ordered that this Regulation be promulgated by placing it in the State Gazette of the Republic of Indonesia.

APPENDIX I
REGULATION OF THE MINISTER OF AGRARIAN AFFAIRS AND SPATIAL PLANNING/
HEAD OF THE NATIONAL LAND AGENCY
NUMBER 10 OF 2024
ABOUT
REGENCY SPATIAL PLAN
PACITAN

CONTENT OF REGIONAL SPATIAL PLANNING

PIG
GENERAL REQUIREMENTS

article 1

In the Pacitan Regency Spatial Planning Plan, the following terms are defined:

1. The Central Government is the President of the Republic of Indonesia who holds the power of government of the Republic of Indonesia as referred to in the 1945 Constitution of the Republic of Indonesia.
2. The province is East Java Province.
3. The area is Pacitan Regency.
4. The Regional Government is the Regional Government of Pacitan Regency.
5. The Regent is the Regent of Pacitan.
6. Regional Apparatus is an element that assists the Regent and the Regional People's Representative Council in carrying out government affairs that are the authority of the Region.
7. Space is a container that includes land space, sea space and air space, including space within the earth as a single territorial unit, where humans and other living creatures carry out activities and maintain their survival.
8. Spatial planning is a manifestation of spatial structure and spatial pattern.
9. Spatial Planning, hereinafter abbreviated as RTR, is the result of spatial planning.
10. The Pacitan Regency Spatial Planning Plan, hereinafter referred to as RTRW, is a general spatial planning plan for the Regional Area, which contains objectives, policies, strategies for Regional Spatial Planning, Regional Spatial Structure plans, Regional Spatial Pattern plans, determination of Regional Strategic Areas, directions for Regional Spatial Utilization, and provisions for Controlling Regional Spatial Utilization.
11. Spatial Structure is the arrangement of settlement centers and infrastructure and facility network systems that function to support the social and economic activities of the community which hierarchically have functional relationships.
12. Spatial Pattern is the distribution of spatial allocation in an area.
which includes the allocation of space for protective functions and the allocation of space for cultivation functions.
13. Spatial Planning is a system of spatial planning, spatial utilization and spatial utilization control.

14. Spatial Planning is a process for determining Spatial Structure and Spatial Patterns which includes the preparation and determination of Spatial Planning.
15. Spatial Utilization is an effort to realize Spatial Structure and Spatial Pattern in accordance with the RTR through the preparation and implementation of programs and their financing.
16. Control of Spatial Utilization is an effort to realize orderly spatial planning.
17. Spatial Planning Regulation is an effort to establish a legal basis for the Government, Regional Government and Community in Spatial Planning.
18. Spatial Planning Development is an effort to improve the performance of Spatial Planning carried out by the Central Government, Regional Government and the Community.
19. A region is a space which is a geographical unit along with all related elements whose boundaries and systems are determined based on administrative and/or functional aspects.
20. Area is an area that has the main function of protection or cultivation.
Power.
21. Protected Areas are areas designated with the main function of protecting the sustainability of the environment, including natural resources and artificial resources.
22. Cultivation Areas are areas designated with the main function of being cultivated based on the conditions and potential of natural resources, human resources and artificial resources.
23. Rural Areas are areas whose main activities are agriculture, including the management of natural resources with the functional structure of the Area as a place for rural settlements, government services, social services and economic activities.
24. Urban Areas are areas whose main activities are not agriculture, with the functional structure of the area being a place for urban settlements, concentration and distribution of government services, social services and economic activities.
25. Regional Activity Center, hereinafter abbreviated as PKW, is an Urban Area that functions to serve activities on a provincial or several district/city scale.
26. Local Activity Centers, hereinafter abbreviated as PKL, are urban areas that function to serve district or sub-district level activities.
27. The Regional Service Center, hereinafter abbreviated as PPK, is an Urban Area that functions to serve activities at the sub-district or several village levels.
28. The Environmental Service Center, hereinafter abbreviated as PPL, is a settlement center that functions to serve inter-village scale activities.
29. Roads are land transportation infrastructure that includes all parts of the road, including complementary buildings and equipment intended for traffic, which are on the surface of the ground, above the surface of the ground, below the surface of the ground and/or water, and above the surface of the water, except for railways, lorry roads and cable roads.
30. Toll roads are public roads which are part of the road network system and are national roads whose users are required to pay tolls;
31. The Road Infrastructure Network System is a single network of road sections that connect and bind growth centers with areas under the influence of its services in a hierarchical relationship.

32. The Primary Road Network System is a road network system with a role in providing distribution services for goods and services for the development of all regions at the national level, by connecting all distribution service nodes in the form of activity centers.
33. The secondary road network system is a road network system with a role in providing distribution services for goods and services to the community in urban areas.
34. Arterial roads are public roads that serve the main transportation sector with the characteristics of long-distance travel, high average speeds, and the number of entrances is limited in an efficient manner.
35. Collector roads are public roads that function to serve collecting or distributing transportation with the characteristics of medium distance travel, medium average speed, and a limited number of entry points.
36. Local roads are public roads that serve local transportation with the characteristics of short distance travel, low average speed, and an unlimited number of entrances.
37. Primary Arterial Roads are roads that efficiently connect national activity centers or between national activity centers and regional activity centers.
38. Primary Collector Roads are roads that efficiently connect national activity centers with local activity centers, between regional activity centers, or between regional activity centers and local activity centers.
39. Primary Local Roads are roads that efficiently connect national activity centers with environmental activity centers, regional activity centers with environmental activity centers, between local activity centers, or local activity centers with environmental activity centers, and between environmental activity centers.
40. Secondary Collector Roads are roads that connect the second secondary area with the second secondary area or the second secondary area with the third secondary area.
41. Secondary Local Roads are roads that connect the first secondary area with housing, the second secondary area with housing, the third secondary area and so on to housing.
42. Water is all water found on, above or below the surface of the land, including in this definition surface water, ground water, rain water and sea water on land.
43. Groundwater is water found in layers of soil or rock below ground level.
44. Raw Water for Household Drinking Water, hereinafter referred to as Raw Water, is water that can come from surface water sources, groundwater recharge and/or rainwater that meets certain quality standards as raw water for drinking water.
45. Drinking water is household drinking water that has been processed or not processed to meet health requirements and can be drunk directly.
46. Rivers are places and containers as well as water drainage networks starting from springs to estuaries, bordered on the right and left and along the flow by boundary lines.
47. A reservoir is a water container that is formed as a result of the construction of a river structure, in this case a dam, and is in the form of a widening of the channel/body/riverbed.

48. A reservoir is a basin used to regulate and accommodate the supply of rainwater flow and to improve the quality of water in the associated water body.
49. River Basin is a unified water resource management area in one or more river basins and/or small islands with an area of less than or equal to 2,000 km² (two thousand square kilometers).
50. River Basin Area, hereinafter abbreviated as DAS, is a land area which is a single unit with rivers and their tributaries, which functions to accommodate, store and channel water originating from rainfall to lakes or to the sea naturally, where the boundary on land is a topographical divider and the boundary at sea to the water area which is still affected by land activities.
51. Irrigation is the effort to provide, regulate and dispose of irrigation water to support agriculture, the types of which include surface irrigation, swamp irrigation, groundwater irrigation, pump irrigation and pond irrigation.
52. Irrigation Area is a unit of land that receives water from one irrigation network.
53. Green Open Space, hereinafter abbreviated as RTH, is an elongated/path and/or grouped area whose use is more open, a place for plants to grow, whether they grow naturally or are planted intentionally, taking into account aspects of ecological function, water absorption, economic, socio-cultural and aesthetics.
54. Waste is the remains of human daily activities and/or natural processes.
which is solid.
55. Final Processing Site, hereinafter abbreviated as TPA, is a place for processing and returning waste to the environmental media in a safe manner for humans and the environment.
56. Temporary Shelter, hereinafter abbreviated as TPS, is a place before waste is transported to a recycling, processing and/or integrated waste processing facility.
57. Waste Processing Place with the 3R Principle (*reduce, reuse and recycle*), hereinafter abbreviated as TPS3R, is a place where collection, sorting, reuse and recycling activities are carried out on a regional scale.
58. Integrated Waste Processing Site, hereinafter abbreviated as TPST, is a place where waste collection, sorting, reuse, recycling, processing and final processing are carried out.
59. A terminal is a base for public motor vehicles which is used to regulate arrivals and departures, pick up and drop off people and/or goods, and change modes of transportation.
60. Feeder Airports are airports that have limited service coverage and influence economic development.
61. Special Airports are airports that are used only to support certain activities and are not used for
general.
62. Special Terminals are terminals located outside the Work Area and Port Interest Area which are part of the nearest port to serve its own interests in accordance with its main business.
63. Forest Areas are certain areas designated and/or determined by the Government to maintain their existence as permanent forests.

64. Protected Forest Areas are forest areas whose main function is to protect life support systems to regulate water management, prevent flooding, control erosion, prevent sea water intrusion, and maintain soil fertility.
65. Production Forest Area is a forest area that has a function the main producer of forest products.
66. Agriculture is the activity of managing natural biological resources with the help of technology, capital, labor and management to produce agricultural commodities which include food crops, horticulture, plantations and/or livestock in an agro-ecosystem.
67. Land is the land part of the earth's surface as a physical environment which includes land and all factors which influence its use such as climate, relief, geological and hydrological aspects which are formed naturally or as a result of human influence.
68. Sustainable Food Agriculture Areas are agricultural cultivation areas, especially in rural areas, which have expanses of Sustainable Food Agriculture Land and/or expanses of Sustainable Food Agriculture Reserve Land and supporting elements with the main function of supporting national food independence, resilience and sovereignty.
69. Agricultural Areas are areas allocated and meet the criteria for cultivating food crops, horticulture, plantations and animal husbandry.
70. Food Crop Areas are irrigated wetland areas, non-irrigated wetlands and dry land with potential for the utilization and development of food crops.
71. Horticultural Areas are dry land areas with potential for the utilization and development of horticultural plants in monoculture or intercropping in the form of commodities related to fruit, vegetables, herbal medicinal ingredients, and floriculture, including mushrooms, moss, and aquatic plants that function as vegetables, herbal medicinal ingredients, and/or aesthetic materials.
72. Plantation Areas are areas that have the potential to be utilized and developed on both wet and/or dry land for plantation commodities.
73. Fisheries Area is an area designated with the main function for capture fisheries and aquaculture activities, including coastal ecosystem management areas.
74. Residential Areas are part of the living environment outside the Protected Area, whether in the form of Urban or Rural Areas which function as residential or residential environments and places for activities which support life and livelihood.
75. Urban Residential Areas are parts of the living environment outside the Protected Areas which function as residential or living environments and places for activities which support life and livelihood in Urban Areas.
76. Rural Residential Areas are parts of the living environment outside the Protected Areas which function as residential or residential environments and places for activities which support life and livelihood in Rural Areas.
77. Industrial Designation Area is a stretch of land designated for industrial activities based on the Regional Spatial Planning determined in accordance with the provisions of statutory regulations.

78. Mining Areas are areas that have the potential for mining resources in solid, liquid or gaseous form based on geological maps/data and are the places where all stages of mining activities are carried out, including research, general investigations, exploration, production/exploitation operations and post-mining, both on land and in water areas, and are not limited by land use, both Cultivation Areas and Protected Areas.
79. Tourism Area is a strategic tourism area located geographically within one or more village/ sub-district administrative areas in which there is potential for DTW, high accessibility, availability of public facilities and tourism facilities as well as social and cultural activities of the community that support each other in realizing tourism.
80. Regency Tourism Destinations, hereinafter abbreviated as DPK, are geographical areas located in one or more regions.
administration which has a specific theme, with components of tourist attractions, public facilities, tourism facilities, accessibility, and the community which are interrelated and complement the realization of tourism.
81. Defense and Security Areas are areas developed to guarantee activities and development in the defense and security sector, such as security installations, including training areas, military districts, regional military command posts, military district command posts, and so on.
82. Provincial Strategic Areas are areas whose spatial planning is prioritized because they have a very important influence within the scope of the Province on the economy, social, culture and/or environment for the interests of the Provincial level/scale.
83. The Regency Strategic Area is an area whose spatial planning is prioritized because it has a very important influence within the Regional scope on the economy, social, culture and/or environment for the interests of the regency level/scale.
84. The 5 (Five) Year Medium Term Main Program Indication is an indication that contains the proposed main program, location, size, implementation time, funding sources, and implementing agencies in order to realize Regional space in accordance with the Spatial Planning Plan.
85. Incentives are tools or efforts to provide rewards for the implementation of activities that are in line with the Spatial Planning Plan.
86. Disincentives are tools or efforts to increase preventive measures, restrictions and cancellation of activities that are not in line with the Spatial Planning Plan.
87. Sanctions Directives are directives to provide sanctions for individuals and/or corporations and/or government officials who commit violations of Spatial Utilization so that they do not comply with the applicable Spatial Planning Plan.
88. The Spatial Planning Forum is a forum at the central and regional levels whose task is to assist the Central Government and Regional Governments by providing considerations in the implementation of Spatial Planning.
89. Person is an individual and/or corporation.
90. The community is an individual, a group of people including customary law communities, corporations, and/or other non-government stakeholders in the implementation of Spatial Planning.
91. The role of society is active participation of the community in spatial planning, spatial utilization and control of spatial utilization.

92. Conformity of Spatial Utilization Activities, hereinafter abbreviated as KKPR, is the conformity between the Spatial Utilization activity plan and the with RTR.

CHAPTER II
SCOPE

Article 2

- (1) The scope of the RTRW area includes the boundaries determined based on statutory regulations, including the land area at 110o90' – 111o43' east longitude and 7o92' – 8o29' south latitude with an area of approximately 143,360 (one hundred and forty three thousand three hundred and sixty) hectares of airspace and areas within the earth, including:
- a. Arjosari District;
 - b. Bandar District;
 - c. Donorojo District;
 - d. Kebonagung District;
 - e. Nawangan District;
 - f. Ngadirojo District;
 - g. Pacitan District;
 - h. Pringkuku District;
 - i. Punung District;
 - j. Sudimoro District;
 - k. Tegalombo District; and
 - l. Tulakan District.
- (2) Regional boundaries include:
- a. to the north with Ponorogo Regency, East Java Province and Wonogiri Regency, Central Java Province;
 - b. to the east with Trenggalek Regency and Ponorogo Regency, East Java Province;
 - c. to the south with the Indian Ocean; and
 - d. to the west with Wonogiri Regency, Central Java Province.
- (3) The scope of the area as referred to in paragraph (1) is described on the map.

Article 3

The scope of RTRW includes:

- a. general provisions;
- b. objectives, policies and strategies of spatial planning;
- c. spatial structure plan;
- d. spatial pattern plan;
- e. Strategic district areas;
- f. directions for the Utilization of Space;
- g. provisions for the Control of Utilization of Space; h. institutions; and
- i. rights, obligations and roles of society.

CHAPTER III
OBJECTIVES, POLICIES, AND STRATEGIES OF SPATIAL PLANNING

Part One
Objectives of Spatial Planning

Article 4

The objective of Spatial Planning is to realize Regional space as a strong regional scale economic center based on tourism and agriculture while paying attention to natural sustainability and equitable development.

Part Two
Spatial Planning Policy

Article 5

- (1) To realize the objectives of Regional Spatial Planning as referred to in Article 4, Regional Spatial Planning policies are prepared.
- (2) Regional Spatial Planning Policy as referred to in paragraph (1) includes:
 - a. development of service centers in an even and balanced manner with the improvement and equal distribution of regional infrastructure development;
 - b. strengthening, preserving, managing and protecting the area
Protect;
 - c. development of environmentally conscious residential areas by taking into account disaster aspects;
 - d. development of agricultural areas and control over conversion of functions
agricultural land;
 - e. development of environmentally conscious tourism areas;
 - f. development of forestry area functions;
 - g. development of regional fisheries potential;
 - h. development of the function of Industrial Designated Areas;
 - i. development of Defense and Security Areas; and
 - j. development and control of strategic areas.

Part Three
Spatial Planning Strategy

Article 6

- (1) To implement the Spatial Planning policy as referred to in Article 5 paragraph (2), a Spatial Planning strategy is determined.
- (2) Strategy for developing service centers evenly and in balance with increasing and equalizing regional infrastructure development.
as referred to in Article 5 paragraph (2) letter a includes:
 - a. strengthening the function and role of PKW;
 - b. improving the function and role of street vendors;
 - c. strengthening the function and role of PPK;
 - d. strengthening the function and role of PPL;
 - e. strengthening economic activities in urban and rural areas synergistically;
 - f. improving the transportation network system services that connect production area nodes with marketing center areas; g. improving the energy and telecommunications network system services; h.
 - improving the water resources infrastructure system services; and

- i. improving the service of other infrastructure network systems.
- (3) The strategy for strengthening, preserving, managing and protecting Protected Areas as referred to in Article 5 paragraph (2) letter b includes:
 - a. maintain the function of Water Bodies;
 - b. maintain the function of the Area which provides protection to its subordinate Areas;
 - c. maintaining the function of Local Protection Areas and the provision of public green open space in Urban Areas of 20% (twenty percent);
 - d. maintaining the function of geological Protected Areas;
 - e. improving the management of disaster-prone areas; and
 - f. maintain the function of the Cultural Heritage Area.
- (4) The strategy for developing environmentally conscious residential areas by taking into account disaster aspects as referred to in Article 5 paragraph (2) letter c includes:
 - a. developing productive urban residential areas;
 - b. developing synergistic rural settlement areas with agricultural development;
 - c. limiting the development of settlements in disaster-prone areas;
And
 - d. improving the quality of urban settlements.
- (5) The strategy for developing agricultural areas and controlling the conversion of agricultural land as referred to in Article 5 paragraph (2) letter d includes:
 - a. maintaining the area of agricultural land; and
 - b. increase the quantity and quality of agricultural production.
- (6) The strategy for developing environmentally conscious tourism areas as referred to in Article 5 paragraph (2) letter e includes:
 - a. developing regional tourism destinations;
 - b. developing connectivity between regional tourist attractions; and
 - c. developing investment in the tourism sector.
- (7) The strategy for developing the function of forestry areas as referred to in Article 5 paragraph (2) letter f is to preserve and control the conversion of production forest areas and people's plantations in the regional area.
- (8) The strategy for developing regional fisheries potential as referred to in Article 5 paragraph (2) letter g includes:
 - a. maintaining the area of fisheries land; and
 - b. developing a sustainable fishing industry.
- (9) The strategy for developing the function of Industrial Designation Areas as referred to in Article 5 paragraph (2) letter h includes:
 - a. developing Industrial Designation Areas taking environmental sustainability into account; and Which
 - b. developing supporting infrastructure for designated areas Industry.
- (10) The strategy for developing Defense and Security Areas as referred to in Article 5 paragraph (2) letter i is to establish Defense and Security Areas supported by Regional facilities and infrastructure.
- (11) Strategic area development and control strategies as referred to in referred to in Article 5 paragraph (2) letter j includes:
 - a. determine strategic areas according to their strategic value and specificity;
 - b. developing Provincial Strategic Areas in the Region;

- c. developing and improving strategic district areas;
And
- d. improving facilities and infrastructure in strategic areas.

CHAPTER IV
SPACE STRUCTURE PLAN

Part One
General

Article 7

- (1) The Spatial Structure Plan is prepared by taking into account the potential and local wisdom of the region.
- (2) The Spatial Structure Plan as referred to in paragraph (1) includes:
 - a. settlement center system; and
 - b. infrastructure network system.
- (3) Spatial Structure Plan as referred to in paragraph (2) depicted on the map.

Part Two
Settlement Center System

Article 8

- (1) The settlement center system as referred to in Article 7 paragraph (2) letter a consists of:
 - a. PKW;
 - b. PKL; and
 - c. other centers.
- (2) PKW as intended in paragraph (1) letter a is in the form of an area Pacitan Urban Area in Pacitan District.
- (3) PKL as referred to in paragraph (1) letter b is in the form of the Ngadirojo Urban Area in Ngadirojo District.
- (4) Other centers as referred to in paragraph (1) letter c consist of on:
 - a. PPK; and
 - b. PPL.
- (5) The PPK as referred to in paragraph (4) letter a includes: a. Punung Urban Area in Punung District; b. Donorojo Urban Area in Donorojo District;
 - c. Pringkuku Urban Area in Pringkuku District;
 - d. Arjosari Urban Area in Arjosari District;
 - e. Nawangan Urban Area in Nawangan District;
 - f. Bandar Urban Area in Bandar District;
 - g. Sudimoro Urban Area in Sudimoro District;
 - h. Tulakan Urban Area in Tulakan District; i. Kebonagung Urban Area in Kebonagung District; and
 - j. Tegalombo Urban Area in Tegalombo District.
- (6) PPL as referred to in paragraph (4) letter b includes: a. PPL Kayen in Pacitan District;
 - b. PPL Tambakrejo in Pacitan District;
 - c. PPL Mlati in Arjosari District;
 - d. PPL Karanggede in Arjosari District;
 - e. PPL Kedungbendo in Arjosari District;
 - f. PPL Penggung in Nawangan District;

g. PPL Pakisbaru in Nawangan District; h. PPL Tokawi in Nawangan District; i. PPL Gemaharjo in Tegalombo District; j. PPL Tahunan Baru in Tegalombo District; k. PPL Jeruk in Bandar District; l. PPL Watupatok in Bandar District; m. PPL Ketjo in Tulakan District; n. PPL Jetak in Tulakan District; o. PPL Wonokarto in Ngadirojo District; p. PPL Hadiwarno in Ngadirojo District; q. PPL Sukorejo in Sudimoro District; r. PPL Klepu in Sudimoro District; s. PPL Ketjo in Kebonagung District; t. PPL Sidomulyo in Kebonagung District; u. PPL Dadapan in Pringkuku District; v. PPL Dersono in Pringkuku District; w. PPL Gondosari in Punung District; x. PPL Bomo in Punung District; y. PPL Kalak in Donorojo District; and z. PPL Sukodono in Donorojo District.

(7) Provisions regarding PKW, PKL, and PPK as referred to in paragraph (2), paragraph (3), and paragraph (5) are regulated in the Detailed Spatial Planning Plan.

Part Three
Infrastructure Network System

Paragraph 1
General

Article 9

The infrastructure network system as referred to in Article 7 paragraph (2) letter b includes: a. transportation network system; b. energy network system; c. telecommunications network system; d. water resources network system; and e. other infrastructure network systems.

Paragraph 2
Transportation Network System

Article 10

The transportation network system as referred to in Article 9 letter a includes: a. road network system; b. sea transportation network system; and c. public airports and special airports.

Article 11

The road network system as referred to in Article 10 letter a includes: a. Primary Arterial Roads; b. Primary Collector Roads; c. Secondary Collector Roads; d. Primary Local Roads;

e. Secondary Local Roads; f. Secondary Environmental Roads; g. Toll road; and h. Passenger terminal.

Article 12

(1) Primary Arterial Roads as referred to in Article 11 letter a includes: a.

Glonggong – Bts. Pacitan City through: 1. Donorojo District; 2. Punung District; 3. Pringkuku District; and 4. Pacitan District.

b. WR Supratman Street (Pacitan) in Pacitan District; (2) Primary Collector Road as referred to in Article 11 letter b includes: a.

