

PETUNJUK TEKNIS PENDAFTARAN TANAH SISTEMATIS LENGKAP

Nomor 1/Juknis-100.HK.02.01/I/2022

Tanggal 26 Januari 2022

**KEMENTERIAN AGRARIA DAN TATA RUANG/
BADAN PERTANAHAN NASIONAL**

FOREWORD

We express our gratitude to Allah SWT, who by His power has allowed us to continue to carry out our land duties even better. With the publication of

The 2022 Complete Systematic Land Registration Technical Instructions (PTSL) are a new scheme based on the identification, formulation, implementation, and evaluation of PTSL implementation in previous years, and in accordance with newly issued laws and regulations.

This year's Technical Guidelines reiterate that data quality is an integral part of every land parcel we register in all contexts. To ensure this, adjustments have been made, including:

1. Complete Systematic Land Registration in 2022, not only completes unregistered areas, improves the quality of K4 data and completes certification of K3.1 and K3.3 improvements, but also requires implementers to realize Electronic Ready Data (DSE) in *the output of* Complete Systematic Land Registration in the context of digital transformation for electronic services;
2. Preparation of a complete village/sub-district settlement *roadmap* by combining *reliable* and *completeness* elements as well as calculating the target volume of Land Plot Maps, Land Title Certificates and K4 for each village/sub-district with a data quality improvement mechanism, as well as non-systematic land registration activities as an integrated part of the planning process implemented T-1 or after the 2022 Budget Implementation List is received by the Land Office;
3. The Cluster 3.3 settlement scheme and Land Plot Maps without clusters are the targets for Land Title Certificates in the 2022 Complete Systematic Land Registration activities;
4. The introduction of Cluster 3.4 as an additional Complete Systematic Land Registration *output* cluster to accommodate Complete Systematic Land Registration activities for which the budget allocated is limited to Land Plot Maps plus legal data collection (Puldata) and the subject is not willing to have a certificate issued;
5. Strengthening the role of the Head of the Land Office in the planning, preparation and implementation stages location determination;
6. Strengthening the role of the National Land Agency Regional Office in determining locations and proposing complete village/sub-district declarations. The Head of the National Land Agency Regional Office is required to examine proposals and approve or revise the location determination submitted by the Head of the Land Office, in accordance with *the roadmap*.

completion of Complete Systematic Land Registration until 2024, as well as verifying complete village/sub-district proposals whose data is ready for electronic services;
7. Strengthening quality control activities for physical data collection and quality control in activities to improve the quality of registered land plots (K4);
8. Determining the priority of adding complete villages/sub-districts and continuing the Complete Systematic Land Registration product from 2017 to 2021 which has not been budgeted for in previous SHAT activities as complete villages/sub-districts;
9. Validation of Land Registers is mandatory to support the implementation of electronic land services. Therefore, in carrying out Complete Systematic Land Registration activities, the Land Office must ensure that land registers and certificates match the data in the KKP application.
10. Prioritize and promote the use of the "Survey Tanahku" application in Complete Systematic Land Registration activities in order to collect physical data and legal data simultaneously, as well as completing K4;
11. Reports on the list of BPHTB owed are periodically submitted to the local Regent/Mayor and the PPh owed to the local Pratama Tax Office. This reporting can be done through an integrated *host-to-host Electronic System*. For land offices that have not implemented the Electronic System integration, reporting is done manually.

These Technical Instructions apply to the implementation of PTSL in 2022. If there are no further changes, these Technical Instructions can serve as guidelines for the implementation of PTSL in subsequent years.

In its use, the PTSL implementation strategy must be tailored to the conditions of each land office. These Technical Instructions are designed to serve as a guideline for PTSL implementation starting in 2022 and in subsequent years, and to ensure its best implementation.

Jakarta, January 26, 2022

MINISTER OF AGRARIAN AND SPATIAL PLANNING/
HEAD OF THE NATIONAL LAND AGENCY

SECRETARY GENERAL,

HIMAWAN ARIEF SUGOTO

TECHNICAL INSTRUCTIONS
NUMBER 1/Juknis-100.HK.02.01/II/2022
ABOUT
COMPLETE SYSTEMATIC LAND REGISTRATION

INTRODUCTION

A. General

Land is a gift from God Almighty which is very important for human life.

As a source of welfare, prosperity and life, its management is the responsibility of the State as mandated in Article 33 paragraph (3).

The 1945 Constitution states that: "The land, water and natural resources contained therein are controlled by the State and used for the greatest prosperity of the people," which in turn became the basis for regulations in Law Number 5 of 1960 concerning Basic Agrarian Regulations and was further elaborated in Government Regulation Number 24 of 1997 concerning Land Registration.

Based on Government Regulation Number 24 of 1997, land registration is a series of activities carried out by the Government continuously, consistently and regularly, including the collection, processing, bookkeeping, presentation and maintenance of physical data and legal data, in the form of maps and lists, regarding land plots and apartment units, including the provision of certificates of proof of rights for land plots for which rights already exist and ownership rights to apartment units and certain rights that encumber them, where it is stated in Article 13 paragraph (1) that the implementation of land registration is through systematic land registration and sporadic land registration.