Gatot Subroto Street (Pacitan) in Pacitan District; b. General Sudirman Street (Pacitan) in Pacitan District; c. Manggribi Street (Pacitan) in Pacitan District; d. Pacitan City Highway – Trenggalek Regency Highway via: 1. Pacitan District; 2. Kebonagung District; 3. Tulakan District; 4. Ngadirojo District; and 5. Sudimoro District.

e. Ploso – Pacitan via:

1. Pacitan District; 2. Kebonagung District; 3. Tulakan District; and 4. Ngadirojo District. f. Pacitan Ring Road in Pacitan District. g. Ponorogo Regency Bts. –

Pacitan City Bts. via:

1. Tegalombo District; 2. Arjosari District; and 3. Pacitan District.

h. Student Army Road in Pacitan District; i. Basuki Racmad Road in Pacitan District; j. Arjosari – Purwantoro (Central Java Province Highway) via:

1. Arjosari District 2. Bandar District; and 3. Nawangan District.

k. Wareng – Mukus (Central Java Province Bts) via: 1. Donorojo District; and 2. Punung District. l. Ahmad Yani Street in Pacitan District; m. Bangunsari – Ngadirejan via: 1. Pacitan District; and 2. Pringkuku District. n. Kom. Yos Sudarso Street in Pacitan District.

(3) Secondary Collector Roads as referred to in Article 11 letter c includes: a.

AR Hakim Street in Pacitan District; b. A. Insp. Sasuit Tubun Street in Pacitan District; c. Buwono Keling Street in Pacitan District; d. Dr. Sutomo Street in Pacitan District;

- e. Railway Road. Posong in Pacitan District;
 - f. KH. Agus Salim Street in Pacitan District;
 - g. KH. Ahmad Dahlan Street in Pacitan District;
 - h. KH. Wahid Hasyim Street in Pacitan District;
 - i. Jalan Letjend. MT. Haryono in Pacitan District; j. Jalan Letjend. R. Suprpto in Pacitan District;
 - k. MA Sucipto Street in Pacitan District;
 - l. Marsda Iswahyudi Street in Pacitan District;
 - m. Jalan RM. Suryo in Pacitan District;
 - n. Jalan SA Tirtoyoso in Pacitan District; and
 - o. Sultan Agung Street in Pacitan District.
- (4) Primary Local Roads as referred to in Article 11 letter d are spread throughout the Regional Area.
- (5) Secondary Local Roads as referred to in Article 11 letter e are spread throughout the Regional Area.
- (6) Secondary Environmental Roads as referred to in Article 11
The letter f is spread throughout the Regional Area.
- (7) The toll road as referred to in Article 11 letter g includes the Yogyakarta – Pacitan – Trenggalek – Lumajang toll road section via:
- a. Donorojo District;
 - b. Punung District;
 - c. Pringkuku District; d. Pacitan District; e. Kebonagung District;
 - f. Tulakan District;
 - g. Ngadirojo District; and h. Sudimoro District.
- (8) Passenger terminal as referred to in Article 11 letter h includes:
- a. Type A passenger terminal in Pacitan District;
 - b. Type B passenger terminal in Ngadirojo District; and c. Type C passenger terminal includes:
- 1. Bandar District;
 - 2. Punung District;
 - 3. Donorojo District;
 - 4. Pringkuku District;
 - 5. Kebonagung District;
 - 6. Tulakan District;
 - 7. Sudimoro District;
 - 8. Arjosari District;
 - 9. Nawangan District; and
 - 10. Tegalombo District.

Article 13

- (1) The sea transportation network system as referred to in Article 10 letter b is in the form of a seaport.
- (2) Sea ports as referred to in paragraph (1) letter a include:
- a. regional feeder port; b. Special Terminal; and
 - c. fishing port.
- (3) The regional feeder port as referred to in paragraph (2) letter a is Pacitan Port in Pacitan District which will serve the flow of passengers and goods between regions.
- (4) The special terminal as referred to in paragraph (2) letter b is located at Sudimoro District.

- (5) The fishing port as referred to in paragraph (2) letter c includes:
 - a. Coastal Fishing Port; and
 - b. Fish Landing Base.
- (6) The Coastal Fishing Port as referred to in paragraph (5) letter a is the Tamperan Coastal Fishing Port in Pacitan District.
- (7) Fish Landing Base as referred to in paragraph (5) letter b includes:
 - a. Sumberejo Fish Landing Base in Sudimoro District;
 - b. Tawang Fish Landing Base in Ngadirojo District;
 - c. Wawaran Fish Landing Base in Kebonagung District;
 - d. Watukarung Fish Landing Base in Pringkuku District;
 - e. Jetak Fish Landing Base in Tulakan District;
 - f. Klesem Fish Landing Base in Kebonagung District;
 - g. Kalipelus Fish Landing Base in Kebonagung District;
 - h. Katipugal Fish Landing Base in Kebonagung District;
 - i. Karangnongko Fish Landing Base in Kebonagung District;

 - j. Plumbungan Fish Landing Base in Kebonagung District;
 - And
 - k. Kembang Fish Landing Base in Pacitan District.

Article 14

- (1) Public airports and special airports as referred to in Article 10 letter c are special airports.
- (2) The Special Airport as referred to in paragraph (1) is the Special Military Airport, Pacitan Air Force Airfield in Pacitan District.

Paragraph 3
Energy Network System

Article 15

- (1) The energy network system as referred to in Article 9 letter b is in the form of an electricity infrastructure network.
- (2) The electricity infrastructure network as referred to in Article (1) includes:
 - a. power generation infrastructure and supporting facilities includes:
 - 1. Pacitan Steam Power Plant (PLTU) in the District Sudimoro.
 - 2. Geothermal Power Plants (PLTP) include:
 - a. Arjosari District; and b. Punung District.
 - 3. Solar Power Plants (PLTS) are spread throughout the Regional Area.
 - 4. Wind Power Plants (PLTB) are spread throughout the Regional Area.
 - 5. Micro Hydro Power Plants (PLTMH) are spread throughout the Regional Area.
 - 6. Other power plants include:
 - a. biofuel energy (*bio ethanol* and bio diesel) is spread throughout the Regional Area; and
 - b. *Biomass* energy from livestock waste and garbage is spread throughout the regional area.

- b. electricity distribution infrastructure and supporting facilities includes:
 - 1. The electric power transmission network to distribute electric power between systems includes:
 - a. High Voltage Air Ducts (SUTT) include:
 - 1. Sudimoro District;
 - 2. Ngadirojo District;
 - 3. Tulakan District;
 - 4. Kebonagung District;
 - 5. Arjosari District;
 - 6. Bandar District;
 - 7. Tegalombo District;
 - 8. Punung District;
 - 9. Pringkuku District; and
 - 10. Pacitan District.
 - 2. The electricity distribution network includes:
 - a. Medium Voltage Air Ducts (SUTM) are spread across all Regional Areas; and
 - b. Low Voltage Air Ducts (SUTR) are spread throughout the Regional Area.
- 3. electrical substation which is an integral part of electric power transmission includes:
 - a. Pacitan District; and
 - b. Sudimoro District.

Paragraph 4
Telecommunication Network System

Article 16

- (1) The telecommunications network system as referred to in Article 9 letter c includes:
 - a. fixed network; and
 - b. mobile network.
- (2) The fixed network as referred to in paragraph (1) letter a is spread across throughout the Regional Area.
- (3) The mobile network as referred to in paragraph (1) letter b is a cellular mobile network spread throughout the Regional Area.
- (4) The arrangement and construction of fixed networks and mobile networks as referred to in paragraph (1) are further regulated in the Regent's Regulation.

Paragraph 5
Water Resources Network System

Article 17

- (1) The water resources network system as referred to in Article 9 letter d includes:
 - a. irrigation network system; b.
 - flood control system; and
 - c. water resource buildings.
- (2) The irrigation network system as referred to in paragraph (1) letter a includes:
 - a. primary irrigation network;
 - b. secondary irrigation network; and

- c. tertiary irrigation network.
- (3) The primary irrigation network as referred to in paragraph (2) letter a is spread throughout the Regional Area.
- (4) The secondary irrigation network as referred to in paragraph (2) letter b is spread throughout the Regional Area.
- (5) The tertiary irrigation network as referred to in paragraph (2) letter c is spread throughout the Regional Area.
- (6) The flood control system as referred to in paragraph (1) letter b includes:
 - a. flood control network; and
 - b. flood control buildings.
- (7) The flood control network as referred to in paragraph (6) letter a spread throughout the Regional Area.
- (8) Flood control structures as referred to in paragraph (6) letter b is spread throughout the Regional Area.
- (9) Water resource buildings as referred to in paragraph (1) letter c are spread throughout the Regional Area.

Paragraph 6
Other Infrastructure Network Systems

Article 18

Other infrastructure network systems as referred to in Article 9 letter e include:

- a. drinking water supply system (SPAM);
- b. wastewater management system (SPAL);
- c. hazardous and toxic waste management system (B3);
- d. waste network system;
- e. disaster evacuation network system; and
- f. drainage system.

Article 19

- (1) The drinking water supply system (SPAM) as referred to in Article 18 letter a includes:
 - a. piping network; and
 - b. not a piping network.
- (2) The piping network as referred to in paragraph (1) letter a includes:
 - a. raw water unit;
 - b. raw water network;
 - c. production units;
 - d. production network;
 - e. distribution unit; and f. service unit.
- (3) The raw water units as referred to in paragraph (2) letter a are spread across throughout the Regional Area.
- (4) The raw water network as referred to in paragraph (2) letter b is spread throughout the Regional Area.
- (5) The production units as referred to in paragraph (2) letter c are spread across throughout the Regional Area.
- (6) The production network as referred to in paragraph (2) letter d is spread throughout the Regional Area.
- (7) The distribution units as referred to in paragraph (2) letter e are spread across throughout the Regional Area.

- (8) The service units as referred to in paragraph (2) letter f are spread across throughout the Regional Area.
- (9) Not a pipe network as referred to in paragraph (1) letter b includes:
 - a. Rainwater Reservoir; b. Shallow Well; and
 - c. Pump Well.
- (10) Rainwater Reservoir Tank as referred to in paragraph (9) letter a spread throughout the Regional Area;
- (11) Shallow wells as referred to in paragraph (9) letter b are spread throughout the Regional Area; and
- (12) The pump wells as referred to in paragraph (9) letter c are spread across all Regional Areas;

Article 20

- (1) The wastewater management system (SPAL) as referred to in Article 18 letter b includes:
 - a. non-domestic wastewater management system infrastructure; and
 - b. domestic wastewater management system infrastructure.
- (2) The non-domestic wastewater management system infrastructure as referred to in paragraph (1) letter a is spread throughout the Regional Area.
- (3) Domestic wastewater management system infrastructure as referred to in referred to in paragraph (1) letter b includes:
 - a. Donorojo District;
 - b. Punung District;
 - c. Pacitan District;
 - d. Ngadirojo District;
 - e. Sudimoro District;
 - f. Arjosari District;
 - g. Tegalombo District;
 - h. Bandar District; and i. Nawangan District.

Article 21

The hazardous and toxic waste management system (B3) as referred to in Article 18 letter c is spread throughout the Regional Area.

Article 22

- (1) The waste network system as referred to in Article 18 letter d includes:
 - a. TPS3R; b. TPS;
 - c. TPA; and d. TPST.
- (2) TPS3R as referred to in paragraph (1) letter a are spread throughout the Regional Area.
- (3) The TPS as referred to in paragraph (1) letter b are spread throughout the Regional Area.
- (4) The TPA as referred to in paragraph (1) letter c is located at:
 - a. Pringkuku District; and
 - b. Ngadirojo District;
- (5) The TPST as referred to in paragraph (1) letter d is spread throughout the Regional Area.

Article 23

- (1) The disaster evacuation network system as referred to in Article 18 letter e consists of: a. disaster evacuation routes; and b. disaster evacuation locations.
- (2) Disaster evacuation routes as referred to in paragraph (1) letter a includes: a.
- Arjosari - Purwanto (Bts Central Java Province) through: 1. Arjosari District; 2. Bandar District; and 3. Nawangan District.
- b. Bangunsari - Ngadirejan through: 1. Pacitan District; and 2. Pringkuku District.
- c. Pacitan City BTS – Trenggalek Regency BTS via: 1. Pacitan District; 2. Kebonagung District; 3. Tulakan District; 4. Ngadirojo District; and 5. Sudimoro District.
- d. Ponorogo Regency BTS - Pacitan City BTS via:
1. Tegalombo District; 2. Arjosari District; and 3. Pacitan District.
- e. Buwono Keling Road in Pacitan District; f. Glonggong - Pacitan City BTS via: 1. Donorojo District; 2. Punung District; 3. Pringkuku District; and 4. Pacitan District.
- g. Ploso – Pacitan via: 1. Pacitan District; 2. Kebonagung District; 3. Tulakan District; and 4. Ngadirojo District.
- h. Wareng – Mukus (Bts Central Java Province) through: 1. Donorojo District; and 2. Punung District;
- i. A. Insp. Sasuit Tubun Street in Pacitan District; j. AR Hakim Street in Pacitan District; k. Ahmad Yani Street in Pacitan District; l. Basuki Racmad Street in Pacitan District; m. Brigadier General Katamso Street in Pacitan District; n. Cut Meutea Street in Pacitan District; o. Dr. Wahidin Street in Pacitan District; p. Gajah Mada Street in Pacitan District; q. HS. Cokroaminoto Street in Pacitan District; r. Husein Sastranegara Street in Pacitan District; s. Gatot Subroto Street (Pacitan) in Pacitan District; t. Jend. Sudirman Street (Pacitan) in Pacitan District; u. Kanjeng Jimat Street in Pacitan District; v. Kapt. P. Tendean Street in Pacitan District; w. Kapten Patimura Street in Pacitan District; x. KH. Agus Salim in Pacitan District; y. Jalan KH. Ahmad Dahlan in Pacitan District;

z. Manggribi Street (Pacitan) in Pacitan District; aa. KH. Wahid Hasyim Street in Pacitan District; bb. Col. Sugiono Street in Pacitan District; cc. Kom. Yos Sudarso Street in Pacitan District; dd. Lt. Gen. MT. Haryono Street in Pacitan District; ee. Lt. Gen. R. Suprpto Street in Pacitan District; ff. Lt. Gen. S. Parman Street in Pacitan District; gg. Mahakam Street in Pacitan District; hh. MA Sucipto Street in Pacitan District; ii. Marsda. Iswahyudi Street in Pacitan District; jj. R. Saleh Street in Pacitan District; kk. RE. Martadinata Street in Pacitan District; ll. SA Tirtoyoso Street in Pacitan District; mm. Safruddin Prawiranegara Street in Pacitan District; nn. Sambi Gumelar Street in Pacitan District; oo. Sultan Agung Street in Pacitan District; pp. Sultan Hasanudin Street in Pacitan District; qq. Sunan Ampel Street in Pacitan District; rr. Sunan Bonang Street in Pacitan District; ss. Sunan Kalijaga Street in Pacitan District; tt. Sunan Maulana Malik Ibrahim Street in Pacitan District; uu. T. Imam Bonjol Street in Pacitan District; vv. Tentara Pelajar Street in Pacitan District; ww. Tumenggung Notopuro Street in Pacitan District; xx. Veteran Street in Pacitan District; and yy. WR Supratman Street (Pacitan) in Pacitan District. (3) Disaster evacuation sites as referred to in paragraph (1) letter b in the form of rooms and/or buildings for disaster evacuation are spread throughout the Regional Area including: a. fields; b. stadiums; c. public parks; d. government office buildings; e. social facility buildings; and f. public facility buildings.

Article 24

- (1) The drainage system as referred to in Article 18 letter f includes: a. primary drainage network; b. secondary drainage network; and c. tertiary drainage network.
- (2) The primary drainage network as referred to in paragraph (1) letter a covers the entire Regional Area.
- (3) The secondary drainage network as referred to in paragraph (1) letter b covers the entire Regional Area.
- (4) The tertiary drainage network as referred to in paragraph (1) letter c covers the entire Regional Area.

CHAPTER V
SPATIAL PATTERN PLAN

Part One
General

Article 25

- (1) The Space Pattern Plan consists of: a. Protected Areas; and b. Cultivation Area.
- (2) The Spatial Pattern Plan as referred to in paragraph (1) is described on the map.

Part Two
Protected Area

Paragraph 1
General

Article 26

Protected Areas as intended in Article 25 paragraph (1) letter a include:

- a. Water bodies;
- b. Areas that provide protection for areas his subordinates;
- c. Local Protected Areas; And
- d. Cultural Heritage Area.

Paragraph 2
Water Body

Article 27

The water bodies as referred to in Article 26 letter a cover an area of approximately 1,103 (one thousand one hundred and three) hectares spread throughout the Regional Area.

Paragraph 3
Areas that provide protection to their subordinate areas

Article 28

- (1) Areas that provide protection to subordinate areas as intended in Article 26 letter b are in the form of Protected Forest Areas.
- (2) The Protected Forest Area as referred to in paragraph (1) covers approximately 268 (two hundred and sixty eight) hectares including: a. Arjosari District;
- b. Bandar District;
- c. Kebonagung District;
- d. Nawangan District;
- e. Pacitan District;
- f. Pringkuku District;
- g. Punung District; and
- h. Tegalombo District.

Paragraph 4
Local Protected Area

Article 29

The Local Protection Area as referred to in Article 26 letter c covers an area of approximately 3,517 (three thousand five hundred and seventeen) hectares spread throughout the Regional Territory.

Paragraph 5
Cultural Heritage Area

Article 30

- (1) Cultural Heritage Areas as referred to in Article 26 letter d includes:
 - a. cultural heritage buildings; b. cultural heritage structures; c. cultural heritage sites; and
 - d. objects suspected of being cultural heritage.
- (2) Cultural heritage buildings as referred to in paragraph (1) letter a includes:
 - a. Song Gde in Punung District;
 - b. Mount Kendil Song in Punung District;
 - c. Ngiriman Cave in Punung District;
 - d. Song Dasar Site in Punung District;
 - e. Song Terus in Punung District;
 - f. Tabuhan Cave in Punung District;
 - g. Song Gde in Punung District;
 - h. Diamond Cave in Punung District;
 - i. Song Kiyut in Punung District;
 - j. Song Keplek in Punung District;
 - k. Song Dono in Punung District;
 - l. Song Agung in Punung District;
 - m. Song Terus in Punung District;
 - n. Song Gupuh in Punung District;
 - o. Song Terus in Punung District;
 - p. Song Pogog in Punung District;
 - q. Song Duren Site in Donorojo District;
 - r. Song Sumber in Donorojo District;
 - s. Song Glonggong Site in Donorojo District;
 - t. Nglampeng Cave Site in Donorojo District;
 - u. Kalak Cave in Donorojo District;
 - v. Kendil Cave Site in Pringkuku District;
 - w. Song Karet Site in Pringkuku District;
 - x. Song Tandu Site in Pringkuku District;
 - y. Song Jomblang Site in Pringkuku District; and
 - z. Continue Song Site in Pringkuku District.
- (3) The cultural heritage structure as referred to in paragraph (1) letter b includes:
 - a. Baksoka River in Punung District; and
 - b. Banjar River in Punung District.
- (4) Cultural heritage sites as referred to in paragraph (1) letter c includes:
 - a. Ngrijangan Site in Punung District;
 - b. Ngrijang Sooko site in Punung District;

c. Kedung Menjangan Site in Punung District; d. Piton Site in Punung District; e. Mrican Site in Punung District; f. Dasar Site in Punung District; g. Ngrijang Sengon Site in Punung District; h. Padangan Site in Punung District; i. Klepu Site in Punung District; j. Bomo Site in Punung District; k. Krajan Site in Punung District; l. Tukluk Rijang Site in Punung District; m. Blawong Site in Punung District; n. Duren Site in Donorojo District; o. Melikan Site in Donorojo District; p. Koboran Site in Donorojo District; q. Ngrijang Sekar Site in Donorojo District; r. Puger Site in Donorojo District; s. Bayem Site in Donorojo District; t. Kepek Site in Donorojo District; u. Jaten Pelem Site in Pringkuku District; v. Doksulur Site in Pringkuku District; w. Sungai Maron Site in Pringkuku District; x. Gupit Site in Pringkuku District; and y. Pelinggih Stone Site in Pringkuku District.

- (5) Objects suspected of being cultural heritage as referred to in paragraph (1) letter d includes: a. Tomb of Ki Buwono Keling in Kebonagung District; b. Tomb of Mbah Bayi in Ngadirojo District; c. Tomb of Ki Ageng Bandung in Ngadirojo District; d. Tomb of Mbah Kapyuran in Ngadirojo District; e. Tomb of Ki Ageng Minggir in Pacitan District; f. Tomb of Syeh Abdul Manan in Pacitan District; g. Tomb of Kyai Ngaliman and Kyai Ahmadyo in Pacitan District; h. Tomb of Setro Ketipo in Pacitan District; i. Tomb of Ki Ageng Posong in Pacitan District; j. Tomb of Kanjeng Marto Noto Negoro (Kanjeng Min) and Kanjeng Marto Hadi Negoro (Kanjeng Marto) in Pacitan District; k. Pendopo Relics in Pacitan District l. Pendopo/Well Relics in Pacitan District m. Tomb of Noto Puro, Regent I in Pacitan District n. Tomb of Kyai Santri in Punung District; o. Tomb of Kendil Wesi in Punung District; p. Tomb of Mbah Menir in Punung District; q. Tomb of Mbah Senthir in Punung District; r. Tomb of Watukuro in Bandar District; and s. Tomb of Ki Kasan Raji in Sudimoro District.

Part Three
Cultivation Area

Paragraph 1
General

Article 31

Cultivation Areas as intended in Article 25 paragraph (1) letter b, include: a. Production Forest Area; b. Community Plantation Area;

c. Agricultural Area; d. Fisheries Area; e. Industrial Designation Area; f. Tourism Area; g. Residential Areas; And h. Defense and Security Area.

Paragraph 2
Production Forest Area

Article 32

- (1) Production Forest Areas as referred to in Article 31 letter a in the form of Permanent Production Forest Areas; and
- (2) The Permanent Production Forest Area as referred to in paragraph (1) covers approximately 1,996 (one thousand nine hundred and ninety-six) hectares spread throughout the Regional Territory.

Paragraph 3
People's Plantation Area

Article 33

The People's Plantation Area as referred to in Article 31 letter b with an area of approximately 40,077 (forty thousand seventy seven) hectares covers the entire Regional Area.

Paragraph 4
Agricultural Area

Article 34

- (1) Agricultural Areas as intended in Article 31 letter c includes:
 - a. Food Crop Area;
 - b. Horticultural Area; and
 - c. Plantation Area.
- (2) The Food Crop Area as referred to in paragraph (1) letter a with an area of approximately 20,863 (twenty thousand eight hundred and sixty three) hectares is spread throughout the Regional Area.
- (3) The Food Crop Area as referred to in paragraph (2) is designated as a Sustainable Food Agriculture Area (KP2B) with an area of approximately 11,015 (eleven thousand fifteen) hectares spread throughout the Regional Area.

- (4) The Horticultural Area as referred to in paragraph (1) letter b covers an area of 27,061 (twenty seven thousand sixty one) hectares spread throughout the Regional Area.

- (5) The Plantation Area as referred to in paragraph (1) letter c covers an area of 16,420 (sixteen thousand four hundred and twenty) hectares including:
 - a. Arjosari District;
 - b. Bandar District;
 - c. Donorojo District;
 - d. Kebonagung District;
 - e. Nawangan District;
 - f. Ngadirojo District;
 - g. Pacitan District.
 - h. Pringkuku District;
 - i. Punung District;
 - j. Sudimoro District; and
 - k. Tulakan District.

Paragraph 5
Fisheries Area

Article 35

- (1) Fisheries Areas as referred to in Article 31 letter d includes:
 - a. Capture Fisheries Area; And
 - b. Aquaculture Area.

- (2) The Capture Fisheries Area as referred to in paragraph (1) letter a with an area of approximately 11 (eleven) hectares is located in Pacitan District.

- (3) The Aquaculture Area as referred to in paragraph (1) letter b is a freshwater Fisheries Area with an area of approximately 60 (sixty) hectares including:
 - a. Ngadirojo District; and
 - b. Sudimoro District.

Paragraph 6
Industrial Designated Area

Article 36

The Industrial Designation Area as referred to in Article 31 letter e with an area of approximately 2,964 (two thousand nine hundred and sixty four) hectares is spread throughout the Regional Area.

Paragraph 7
Tourism Area

Article 37

- (1) The Tourism Area as referred to in Article 31 letter f is included in the National Strategic Tourism Area and Provincial Tourism Destination (DPP) Pacitan Karst, Lawu-Kelud-Wilis and surrounding areas.

- (2) The Tourism Area as referred to in paragraph (1) is developed through the formation of District Tourism Destinations (DPK) including: a. DPK A; b. DPK B;

c. DPK C; and

d. DPK D.

(3) DPK A as referred to in paragraph (2) letter a with the theme *Geopark* tourism development includes: a. Srau Beach in Pringkuku District; b. Klayar Beach in Donorojo District; c. Karang Bolong/Segoro Bunder Beach in Donorojo District; d. Nampu Beach in Donorojo District; e. Watu Karung Beach in Pringkuku District; f. Buyutan Beach in Donorojo District; g. The Tomb of the King's Descendants in Punung District; h. The Former Wirati Kingdom and the Tomb of Kyai Santri in

Donorojo; i.

Bak Soko Site in Punung District; j. Gong Cave in Punung District; k. Putri Cave in Punung District; l.

Baksooka River in Punung District; m.

Luweng Jaran Cave in Pringkuku District; n. Luweng Ombo Cave in Donorojo District; o. Batu Tulis in Donorojo District; p. Tourism Forest in Pringkuku District; q. Guyang Warak Lake Site in Punung District; r. Maron River in Pringkuku District; s. Song Terus Museum in Punung District; t. Tabuhan Cave in Punung District; u. Kyai Mojo Relics in Punung District; v. Hot Springs in Punung District; w. Nyawiji Beach in Donorojo District; x. Sentono Gentong in Pringkuku District; y. Barong River in Pringkuku District; z. Grojokan Nduwur in Pringkuku District; aa. Kali Suro Dam in Pringkuku District; bb. Beiji Park in Pringkuku District; cc. Selo Arum Cave in Pringkuku District; dd. Tiara Hill in Pringkuku District; ee. Palagan Tumpak Rinjing in Pringkuku District; ff. Dawung Cave in Punung District; and gg. Other tourist destinations.

(4) DPK B as referred to in paragraph (2) letter b with the theme of developing *Mass Tourism* includes: a. SBY*ANI Museum and Art Gallery in Pacitan District; b. Teleng Ria Beach in Pacitan District; c. Pancer Dor Beach in Pacitan District; d. Tamperan Beach in Pacitan District; e. Pacitan Bay in Pacitan District; f. Gunung Sewu Geopark Showcase in Pacitan District; g. Kanjeng Jimat Tomb in Pacitan District; h. Hot Spring in Arjosari District; i. Pondok Tremas in Arjosari District; j. Ki Ageng Petung Tomb in Pacitan District; k. Ki Ageng Notopuro Tomb in Pacitan District; l. Setro Ketipo Petilasan in Pacitan District; m. Notopuro Petilasan in Pacitan District; n. Kanjeng Bayat Tomb in Pacitan District; o. The Buwono Keling Geger Relics of Mount Selurung in the District

Pacitan;

p. Tomb of Kyai Banteng in Pacitan District; q. Tomb of Mbah Jaiman in Arjosari District; r. Tomb of Ki Ageng Posong in Pacitan District; s. Mentari Hill in Pacitan District; t. Tomb of Syekh Brubuh in Pacitan District; u. Tebing Sengen in Pacitan District; v. Watu Mejo in Pacitan District; w. Thukul Reservoir in Arjosari District; x. Sidoluhur Dam Water Tourism in Pacitan District; and y. Other tourist destinations.

- (5) DPK C as referred to in paragraph (2) letter c with the theme of developing *Ecotourism* includes: a. Tawang Beach in Kebonagung District; b. Bakung Beach in Kebonagung District; c. Wawaran Beach in Kebonagung District; d. Jetak Beach in Tulakan District; e. Bawur Beach in Sudimoro District; f. Sidomulyo Beach in Ngadirojo District; g. Taman Beach in Ngadirojo District; h. Soge Beach in Ngadirojo District; i. Mount Limo in Kebonagung District; j. Sutononggo Tomb in Tegalombo District; k. Somopuro Cave in Tulakan District; l. Papringan Cave in Ngadirojo District; m. Pentung Cave in Tulakan District; n. Kambil Cave in Sudimoro District; o. General Sudirman's Headquarters in Ngadirojo District; p. Sheikh Yahuda's Tomb in Ngadirojo District; q. Ki Ageng Bandung's Tomb in Ngadirojo District; r. Watu Bale Beach in Tulakan District; s. Dangkal Beach in Kebonagung District; t. Pidakan Beach in Tulakan District; u. Gununglimo in Kebonagung District; v. Daki Beach in Sudimoro District; w. Beji Cave in Ngadirojo District; x. Puring Beach in Ngadirojo District; y. Mbah Kapyuran Tomb in Ngadirojo District; z. Former Lorok District in Ngadirojo District; aa. Raden Panji Sanjoyo Rangun's Tomb in Tulakan District; bb. Muning Waterfall in Ngadirojo District; cc. Pangasan Beach in Kebonagung District; dd. Tiyoso's Tomb in Kebonagung District; ee. Watu Papak Beach in Ngadirojo District; ff. Mount Lanang in Kebonagung District; gg. Kali Uluh Beach in Kebonagung District; hh. Kali Klepu Old Time Tourism in Kebonagung District; ii. Ganjuran Peak in Kebonagung District; jj. Tejo Hill in Kebonagung District; kk. Wah Gebang Lake in Sudimoro District; ll. Tinawu Beach in Sudimoro District; mm. Nguren Beach in Sudimoro District; nn. Kunir Beach in Sudimoro District; oo. Jurug Panguripan in Tegalombo District; pp. Jurug Gringsing Waterfall in Tegalombo District; qq. Telogo Sono and Kebon Duren in Tulakan District;

- rr. Banyu Biru in Ngadirojo District;
 - ss. Tawang Beach in Ngadirojo District; tt. The Tomb of Waliyulloh Eyang Yahudo in Ngadirojo District; uu. Klethek Lake in Ngadirojo District; vv. Cagak Telu Tourism in Sudimoro District; and
 - www. Other tourist destinations.
- (6) DPK D as referred to in paragraph (2) letter d with the theme of developing Agrotourism includes:
- a. General Sudirman Monument in Nawangan District;
 - b. The tombs of Eyang Putri and Iro Kombor in Bandar District;
 - c. Mbah Wager's tomb in Bandar District;
 - d. Agrotourism in Nawangan District; e. Watusente Waterfall in Bandar District;
 - f. Watu Senthe in Bandar District;
 - g. Agrotourism in Bandar District;
 - h. Curug Sabon Waterfall in Bandar District; and
 - i. Other tourist destinations.

Paragraph 8 Residential Area

Article 38

- (1) Residential Areas as referred to in Article 31 letter g consists of:
- a. Urban Residential Areas; and
 - b. Rural Residential Areas.
- (2) Urban Residential Areas as referred to in paragraph (1) letter a with an area of approximately 6,519 (six thousand five hundred and nineteen) hectares are spread throughout the Regional Territory.
- (3) The Rural Settlement Area as referred to in paragraph (1) letter b with an area of approximately 22,434 (twenty two thousand four hundred and thirty four) hectares is spread throughout the Regional Territory.

Paragraph 9 Defense and Security Area

Article 39

- (1) The Defense and Security Area as referred to in Article 31 letter h with an area of approximately 67 (sixty seven) hectares is an area of the Indonesian National Armed Forces (TNI).
- (2) The TNI as referred to in paragraph (1) includes:
- a. Indonesian Army;
 - b. Indonesian Navy; and
 - c. Indonesian Air Force.
- (3) The Indonesian Army as referred to in paragraph (2) letter a includes:
- a. Military District Command (KODIM) 0801 in Pacitan District; and
 - b. Military District Command (KORAMIL) throughout the Regional Area.
- (4) The Indonesian Navy as referred to in paragraph (2) letter b includes:
- a. Integrated Fisheries and Maritime Security Post (POSKAMLADU) in Pacitan District; and
 - b. Type D Naval Base (LANAL) in Pacitan District.

- (5) The Indonesian Air Force as referred to in paragraph (2) letter c includes:
- a. Pacitan Air Force Airfield in Pacitan District; b. Tumpak Rinjing Shooting Range in Pringkuku District;
 - c. Rahlat KOOPSAU II in Pringkuku District; and
 - d. Rahlat KOOPSAU II in Pacitan District.

CHAPTER VI
STRATEGIC AREA

Part One
General

Article 40

- (1) Strategic areas consist of:
- a. Strategic Areas of Provinces in the Region; and
 - b. strategic district areas.
- (2) The strategic areas of the district as referred to in paragraph (1) letter b are depicted on the map.

Part Two
Strategic Areas of Provinces in the Region

Article 41

- (1) Strategic Areas of the Province in the Regions as referred to in Article 40 paragraph (1) letter a consists of:
- a. strategic areas from the perspective of economic growth interests;
And
 - b. strategic areas from the perspective of resource utilization interests natural resources and/or high technology.
- (2) Strategic areas from the perspective of economic growth interests as referred to in paragraph (1) letter a include:
- a. Regional agropolitan area in the form of the Wilis Agropolitan System;
 - b. The Trenggalek – Pacitan – Tulungagung Minapolitan System.
- (3) The strategic area from the perspective of the interests of utilizing natural resources and/or high technology as referred to in paragraph (1) letter b is the Sudimoro PLTU power plant area.

Part Three
Strategic Area of Regency

Article 42

- (1) The Regency Strategic Area as referred to in Article 40 Article (1) letter b includes:
- a. strategic areas from the perspective of economic growth interests;
And
 - b. strategic areas from the perspective of functional interests and environmental carrying capacity.
- (2) Strategic areas from the perspective of economic growth interests as referred to in paragraph (1) letter a include:
- a. strategic tourism areas include:
 - 1. strategic tourism area of Klayar Regency and its surroundings;
 - 2. strategic tourism area of Watu Karung Regency and surrounding area;

- 3. strategic tourism areas of the Regency/City and surrounding areas;
- 4. strategic tourism areas of Taman Regency, Soge and surrounding areas; and
- 5. strategic tourism area of Pidakan Regency, Dangkal, Gununglimo and surrounding areas.
- b. strategic agropolitan areas include:
 - 1. Nawangan District; and
 - 2. Bandar District.
- (3) The strategic area from the perspective of functional interests and environmental carrying capacity as referred to in paragraph (1) letter b is the Gunungsewu Karst Natural Landscape Area which is part of the Pacitan Karst KSPN and its surroundings.
- (4) The aim of developing strategic areas from the perspective of economic growth interests as referred to in paragraph (2) is to create superior regional tourism and agriculture sectors that can drive economic growth.
- (5) The aim of developing strategic areas from the perspective of functional interests and environmental carrying capacity as referred to in paragraph (3) is to realize the Pacitan eco-karst area (*geopark*) to improve the quality and diversification of the attractiveness of tourism destinations.
- (6) The direction of strategic area development from the perspective of economic growth interests as referred to in paragraph (2) is in the form of direction for the development of superior regional tourism and agriculture sectors which can drive economic growth.
- (7) The direction of strategic area development from the perspective of functional interests and environmental carrying capacity as referred to in paragraph (3) is in the form of direction for the development of the Pacitan eco-karst area (*geopark*) to improve the quality and diversification of the attractiveness of tourism destinations.

CHAPTER VII
DIRECTIONS FOR THE UTILIZATION OF REGIONAL SPACE

Part One
General

Article 43

Directions for the Utilization of Regional Spatial Space as referred to in Article 3 letter f, include:

- a. KKPR provisions;
- b. Indications of the Main 5 (five) Year Medium Term Program; and c. Synchronization of Spatial Utilization Programs.

Part Two
KKPR Provisions

Article 44

- (1) The provisions of KKPR as referred to in Article 43 letter a consist of on:
 - a. KKPR for business activities;
 - b. KKPR for non-business activities; and
 - c. KKPR for activities of a national strategic nature.
- (2) The implementation of KKPR as referred to in paragraph (1) is carried out in accordance with the provisions of statutory regulations.

Part Three
Indications for the Main 5 (five) Year Medium Term Program

Article 45

- (1) Indications for the 5 (five) Year Medium Term Main Program as referred to in Article 43 letter b include:
 - a. indication of the main medium-term program for the first 5 (five) years;
And
 - b. indication of the main medium-term program for the second 5 (five) years up to 5 (five) years fourth.
- (2) Indications for the main medium-term program for the first 5 (five) years as referred to in paragraph (1) letter a include:
 - a. main program;
 - b. location;
 - c. funding sources;
 - d. implementing agency; and
 - e. implementation time.
- (3) The main programs as referred to in paragraph (2) letter a include:
 - a. realization of the district's Regional Spatial Structure plan;
 - b. realization of the district's Regional Spatial Pattern plan; and
 - c. realization of the district's strategic area plan.
- (4) The location as referred to in paragraph (2) letter b is a place where the proposed main program will be implemented;
- (5) The funding sources as referred to in paragraph (2) letter c, come from from:
 - a. State Revenue and Expenditure Budget (APBN);
 - b. Provincial Revenue and Expenditure Budget (APBD);
 - c. Regional Revenue and Expenditure Budget (APBD) of the Regency;
 - d. Village Revenue and Expenditure Budget;
 - e. Society; and
 - f. other legitimate funding sources.
- (6) The implementing agencies as referred to in paragraph (2) letter d include:
 - a. Central Government;
 - b. Provincial Government;
 - c. District Government; d. Village Government; and
 - e. Society.
- (7) The implementation time as referred to in paragraph (2) letter e contains the proposed main program for the first 5 (five) years (2023 – 2027) which is detailed in the annual main program.
- (8) Indications for the main medium-term program for the second 5 (five) years to the fourth 5 (five) years as referred to in paragraph (1) letter b include:
 - a. Indications of the main medium-term program for the second 5 (five) years (Year 2028 – 2032);
 - b. Indications for the third 5 (five) year medium-term main program (2033 – 2037); and
 - c. Indications of the fourth 5 (five) year medium-term main program (Year 2038 – 2043).

Article 46

(1) Indications for the main medium-term program for the second 5 (five) years (2028 – 2032) as referred to in Article 45 paragraph (8) letter a include:

- a. realization of the Spatial Structure plan;
- b. realization of the Spatial Pattern plan; and
- c. realization of the Regency Strategic Area.

(2) The realization of the Spatial Structure plan as referred to in paragraph (1) letter a includes:

- a. realization of a settlement center system; and
- b. realization of infrastructure network system.

(3) The realization of the settlement center system as referred to in paragraph (2) letter a includes:

- a. encouraging the development of PKW includes:
 - 1. preparation of detailed spatial planning; 2. improvement of basic facilities and infrastructure as an economic and social center; and
 - 3. Socialization of Spatial Planning.
- b. encouraging the development of street vendors includes:
 - 1. preparation of detailed spatial planning; 2. optimization of basic facilities and infrastructure; and
 - 3. Socialization of Spatial Planning.
- c. encouraging the development of PPK includes:
 - 1. preparation of detailed spatial planning;
 - 2. improvement and optimization of basic facilities and infrastructure:
And
 - 3. Socialization of Spatial Planning.
- d. encourage the development of PPL including:
 - 1. preparation of detailed spatial planning;
 - 2. improvement and optimization of basic facilities and infrastructure;
And
 - 3. Socialization of Spatial Planning.
- e. increasing interaction between rural activity centers and urban areas in stages include:
 - 1. preparation of integrated regional development programs;
 - 2. preparation of a program for developing urban-rural linkages
(*urban-rural linkage*);
 - 3. Increased accessibility between urban and rural areas
Rural Areas;
 - 4. increasing the role and function of rural areas;
 - 5. arrangement of rural settlements;
 - 6. encourage the growth of rural areas;
 - 7. development of accessibility to border villages; and
 - 8. improving basic facilities and infrastructure in rural areas.

(4) The realization of the infrastructure network system as referred to in paragraph (2) letter b includes:

- a. realization of the transportation network system;
- b. realization of the energy network system;
- c. realization of telecommunication network system;
- d. realization of the water resources network system; and
- e. realization of other infrastructure network systems.

(5) The realization of the transportation network system as referred to in Article (4) letter a includes:

- a. development of road network systems;
- b. development of a marine transportation network system; and

- c. development of public airports and special airports.
- (6) Development of the road network system as referred to in paragraph (5) letter a includes:
 - a. development of primary arterial roads;
 - b. development of primary collector roads;
 - c. development of secondary collector roads;
 - d. development of primary local roads;
 - e. development of secondary environmental roads;
 - f. development of toll roads;
 - g. development of accessibility between areas in the Gunung Sewu Geopark and KSPN;
 - h. construction of an alternative road from Ponorogo to Pacitan;
 - i. development of roads between PKL, PPK and PPL;
 - j. development of local roads to border areas, industry, tourism and other areas;
 - k. development of the Kembang - Pelabuhan road section (connecting the ring road to the regional feeder port (Pacitan Port);
 - l. development of passenger terminals; and
 - m. road network system support.
- (7) Development of the marine transportation network system as referred to in paragraph (5) letter b includes:
 - a. development of regional feeder ports (Pacitan Port); b. development of special terminals; c. development of Coastal Fishing Ports; and
 - d. development of Fish Landing Base.
- (8) The development of public airports and special airports as referred to in paragraph (5) letter c includes:
 - a. construction of Feeder Airports; And
 - b. development of special military airports.
- (9) The realization of the energy network system as referred to in paragraph (4) letter b includes:
 - a. development of oil and gas infrastructure network systems;
And
 - b. development of electricity infrastructure networks.
- (10) Development of the oil and gas infrastructure network system as referred to in paragraph (9) letter a includes:
 - a. development of LPG Bulk Transportation and Filling Stations (SPPBE);
 - b. development of Public Fuel Filling Stations (SPBU); c. development of LPG Fuel Filling Stations (SPBE); and
 - d. development of Fishermen's Fuel Filling Stations (SPBN).
- (11) Development of electricity infrastructure networks as referred to in referred to in paragraph (9) letter b includes:
 - a. development of electricity generation infrastructure and facilities supporters include:
 - 1. Hydroelectric Power Plant (PLTA);
 - 2. Steam Power Plant (PLTU);
 - 3. Geothermal Power Plant (PLTP);
 - 4. Solar Power Plant (PLTS);
 - 5. Wind Power Plant (PLTB);
 - 6. Micro Hydro Power Plant (PLTMH);
 - 7. other power plants:
 - a) biofuel power plant (*bio ethanol*) and biodiesel); and
 - b) *biomass* power plants .

- b. development of electricity distribution infrastructure and facilities
supporters include:
 - 1. development of inter-system electric power transmission networks;
 - 2. development of electricity distribution networks; and
 - 3. development of electrical substations.
- (12) The realization of the telecommunications network system as referred to in Article (4) letter c includes:
 - a. development of fixed networks in the form of development of cable systems;
And
 - b. development of mobile networks in the form of network development
mobile mobile.
- (13) The realization of the water resources network system as referred to in paragraph (4) letter d includes:
 - a. development of irrigation networks;
 - b. development of flood control systems; and
 - c. development of water resource buildings.
- (14) Development of irrigation networks as referred to in paragraph (13) letter a includes:
 - a. development of primary irrigation networks;
 - b. development of secondary irrigation networks; and
 - c. development of tertiary irrigation networks.
- (15) Development of flood control systems as referred to in Article (13) letter b includes:
 - a. development of flood control networks includes:
 - 1. arrangement and management of river basins; and
 - 2. river normalization.
 - b. development of flood control structures includes:
 - 1. construction of parapets and rehabilitation of Asemgandok river bank protection;
 - 2. construction of flood retaining walls;
 - 3. construction of *groundsill* and *checkdam*;
 - 4. construction of river bank reinforcements;
 - 5. construction of flood control ponds; and
 - 6. construction of reservoirs, dams, ponds and bozems.
- (16) Development of water resource buildings as referred to in Article (13) letter c includes:
 - a. development of the Tukul Dam; and
 - b. construction of the Wonodadi Dam.
- (17) The embodiment of other infrastructure network systems as referred to in paragraph (4) letter e includes:
 - a. development of drinking water supply systems (SPAM);
 - b. development of wastewater management systems (SPAL);
 - c. development of a hazardous and toxic waste management system (B3);
 - d. development of waste network systems;
 - e. development of a disaster evacuation network system; and
 - f. development of drainage systems.
- (18) Development of drinking water supply systems (SPAM) as referred to in paragraph (17) letter a includes:
 - a. development of raw water units;
 - b. development of raw water networks;
 - c. development of production units;
 - d. development of production networks;
 - e. development of distribution units; f.
 - development of service units;

- g. development of rainwater reservoirs;
 - h. development of shallow wells; i.
 - development of pump wells; and
 - j. control and supervision of groundwater utilization.
- (19) Development of wastewater management systems (SPAL) as referred to in paragraph (17) letter b includes:
- a. development of non-domestic wastewater management system infrastructure by strengthening and developing industrial wastewater treatment installations; and
 - b. development of wastewater management system infrastructure domestic.
- (20) Development of a hazardous and toxic waste management system (B3) as referred to in paragraph (17) letter c includes:
- a. Temporary storage of B3 waste is carried out by the waste producer B3; and
 - b. B3 waste collection is carried out by B3 waste producers and/or other parties who have a B3 waste management permit.
- (21) Development of the waste network system as referred to in paragraph (17) letter d includes:
- a. development of TPS3R, TPS and TPST;
 - b. development and construction of landfills; and
 - c. household scale waste management through a *reduce, reuse, and recycle approach*.
- (22) Development of a disaster evacuation network system as referred to in paragraph (17) letter e includes:
- a. development of disaster evacuation routes;
 - b. development of disaster evacuation sites; and
 - c. installation of disaster evacuation route signs.
- (23) Development of the drainage system as referred to in paragraph (17) letter f includes:
- a. development of a drainage system that is integrated with the system river basin unit;
 - b. development of primary drainage systems;
 - c. development of secondary drainage systems; and
 - d. development of tertiary drainage systems.
- (24) Realization of the Spatial Pattern plan as referred to in paragraph (1) letter b includes:
- a. realization of Protected Areas; And
 - b. realization of Cultivation Areas.
- (25) The realization of the Protected Area as referred to in paragraph (24) letter a includes:
- a. Water bodies;
 - b. Areas that provide protection to subordinate areas;
 - c. Local Protected Areas; And
 - d. Cultural Heritage Area.
- (26) The embodiment of the Water Body as referred to in paragraph (25) letter a includes:
- a. regulation of water bodies;
 - b. determination of the use of water bodies;
 - c. maintenance of water bodies;
 - d. conservation and utilization of reservoirs; and
 - e. conservation and utilization of springs.
- (27) Realization of areas that provide protection for areas His subordinates as referred to in paragraph (25) letter b include:

- a. supervision and monitoring for the preservation of Forest Areas Protect;
 - b. land security and control in Protected Forest Areas;
 - c. preservation of biodiversity and its ecosystem;
 - d. Accelerating the rehabilitation of protected forest areas with plants which is in accordance with the protective function;
 - e. strengthening institutions and participation of land-owning communities around the Protected Forest Area; And
 - f. carry out coaching and outreach programs to the community in efforts to preserve Protected Forest Areas.
- (28) The realization of Local Protection Areas as referred to in paragraph (25) letter c includes:
- a. regulation of buildings above the Local Protection Area;
 - b. Determination of the Utilization of Local Protected Area Space;
 - c. designation of urban green open space areas; d. planting mangroves along the coast; and
 - e. maintain and preserve mangrove ecosystem areas.
- (29) The realization of Cultural Heritage Areas as referred to in paragraph (25) letter d is in the form of preserving buildings, structures, sites and objects suspected of being cultural heritage.
- (30) Realization of Cultivation Areas as referred to in paragraph (24) letter b includes:
- a. Production Forest Area; b. Community Plantation Area;
 - c. Agricultural Area; d. Fisheries Area;
 - e. Industrial Designation Area; f. Tourism Area; g. Residential Areas;
 - And
 - h. Defense and Security Area.
- (31) The realization of Production Forest Areas as referred to in paragraph (30) letter a in the form of development of Permanent Production Forest Areas includes:
- a. area determination and strategies for handling Forest Areas Fixed Production based on land suitability;
 - b. regulating planting patterns and cutting patterns to maintain land cover; and
 - c. development of cooperation in managing Permanent Production Forest Areas with the community.
- (32) The realization of the People's Plantation Area as referred to in paragraph (30) letter b is in the form of developing people's plantation commodities;
- (33) The realization of Agricultural Areas as referred to in paragraph (30) letter c includes:
- a. development of food crops;
 - b. development of plantation crops; and
 - c. development of horticultural crops.
- (34) The realization of the Fisheries Area as referred to in paragraph (30) letter d includes:
- a. increasing fisheries productivity;
 - b. improving fisheries facilities and infrastructure;
 - c. development of freshwater fisheries cultivation through cultivation in ponds and rivers;
 - d. development of a sustainable fisheries processing industry; And
 - e. improving the marketing of fishery products.