Complete Systematic Land Registration (PTSL)

Over time, the Systematic Land Registration, implemented village by village in districts and sub-district by sub-district in urban areas, encompassing all land parcels throughout the Republic of Indonesia, has evolved into the Complete Systematic Land Registration Policy (PTSL). This policy is a National Strategic Program, focused on developing new land parcel data while simultaneously maintaining the quality of existing land parcel data to ensure complete and accurate registration. The stages of the Complete Systematic Land Registration (PTSL) are as follows.

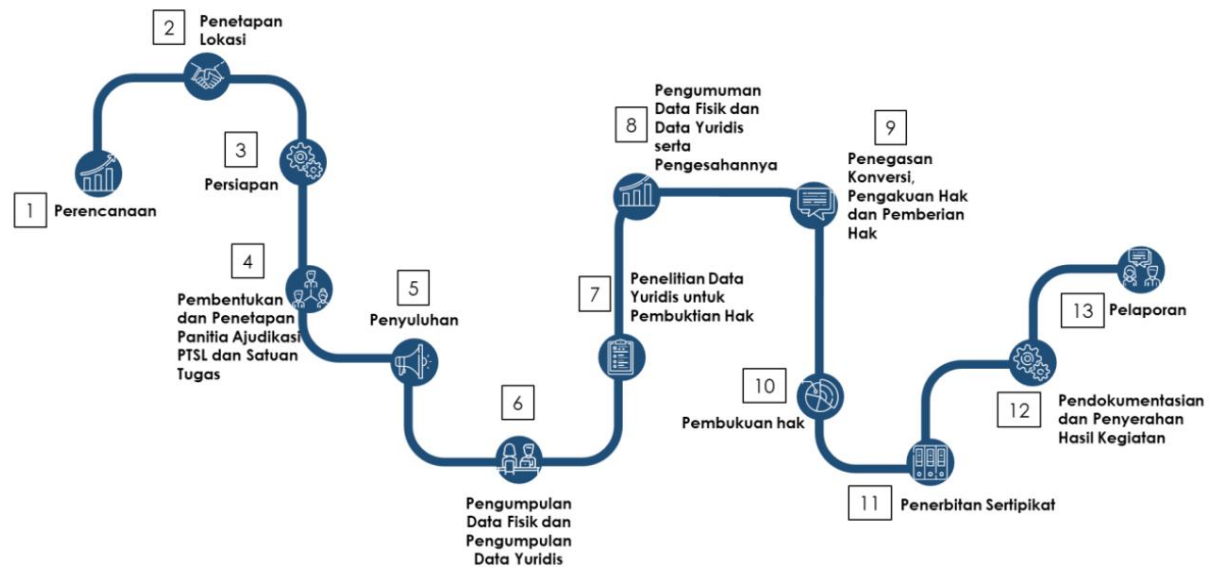

Figure 1 PTSL Work Stages

Complete Regency/City Land Registration (PTKL)

Complete Regency/City Land Registration (PTKL) is a Complete Village/Sub-district-based Land Registration conducted in a Regency/City where the number of registered land plots is above 80% (eighty percent) and unregistered land plots are scattered sporadically. Provisions regarding PTKL are further regulated in the complete village/sub-district and complete regency/city regulations.

In the 2022 PTKL, it is hoped that a complete Regency/City will be formed and *block adjustments* will also be implemented (the result of the 2021 *pilot project* in East Jakarta).

Cross-Sector Land Registration

Cross-Sector Land Registration activities, the objects of which are within the location determination for Complete Systematic Land Registration (PTSL) in Villages/Sub-districts, are carried out through the PTSL mechanism.

If the object of Cross-Sector Land Registration is outside the designated location for Complete Systematic Land Registration (PTSL), it will be resolved using Non-Systematic PBT and Non-Systematic SHAT. The implementation of Cross-Sector Land Registration refers to the Standard Procedures and Criteria Norms (NSPK) regarding

Applicable Cross-Sector Land Registration.

B. Legal Basis

1. Law Number 5 of 1960 concerning Basic Agrarian Principles (State Gazette of the Republic of Indonesia 1960 Number 104, Supplement to the State Gazette of the Republic of Indonesia Number 2043);
2. Government Regulation Number 24 of 1997 concerning Land Registration (State Gazette of the Republic of Indonesia 1997 Number 59, Supplement to the State Gazette of the Republic of Indonesia Number 3696);
3. Government Regulation Number 128 of 2015 concerning Tariffs on Types of Non-Tax State Revenue Applicable to the Ministry of Agrarian Affairs and Spatial Planning/National Land Agency (State Gazette of the Republic of Indonesia 2015 Number 351, Supplement to the State Gazette of the Republic of Indonesia Number 5804);