- (35) The realization of Industrial Designation Areas as referred to in Article (30) letter e includes:
- a. control and supervision of Industrial Designated Areas;
 - b. development of green open space in industrial use areas; And
 - c. provision of facilities and infrastructure for Industrial Areas that are sustainable and environmentally friendly.
- (36) The realization of the Tourism Area as referred to in paragraph (30) letter f includes:
- a. development of the Gunung Sewu *Geopark* ;
 - b. increasing tourism promotion;
 - c. development and improvement of standard facilities and infrastructure according to the level of service of the tourist destination;
 - d. fostering tourism-aware communities;
 - e. optimizing cultural, natural and local unique potential as potential tourist destinations; and
 - f. formation of intra and inter-district tourism route patterns.
- (37) Realization of Residential Areas as referred to in paragraph (30) letter g includes:
- a. development of urban residential areas; and
 - b. development of rural settlement areas.
- (38) Development of Urban Residential Areas as referred to in paragraph (37) letter a includes:
- a. provision of sustainable and environmentally friendly facilities and infrastructure for urban settlement areas;
 - b. developing public space facilities and green open space;
 - c. provision of various socio-economic facilities that are capable encourage the development of urban areas;
 - d. development of integrated urban settlement areas;
 - e. improving the quality of settlements and preventing slum areas;
- And
- f. control and supervision of urban residential areas in disaster-prone areas.
- (39) Development of Rural Settlement Areas as referred to in paragraph (37) letter b includes:
- a. provision of sustainable and environmentally friendly facilities and infrastructure for rural settlement areas;
 - b. development of Rural Settlement Areas integrated with agricultural business areas;
- c. provision of various socio-economic facilities that are capable encourage the development of rural areas;
- d. improving the quality of settlements and preventing slum areas;
- And
- e. control and supervision of Rural Settlement Areas in disaster-prone areas.
- (40) The realization of the Defense and Security Area as referred to in paragraph (30) letter h includes:
- a. arrangement and management of Defense and Security Areas land, sea and air;
 - b. fulfillment of standard requirements for military, defense and security needs on land, sea and air for residential areas in the surrounding area; and
- c. development of defense and security facilities and infrastructure land, sea and air.

- (41) The realization of the strategic district area as referred to in Article (1) letter c includes:
- a. development of supporting infrastructure for tourism areas;
 - b. development of supporting infrastructure for the agropolitan area; and
 - c. development of supporting infrastructure for strategic areas
Karst landscape of Mount Sewu.

Article 47

- (1) Indications for the main medium-term program for the third 5 (five) years (2033 – 2037) as referred to in Article 45 paragraph (8) letter b include:
- a. realization of the Spatial Structure plan;
 - b. realization of the Spatial Pattern plan; and
 - c. realization of the Regency Strategic Area.
- (2) The realization of the Spatial Structure plan as referred to in paragraph (1) letter a includes:
- a. realization of a settlement center system; and
 - b. realization of infrastructure network system.
- (3) The realization of the settlement center system as referred to in paragraph (2) letter a includes:
- a. encouraging the development of PKW includes:
 - 1. preparation of detailed spatial planning; 2. improvement of basic facilities and infrastructure as an economic and social center; and
 - 3. Socialization of Spatial Planning.
 - b. encouraging the development of street vendors includes:
 - 1. preparation of detailed spatial planning; 2. optimization of basic facilities and infrastructure; and
 - 3. Socialization of Spatial Planning.
 - c. encouraging the development of PPK includes:
 - 1. preparation of detailed spatial planning;
 - 2. improvement and optimization of basic facilities and infrastructure:
And
 - 3. Socialization of Spatial Planning.
 - d. encourage the development of PPL including:
 - 1. preparation of detailed spatial planning;
 - 2. improvement and optimization of basic facilities and infrastructure;
And
 - 3. Socialization of Spatial Planning.
 - e. increasing interaction between rural activity centers and urban areas in stages include:
 - 1. preparation of integrated regional development programs;
 - 2. preparation of a program for developing urban-rural linkages
(*urban-rural linkage*);
 - 3. Increased accessibility between urban and rural areas
Rural Areas;
 - 4. increasing the role and function of rural areas;
 - 5. arrangement of rural settlements;
 - 6. encourage the growth of rural areas;
 - 7. development of accessibility to border villages; and
 - 8. improving basic facilities and infrastructure in rural areas.
- (4) The realization of the infrastructure network system as referred to in paragraph (2) letter b includes:
- a. realization of the transportation network system;
 - b. realization of the energy network system;

- c. realization of telecommunication network system;
 - d. realization of the water resources network system; and
 - e. realization of other infrastructure network systems.
- (5) The realization of the transportation network system as referred to in Article (4) letter a includes:
- a. development of road network systems;
 - b. development of a marine transportation network system; and
 - c. development of public airports and special airports.
- (6) Development of the road network system as referred to in paragraph (5) letter a includes:
- a. development of primary arterial roads;
 - b. development of primary collector roads;
 - c. development of secondary collector roads;
 - d. development of primary local roads;
 - e. development of secondary environmental roads;
 - f. development of toll roads;
 - g. development of accessibility between areas in the Gunung Sewu Geopark and KSPN;
 - h. construction of an alternative road from Ponorogo to Pacitan;
 - i. development of roads between PKL, PPK and PPL;
 - j. development of local roads to border areas, industry, tourism and other areas;
 - k. development of the Kembang - Pelabuhan road section (connecting the ring road to the regional feeder port (Pacitan Port);
 - l. development of passenger terminals; and
 - m. road network system support.
- (7) Development of the marine transportation network system as referred to in paragraph (5) letter b includes:
- a. development of regional feeder ports (Pacitan Port); b. development of special terminals; c. development of Coastal Fishing Ports; and
 - d. development of Fish Landing Base.
- (8) The development of public airports and special airports as referred to in paragraph (5) letter c includes:
- c. construction of Feeder Airports; And
 - d. development of special military airports.
- (9) The realization of the energy network system as referred to in paragraph (4) letter b includes:
- a. development of oil and gas infrastructure network systems; And
 - b. development of electricity infrastructure networks.
- (10) Development of the oil and gas infrastructure network system as referred to in paragraph (9) letter a includes:
- a. development of LPG Bulk Transportation and Filling Stations (SPPBE);
 - b. development of Public Fuel Filling Stations (SPBU); c. development of LPG Fuel Filling Stations (SPBE); and
 - d. development of Fishermen's Fuel Filling Stations (SPBN).
- (11) Development of electricity infrastructure networks as referred to in referred to in paragraph (9) letter b includes:
- a. development of electricity generation infrastructure and facilities supporters include:
 - 1. Hydroelectric Power Plant (PLTA);
 - 2. Steam Power Plant (PLTU);
 - 3. Geothermal Power Plant (PLTP);

4. Solar Power Plants (PLTS); 5. Wind Power Plants (PLTB); 6. Micro Hydro Power Plants (PLTMH); 7. Other power plants:

a. biofuel power plant (*bio ethanol*) and *biodiesel*); and b.

biomass power plants . b. development of electricity distribution infrastructure and facilities

Supporting factors

include: 1. development of inter-system power transmission networks; 2. development of power distribution networks; and 3. development of electrical substations.

(12) The realization of the telecommunications network system as referred to in Article (4) letter c includes:

a. development of fixed networks in the form of development of cable systems; And

b. development of mobile networks in the form of network development mobile mobile.

(13) The realization of the water resources network system as referred to in paragraph (4) letter d includes: a. development of irrigation networks; b. development of flood control systems; and c. development of water resources buildings.

(14) Development of irrigation networks as referred to in paragraph (13) letter a includes:

a. development of primary irrigation networks; b. development of secondary irrigation networks; and c. development of tertiary irrigation networks.

(15) Development of flood control systems as referred to in Article (13) letter b includes:

a. development of flood control networks including: 1. arrangement and management of river basins; and 2. river normalization. b.

development of flood control structures including: 1. construction of parapets and rehabilitation of riverbank protection for the Asemgandok River; 2.

construction of flood retaining embankments; 3.

construction of *groundsills* and *checkdams*; 4.

construction of riverbank reinforcement; 5.

construction of flood control ponds; and 6. construction of reservoirs, weirs, ponds and bozems.

(16) Development of water resource buildings as referred to in Article (13) letter c includes:

a. development of the Tukul Dam; and b. development of the Wonodadi Dam.

(17) The implementation of other infrastructure network systems as referred to in paragraph (4) letter e includes: a.

development of drinking water supply systems (SPAM); b.

development of waste water management systems (SPAL); c.

development of hazardous and toxic waste management systems (B3); d. development

of waste network systems; e. development of disaster

evacuation network systems; and f. development of drainage systems.

- (18) Development of drinking water supply systems (SPAM) as referred to in paragraph (17) letter a includes:
 - a. development of raw water units;
 - b. development of raw water networks;
 - c. development of production units;
 - d. development of production networks;
 - e. development of distribution units; f.
 - development of service units;
 - g. development of rainwater reservoirs;
 - h. development of shallow wells; i.
 - development of pump wells; and
 - j. control and supervision of groundwater utilization.
- (19) Development of wastewater management systems (SPAL) as referred to in paragraph (17) letter b includes:
 - a. development of non-domestic wastewater management system infrastructure by strengthening and developing industrial wastewater treatment installations; and
 - b. development of wastewater management system infrastructure domestic.
- (20) Development of a hazardous and toxic waste management system (B3) as referred to in paragraph (17) letter c includes:
 - a. Temporary storage of B3 waste is carried out by the waste producer B3; and
 - b. B3 waste collection is carried out by B3 waste producers and/or other parties who have a B3 waste management permit.
- (21) Development of the waste network system as referred to in paragraph (17) letter d includes:
 - a. development of TPS3R, TPS and TPST;
 - b. development and construction of landfills; and
 - c. household scale waste management through *a reduce, reuse, and recycle approach*.
- (22) Development of a disaster evacuation network system as referred to in paragraph (17) letter e includes:
 - a. development of disaster evacuation routes;
 - b. development of disaster evacuation sites; and
 - c. installation of disaster evacuation route signs.
- (23) Development of the drainage system as referred to in paragraph (17) letter f includes:
 - a. development of a drainage system that is integrated with the system river basin unit;
 - b. development of primary drainage systems;
 - c. development of secondary drainage systems; and
 - d. development of tertiary drainage systems.
- (24) Realization of the Spatial Pattern plan as referred to in paragraph (1) letter b includes:
 - a. realization of Protected Areas; And
 - b. realization of Cultivation Areas.
- (25) The realization of the Protected Area as referred to in paragraph (24) letter a includes:
 - a. Water bodies;
 - b. Areas that provide protection to subordinate areas;
 - c. Local Protected Areas; And
 - d. Cultural Heritage Area.

- (26) The embodiment of the Water Body as referred to in paragraph (25) letter a includes:
- a. regulation of water bodies;
 - b. determination of the use of water bodies;
 - c. maintenance of water bodies;
 - d. conservation and utilization of reservoirs; and
 - e. conservation and utilization of springs.
- (27) Area manifestations that provide protection to subordinate areas as intended in paragraph (25) letter b include:
- a. supervision and monitoring for the preservation of Forest Areas
Protect;
 - b. land security and control in Protected Forest Areas;
 - c. preservation of biodiversity and its ecosystem;
 - d. Accelerating the rehabilitation of protected forest areas with plants
which is in accordance with the protective function;
 - e. strengthening institutions and participation of land-owning communities
around the Protected Forest Area; And
 - f. carry out coaching and outreach programs to the community in efforts to preserve
Protected Forest Areas.
- (28) The realization of Local Protection Areas as referred to in paragraph (25) letter c includes:
- a. regulation of buildings above the Local Protection Area;
 - b. Determination of the Utilization of Local Protected Area Space;
 - c. designation of urban green open space areas; d. planting
mangroves along the coast; and
 - e. maintain and preserve mangrove ecosystem areas.
- (29) The realization of Cultural Heritage Areas as referred to in paragraph (25) letter d is in the form of preserving buildings, structures, sites and objects suspected of being cultural heritage.
- (30) Realization of Cultivation Areas as referred to in paragraph (24) letter b includes:
- a. Production Forest Area; b.
Community Plantation Area;
 - c. Agricultural Area; d.
Fisheries Area;
 - e. Industrial Designation Area; f. Tourism
Area; g. Residential Areas;
 - And
 - h. Defense and Security Area.
- (31) The realization of Production Forest Areas as referred to in paragraph (30) letter a in the form of development of Permanent Production Forest Areas includes:
- a. area determination and strategies for handling Forest Areas
Fixed Production based on land suitability;
 - b. regulating planting patterns and cutting patterns to maintain land cover; and
 - c. development of cooperation in managing Permanent Production Forest Areas with
the community.
- (32) The realization of the People's Plantation Area as referred to in paragraph (30) letter b is in the form of developing people's plantation commodities;
- (33) Realization of Agricultural Areas as referred to in paragraph (30) letter c includes:
- a. development of food crops;
 - b. development of plantation crops; and
 - c. development of horticultural crops.

- (34) The realization of the Fisheries Area as referred to in paragraph (30) letter d includes:
- a. increasing fisheries productivity;
 - b. improving fisheries facilities and infrastructure;
 - c. development of freshwater fisheries cultivation through cultivation in ponds and rivers;
 - d. development of a sustainable fisheries processing industry;
- And
- e. improving the marketing of fishery products.
- (35) The realization of Industrial Designation Areas as referred to in Article (30) letter e includes:
- a. control and supervision of Industrial Designated Areas;
 - b. development of green open space in industrial use areas; And
 - c. provision of facilities and infrastructure for Industrial Areas that are sustainable and environmentally friendly.
- (36) The realization of the Tourism Area as referred to in paragraph (30) letter f includes:
- a. development of the *Gunung Sewu Geopark* ;
 - b. increasing tourism promotion;
 - c. development and improvement of standard facilities and infrastructure according to the level of service of the tourist destination;
 - d. fostering tourism-aware communities;
 - e. optimizing cultural, natural and local unique potential as potential tourist destinations; and
 - f. formation of intra and inter-district tourism route patterns.
- (37) Realization of Residential Areas as referred to in paragraph (30) letter g includes:
- a. development of urban residential areas; and
 - b. development of rural settlement areas.
- (38) Development of Urban Residential Areas as referred to in paragraph (37) letter a includes:
- a. provision of sustainable and environmentally friendly facilities and infrastructure for urban settlement areas;
 - b. developing public space facilities and green open space;
 - c. provision of various socio-economic facilities that are capable encourage the development of urban areas;
 - d. development of integrated urban settlement areas;
 - e. improving the quality of settlements and preventing slum areas;
- And
- f. control and supervision of urban residential areas in disaster-prone areas.
- (39) Development of Rural Settlement Areas as referred to in paragraph (37) letter b includes:
- a. provision of sustainable and environmentally friendly facilities and infrastructure for rural settlement areas;
 - b. development of Rural Settlement Areas integrated with agricultural business areas;
- c. provision of various socio-economic facilities that are capable encourage the development of rural areas;
 - d. improving the quality of settlements and preventing slum areas;
- And
- e. control and supervision of Rural Settlement Areas in disaster-prone areas.

- (40) The realization of the Defense and Security Area as referred to in paragraph (30) letter h includes:
- a. arrangement and management of Defense and Security Areas
land, sea and air;
 - b. fulfillment of standard requirements for military, defense and security needs on land, sea and air for residential areas in the surrounding area; and
 - c. development of defense and security facilities and infrastructure
land, sea and air.
- (41) The realization of the strategic district area as referred to in Article (1) letter c includes:
- a. development of supporting infrastructure for tourism areas;
 - b. development of supporting infrastructure for the agropolitan area; and
 - c. development of supporting infrastructure for strategic areas
Karst landscape of Mount Sewu.

Article 48

- (1) Indications for the fourth 5 (five) year medium-term main program (2038 – 2043) as referred to in Article 45 paragraph (8) letter c include:
- a. realization of the Spatial Structure plan;
 - b. realization of the Spatial Pattern plan; and
 - c. realization of the Regency Strategic Area.
- (2) The realization of the Spatial Structure plan as referred to in paragraph (1) letter a includes:
- a. realization of a settlement center system; and
 - b. realization of infrastructure network system.
- (3) The realization of the settlement center system as referred to in paragraph (2) letter a includes:
- a. encouraging the development of PKW includes:
 - 1. preparation of detailed spatial planning; 2. improvement of basic facilities and infrastructure as an economic and social center; and
 - 3. Socialization of Spatial Planning.
 - b. encouraging the development of street vendors includes:
 - 1. preparation of detailed spatial planning; 2. optimization of basic facilities and infrastructure; and
 - 3. Socialization of Spatial Planning.
 - c. encouraging the development of PPK includes:
 - 1. preparation of detailed spatial planning;
 - 2. improvement and optimization of basic facilities and infrastructure:
And
 - 3. Socialization of Spatial Planning.
 - d. encourage the development of PPL including:
 - 1. preparation of detailed spatial planning;
 - 2. improvement and optimization of basic facilities and infrastructure;
And
 - 3. Socialization of Spatial Planning.
 - e. increasing interaction between rural activity centers and urban areas in stages include:
 - 1. preparation of integrated regional development programs;
 - 2. preparation of a program for developing urban-rural linkages
(*urban-rural linkage*);
 - 3. Increased accessibility between urban and rural areas
Rural Areas;

4. increasing the role and function of rural areas;
 5. arrangement of rural settlements;
 6. encourage the growth of rural areas;
 7. development of accessibility to border villages; and
 8. improving basic facilities and infrastructure in rural areas.
- (4) The realization of the infrastructure network system as referred to in paragraph (2) letter b includes:
- a. realization of the transportation network system;
 - b. realization of the energy network system;
 - c. realization of telecommunication network system;
 - d. realization of the water resources network system; and
 - e. realization of other infrastructure network systems.
- (5) The realization of the transportation network system as referred to in Article (4) letter a includes:
- a. development of road network systems;
 - b. development of a marine transportation network system; and
 - c. development of public airports and special airports.
- (6) Development of the road network system as referred to in paragraph (5) letter a includes:
- a. development of primary arterial roads;
 - b. development of primary collector roads;
 - c. development of secondary collector roads;
 - d. development of primary local roads;
 - e. development of secondary environmental roads;
 - f. development of toll roads;
 - g. development of accessibility between areas in the *Gunung Sewu Geopark* and KSPN;
 - h. construction of an alternative road from Ponorogo to Pacitan;
 - i. development of roads between PKL, PPK and PPL;
 - j. development of local roads to border areas, industry, tourism and other areas;
 - k. development of the Kembang - Pelabuhan road section (connecting the ring road to the regional feeder port (Pacitan Port);
 - l. development of passenger terminals; and
 - m. road network system support.
- (7) Development of the marine transportation network system as referred to in paragraph (5) letter b includes:
- a. development of regional feeder ports (Pacitan Port);
 - b. development of special terminals;
 - c. development of Coastal Fishing Ports; and
 - d. development of Fish Landing Base.
- (8) The development of public airports and special airports as referred to in paragraph (5) letter c includes:
- a. construction of Feeder Airports; And
 - b. development of special military airports.
- (9) The realization of the energy network system as referred to in paragraph (4) letter b includes:
- a. development of oil and gas infrastructure network systems;
And
 - b. development of electricity infrastructure networks.
- (10) Development of the oil and gas infrastructure network system as referred to in paragraph (9) letter a includes:
- a. development of LPG Bulk Transportation and Filling Stations (SPPBE);
 - b. development of Public Fuel Filling Stations (SPBU);

- c. development of LPG Fuel Filling Stations (SPBE); and d. development of Fishermen's Fuel Filling Stations (SPBN).
- (11) Development of electricity infrastructure networks as referred to in paragraph (9) letter b includes:
- a. development of electricity generation infrastructure and facilities
- Supporting factors include: 1. Hydroelectric Power Plant (PLTA); 2. Steam Power Plant (PLTU); 3. Geothermal Power Plant (PLTP); 4. Solar Power Plant (PLTS); 5. Wind Power Plant (PLTB); 6. Micro Hydro Power Plant (PLTMH); 7. Other power plants:
- a) biofuel power plant (*bio ethanol*) and *bio diesel*); and
- b) *biomass* power plants . b. development of electricity distribution infrastructure and facilities
- Supporting factors include: 1. development of inter-system power transmission networks; 2. development of power distribution networks; and 3. development of electrical substations.
- (12) The realization of the telecommunications network system as referred to in Article (4) letter c includes:
- a. development of fixed networks in the form of development of cable systems; And
- b. development of mobile networks in the form of network development mobile mobile.
- (13) The realization of the water resources network system as referred to in paragraph (4) letter d includes: a. development of irrigation networks; b. development of flood control systems; and c. development of water resources buildings.
- (14) Development of irrigation networks as referred to in paragraph (13) letter a includes:
- a. development of primary irrigation networks; b. development of secondary irrigation networks; and c. development of tertiary irrigation networks.
- (15) Development of flood control systems as referred to in Article (13) letter b includes:
- a. development of flood control networks including:
1. arrangement and management of river basins; and 2. river normalization. b.
- development of flood control structures including: 1. construction of parapets and rehabilitation of riverbank protection for the Asemgandok River; 2.
- construction of flood retaining embankments; 3. construction of *groundsills* and *checkdams*; 4. construction of riverbank reinforcement; 5. construction of flood control ponds; and 6. construction of reservoirs, weirs, ponds and bozems.
- (16) Development of water resource buildings as referred to in Article (13) letter c includes:
- a. development of the Tukul Dam; and b. development of the Wonodadi Dam.

- (17) The realization of other infrastructure network systems as referred to in paragraph (4) letter e includes:
- a. development of drinking water supply systems (SPAM);
 - b. development of wastewater management systems (SPAL);
 - c. development of a hazardous and toxic waste management system (B3);
 - d. development of waste network systems;
 - e. development of a disaster evacuation network system; and
 - f. development of drainage systems.
- (18) Development of drinking water supply systems (SPAM) as referred to in paragraph (17) letter a includes:
- a. development of raw water units;
 - b. development of raw water networks;
 - c. development of production units;
 - d. development of production networks;
 - e. development of distribution units; f. development of service units;
 - g. development of rainwater reservoirs;
 - h. development of shallow wells; i. development of pump wells; and
 - j. control and supervision of groundwater utilization.
- (19) Development of wastewater management systems (SPAL) as referred to in paragraph (17) letter b includes:
- a. development of non-domestic wastewater management system infrastructure by strengthening and developing industrial wastewater treatment installations; and
 - b. development of wastewater management system infrastructure domestic.
- (20) Development of a hazardous and toxic waste management system (B3) as referred to in paragraph (17) letter c includes:
- a. Temporary storage of B3 waste is carried out by the waste producer B3; and
 - b. B3 waste collection is carried out by B3 waste producers and/or other parties who have a B3 waste management permit.
- (21) Development of the waste network system as referred to in paragraph (17) letter d includes:
- a. development of TPS3R, TPS and TPST;
 - b. development and construction of landfills; and
 - c. household scale waste management through a *reduce, reuse, and recycle approach*.
- (22) Development of a disaster evacuation network system as referred to in paragraph (17) letter e includes:
- a. development of disaster evacuation routes;
 - b. development of disaster evacuation sites; and
 - c. installation of disaster evacuation route signs.
- (23) Development of the drainage system as referred to in paragraph (17) letter f includes:
- a. development of a drainage system that is integrated with the system river basin unit;
 - b. development of primary drainage systems;
 - c. development of secondary drainage systems; and
 - d. development of tertiary drainage systems.

- (24) Realization of the Spatial Pattern plan as referred to in paragraph (1) letter b includes:
- a. realization of Protected Areas; And
 - b. realization of Cultivation Areas.
- (25) The realization of the Protected Area as referred to in paragraph (24) letter a includes:
- a. Water bodies;
 - b. Areas that provide protection to subordinate areas;
 - c. Local Protected Areas; And
 - d. Cultural Heritage Area.
- (26) The embodiment of the Water Body as referred to in paragraph (25) letter a includes:
- a. regulation of water bodies;
 - b. determination of the use of water bodies;
 - c. maintenance of water bodies;
 - d. conservation and utilization of reservoirs; and
 - e. conservation and utilization of springs.
- (27) Area manifestations that provide protection to subordinate areas as intended in paragraph (25) letter b include:
- a. supervision and monitoring for the preservation of Forest Areas Protect;
 - b. land security and control in Protected Forest Areas;
 - c. preservation of biodiversity and its ecosystem;
 - d. Accelerating the rehabilitation of protected forest areas with plants which is in accordance with the protective function;
 - e. strengthening institutions and participation of land-owning communities around the Protected Forest Area; And
 - f. carry out coaching and outreach programs to the community in efforts to preserve Protected Forest Areas.
- (28) The realization of Local Protection Areas as referred to in paragraph (25) letter c includes:
- a. regulation of buildings above the Local Protection Area;
 - b. Determination of the Utilization of Local Protected Area Space;
 - c. determination of urban green open space areas; d. planting mangroves along the coast; and
 - e. maintain and preserve the mangrove ecosystem area.
- (29) The realization of Cultural Heritage Areas as referred to in paragraph (25) letter d is in the form of preserving buildings, structures, sites and objects suspected of being cultural heritage.
- (30) Realization of Cultivation Areas as referred to in paragraph (24) letter b includes:
- a. Production Forest Area; b. Community Plantation Area;
 - c. Agricultural Area; d. Fisheries Area;
 - e. Industrial Designation Area; f. Tourism Area; g. Residential Areas; And
 - h. Defense and Security Area.

- (31) The realization of Production Forest Areas as referred to in paragraph (30) letter a in the form of development of Permanent Production Forest Areas includes:
- a. area determination and strategies for handling Forest Areas
Fixed Production based on land suitability;
 - b. regulating planting patterns and cutting patterns to maintain land cover; and
 - c. development of cooperation in managing Permanent Production Forest Areas with the community.
- (32) The realization of the People's Plantation Area as referred to in paragraph (30) letter b is in the form of developing people's plantation commodities;
- (33) Realization of Agricultural Areas as referred to in paragraph (30) letter c includes:
- a. development of food crops;
 - b. development of plantation crops; and
 - c. development of horticultural crops.
- (34) The realization of the Fisheries Area as referred to in paragraph (30) letter d includes:
- a. increasing fisheries productivity;
 - b. improving fisheries facilities and infrastructure;
 - c. development of freshwater fisheries cultivation through cultivation in ponds and rivers;
 - d. development of a sustainable fisheries processing industry;
- And
- e. improving the marketing of fishery products.
- (35) The realization of Industrial Designation Areas as referred to in Article (30) letter e includes:
- a. control and supervision of Industrial Designated Areas;
 - b. development of green open space in industrial use areas; And
 - c. provision of facilities and infrastructure for Industrial Areas that are sustainable and environmentally friendly.
- (36) The realization of the Tourism Area as referred to in paragraph (30) letter f includes:
- a. development of the Gunung Sewu Geopark;
 - b. increasing tourism promotion;
 - c. development and improvement of standard facilities and infrastructure
according to the level of service of the tourist destination;
 - d. fostering tourism-aware communities;
 - e. optimizing cultural, natural and local unique potential as potential tourist destinations;
and
 - f. formation of intra and inter-district tourism route patterns.
- (37) The realization of Residential Areas as referred to in paragraph (30) letter g includes:
- a. development of urban residential areas; and
 - b. development of rural settlement areas.
- (38) Development of Urban Residential Areas as referred to in paragraph (37) letter a includes:
- a. provision of sustainable and environmentally friendly facilities and infrastructure for urban settlement areas;
 - b. developing public space facilities and green open space;
 - c. provision of various socio-economic facilities that are capable
encourage the development of urban areas;
 - d. development of integrated urban settlement areas;
 - e. improving the quality of settlements and preventing slum areas; and

f. control and supervision of urban settlement areas in disaster-prone areas.

(39) Development of Rural Settlement Areas as referred to in paragraph (37) letter b includes:

- a. provision of sustainable and environmentally friendly facilities and infrastructure for rural settlement areas;
- b. development of Rural Settlement Areas integrated with agricultural business areas;
- c. provision of various socio-economic facilities that are capable encourage the development of rural areas;
- d. improving the quality of settlements and preventing areas slum; and
- e. control and supervision of rural settlement areas in disaster-prone areas.

(40) The realization of the Defense and Security Area as referred to in paragraph (30) letter h includes:

- a. arrangement and management of Defense and Security Areas land, sea and air;
- b. fulfillment of standard requirements for military, defense and security needs on land, sea and air for residential areas in the surrounding area; and
- c. development of defense and security facilities and infrastructure land, sea and air.

(41) The realization of the strategic district area as referred to in Article (1) letter c includes:

- a. development of supporting infrastructure for tourism areas;
- b. development of supporting infrastructure for the agropolitan area; and
- c. development of supporting infrastructure for strategic areas Karst landscape of Mount Sewu.

Part Four
Synchronization of Space Utilization Programs
Article 49

(1) The synchronization of the Spatial Utilization Program as referred to in Article 43 letter c is implemented in accordance with the provisions of laws and regulations, resulting in the following documents:

- a. Synchronization of the 5 (five) yearly medium-term Spatial Utilization Program; and
- b. Synchronization of short-term Space Utilization Program 1 (one) annual.

(2) The Spatial Utilization Program Synchronization Document as referred to in paragraph (1) shall be input for the preparation of development plans and implementation of reviews in the context of revising the RTR.

CHAPTER VIII
PROVISIONS ON CONTROL OF THE UTILIZATION OF REGIONAL SPACE

Part One
General
Article 50

(1) The provisions on Controlling the Utilization of Regional Space are used as a reference in implementing Controlling the Utilization of Regional Space.

- (2) Provisions for Controlling the Utilization of Regional Space include: a. general zoning provisions; b. assessment of the implementation of Utilization of Space; c. provisions on incentives and disincentives; and d. directions for sanctions.

Part Two General
Provisions on Zoning Paragraph 1
General Article
51 (1)
General

provisions on zoning as referred to in Article 51 paragraph (2) letter a consist of: a. general provisions on spatial structure zoning; b. general provisions on spatial pattern zoning; and c. special provisions.

- (2) The general provisions for zoning as referred to in paragraph (1) include: a. permitted activities; b. permitted activities with conditions; c. prohibited activities; and d. intensity of spatial utilization.

- (3) The general zoning provisions as referred to in paragraph (1) are used as guidelines for Regional Governments in drafting zoning regulations.

Paragraph 2
General Provisions for Spatial Structure Zoning Article 52
General

provisions for spatial structure zoning as referred to in Article 52 paragraph (1) letter a include: a. general provisions for zoning of settlement center systems; and b. general provisions for zoning of infrastructure network systems, including: 1. general provisions for zoning of transportation network systems; 2. general provisions for zoning of energy network systems; 3. general provisions for zoning of telecommunications network systems; 4. general provisions for zoning of water resources network systems; and 5. general provisions for zoning of other infrastructure network systems.

Article 53

- (1) General provisions for zoning of the settlement center system as follows: referred to in Article 53 letter a includes: a. general provisions for PKW zoning; b. general provisions for PKL zoning; c. general provisions for PPK zoning; and d. general provisions for PPL zoning.
- (2) General provisions for PKW zoning as referred to in paragraph (1) letter a includes: a. permitted activities include: 1. development of regional scale activities (province or several districts/cities); and 2. development of facilities and infrastructure in accordance with the area served. b. conditionally permitted activities include: 1. Protected Area activities by taking into account the capacity of the protected area. environmental support and carrying capacity; and

- 2. Cultivation Area activities taking into account the environmental carrying capacity and capacity.
- c. Activities that reduce the function of the PKW are not permitted.
- (3) General provisions for PKL zoning as referred to in paragraph (1) letter b includes:
 - a. permitted activities include:
 - 1. development of local scale activities (district or several sub-districts); and
 - 2. development of facilities and infrastructure according to the region served.
 - b. Conditionally permitted activities include:
 - 1. Protected Area activities taking into account the capacity environmental support and carrying capacity; and
 - 2. Cultivation Area activities taking into account the environmental carrying capacity and capacity.
 - c. Activities that reduce the function of street vendors are not permitted.
- (4) General provisions for PPK zoning as referred to in paragraph (1) letter c includes:
 - a. permitted activities include:
 - 1. development of activities at the regional level (sub-district or several villages); and
 - 2. development of facilities and infrastructure according to the region served.
 - b. Conditionally permitted activities include:
 - 1. Protected Area activities taking into account the capacity environmental support and carrying capacity; and
 - 2. Cultivation Area activities taking into account the environmental carrying capacity and capacity.
 - c. Activities that reduce the function of the PPK are not permitted.
- (5) General provisions for PPL zoning as referred to in paragraph (1) letter d includes:
 - a. permitted activities include:
 - 1. development of neighborhood-scale activities (between villages); and
 - 2. development of facilities and infrastructure according to the region served.
 - b. Conditionally permitted activities include:
 - 1. Protected Area activities taking into account the capacity environmental support and carrying capacity; and
 - 2. Cultivation Area activities taking into account the environmental carrying capacity and capacity.
 - c. Activities that reduce the function of PPL are not permitted.

Article 54

The general provisions for zoning the transportation network system as referred to in Article 53 letter b number 1 include:

- a. general provisions for zoning of road network systems;
- b. general provisions for zoning of marine transportation network systems; and
- c. general provisions for zoning of public airports and special airports.

Article 55

- (1) General provisions for zoning of the road network system as referred to in Article 55 letter a include:
 - a. general provisions for zoning primary arterial roads;
 - b. general provisions for primary collector road zoning;
 - c. general provisions for zoning secondary collector roads;

- d. general provisions for zoning primary local roads;
 - e. general provisions for secondary local road zoning;
 - f. general provisions for zoning secondary environmental roads;
 - g. general provisions for zoning of toll roads; h.
 - general provisions for zoning of type A passenger terminals;
 - i. general provisions for zoning of type B passenger terminals; and j.
 - general provisions for zoning of type C passenger terminals.
- (2) General provisions for zoning primary arterial roads as referred to in Article (1) letter a includes:
- a. permitted activities include:
 - 1. development of complementary infrastructure and road utilities; and
 - 2. development of green open spaces, paths and road islands. b.
 - conditionally permitted development of built-up land in the area road property; and
 - c. It is not permitted to use and exploit road space which results in disruption of the road's function without permission from the road operator.
- (3) General provisions for zoning primary collector roads as referred to in paragraph (1) letter b include:
- a. permitted activities include:
 - 1. development of complementary infrastructure and road utilities; and
 - 2. development of green open spaces, paths and road islands. b.
 - conditionally permitted activities include: 1. provision of parking facilities within road spaces on roads district, village or city roads; and 2. development of built-up land in road space.
 - c. It is not permitted to use and exploit road space which results in disruption of the road's function without permission from the road operator.
- (4) General provisions for zoning secondary collector roads as referred to in paragraph (1) letter c include:
- a. permitted activities include:
 - 1. development of complementary infrastructure and road utilities; and
 - 2. development of green open spaces, paths and road islands. b.
 - conditionally permitted activities include: 1. provision of parking facilities within the road space on the road district, village or city roads; and 2. development of built-up land in road space.
 - c. It is not permitted to use and exploit road space which results in disruption of the road's function without permission from the road operator.
- (5) General provisions for zoning of primary local roads as referred to in Article (1) letter d includes:
- a. permitted activities include:
 - 1. development of complementary infrastructure and road utilities; and
 - 2. development of green open spaces, paths and road islands.
 - b. Conditionally permitted activities include: 1. provision of parking facilities in road space on district roads, village roads or city roads;
 - 2. development of built-up land in road space; and
 - 3. Commercial activities in the form of trade and services with moderate intensity in road space with permission from the road organizer.

- c. It is not permitted to use and exploit road space which results in disruption of the road's function without permission from the road operator.
- (6) General provisions for zoning secondary local roads as referred to in paragraph (1) letter e include:
- a. permitted activities include:
 - 1. development of complementary infrastructure and road utilities; and
 - 2. development of green open spaces, paths and road islands.
 - b. conditionally permitted activities that include:
 - 1. provision of parking facilities within road space on district roads, village roads or city roads;
 - 2. development of built-up land within road space; and
 - 3. Commercial activities in the form of trade and services with moderate intensity in road space with permission from the road organizer.
 - c. It is not permitted to use and exploit road space which results in disruption of the road's function without permission from the road operator.
- (7) general provisions for zoning secondary environmental roads as follows: referred to in paragraph (1) letter f includes:
- a. permitted activities include:
 - 1. development of complementary infrastructure and road utilities; and
 - 2. development of green open spaces.
 - b. conditionally permitted activities that include:
 - 1. provision of parking facilities within road space on district roads, village roads or city roads;
 - 2. development of built-up land within road space; and
 - 3. commercial activities in the form of trade and services with medium intensity in road space with permission from the road operator.
 - c. It is not permitted to use and exploit road space which results in disruption of the road's function without permission from the road operator.
- (8) general provisions for toll road zoning as referred to in paragraph (1) letter g includes:
- a. permitted activities include:
 - 1. development of complementary infrastructure and road utilities; and
 - 2. development of green open spaces, paths and road islands.
 - b. Conditionally permitted activities include:
 - 1. construction of rest and service areas for interests of toll road users; and
 - 2. construction of entrances and exits to and from the road toll.
 - c. It is not permitted to use and exploit road space which results in disruption of the road's function without permission from the road operator.
- (9) General provisions for zoning of type A passenger terminals as follows: referred to in paragraph (1) letter h includes:
- a. permitted activities include:
 - 1. development of operational activities, main facilities and supporting facilities for type A passenger terminals; and
 - 2. Development of a type A terminal integrated with residential areas, tourism and trade in goods and services.

- b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of goods vehicle parking areas; and
 - 3. Loading and unloading activities of goods as long as they do not interfere function of type A passenger terminal.
 - c. Activities that disrupt the security and safety of traffic and road transportation and the function of type A terminals are not permitted.
- (10) General provisions for zoning of type B passenger terminals as follows:
referred to in paragraph (1) letter i includes:
- a. permitted activities include:
 - 1. development of operational activities, main facilities and supporting facilities for type B passenger terminals; and
 - 2. Development of a type B terminal integrated with residential areas, tourism and trade in goods and services.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of goods vehicle parking areas; and
 - 3. Loading and unloading activities of goods as long as they do not interfere function of type B passenger terminal.
 - c. Activities that disrupt the security and safety of traffic and road transportation and the function of type B terminals are not permitted.
- (11) General provisions for zoning of type C passenger terminals as follows:
referred to in paragraph (1) letter j includes:
- a. permitted activities include:
 - 1. development of operational activities, main facilities and supporting facilities for type C passenger terminals; and
 - 2. Development of a type C terminal integrated with residential areas, tourism and trade in goods and services.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of goods vehicle parking areas; and
 - 3. Loading and unloading activities of goods as long as they do not interfere function of type B passenger terminal.
 - c. Activities that disrupt the security and safety of traffic and road transportation and the function of type C terminals are not permitted.

Article 56

- (1) General provisions for zoning of the marine transportation network system as follows:
referred to in Article 55 letter b includes:
- a. general provisions for regional feeder port zoning;
 - b. general provisions for zoning of special terminals; c.
 - general provisions for zoning of Coastal Fishing Ports; and
 - d. general provisions for zoning of Fish Landing Bases.
- (2) General provisions for regional feeder port zoning as referred to in
referred to in paragraph (1) letter a includes:
- a. development of operational activities, main facilities and supporting facilities for regional feeder ports, including marking devices as information on ship movements, is permitted;
 - b. Conditionally permitted activities include: 1. development of green open spaces;
 - 2. development of parking areas for goods vehicles; 3.
 - loading and unloading activities as long as they do not disrupt traffic.
 - regional feeder port function; and

4. activities that support the function of feeder ports regional.
- c. Activities that include:
 1. activities that disrupt ship routes; and
 2. activities that result in shallowing of ship routes.
- (3) General provisions for special terminal zoning as referred to in Article (1) letter b includes:
 - a. development of operational activities, main facilities and supporting facilities for special terminals including marking devices as information on ship movements is permitted; b. conditionally permitted activities include: 1. development of green open spaces;
 2. development of parking areas for goods vehicles; 3. loading and unloading activities as long as they do not disrupt traffic. special terminal functions; and
 4. activities that support special terminal functions.
- c. Activities that include:
 1. activities that disrupt ship routes; and
 2. activities that result in shallowing of ship routes.
- (4) General provisions for zoning of Coastal Fishing Ports as follows: referred to in paragraph (1) letter c includes:
 - a. development of operational activities, main facilities and supporting facilities of the Coastal Fisheries Port including marking devices as information on ship movements is permitted; b. conditionally permitted activities which include: 1. development of green open spaces;
 2. development of parking areas for goods vehicles; 3. loading and unloading activities for goods as long as they do not disrupt the function of the Coastal Fisheries Port; and
 4. activities that support the function of the Coastal Fishing Port.
- c. Activities that include:
 1. activities that disrupt ship routes; and
 2. activities that result in shallowing of ship routes.
- (5) General provisions for zoning of Fish Landing Bases as follows: referred to in paragraph (1) letter d includes:
 - a. development of operational activities, main facilities and supporting facilities for the Fish Landing Base including marking devices as information on ship movements is permitted; b. conditionally permitted activities include: 1. development of green open spaces;
 2. development of parking areas for goods vehicles; 3. loading and unloading activities for goods as long as they do not disrupt the function of the Fish Landing Base; and
 4. activities that support the function of the Fish Landing Base.
- c. Activities that include:
 1. activities that disrupt ship routes; and
 2. activities that result in shallowing of ship routes.

Article 57

- (1) The general provisions for zoning of general airports and special airports as referred to in Article 55 letter c are general provisions for zoning of special airports.

- (2) General provisions for zoning of Special Airports as referred to in paragraph (1) include:

- a. permitted activities include:
 - 1. Utilization of space for the operation and development of air transportation to strengthen the national defense and security system;
 - 2. Utilization of space for operational and development of air transportation to facilitate commodity output; and
 - 3. Utilization of space for the operation and development of air transportation to facilitate tourism, agriculture and other sectors.
- b. conditionally permitted to construct buildings in the area around helicopter and aircraft landing and take-off facilities; and
- c. It is not permitted to construct buildings with a height outside the provisions of the designated Aviation Operational Safety Area (KKOP).

Article 58

- (1) The general provisions for zoning the energy network system as referred to in Article 53 letter b number 2 include general provisions for zoning the electricity infrastructure network.
- (2) General provisions for zoning of electricity infrastructure networks as referred to in paragraph (1) include:
 - a. general provisions for zoning of Steam Power Plants (PLTU);
 - b. general provisions for zoning of Geothermal Power Plants (PLTP);
 - c. general provisions for zoning of Solar Power Plants (PLTS);
 - d. general provisions for zoning of Wind Power Plants (PLTB);
 - e. general provisions for zoning of Micro Hydro Power Plants (PLTMH);
 - f. general provisions for zoning other power plants;
 - g. general provisions for zoning of High Voltage Air Ducts (SUTT);
 - h. general provisions for zoning of Medium Voltage Air Ducts (SUTM);
 - i. general provisions for zoning of Low Voltage Air Ducts (SUTR);
 - And
 - j. general provisions for zoning of electrical substations.
- (3) General provisions for zoning of Steam Power Plants (PLTU) as referred to in paragraph (2) letter a include:
 - a. permitted activities include:
 - 1. Steam Power Plant (PLTU) buildings and equipment;
 - And
 - 2. Operational, main facilities and supporting facilities of the Steam Power Plant (PLTU).
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of electricity transmission and distribution networks and supporting facilities; 3.
 - protection and cultivation activities with attention to the safety radius; and
 - 4. Loading and unloading activities of goods as long as they do not disrupt the function of the Steam Power Plant (PLTU); c. Activities that have the potential to disrupt the function of the Steam Power Plant (PLTU) are not permitted.
- (4) General provisions for zoning of Geothermal Power Plants (PLTP) as referred to in paragraph (2) letter b include:
 - a. permitted activities include:

1. Geothermal Power Plant buildings and equipment (PLTP); and
 2. Operational, main facilities and supporting facilities of the power plant Geothermal Power Plant (PLTP).
 - b. Conditionally permitted activities include:
 1. development of green open spaces;
 2. development of electricity transmission and distribution networks and supporting facilities; 3.protection and cultivation activities with attention to the safety radius; and
 4. Loading and unloading activities of goods as long as they do not disrupt the function of the Geothermal Power Plant (PLTP); c. Activities that have the potential to disrupt the function are not permitted. Geothermal Power Plant (PLTP).
- (5) General provisions for zoning of Solar Power Plants (PLTS) as referred to in paragraph (2) letter c include:
- a. permitted activities include:
 1. Solar Power Plant buildings and equipment (PLTS); and
 2. Operational, main facilities and supporting facilities of Solar Power Plants (PLTS).
 - b. Conditionally permitted activities include:
 1. development of green open spaces;
 2. development of electricity transmission and distribution networks and supporting facilities; 3.protection and cultivation activities with attention to the safety radius; and
 4. Loading and unloading activities of goods as long as they do not disrupt the function of the Solar Power Plant (PLTS); c. Activities that have the potential to disrupt the function are not permitted. Solar Power Plant (PLTS).
- (6) General provisions for zoning Wind Power Plants (PLTB) as referred to in paragraph (2) letter d include:
- a. permitted activities include:
 1. Wind Power Plant (PLTB) buildings and equipment; and
 2. Operational, main facilities and supporting facilities of Wind Power Plants (PLTB).
 - b. Conditionally permitted activities include:
 1. development of green open spaces;
 2. development of electricity transmission and distribution networks and supporting facilities; 3.protection and cultivation activities with attention to the safety radius; and
 4. Loading and unloading activities of goods as long as they do not disrupt the function of the Wind Power Plant (PLTB); c. Activities that have the potential to disrupt the function are not permitted. Wind Power Plant (PLTB).
- (7) General provisions for zoning of Micro Hydro Power Plants (PLTMH) as referred to in paragraph (2) letter e include:
- a. permitted activities include:
 1. buildings and equipment for Micro Hydro Power Plants (PLTMH); and
 2. Operational, main facilities and supporting facilities of the power plant Micro Hydro Power Plant (PLTMH).

- b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of electricity transmission and distribution networks and supporting facilities; 3.protection and cultivation activities with attention to the safety radius; and
 - 4. Loading and unloading activities of goods as long as they do not disrupt the function of the Micro Hydro Power Plant (PLTMH).
 - c. Activities that have the potential to disrupt the function of the Micro Hydro Power Plant (PLTMH) are not permitted.
- (8) General provisions for zoning other power plants as referred to in paragraph (2) letter f in the form of biofuel *energy ethanol* and bio diesel) and *biomass* energy from livestock waste and garbage include:
- a. permitted activities include:
 - 1. buildings and equipment for biofuel energy (*bio ethanol* and bio diesel) and *bio mass* energy from livestock waste and garbage; and
 - 2. Operational, main facilities and supporting facilities for biofuel energy (*bio ethanol* and bio diesel) and *bio* energy *mass* of livestock waste and garbage.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of electricity transmission and distribution networks and supporting facilities; 3.protection and cultivation activities with attention to the safety radius; and
 - 4. Loading and unloading activities of goods as long as they do not disrupt the energy function of biofuels (*bio ethanol* and bio diesel) and *biomass* energy from livestock waste and garbage;
 - c. Activities that have the potential to disrupt the energy function of biofuels (*bio ethanol* and bio diesel) and *bio* energy are not permitted. *mass* of livestock waste and garbage.
- (9) General provisions for zoning of High Voltage Air Ducts (SUTT) as referred to in paragraph (2) letter g include:
- a. development, operation and maintenance of infrastructure and facilities for electric power transmission networks between High Voltage Air Duct (SUTT) systems are permitted.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces; and
 - 2. Protection and cultivation activities by paying attention to the safety radius and free space of High Voltage Air Ducts (SUTT).
 - c. Activities that have the potential to disrupt functions are not permitted High Voltage Air Duct (SUTT).
- (10) General provisions for zoning of Medium Voltage Air Ducts (SUTM) as referred to in paragraph (2) letter h include:
- a. development, operation and maintenance of infrastructure and facilities for the Medium Voltage Air Duct (SUTM) electricity distribution network are permitted.
 - b. Conditionally permitted activities include:
 - 1. development of the Low Voltage Air Duct (SUTR) electricity distribution network;
 - 2. development of green open spaces; and

- 3. Protection and cultivation activities by paying attention to the safety radius and free space of Medium Voltage Air Ducts (SUTM).
- c. Activities that have the potential to disrupt the function of the Medium Voltage Air Line (SUTM) are not permitted.
- (11) General provisions for zoning of Low Voltage Air Ducts (SUTR) as referred to in paragraph (2) letter i include:
 - a. development, operation and maintenance of infrastructure and facilities for the Low Voltage Air Duct (SUTR) electricity distribution network are permitted.
 - b. Conditionally permitted activities include:
 - 1. development of the Medium Voltage Air Line (SUTM) electricity distribution network;
 - 2. development of green open spaces; and
 - 3. Protection and cultivation activities by paying attention to the safety radius and free space of Medium Voltage Air Ducts (SUTM).
 - c. Activities that have the potential to disrupt functions are not permitted Low Voltage Air Duct (SUTR).
- (12) General provisions for zoning of electrical substations as referred to in paragraph (2) letter j include:
 - a. permitted activities include:
 - 1. substation buildings and equipment; and
 - 2. Operational, main facilities and supporting facilities of the substation parent.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces; 2. development of electricity transmission and distribution networks and supporting facilities; 3. conservation and cultivation activities with attention to the safety radius; and 4. loading and unloading activities as long as they do not disrupt substation function.
 - c. Activities that have the potential to disrupt the function of the main substation are not permitted.

Article 59

- (1) General provisions for zoning of telecommunications network systems as follows:
 - referred to in Article 53 letter b number 3 includes:
 - a. general provisions for fixed network zoning; and
 - b. general provisions for cellular mobile network zoning.
- (2) The general provisions for fixed network zoning as referred to in paragraph (1) letter a include:
 - a. development of fixed networks is permitted. b. conditionally permitted activities that include:
 - 1. development of telecommunications towers by taking into account land use patterns, population/building density, shape of telecommunications towers and distance between telecommunications towers, development of telecommunications technology and fulfillment of special telecommunications needs; and
 - 2. development of telecommunication towers on buildings.
 - c. Activities that could disrupt the function of the fixed network are not permitted.
- (3) General provisions for cellular mobile network zoning as referred to in paragraph (1) letter b include:

- a. development of mobile cellular networks is permitted.
- b. activities which include:
 - 1. development of fixed networks;
 - 2. development of telecommunications towers by taking into account land use patterns, population/building density, shape of telecommunications towers and distance between telecommunications towers, development of telecommunications technology and fulfillment of special telecommunications needs; and
 - 3. development of telecommunication towers on buildings.
- c. Activities that could disrupt the function of the cellular mobile network are not permitted.

Article 60

- (1) General provisions for zoning of water resource network systems as follows: referred to in Article 53 letter b number 4 includes:
 - a. general provisions for zoning primary irrigation networks;
 - b. general provisions for zoning secondary irrigation networks;
 - c. general provisions for zoning tertiary irrigation networks.
 - d. general provisions for zoning flood control networks; e. general provisions for zoning flood control structures; and
 - f. general provisions for zoning of water resource buildings.
- (2) General provisions for zoning primary irrigation networks as referred to in paragraph (1) letter a include:
 - a. permitted activities include:
 - 1. development of primary irrigation network facilities and infrastructure;
And
 - 2. utilization of water for irrigation needs.
 - b. Conditionally permitted activities include:
 - 1. controlling the destructive power of water; 2. developing infrastructure, tourism and agriculture; and
 - 3. other protection and cultivation activities that do not disrupt the function of the primary irrigation network.
 - c. Activities that could disrupt the function are not permitted primary irrigation network.
- (3) General provisions for zoning secondary irrigation networks as referred to in paragraph (1) letter b include:
 - a. permitted activities include:
 - 1. development of secondary irrigation network facilities and infrastructure;
And
 - 2. utilization of water for irrigation needs.
 - b. Conditionally permitted activities include:
 - 1. controlling the destructive power of water; 2. developing infrastructure, tourism and agriculture; and
 - 3. other protection and cultivation activities that do not disturb secondary irrigation network function.
 - c. Activities that could disrupt the function of the secondary irrigation network are not permitted.
- (4) General provisions for tertiary irrigation network zoning as referred to in paragraph (1) letter c include:
 - a. permitted activities include:
 - 1. development of tertiary irrigation network facilities and infrastructure;
And
 - 2. utilization of water for irrigation needs.
 - b. Conditionally permitted activities include:

1. controlling the destructive power of water; 2. developing infrastructure, tourism and agriculture; and
 3. other protection and cultivation activities that do not disrupt the function of the tertiary irrigation network.
- c. Activities that could disrupt the function are not permitted tertiary irrigation network.
- (5) General provisions for zoning of flood control networks as follows: referred to in paragraph (1) letter d includes:
- a. permitted activities include:
 1. development of network control facilities and infrastructure floods; and
 2. utilization of water for irrigation and drinking water needs.
 - b. Conditionally permitted activities include:
 1. controlling the destructive power of water; 2. developing infrastructure, tourism and agriculture; and
 3. other protection and cultivation activities that do not disturb flood control network function.
 - c. Activities that could disrupt the function of the flood control network are not permitted.
- (6) General provisions for zoning of flood control buildings as follows: referred to in paragraph (1) letter e includes:
- a. permitted activities include:
 1. development of building control facilities and infrastructure floods; and
 2. utilization of water for irrigation and drinking water needs.
 - b. Conditionally permitted activities include:
 1. controlling the destructive power of water; 2. developing infrastructure, tourism and agriculture; and
 3. other protection and cultivation activities that do not disturb flood control building function.
 - c. Activities that could disrupt the function of flood control structures are not permitted.
- (7) General provisions for zoning of water resource buildings as follows: referred to in paragraph (1) letter f includes:
- a. permitted activities include:
 1. development of building resources facilities and infrastructure water; and
 2. utilization of water for irrigation and drinking water needs.
 - b. Conditionally permitted activities include:
 1. controlling the destructive power of water; 2. developing infrastructure, tourism and agriculture; and
 3. other protection and cultivation activities that do not disturb function of water resource buildings.
 - c. Activities that could disrupt the function of water resource structures are not permitted.

Article 61

- (1) General provisions for zoning of other infrastructure network systems as referred to in referred to in Article 53 letter b number 5 includes:
- a. general provisions for zoning of drinking water supply systems (SPAM);
 - b. general provisions for zoning of wastewater management systems (SPAL);
 - c. general provisions for zoning of hazardous and toxic waste management systems (B3);
 - d. general provisions for zoning of waste network systems;
 - e. general provisions for zoning of disaster evacuation network systems; and

- f. general provisions for zoning of drainage network systems.
- (2) General provisions for zoning of drinking water supply systems (SPAM) as referred to in paragraph (1) letter a include:
 - a. general provisions for zoning raw water units;
 - b. general provisions for zoning raw water networks;
 - c. general provisions for zoning production units;
 - d. general provisions for zoning production networks;
 - e. general provisions for distribution unit zoning;
 - f. general provisions for zoning service units;
 - g. general provisions for zoning rainwater reservoirs; h. general provisions for zoning shallow wells; and
 - i. general provisions for zoning pump wells.
- (3) General provisions for zoning raw water units as referred to in paragraph (2) letter a include:
 - a. permitted activities include:
 - 1. development of water intake structures;
 - 2. development of raw water unit facilities and infrastructure; and 3. utilization of water for drinking water needs.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of public facilities in accordance with provisions legislation;
 - 3. infrastructure development; and
 - 4. other protection and cultivation activities that do not disturb raw water unit function.
 - c. Activities that could disrupt the function of the water unit are not permitted.
standard.
- (4) General provisions for zoning of raw water networks as referred to in Article (2) letter b includes:
 - a. permitted activities include:
 - 1. development of water intake structures;
 - 2. development of raw water network facilities and infrastructure; and 3. utilization of water for drinking water needs.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of public facilities in accordance with provisions legislation;
 - 3. infrastructure development; and
 - 4. other conservation and cultivation activities that do not disrupt the function of the raw water network.
 - c. Activities that could disrupt the function of the raw water network are not permitted.
- (5) General provisions for zoning production units as referred to in paragraph (2) letter c include:
 - a. permitted activities include:
 - 1. development of water intake structures;
 - 2. development of production unit facilities and infrastructure; and 3. utilization of water for drinking water needs.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of public facilities in accordance with provisions legislation;
 - 3. infrastructure development; and
 - 4. other protection and cultivation activities that do not disturb production unit function.

- c. Activities that could disrupt the unit's function are not permitted.
production.
- (6) General provisions for zoning production networks as referred to in Article (2) letter d includes:
 - a. permitted activities include:
 - 1. development of water intake structures;
 - 2. development of production network facilities and infrastructure; and 3. utilization of water for drinking water needs.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of public facilities in accordance with provisions legislation;
 - 3. infrastructure development; and
 - 4. other protection and cultivation activities that do not disrupt the function of the production network.
 - c. Activities that could disrupt the function of the production network are not permitted.
- (7) General provisions for distribution unit zoning as referred to in paragraph (2) letter e include:
 - a. permitted activities include:
 - 1. development of water intake structures;
 - 2. development of distribution unit facilities and infrastructure; and 3. utilization of water for drinking water needs.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of public facilities in accordance with provisions legislation;
 - 3. infrastructure development; and
 - 4. other protection and cultivation activities that do not disturb distribution unit function.
 - c. Activities that could disrupt the unit's function are not permitted.
distribution.
- (8) General provisions for zoning of service units as referred to in Article (2) letter f includes:
 - a. permitted activities include:
 - 1. development of water intake structures;
 - 2. development of service unit facilities and infrastructure; and 3. utilization of water for drinking water needs.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of public facilities in accordance with provisions legislation;
 - 3. infrastructure development; and
 - 4. other protection and cultivation activities that do not disturb service unit function.
 - c. Activities that could disrupt the unit's function are not permitted.
service.
- (9) General provisions for zoning of rainwater reservoirs as follows:
referred to in paragraph (2) letter g includes:
 - a. permitted activities include:
 - 1. development of water intake structures;
 - 2. development of water reservoir facilities and infrastructure rain; and 3. utilization of water for drinking water needs.

- b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of public facilities in accordance with provisions legislation;
 - 3. infrastructure development; and
 - 4. other protection and cultivation activities that do not disturb function of rainwater reservoir.
 - c. Activities that could disrupt the function of the rainwater reservoir are not permitted.
- (10) General provisions for shallow well zoning as referred to in Article (2) letter h includes:
- a. permitted activities include:
 - 1. development of water intake structures;
 - 2. development of shallow well facilities and infrastructure; and 3. utilization of water for drinking water needs.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of public facilities in accordance with provisions legislation;
 - 3. infrastructure development; and
 - 4. other conservation and cultivation activities that do not interfere with the function of shallow wells.
 - c. Activities that could disrupt the function of the well are not permitted. shallow.
- (11) General provisions for zoning pump wells as referred to in paragraph (2) letter i include:
- a. permitted activities include:
 - 1. development of water intake structures;
 - 2. development of pump well facilities and infrastructure; and 3. utilization of water for drinking water needs.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of public facilities in accordance with provisions legislation;
 - 3. infrastructure development; and
 - 4. other protection and cultivation activities that do not disturb pump well function.
 - c. Activities that could disrupt the function of the well are not permitted. pump.
- (12) General provisions for zoning of wastewater management systems (SPAL) as referred to in paragraph (1) letter b include:
- a. general provisions for zoning of non-domestic wastewater management system infrastructure; and
 - b. general provisions for zoning of wastewater management system infrastructure domestic.
- (13) General provisions for zoning of non-domestic wastewater management system infrastructure as referred to in paragraph (12) letter a include:
- a. permitted activities include:
 - 1. development of facilities and infrastructure for non-domestic wastewater management systems; and
 - 2. development of industrial waste processing.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of public facilities in accordance with provisions legislation;

- 3. infrastructure development; and
 - 4. other conservation and cultivation activities that do not disrupt the function of the non-domestic wastewater management system.
 - c. Activities that could disrupt system function are not permitted. non-domestic wastewater management.
- (14) General provisions for zoning of domestic wastewater management system infrastructure as referred to in paragraph (12) letter b include:
- a. development activities for domestic wastewater management system facilities and infrastructure are permitted.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of public facilities in accordance with provisions legislation;
 - 3. infrastructure development; and
 - 4. other conservation and cultivation activities that do not disrupt the function of the domestic wastewater management system.
 - c. Activities that could disrupt the function of the domestic wastewater management system are not permitted.
- (15) General provisions for zoning the hazardous and toxic waste management system (B3) as referred to in paragraph (1) letter c include:
- a. development activities for infrastructure and facilities for hazardous and toxic waste management systems (B3) are permitted;
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. temporary storage of hazardous and toxic waste (B3) for activities that produce hazardous and toxic waste (B3); and
 - 3. collection of hazardous and toxic waste (B3) for activities that produce hazardous and toxic waste (B3).
 - c. Activities that include:
 - 1. direct disposal of hazardous and toxic waste materials (B3); and
 - 2. activities that can disrupt the function of the management system hazardous and toxic waste (B3).
- (16) General provisions for zoning of waste network systems as follows: referred to in paragraph (1) letter d includes:
- a. general provisions for TPS3R zoning;
 - b. general provisions for TPS zoning;
 - c. general provisions for TPA zoning; and
 - d. general provisions for TPST zoning.
- (17) General provisions for TPS3R zoning as referred to in paragraph (16) letter a includes:
- a. permitted activities include:
 - 1. development of TPS3R facilities and infrastructure; and
 - 2. development of TPS3R operational support.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces;
 - 2. development of public facilities in accordance with provisions legislation;
 - 3. infrastructure development; and
 - 4. other protection and cultivation activities that do not interfere with the function of TPS3R.
 - c. Activities that could disrupt the function of the TPS3R are not permitted.

(18) General provisions for TPS zoning as referred to in paragraph (16) letter b includes:

a. permitted activities include:

1. development of TPS facilities and infrastructure; and 2. development of TPS operational support.

b. Conditionally permitted activities include:

1. development of green open spaces;
2. development of public facilities in accordance with provisions legislation;
3. infrastructure development; and
4. other protection and cultivation activities that do not disturb TPS function.

c. Activities that could disrupt the function of the TPS are not permitted.

(19) General provisions for TPA zoning as referred to in paragraph (16) letter c includes:

a. permitted activities include:

1. development of TPA facilities and infrastructure; and 2. development of TPA operational support.

b. Conditionally permitted activities include:

1. development of New Renewable Energy (EBT);
2. development of green open spaces;
3. development of public facilities in accordance with provisions legislation;
4. infrastructure development; and
5. other protection and cultivation activities that do not disturb landfill function.

c. Activities that could disrupt the function of the TPA are not permitted.

(20) General provisions for TPST zoning as referred to in paragraph (16) letter d includes:

a. permitted activities include:

1. development of TPST facilities and infrastructure; and 2. development of TPST operational support.

b. Conditionally permitted activities include:

1. development of New Renewable Energy (EBT);
2. development of green open spaces;
3. development of public facilities in accordance with provisions legislation;
4. infrastructure development; and
5. other protection and cultivation activities that do not interfere with the function of the TPST.

c. Activities that could disrupt the function of the TPST are not permitted.

(21) General provisions for zoning of disaster evacuation network systems as follows: referred to in paragraph (1) letter e includes:

a. general provisions for zoning disaster evacuation routes; and

b. general provisions for zoning disaster evacuation areas.

(22) General provisions for zoning disaster evacuation routes as referred to in paragraph (21) letter a include:

a. the installation of signs and warning boards is permitted disaster;

b. Evacuation route development activities are conditionally permitted disasters on other infrastructure networks; and

c. It is not permitted to use evacuation routes which could disrupt the function of disaster evacuation routes.

- (23) General provisions for zoning disaster evacuation areas as referred to in referred to in paragraph (21) letter b includes:
- a. development of supporting facilities for disaster evacuation activities is permitted; b. building construction activities are permitted conditionally at the location. disaster evacuation; and
 - c. It is not permitted to develop activities that could disrupt the function of disaster evacuation sites.
- (24) General provisions for zoning of drainage network systems as referred to in paragraph (1) letter f include:
- a. general provisions for zoning primary drainage networks;
 - b. general provisions for zoning secondary drainage networks; and
 - c. general provisions for tertiary drainage network zoning.
- (25) General provisions for zoning primary drainage networks as referred to in paragraph (24) letter a include:
- a. permitted activities include:
 - 1. development of primary drainage network facilities and infrastructure;
And
 - 2. development of operational support for primary drainage networks.
 - b. Conditionally permitted activities include:
 - 1. development of New Renewable Energy (EBT);
 - 2. construction of public facilities in accordance with provisions legislation;
 - 3. infrastructure development; and
 - 4. other protection and cultivation activities that do not disturb primary drainage network function.
 - c. Activities that could disrupt the function of the primary drainage network are not permitted.
- (26) General provisions for zoning of secondary drainage networks as follows: referred to in paragraph (24) letter b includes:
- a. permitted activities include:
 - 1. development of drainage network facilities and infrastructure secondary; and
 - 2. development of operational support for drainage networks secondary.
 - b. Conditionally permitted activities include:
 - 1. development of New Renewable Energy (EBT);
 - 2. construction of public facilities in accordance with provisions legislation;
 - 3. infrastructure development; and
 - 4. other protection and cultivation activities that do not disturb secondary drainage network function.
 - c. Activities that could disrupt the function of the secondary drainage network are not permitted.
- (27) General provisions for tertiary drainage network zoning as referred to in paragraph (24) letter c include:
- a. permitted activities include:
 - 1. development of tertiary drainage network facilities and infrastructure;
And
 - 2. development of operational support for tertiary drainage networks.
 - b. Conditionally permitted activities include:
 - 1. construction of public facilities in accordance with provisions legislation;
 - 2. infrastructure development; and

- 3. other protection and cultivation activities that do not disturb tertiary drainage network function.
- c. Activities that could disrupt the function of the tertiary drainage network are not permitted.

Paragraph 3
General Provisions for Spatial Zoning Patterns
Article 62

The general provisions for zoning Spatial Patterns as referred to in Article 52 paragraph (1) letter b consist of:

- a. general provisions for zoning of Protected Areas; and
- b. general provisions for zoning of Cultivation Areas.

Article 63

- (1) General provisions for zoning of Protected Areas as referred to in Article 63 letter a includes:
 - a. general provisions for zoning of Water Bodies; b. general provisions for zoning of Areas that provide protection for subordinate Areas;
 - c. general provisions for zoning of Local Protection Areas; and
 - d. general provisions for zoning Cultural Heritage Areas.
- (2) General provisions for zoning of Water Bodies as referred to in paragraph (1) letter a includes:
 - a. permitted activities that can increase water absorption into the soil;
 - b. Conditionally permitted activities include:
 - 1. nature tourism, education and research activities without changing the natural landscape;
 - 2. agriculture, fisheries, defense and security and mining that do not cause disruption to the productivity of water bodies and environmental damage;
 - 3. transportation, energy, telecommunications, water resources and other infrastructure networks without reducing water quality and disrupting aquatic ecosystems; and
 - 4. Water utilization activities are carried out based on water quality protection and management plans.
 - c. Activities that include:
 - 1. activities that have the potential to reduce the area of water bodies;
 - 2. activities that cause pollution and damage the function of water bodies; and
 - 3. Activities that have the potential to disrupt the natural landscape, the preservation of flora and fauna, and the preservation of the environment.
 - d. intensity of space utilization: low.
- (3) General provisions for zoning areas that provide protection for subordinate areas as referred to in paragraph (1) letter b in the form of general provisions for zoning protected forest areas include:
 - a. Permitted spatial utilization activities include conservation and preservation activities for protected forest areas;
 - b. Space Utilization activities are permitted with conditions includes:
 - 1. Utilization of forests in Protected Forest Areas is carried out in accordance with the provisions of laws and regulations;

2. educational and research activities without damaging and/or disturbing the Protected Forest Area; and
 3. Utilization of space in areas suspected of containing unique rocks and fossils is carried out in accordance with the provisions of statutory regulations.
- c. Space Utilization activities that are not permitted include:
1. activities that disrupt the natural landscape, soil fertility and durability, hydrological function, the preservation of flora and fauna, and the preservation of the environment; and
 2. activities that reduce the area and cover of vegetation.
- d. intensity of space utilization: low.
- (4) General provisions for zoning of Local Protection Areas as referred to in referred to in paragraph (1) letter c includes: a.
- general provisions for zoning. Coastal boundary areas are arranged with the provision that all activities on coastal boundaries must have a permit from the authorized agency, taking into account the function of protecting coastal boundaries with the intensity of Spatial Utilization: moderate;
- b. general provisions for zoning River boundary areas are drawn up with the provision that all activities on river boundaries must have a permit from the authorized agency, taking into account the protective function of river boundaries with the intensity of Spatial Utilization: medium; and
- c. General provisions for zoning of lake or reservoir boundary areas are drawn up with the provision that all activities on the lake or reservoir boundaries must have a permit from the authorized agency, taking into account the protection function of the lake or reservoir boundaries with the intensity of Spatial Utilization: medium.
- (5) General provisions for zoning Cultural Heritage Areas as referred to in paragraph (1) letter d include:
- a. permitted activities include:
1. research and education activities; and
 2. cultural heritage preservation activities
- b. Conditionally permitted activities include:
1. transportation networks, energy, telecommunications, water resources and other infrastructure networks, residential and agricultural activities without disrupting the sustainability and reducing the function of the Cultural Heritage Area; and
 2. Religious, social, educational, scientific, technological, cultural and tourism activities are carried out in accordance with the provisions of laws and regulations.
- c. Activities that include:
1. mining;
 2. activities that disrupt the environmental sustainability around cultural heritage sites; and
 3. Activities that disturb Cultural and Customary Heritage Areas
Community culture.
- d. intensity of space utilization: high.

Article 64

- (1) General provisions for zoning of Cultivation Areas as referred to in Article 63 letter b include:
- a. general provisions for zoning of Production Forest Areas;
 - b. general provisions for zoning of People's Plantation Areas;
 - c. general provisions for zoning of Agricultural Areas;

- d. general provisions for zoning of Fisheries Areas;
 - e. general provisions for zoning of Industrial Designated Areas;
 - f. general provisions for zoning of Tourism Areas;
 - g. general provisions for zoning of residential areas; and
 - h. general provisions for zoning of Defense and Security Areas.
- (2) The general provisions for zoning Production Forest Areas as referred to in paragraph (1) letter a are in the form of general provisions for zoning Permanent Production Forest Areas including:
- a. sustainable reforestation activities are permitted, utilization forests and utilization of forest products;
 - b. Conditionally permitted activities include:
 - 1. Utilization of Space is carried out by taking into account the function of the Area and natural landscape in accordance with the provisions of laws and regulations; and
 - 2. Utilization of space in areas suspected of containing unique rocks and fossils is carried out in accordance with the provisions of laws and regulations.
 - c. Activities that include:
 - 1. activities that disrupt the natural landscape, soil fertility and durability, hydrological function, the preservation of flora and fauna, and the preservation of the environment; and
 - 2. activities that reduce the area and cover of vegetation.
 - d. intensity of space utilization: low.
- (3) General provisions for zoning of People's Plantation Areas as follows: referred to in paragraph (1) letter b includes:
- a. permitted activities include:
 - 1. activities that support the development of plantation areas People;
 - 2. activities that increase the productivity of the People's Plantation Area; and
 - 3. activities to utilize the results of people's plantations.
 - b. Conditionally permitted activities include:
 - 1. transportation networks, energy, telecommunications, water resources and other infrastructure networks, settlement activities and other cultivation that do not reduce the function and do not cause negative impacts on the People's Plantation Area;
 - 2. livestock, fisheries, small industries and industries that have special raw materials and special processes, tourism, defense and security, salt and mining that do not cause disruption to the productivity of people's plantations and environmental damage;
 - 3. construction of buildings while still taking into account the environmental carrying capacity and in accordance with the provisions of laws and regulations; and
 - 4. Development of infrastructure and facilities is carried out in accordance with the provisions of laws and regulations.
 - c. Activities that reduce the ecological and aesthetic function of the Area by changing and/or damaging the natural landscape and function of the People's Plantation Area are not permitted.
 - d. intensity of space utilization: moderate.
- (4) General provisions for zoning of Agricultural Areas as referred to in Article (1) letter c includes:
- a. General provisions for zoning of Food Crop Areas include:
 - 1. Food crop activities and supporting facilities are permitted;

2. Other cultivation activities are conditionally permitted in Food Crop Areas that are not productive and do not have technical irrigation in accordance with the provisions of laws and regulations.
3. Other cultivation activities are not permitted in productive and technically irrigated Food Crop Areas in accordance with the provisions of laws and regulations.
4. Intensity of Space Utilization: low.
- b. General provisions for zoning of Horticultural Areas include:
 1. permitted activities for food crops, horticulture and supporting facilities;
 2. Conditionally permitted activities include:
 - a. transportation networks, energy, telecommunications, water resources, and other infrastructure networks;
 - b. green open spaces, cultural heritage, mangrove ecosystems;
And
 - c. utilization of forest products, people's plantations, plantations, animal husbandry, fisheries, small industries and industries that have special raw materials and special processes, tourism, settlements, defense and security, salt and mining that do not cause disruption to horticultural productivity and environmental damage.
 3. Activities that reduce the ecological and aesthetic function of the Area by changing and/or damaging the natural landscape and function of the Horticultural Area are not permitted.
 4. intensity of spatial utilization: moderate. c.
- general provisions for zoning of plantation areas include:
 1. permitted activities for food crops, horticulture, plantations and supporting facilities;
 2. Conditionally permitted activities include:
 - a. transportation networks, energy, telecommunications, water resources, and other infrastructure networks;
 - b. green open spaces, cultural heritage, mangrove ecosystems;
And
 - c. utilization of forest products, people's plantations, livestock, fisheries, small industries and industries that have special raw materials and special processes, tourism, settlements, defense and security, salt and mining that do not cause disruption to plantation productivity and environmental damage.
 3. Activities that reduce the ecological and aesthetic function of the Area by changing and/or damaging the natural landscape and function of the Plantation Area are not permitted.
 4. Space Utilization Intensity: Medium.
- (5) General provisions for zoning of Fisheries Areas as referred to in paragraph (1) letter d include:
 - a. General provisions for zoning of Capture Fisheries Areas include:
 1. permitted activities include:
 - a. research, education and tourism activities;
 - b. activities to increase the productivity of Capture Fisheries Areas; and
 - c. operational, supporting and development activities
Capture Fisheries Area.

2. Conditionally permitted activities include:
 - a. transportation networks, energy, telecommunications, water resources, and other infrastructure networks; and
 - b. development of facilities and infrastructure is carried out in accordance with the provisions of laws and regulations.
3. Activities that include:
 - a. mining; and
 - b. activities that reduce the ecological and aesthetic function of the Area by changing and/or damaging the natural landscape and function of the Capture Fisheries Area.
4. high intensity of Space Utilization. b. general provisions for zoning of Aquaculture Areas include:
 1. permitted activities include:
 - a. research, education and tourism activities;
 - b. activities to increase the productivity of Aquaculture Areas; and
 - c. operational, supporting and development activities Aquaculture Area.
 2. Conditionally permitted activities include:
 - a. transportation networks, energy, telecommunications, water resources, and other infrastructure networks;
 - b. use of irrigation water for fisheries without reducing the quality and without reducing the supply of water for agriculture; and
 - c. development of infrastructure network systems is carried out in accordance with the provisions of laws and regulations.
 3. Activities that include:
 - a. mining; and
 - b. activities that reduce the ecological and aesthetic function of the Area by changing and/or damaging the natural landscape and function of the Aquaculture Area.
 4. Intensity of Space Utilization: moderate.
- (6) General provisions for zoning of Industrial Designated Areas as referred to in referred to in paragraph (1) letter e includes:
 - a. permitted activities include:
 1. operational, supporting and development activities of the Area Industrial Allocation;
 2. Development of Green Open Spaces.
 - b. Conditionally permitted activities include:
 1. industrial support settlements;
 2. transportation networks, energy, telecommunications, water resources, and other infrastructure networks; 3. cultural heritage, mangrove ecosystems; 4. utilization of forest products, people's plantations, agriculture, animal husbandry, fisheries, tourism, defense and security, salt production and mining that do not cause disruption to the productivity of Industrial Designated Areas and environmental damage; and
 5. Development of infrastructure, facilities and utilities is carried out in accordance with the provisions of laws and regulations.
 - c. Activities that include:
 1. activities that can reduce environmental quality and cause socio-economic conflict; and
 2. Activities that may disrupt the operations, support and development of Industrial Designated Areas.

d. intensity of space utilization: high.

(7) General provisions for zoning Tourism Areas as referred to in paragraph (1) letter f include:

a. tourism activities and supporting facilities are permitted;

b. Conditionally permitted activities include:

1. utilization of natural potential according to carrying capacity and capacity environmental capacity;

2. transportation networks, energy, telecommunications, water resources, and other infrastructure networks;

3. Arrangement of tourism areas by paying attention to ecosystem sustainability and environmental protection functions; and

4. Development of infrastructure, facilities and utilities is carried out in accordance with the provisions of statutory regulations.

c. Activities that include: 1. mining are not permitted;

2. activities that can reduce environmental quality and cause socio-economic conflict; and

3. activities that can disrupt operations, support and development of tourism areas.

d. intensity of space utilization: high.

(8) General provisions for zoning of Residential Areas as referred to in paragraph (1) letter g include:

a. General provisions for zoning of Urban Residential Areas include:

1. permitted activities include:

a. development of housing, infrastructure, facilities and utilities that support the function of Urban Residential Areas; and

b. construction of infiltration wells and/or biopores for maintain the balance of the water balance.

2. Conditionally permitted activities include:

a. trade and service activities in accordance with the provisions legislation;

b. small industrial activities and industries that have special raw materials and special processes in accordance with statutory regulations;

c. cultural heritage, mangrove ecosystems; d.

utilization of forest products, people's plantations, agriculture, animal husbandry, fisheries, tourism, defense and security, salt production and mining that do not cause disruption to the productivity of urban settlement areas and environmental damage;

e. transportation, energy, telecommunications, water resources and other infrastructure networks without disrupting safety and without polluting the environment;

f. public interest activities, national strategic projects and disaster management are carried out in accordance with the provisions of laws and regulations;

g. development of Green Open Space with an area of at least 30% (thirty percent) of the area of the Urban Area consisting of 20% (twenty percent) of public Green Open Space and 10% (ten percent) of private Green Open Space;

h. other cultivation activities in Food Crop Areas that are not productive and do not have technical irrigation in accordance with the provisions of laws and regulations; and

i. development of infrastructure, facilities and utilities is carried out in accordance with the provisions of laws and regulations.

3. Activities that may interfere with function are not permitted
Urban Residential Areas.

4. intensity of space utilization: high.

b. general zoning provisions for Rural Residential Areas

includes:

1. permitted activities include:

a. development of housing, infrastructure, facilities and utilities that support the function of Rural Settlement Areas; and

b. construction of infiltration wells and/or biopores for maintain the balance of the water balance.

2. Conditionally permitted activities include:

a. trade and service activities are carried out in accordance with statutory provisions;

b. small industrial activities and industries that have special raw materials and special processes in accordance with statutory regulations;

c. green open spaces, cultural heritage, mangrove ecosystems; d. utilization of forest products, people's plantations, agriculture, animal husbandry, fisheries, tourism, defense and security, salt production and mining that do not cause disruption to the productivity of rural settlement areas and environmental damage;

e. transportation, energy, telecommunications, water resources and other infrastructure networks without disrupting safety and without polluting the environment;

f. public interest activities, national strategic projects and disaster management carried out in accordance with statutory provisions;

g. other cultivation activities in Food Crop Areas that are not productive and do not have technical irrigation in accordance with the provisions of laws and regulations; and

h. development of infrastructure, facilities and utilities is carried out in accordance with the provisions of laws and regulations.

3. Activities that may interfere with function are not permitted
Rural Settlement Area.

4. intensity of space utilization: high.

(9) General provisions for zoning of Defense and Security Areas as referred to in paragraph (1) letter h include:

a. permitted activities include:

1. development of Green Open Space;

2. operational, supporting and development activities of the Defense and Security Area;

3. development of entry and exit roads and/or bridges;

4. development of independent power lines;

5. development of an independent water network; and
 6. development of independent telecommunications networks.
- b. Conditionally permitted activities include:
1. trade and service activities and buildings that support the function of the Defense and Security Area are carried out in accordance with the provisions of laws and regulations;
 2. transportation networks, energy, telecommunications, water resources, and other infrastructure networks; and
 3. Development of infrastructure, facilities and utilities is carried out in accordance with the provisions of laws and regulations.
- c. Activities that include:
1. cultivation activities that disrupt the function of the Defense and Security Area;
 2. activities that can be used for sabotage activities; and
 3. Free from explosive industrial areas.
- d. intensity of space utilization: moderate.

Paragraph 4
Special Provisions
Article 65

- (1) The special provisions as referred to in Article 52 paragraph (1) letter c are the overlay area which consists of:
- a. special provisions for spatial planning of border areas;
 - b. special provisions for the Spatial Planning of Karst Areas;
 - c. special provisions for spatial planning for disaster-prone areas;
 - d. special provisions for the Food Agriculture Area Spatial Plan Sustainable (KP2B);
 - e. special provisions for spatial planning for mineral and coal mining areas; and
 - f. special provisions for the Aviation Operations Safety Area Spatial Pattern (KKOP) plan.
- (2) Special provisions for the Spatial Pattern plan for the border area as referred to in referred to in paragraph (1) letter a includes:
- a. special provisions for the coastal boundary spatial plan include:
1. permitted activities include:
 - a. activities that are able to protect or strengthen the protection of coastal boundary areas from abrasion, sea water intrusion and sea water infiltration into the soil;
 - b. green open spaces, coastal vegetation; and
 - c. mangrove ecosystem.
 2. Conditionally permitted activities include:
 - a. fish auction places, water control structures, navigation aids, defense and security, ports/docks and supporting infrastructure, residences of indigenous communities or community members who have lived in these places for generations, transportation networks, energy, telecommunications, water resources, and other infrastructure networks and/or other activities that require a location on the coast; and
 - b. education, research, utilization of forest products, people's plantations, agriculture, fisheries, tourism, salt production while taking into account the function of coastal boundaries.

- 3. Activities that include:
 - a. hazardous and toxic waste management system (B3);
 - b. industry, mining; and
 - c. activities that reduce the ecological and aesthetic function of the area by changing and/or damaging the natural landscape and the sustainability of the function of the coastal boundary area.
- b. special provisions for river boundary spatial planning include:
 - 1. permitted activities include:
 - a. development of green open spaces; and
 - b. activities that are able to protect or strengthen the protection of river border areas.
 - 2. Conditionally permitted activities include:
 - a. transportation, energy, telecommunications, water resources and other infrastructure networks are implemented in accordance with the provisions of laws and regulations;
 - b. education and research by paying attention to the function of river boundaries; and
 - c. utilization of forest products, people's plantations, agriculture, fisheries, tourism, settlements of customary law communities or community members who have lived in the area for generations, navigation aids, defense and security, salt production and mining.

- 3. Activities that include:
 - a. industry; and
 - b. activities that reduce the ecological and aesthetic function of the area by changing and/or damaging the natural landscape and the sustainability of the function of the river boundary area.
- c. Special provisions for reservoir/lake/embung plans Boundary Space Pattern include:
 - 1. Reforestation activities, green open spaces and water source conservation are permitted;
 - 2. Conditionally permitted activities include:
 - a. education, research, utilization of forest products, people's plantations, agriculture, fisheries, tourism, settlements of customary law communities or community members who have lived in the area for generations and defense and security by taking into account the function of the boundaries of lakes, reservoirs and reservoirs and their buffer zones;
 - b. transportation, energy, telecommunications, water resources and other infrastructure networks are implemented in accordance with the provisions of laws and regulations; and
 - c. buildings for water body management and/or water utilization.
- 3. Activities that disturb the natural landscape, disturb the fertility and durability of the soil, hydrological function, the preservation of flora and fauna, the preservation of the environment and activities that cause a decline in water quality, the physical condition of the area around the boundaries of lakes, reservoirs and reservoirs and disturb the water discharge are not permitted.

(3) Special provisions for the Spatial Pattern plan for karst areas as referred to in referred to in paragraph (1) letter b includes:

- a. Conservation activities for plant and animal diversity and their ecosystems are permitted in the karst area.
 - b. Conditionally permitted activities include:
 - 1. development of green open spaces, cultural heritage, ecosystems mangroves;
 - 2. transportation networks, energy, telecommunications, water resources and other infrastructure networks taking into account the function of the karst area; and
 - 3. utilization of forest products, people's plantations, agriculture, fisheries, small industries, tourism, settlements, defense and security and salt production.
 - c. Activities that include:
 - 1. waste (Final Processing Site (TPA));
 - 2. mining; and
 - 3. Activities that reduce the ecological and aesthetic function of the area by changing and/or damaging the landscape and function of the karst area.
- (4) Special provisions for the Spatial Planning Plan for Disaster-Prone Areas as referred to in paragraph (1) letter c include:
- a. special provisions for spatial planning for disaster-prone areas
landslides include:
 - 1. permitted activities include:
 - a. preservation, development and maintenance that supports the protective function of areas prone to landslides;
 - b. early warning of areas prone to landslides;
And
 - c. Evacuation routes and locations in areas prone to landslides landslide.
 - 2. Conditionally permitted while still paying attention to structural and non-structural mitigation efforts, implementing construction standards and still paying attention to the function of landslide-prone areas, activities which include:
 - a. road networks, railways, rivers, lakes and crossings, sea transportation, airports, energy, telecommunications, water resources, Drinking Water Supply Systems (SPAM), Wastewater Management Systems (SPAL), hazardous and toxic waste management systems (B3), garbage and drainage;
 - b. green open spaces, cultural heritage, mangrove ecosystems;
And
 - c. utilization of forest products, people's plantations, agriculture, fisheries, industry, tourism, settlements, defense and security, salt production and mining that do not cause environmental damage and carry out reclamation and post-mining activities.
 - 3. Activities that reduce the ecological and aesthetic function of the area by changing and/or damaging the natural landscape and function of areas prone to landslides are not permitted.
 - b. Special provisions for spatial planning for tsunami-prone areas include:

1. permitted activities include:
 - a. preservation, development and maintenance that supports the protective function of tsunami-prone areas; b. early warning of tsunami-prone areas; and
 - c. Evacuation routes and locations in disaster-prone areas tsunami.
2. Conditionally permitted while still paying attention to structural and non-structural mitigation efforts, implementing construction standards and still paying attention to the function of tsunami-prone areas, activities which include:
 - a. road networks, railways, rivers, lakes and crossings, sea transportation, airports, energy, telecommunications, water resources, Drinking Water Supply Systems (SPAM), Wastewater Management Systems (SPAL), hazardous and toxic waste management systems (B3), garbage and drainage;
 - b. green open spaces, cultural heritage, mangrove ecosystems;
And
 - c. utilization of forest products, people's plantations, agriculture, fisheries, industry, tourism, settlements, defense and security, salt production and mining that do not cause environmental damage and carry out reclamation and post-mining activities.
3. Activities that reduce ecological function are not permitted.
and the aesthetics of the area by changing and/or damaging the natural landscape and function of the tsunami-prone area.
- c. special provisions for spatial planning for disaster-prone areas
floods include:
 1. permitted activities include:
 - a. preservation, development and maintenance that supports the protective function of flood-prone areas;
 - b. early warning of flood-prone areas; and
 - c. Evacuation routes and locations in flood-prone areas.
 2. Conditionally permitted while still paying attention to structural and non-structural mitigation efforts, implementing construction standards and still paying attention to the function of flood-prone areas, activities which include:
 - a. road networks, railways, rivers, lakes and crossings, sea transportation, airports, energy, telecommunications, water resources, Drinking Water Supply Systems (SPAM), Wastewater Management Systems (SPAL), hazardous and toxic waste management systems (B3), garbage and drainage;
 - b. green open spaces, cultural heritage, mangrove ecosystems;
And
 - c. utilization of forest products, people's plantations, agriculture, fisheries, industry, tourism, settlements, defense and security, salt production and mining that do not cause environmental damage and carry out reclamation and post-mining activities.
 3. Activities that reduce the ecological and aesthetic function of the area by changing and/or damaging the natural landscape and function of areas prone to flooding are not permitted.

- d. special provisions for spatial planning for disaster-prone areas earthquakes include:
 - 1. permitted activities include:
 - a. preservation, development and maintenance that supports the protective function of earthquake-prone areas;
 - b. early warning in areas prone to earthquake disasters; And
 - c. Evacuation routes and locations in earthquake-prone areas earth.
 - 2. Conditionally permitted while still paying attention to structural and non-structural mitigation efforts, implementing construction standards and still paying attention to the function of earthquake-prone areas, activities which include:
 - a. road networks, railways, rivers, lakes and crossings, sea transportation, airports, energy, telecommunications, water resources, Drinking Water Supply Systems (SPAM), Wastewater Management Systems (SPAL), hazardous and toxic waste management systems (B3), garbage and drainage;
 - b. green open spaces, cultural heritage, mangrove ecosystems; And
 - c. utilization of forest products, people's plantations, agriculture, fisheries, industry, tourism, settlements, defense and security, salt production and mining that do not cause environmental damage and carry out reclamation and post-mining activities.
 - 3. Activities that reduce the ecological and aesthetic function of the area by changing and/or damaging the natural landscape and function of areas prone to earthquake disasters are not permitted.
- e. Special provisions for spatial planning for areas prone to drought include:
 - 1. permitted activities include:
 - a. preservation, development and maintenance that supports the protective function of drought-prone areas; b. early warning of drought-prone areas; and
 - c. Evacuation routes and locations in areas prone to drought disasters.
 - 2. Conditionally permitted while still paying attention to structural and non-structural mitigation efforts, implementing construction standards and still paying attention to the function of drought-prone areas, activities which include:
 - a. road networks, railways, rivers, lakes and crossings, sea transportation, airports, energy, telecommunications, water resources, Drinking Water Supply Systems (SPAM), Wastewater Management Systems (SPAL), hazardous and toxic waste management systems (B3), garbage and drainage;
 - b. green open spaces, cultural heritage, mangrove ecosystems; And
 - c. utilization of forest products, people's plantations, agriculture, fisheries, industry, tourism, settlements, defense and security, salt production and mining that do not cause environmental damage and carry out reclamation and post-mining activities.

3. Activities that reduce the ecological and aesthetic function of the area by changing and/or damaging the natural landscape and function of areas prone to drought disasters are not permitted.
- f. special provisions for spatial planning for disaster-prone areas extreme weather includes:
 1. permitted activities include:
 - a. preservation, development and maintenance that supports the protective function of areas prone to extreme weather disasters;
 - b. early warning of areas prone to extreme weather disasters; c. evacuation routes and locations of areas prone to weather disasters extreme;
 2. Conditionally permitted while still paying attention to structural and non-structural mitigation efforts, implementing construction standards and still paying attention to the function of areas prone to extreme weather disasters, activities which include:
 - a. road networks, railways, rivers, lakes and crossings, sea transportation, airports, energy, telecommunications, water resources, Drinking Water Supply Systems (SPAM), Wastewater Management Systems (SPAL), hazardous and toxic waste management systems (B3), garbage and drainage;
 - b. green open spaces, cultural heritage, mangrove ecosystems;
And
 - c. utilization of forest products, people's plantations, agriculture, fisheries, industry, tourism, settlements, defense and security, salt production and mining that do not cause environmental damage and carry out reclamation and post-mining activities.
 3. Activities that reduce the ecological and aesthetic function of the area by changing and/or damaging the natural landscape and function of areas prone to extreme weather disasters are not permitted.
- (5) Special provisions for the Sustainable Food Agriculture Area Spatial Plan as referred to in paragraph (1) letter d include:
 - a. permitted food crop activities and facilities his supporters;
 - b. other cultivation activities are conditionally permitted in Sustainable Food Agriculture Areas that are not productive and do not have technical irrigation in accordance with the provisions of laws and regulations; and
 - c. other cultivation activities are not permitted in productive and technically irrigated Sustainable Food Agriculture Areas in accordance with the provisions of laws and regulations.
- (6) Special provisions for the Spatial Planning for Mineral and Coal Mining Areas as referred to in paragraph (1) letter e include:
 - a. Mining activities are conditionally permitted, including:
 1. Mineral and coal mining locations meet the minimum radius requirements for residential areas in accordance with statutory regulations;
 2. implementing environmentally friendly mining technology;

- 3. does not cause environmental damage, reclamation and post-mining activities are carried out and environmental studies are carried out in accordance with statutory regulations;
 - 4. take into account the balance between costs and benefits and the balance between risks and benefits;
 - 5. consider the potential of mining materials, geological conditions, geohydrology, and environmental carrying capacity; and
 - b. Mining activities are not permitted in Sustainable Food Agriculture Areas.
- (7) Special provisions for the Aviation Operations Safety Area (KKOP) Spatial Pattern plan as referred to in paragraph (1) letter f, namely that no buildings or growing objects are permitted whose height exceeds the height limit of each Area, including the Region
- air and land/water up to a radius of 15,810 (fifteen thousand eight hundred and ten) meters from the center point of the runway.
- (8) The special provisions as referred to in paragraph (1) are described on the map.

Part Three
Assessment of Implementation of Spatial Utilization

Article 66

- (1) Assessment of the implementation of Spatial Utilization is carried out through:
- a. assessment of KKPR implementation; And
 - b. assessment of the realization of RTR.
- (2) Assessment of KKPR implementation is carried out as intended in paragraph (1) letter a to ensure:
- a. compliance with the implementation of KKPR provisions; and
 - b. fulfillment of KKPR acquisition procedures.
- (3) The assessment of the realization of the RTR is carried out as referred to in paragraph (1) letter b by assessing the realization of the Spatial Structure plan and the Spatial Pattern plan.
- (4) Further provisions regarding the assessment of the implementation of KKPR as referred to in paragraph (2) and the assessment of the realization of RTR as referred to in paragraph (3) are carried out in accordance with the provisions of laws and regulations.

Part Four
Incentive and Disincentive Provisions

Article 67

- (1) The provisions on incentives and disincentives as referred to in Article 51 paragraph (2) letter c are efforts to provide rewards for the implementation of activities that are in line with the Spatial Planning Plan, and efforts to prevent, limit growth, or reduce activities that are not in line with the Spatial Planning Plan.
- (2) The incentives referred to in paragraph (1) may take the form of:
- a. fiscal incentives; and b. non-fiscal incentives.
- (3) The fiscal incentives as referred to in paragraph (2) letter a may be in the form of:
- a. granting tax relief; and/or
 - b. levy relief.

- (4) Non-fiscal incentives as referred to in paragraph (2) letter b may in the form of:
- a. providing compensation;
 - b. cross subsidies;
 - c. ease of licensing;
 - d. rewards;
 - e. rent space;
 - f. crowdfunding;
 - g. provision of infrastructure and facilities;
 - h. awards; and/or
 - i. publication or promotion.
- (5) Provision of incentives includes:
- a. incentives provided by the Regional Government to the Community in carrying out activities in line with the Spatial Planning Plan; and
 - b. incentives provided by the Regional Government to Village Governments within the Regional Area or to other regional governments in implementing activities in line with the Spatial Planning Plan.
- (6) Incentives provided by the Regional Government to the Community in carrying out activities in line with the Spatial Planning as referred to in paragraph (5) letter a may be in the form of:
- a. development and procurement of infrastructure;
 - b. ease of licensing procedures;
 - c. compensation;
 - d. cross subsidies;
 - e. rewards;
 - f. space rental;
 - g. share contributions;
 - and/or h. awards.
- (7) Incentives provided by the Regional Government to Village Governments in the Regional Area or to other regional governments in implementing activities in line with the spatial planning as referred to in paragraph (5) letter b may take the form of awards.
- (8) The disincentives referred to in paragraph (1) may take the form of:
- a. fiscal disincentives; and
 - b. non-fiscal disincentives.
- (9) The fiscal disincentives as referred to in paragraph (8) letter a may take the form of imposing high taxes/levies.
- (10) Non-fiscal disincentives as referred to in paragraph (8) letter b may in the form of:
- a. obligation to provide compensation;
 - b. special requirements in licensing;
 - c. obligation to provide compensation; and/or
 - d. restrictions on the provision of infrastructure and facilities.
- (11) The provision of disincentives includes:
- a. disincentives given by the Regional Government to the Community in carrying out activities that are not in line with the Spatial Planning Plan; and
 - b. disincentives given by the Regional Government to Village Governments within the Regional Area or to other regional governments in carrying out activities that are not in line with the Spatial Planning Plan.

- (12) Disincentives given by the Regional Government to the Community in carrying out activities that are not in line with the Spatial Planning as referred to in paragraph (11) letter a may be in the form of: a. imposition of high taxes and/or levies, adjusted to the amount of costs required to overcome the impacts caused by the Utilization of Space; b. provision of special requirements in the licensing process; and c. restrictions on the provision of infrastructure facilities and infrastructure.

- (13) Disincentives given by the Regional Government to Village Governments in the Regional Area or to other regional governments in carrying out activities that are not in line with the Spatial Planning as referred to in paragraph (11) letter b may take the form of a written warning and/or statement of objection.

Article 68

- (1) The provision of incentives and imposition of disincentives is carried out by the authorized Regional Apparatus.
- (2) Further provisions regarding the procedures for providing incentives and Disincentives are regulated in the Regent's Regulation.

Part Five
Sanction Directions

Article 69

- (1) Any person who commits a violation in the field of Spatial Planning shall be subject to administrative sanctions.

- (2) Administrative sanctions as referred to in paragraph (1) may be in the form of:
 - a. written warning;
 - b. temporary suspension of activities;
 - c. temporary suspension of public services;
 - d. closure of the location;
 - e. revocation of permits and/or KKPR;
 - f. cancellation of permits and/or KKPR;
 - g. demolition of construction;
 - h. restoration of space function; and/or;
 - i. administrative fines.

- (3) Further provisions regarding the mechanism and procedures for granting Administrative sanctions are regulated in the Regent's Regulation.

CHAPTER IX
RIGHTS, OBLIGATIONS, AND ROLES OF SOCIETY

Part One
Community Rights
Article 70

- In Spatial Planning, everyone has the right to:
- a. knowing the RTRW and detailed plans;
 - b. obtain the benefits of increased spatial value as a result of spatial planning Space in the Region;
 - c. obtain appropriate compensation for losses arising from the implementation of development activities in accordance with the Regional Spatial Planning Plan;

- d. submit objections to authorized officials regarding development that does not comply with the Spatial Planning Plan in their area;
- e. submit a demand for the cancellation of permits and the cessation of development that does not comply with the Spatial Planning Plan to the authorized officials;
- f. file a lawsuit for compensation against the Regional Government and/or permit holder if development activities that do not comply with the Spatial Planning Plan cause losses; and
- g. file a lawsuit with the State Administrative Court against a State Administrative decision related to a regional spatial planning dispute.

Article 71

- (1) The public can find out about the RTRW and detailed plans that have been determined as referred to in Article 71 letter a through announcements or dissemination by the Regional Government.
- (2) The obligation to provide media for announcements or dissemination as referred to in paragraph (1) is carried out by posting/installing the relevant Spatial Planning map in public places and also in the mass media, as well as by developing a spatial planning information system.

Article 72

- (1) The right to obtain benefits from increased spatial value as referred to in Article 71 letter b, is implemented in accordance with the provisions of statutory regulations.
- (2) The benefits of added value of space as referred to in paragraph (1) are in the form of economic, social and/or environmental benefits.

Article 73

- (1) The right to obtain appropriate compensation for losses due to changes in the original status as referred to in Article 71 letter c which is held by the community as a result of the implementation of the RTRW is carried out through deliberation between the interested parties.
- (2) If no agreement is reached regarding appropriate compensation as referred to in paragraph (1), the settlement will be carried out in accordance with applicable laws and regulations.

Part Two Community Obligations

Article 74

- (1) In the Utilization of Space, every person is obliged to:
 - a. comply with the established Spatial Planning Plan;
 - b. utilize space in accordance with the Space Utilization Permit/KKPR and authorized officials;
 - c. comply with the provisions stipulated in the Spatial Utilization/KKPR permit requirements; and
 - d. provide access to areas which are declared as public property by statutory provisions.
- (2) In spatial planning, every person is obliged to maintain the quality of space.

Article 75

- (1) Implementation of community obligations in the Utilization of Space implemented by complying with and applying the criteria, quality standards and arrangement rules established in accordance with the provisions applicable laws and regulations.
- (2) The rules and regulations for the Utilization of Space that have been practiced by the community from generation to generation can be applied as long as they take into account factors of environmental carrying capacity, environmental aesthetics, location and structure of the Utilization of Space and can guarantee the Utilization of Space. harmonious, harmonious and balanced.

Part Three Role of Society Article 76

The role of the community in Spatial Planning is carried out at the following stages:

- a. Spatial planning process;
- b. Utilization of Space; and
- c. control of spatial utilization.

Article 77

The form of community role in the Spatial Planning process as referred to in Article 77 letter a can be in the form of:

- a. provide input regarding:
 1. preparation of the preparation of the Spatial Planning Plan;
 2. determining the direction of development of the Region or Area;
 3. identification of potential and problems in regional development or Area;
 4. formulation of the concept of Spatial Planning; and/or
 5. Determination of Spatial Planning.
- b. cooperation with the Government, Regional Government and/or fellow community elements in Spatial Planning.

Article 78

The form of community role in the Utilization of Space as referred to in Article 77 letter b can be:

- a. providing input regarding Spatial Utilization policies;
- b. cooperation with the Central Government, Provincial Government, Regional Government, and/or other elements of society in the Utilization of Space; c. activities to utilize space in accordance with local wisdom and The established Spatial Plan;
- d. increasing efficiency, effectiveness and harmony in the use of land space, sea space, air space and space within the earth based on the provisions of laws and regulations;
- e. activities to safeguard defense and security interests and maintain and improve the sustainability of environmental functions and natural resources; and
- f. investment activities in the Utilization of Space in accordance with the provisions of laws and regulations.

Article 79

- (1) The procedures for community participation in the Utilization of Space in the Region as referred to in Article 77 letter b are carried out in accordance with the provisions of statutory regulations.

- (2) The implementation of community participation as referred to in paragraph (1) is coordinated by the Regional Apparatus in charge of Spatial Planning.

Article 80

Forms of community role in controlling spatial utilization as referred to in Article 77 letter c can be in the form of:

- a. input related to zoning directives and/or regulations, permits, incentives and disincentives and the imposition of sanctions; b. participation in monitoring and supervising the implementation of the established Spatial Plan; c. reporting to authorized agencies and/or officials in the event of finding suspected deviations or violations of Spatial Utilization activities that violate the established Spatial Plan; and d. filing objections against decisions of authorized officials regarding development that is deemed not in accordance with the Spatial Plan.

CHAPTER X
INSTITUTIONAL

Article 81

- (1) In the framework of coordinating spatial planning and cooperation between regions the Regional Spatial Planning Forum was formed.
- (2) The duties, organizational structure and work procedures of the Regional Spatial Planning Forum as referred to in paragraph (1) are determined by the Regent's Decree.

CHAPTER XI
DISPUTE RESOLUTION

Article 82

- (1) The settlement of Spatial Planning disputes in the first stage is attempted based on the principle of deliberation to reach consensus.
- (2) In the event that no agreement is reached regarding the resolution of the dispute as referred to in paragraph (1), the parties may seek to resolve the dispute through the courts or outside the courts in accordance with the provisions of statutory regulations.

CHAPTER XII
OTHER PROVISIONS

Article 83

- (1) In the event of a discrepancy between the RTRW and the National and Provincial development plans, the implementation of the Spatial Utilization program will be based on the provisions of the Central Government.
- (2) The RTRW is valid for 20 years and is reviewed once every 5 years.
(five years).
- (3) The review as referred to in paragraph (2) may be carried out more than 1 (one) time within 5 (five) years if there are changes in the strategic environment in the form of:
 - a. large-scale natural disasters determined by regulations
legislation;

- b. changes to the territorial boundaries of the state as determined by regulations legislation;
- c. changes to regional boundaries as determined by statutory regulations; and/or
- d. strategic changes in national policy.

LIST OF PRIMARY LOCAL ROADS AND SECONDARY LOCAL ROADS

A. PRIMARY LOCAL ROADS

1. Arjosari-Gondosari Road in Arjosari District.
2. Arjosari-Jatimalang Road in Arjosari District.
3. Bandar-Ngagik Road in Bandar District.
4. Bandar-Tugu Ngunut Road in Bandar District.
5. Bandar-Watupatok Road in Bandar District.
6. Bangunsari Road - Ponorogo Border in Bandar District.
7. Bangunsari-Dayakan Road in Bandar District.
8. Bangunsari-Gondanglegi Road in Bandar District.
9. Bangunsari-Lemahbang in Bandar District.
10. Bangunsari-Sidoharjo Road in Pacitan District.
11. Bangunsari-Tumpuk Road in Bandar District.
12. Bangunsari-Watupatok Road in Bandar District.
13. Banyon-Sundang Road in Sudimoro District.
14. Jalan Bawur-Pantai Daki in Sudimoro District.
15. Belah-Gendaran Road in Donorojo District.
16. Belah-Sekar Road in Donorojo District.
17. Belah-Sukodono Road in Donorojo District.
18. Bolosingo-Tamanasri Road, via:
 - a. Pacitan District; and b.Pringkuku District.
19. Bomo-Klepu Road, via:
 - a. Donorojo District; and b. PunungDistrict.
20. Bomo-Sekar Road, via:
 - a. Donorojo District; and b. PunungDistrict.
21. Bonsiak-Sepang-Wonoanti Road in Tulakan District.
22. Bubakan-Kasihani Road in Tegalombo District.
23. Bubakan-Losari-Ngumbul Road in Tulakan District.
24. Jalan Bulu-Jodok in Pringkuku District.
25. Candi-Srau Road in Pringkuku District.

26. Cangkring-Sembowo-Baosan Lor Road via:
 - a. Ngadirojo District; and
 - b. Sudimoro District.
27. Cemeng-Widoro Road in Donorojo District.
28. Cokrokembang-Hadiwarno Road in Ngadirojo District.
29. Dadapan-Watukarung-Dersono Road in Pringkuku District.
30. Dersono-Kalak Road via:
 - a. Donorojo District; and b.Pringkuku District.
31. Donorojo-Gedongrejo Road in Donorojo District.
32. Donorojo-Jeblogan Road in Donorojo District.
33. Donorojo-Mantren-Ploso Road passes through:
 - a. Punung District; and b.Pringkuku District.
34. Donorojo-Sekar Road in Donorojo District.
35. Jalan Gawang-Gembuk in Kebonagung District.
36. Gawang-Sidomulyo Road in Kebonagung District.
37. Gayam-Bulusari Road in Tegalombo District.
38. Gayuhan-Sedayu-Mlati Road in Arjosari District.
39. Gedangan-Ngile Road via:
 - a. Tegalombo District; and
 - b. Tulakan District.
40. Gegeran-Kalikuning Road in Donorojo District.
41. Gemaharjo-Binade Road in Tegalombo District.
42. Gemaharjo-Pagergunung Road in Sudimoro District.
43. Gemaharjo-Watupatok Road via:
 - a. Bandar District; and b.Tegalombo District.
44. Gembong-Kalikuning Road in Arjosari District 45. Gendaran-Sukodono Road in Donorojo District 46. Genting-Sidomulyo Road via: a. Ngadirojo District; and b. Tulakan District.
47. Gesingan-Losari Road in Tulakan District 48. Glinggangan-Mendolo Kidul Road via: a. Pringkuku District; and b. Punung District.
49. Glinggangan-Sambong Road in Pacitan District.
50. Glinggangan-Tamanasri Road in Pringkuku District.
51. Glonggong-Cemeng Road in Donorojo District.

52. Godeg Kulon-Pidakan Beach Road in Tulakan District.
53. Godeg Wetan-Kowang Beach Road in Tulakan District.
54. Gondang-Petungsinarang Road via: a. Arjosari District; b. Bandar District; and c. Nawangan District.
55. Gondosari-Kebonsari-Tenggar Road in Punung District.
56. Jalan Gondosari-Ploso-Jeblogan in Punung District.
57. Gunungpegat-Kebonagung Road in Kebonagung District.
58. Hadiluwih-Pagerejo Road in Ngadirojo District.
59. Hadiluwih-Sidomulyo Road in Ngadirojo District.
60. Hadiwarno-Taman Beach Road in Ngadirojo District.
61. Hadiwarno-Wonodadi Wetan Road in Ngadirojo District.
62. Jatigunung-Gasang Road in Tulakan District.
63. Jatimalang-Karanggede-Purwoharjo Road in Arjosari District.
64. Jetislur-Penggung Road in Nawangan District.
65. Jalan Jelok-Tileng-Wonogondo via:
 - a. Kebonagung District; and
 - b. Pacitan District.
66. Jeruk-Bandar Road in Bandar District.
67. Jetak-Worawari Road in Kebonagung District.
68. Jetislur-Pakisbaru Road in Nawangan District.
69. Jetislur-Ngromo Road in Nawangan District.
70. J Lubang-Dersono Road in Pringkuku District.
71. Joho-Tenggar Road in Sudimoro District.
72. Kalak Road - Central Java Border in Donorojo District.
73. Kalak-Bomo Road via:
 - a. Donorojo District; and b. Punung District.
74. Kalak-Piser Beach Road in Donorojo District.
75. Kalak-Sawahan Road in Donorojo District.
76. Kalikuning-Kalitengi Road in Tulakan District.
77. Kalipelus-Pangasan Beach Road in Kebonagung District.
78. Kalipelus-Srengit Beach Road in Kebonagung District.
79. Karanganyar-Katipugal Road in Kebonagung District.
80. Karanggede-Gondang Road in Arjosari District.
81. Karanggede-Purwoharjo Road in Arjosari District.
82. Karanggede-Tokawi Road in Arjosari District.
83. Karangnongko-Bakung Beach Road in Kebonagung District.
84. Karangrejo-Tinatar Road in Kebonagung District.
85. Karangturi-Ngobyok Road in Sudimoro District.

86. Kasihan-Kerto Road via:
- a. Tegalombo District; and
 - b. Tulakan District.
87. Katipugal-Tawang Beach Road in Kebonagung District.
88. Kebonagung-Sanggrahan Road in Kebonagung District.
89. Kebondalem-Bandar Road via:
- a. Bandar District; and b.
 - Tegalombo District.
90. Jalan Kebondalem-Kalikuning via:
- a. Tegalombo District; and
 - b. Tulakan District.
91. Kebonsari-Ngambarsari Road in Punung District.
92. Kedungbendo-Jetis Kidul-Temon Road in Arjosari District.
93. Kembang-Pelabuhan Road in Pacitan District.
94. Kembang-Purwoasri Road via: a.
- Kebonagung District; and
 - b. Pacitan District.
95. Kemuning-Ngreco Road in Tegalombo District.
96. Kemuning-Tegalombo Road in Tegalombo District.
97. Kendal-Gondanglegi Road in Bandar District.
98. Kendal-Wareng Road in Punung District.
99. Ketanggung-Klepu Road in Sudimoro District.
100. Ketanggung-Sembowo Road in Sudimoro District.
101. Jalan Keborne-Wonodadi Wetan in Ngadirojo District.
102. Ketepung-Tambakrejo Road in Arjosari District.
103. Ketepung-Wonogondo Road in Kebonagung District.
104. Ketrowonojono-Lor Road in Tulakan District.
105. Jalan Ketrowonojono-Kasihan through:
- a. Tegalombo District; and
 - b. Tulakan District.
106. Ketrowonojono-Slahung Road in Tulakan District.
107. Ketrowonojono-Kalikuning Road via: a. Tulakan District;
- b. Arjosari District; and c.
 - Kebonagung District.
108. Ketrowonojono-Klepu-Jatigunung Road via: a.
- Kebonagung District; and
 - b. Tulakan District.
109. Ketrowonojono-Pagutan Road via:
- a. Arjosari District; and

- b. Kebonagung District.
- 110. Ketrowonojoyo-Sidomulyo Road in Kebonagung District.
- 111. Kledung-Gemaharjo Road via:
 - a. Bandar District; and b.
 - Tegalombo District.
- 112. Kledung-Ploso Road in Bandar District.
- 113. Klepu-Gedompol Road in Donorojo District.
- 114. Klepu-Sawahan Road in Donorojo District.
- 115. Klepu-Sekar Road in Donorojo District.
- 116. Klesem-Kaliuluh Beach Road in Kebonagung District.
- 117. Jalan Kluwih-Cokrokembang via:
 - a. Ngadirojo District; and
 - b. Tulakan District.
- 118. Kluwih-Ngumbul Road in Tulakan District.
- 119. Kluwih-Padi Road in Tulakan District.
- 120. Jalan Komplang-Bandarangin via:
 - a. Ngadirojo District; and
 - b. Tulakan District.
- 121. Krajan-Kaligoro Road in Kebonagung District.
- 122. Krajan-Mando Gembuk Road in Kebonagung District.
- 123. Bandar-Panjing Ring Road in Bandar District.
- 124. Panjing-Saput Ring Road in Bandar District.
- 125. Mangunharjo-Petungsinarang Road via:
 - a. Bandar District;
 - b. Arjosari District; and c.
 - Tegalombo District.
- 126. Mantren-Gembuk Road in Kebonagung District.
- 127. Mantren-Ngamban Donorojo Road in Donorojo District.
- 128. Mbawur-Daki Beach Road in Sudimoro District.
- 129. Jalan Mendolo Lor-Mendolo Kidul in Punung District.
- 130. Mentoro-Arjosari Road in Arjosari District.
- 131. Mlati-Tinatar Road via:
 - a. Arjosari District; and b. Punung
 - District.
- 132. Mloko-Janti Pringkuku Road in Pringkuku District.
- 133. Mujing-Sempu Road in Nawangan District.
- 134. Nalangan-Jeruk Road in Bandar District.
- 135. Nawangan-Ngunut Road passes through:
 - a. Bandar District; and
 - b. Nawangan District.
- 136. Nawangan-Pagergunung Road in Nawangan District.

137. Nawangan-Petungsinarang Road in Bandar District.
138. Ngadirejan-Pringkuku Road in Pringkuku District.
139. Ngadirejan-Tamansari Road in Pringkuku District.
140. Ngadirojo-Sudimoro Road passes
through: a. Ngadirojo District; and
b. Sudimoro District.
141. Ngadirojo-Wonokarto Road in Ngadirojo District.
142. Nglaran-Padi Road in Tulakan District.
143. Nglumpang-Kunir Beach Road in Sudimoro District.
144. Ngreco-Kasihani Road in Tegalombo District.
145. Ngromo-Bugelan Road in Nawangan District.
146. Ngromo-Padarangin Road in Nawangan District.
147. Ngromo-Pakisbaru Road in Nawangan District.
148. Ngunut-Mujing Road in Bandar District.
149. Padi-Kluwih Road in Tulakan District.
150. Pagah-Sebrok Road in Pringkuku District.
151. Pagerejo-Padi Road passes
through: a. Tulakan District; and
b. Ngadirojo District.
152. Pagerlor-Crabak Road in Sudimoro District.
153. Pagerlor-Ngampo Dadapan Road in Sudimoro District.
154. Pagerlor-Pagerkidul Road in Sudimoro District.
155. Pagotan-Gegeran Road in Arjosari District.
156. Pakisbaru-Brenggolo Road in Nawangan District.
157. Pakisbaru-Sempu Road in Nawangan District.
158. Pakis-Ngumbul Road in Tulakan District.
159. Pakisbaru-Sobo Road in Nawangan District.
160. Palimo-Bero Road in Pringkuku District.
161. Penggung-Hargosari Road in Nawangan District.
162. Penggung-Brenggolo Road in Nawangan District.
163. Penggung-Pakisbaru Road in Nawangan District.
164. Penggung-Sidorejo Road in Nawangan District.
165. Pentung-Ngile-Bubakan Road in Tulakan District.