4. Government Regulation Number 18 of 2021 concerning Management Rights, Land Rights, Apartment Units, and Land Registration (State Gazette of the Republic of Indonesia 2021 Number 28, Supplement to the State Gazette Number 6630);
5. Presidential Regulation Number 47 of 2020 concerning the Ministry of Agrarian Affairs and Spatial Planning (State Gazette of the Republic of Indonesia 2020 Number 83);
6. Presidential Regulation Number 48 of 2020 concerning the National Land Agency (State Gazette of the Republic of Indonesia 2020 Number 84);
7. Presidential Instruction Number 2 of 2018 concerning the Acceleration of Land Registration Complete Systematic throughout the Republic of Indonesia;
8. Presidential Instruction Number 5 of 2019 concerning the Cessation of the Issuance of New Permits and Improvement of the Governance of Primary Natural Forests and Peatlands;
9. Regulation of the Minister of State for Agrarian Affairs/Head of the National Land Agency Number 3 of 1997 concerning Implementing Provisions of Government Regulation Number 24 of 1997 concerning Land Registration as amended several times, most recently by Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 16 of 2021 concerning the Third Amendment to Regulation of the Minister of State for Agrarian Affairs/Head of the National Land Agency Number 3 of 1997 concerning Implementing Provisions of Government Regulation Number 24 of 1997 concerning Land Registration (State Gazette of the Republic of Indonesia 2021 Number 953);
10. Regulation of the Head of the National Land Agency Number 1 of 2010 concerning Land Service Standards and Regulations;
11. Regulation of the Minister of Public Works and Public Housing Number 28/PRT/M/2015 concerning the Determination of River Boundary Lines and Lake Boundary Lines (State Gazette of the Republic of Indonesia 2015 Number 772);
12. Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 16 of 2020 concerning the Organization and Work Procedures of the Ministry of Agrarian Affairs and Spatial Planning/National Land Agency (State Gazette of the Republic of Indonesia 2020 Number 985);
13. Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 17 of 2020 concerning the Organization and Work Procedures of the Regional Offices of the National Land Agency and Land Offices (State Gazette of the Republic of Indonesia 2020 Number 986);
14. Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 18 of 2021 concerning Procedures for Granting Management Rights, Land Rights, Apartment Units and Land Registration (State Gazette of the Republic of Indonesia 2021 Number 1202).

C. Purpose and Objectives

These Technical Instructions for Complete Systematic Land Registration (PTSL) are intended as guidelines for implementing Complete Systematic Land Registration (PTSL) activities within the Ministry of Agrarian Affairs and Spatial Planning/National Land Agency, Regional Office of the National Land Agency and Land Office.

The purpose of compiling these Technical Instructions is to ensure standardization and uniformity of understanding in implementing Complete Systematic Land Registration (PTSL) activities.

D. Scope

These Complete Systematic Land Registration Technical Instructions (PTSL) include:

1. Complete Systematic Land Registration Activities (PTSL);
2. Follow-up on the results of Complete Systematic Land Registration (PTSL);
3. Improving the quality of registered land plot data;
4. Complete Village/Sub-district and Complete Regency/City;
5. My Land Survey Application; and
6. *Output*, Evidence and Budget.

E. General Provisions

1. Land Registration is a series of activities carried out by the Government continuously, sustainably and regularly, including collecting, processing, bookkeeping, and presentation as well as maintenance of physical data and data juridical, in the form of maps and lists, regarding land plots, Upper Space Land, Basement and apartment units, including the provision of certificate of proof of rights for land plots, land space, space Underground land for which there are rights and ownership rights to the apartment units and certain rights that encumber it.
2. Complete Systematic Land Registration, hereinafter abbreviated as PTSL, is a first-time Land Registration activity carried out simultaneously for all Land Registration objects throughout the territory of the Republic of Indonesia in one village/sub-district or other name of the same level, which includes the collection of physical data and/or legal data regarding one or several Land Registration objects for registration purposes.
3. A Complete Village/Sub-district is a Village/Sub-district that has fulfilled the complete and valid requirements both spatially and legally.
4. A Complete Regency/City is a regency/city where all land plots are registered and each village/sub-district has fulfilled complete and valid requirements, both spatially and legally.
5. Land Data Collector or Puldatan is an officer who assists in collecting physical data and collecting legal data in the PTSL scheme based on community participation.
6. Data Quality Improvement is the process of improving land area data to become KW1 is valid.
7. The My Land Survey Application is an application for collecting physical and legal data integrated in an Electronic System provided by the Ministry of Agrarian Affairs and Spatial Planning/National Land Agency.
8. The Ministry of Agrarian Affairs and Spatial Planning/National Land Agency, hereinafter referred to as the Ministry, is the ministry that organizes government affairs in the agrarian/land and spatial planning sectors.
9. Regional Office of the National Land Agency, hereinafter referred to as the Office Region is a vertical agency of the Ministry in the Province.
10. The Land Office is a vertical agency of the Ministry in the Regency/City.

PLANNING STAGES

A. Roadmap Planning

In the PTSL activity planning stage, the Head of the Land Office carries out:

1. Compile/review/revise *the Roadmap* for the implementation of PTSL and the completion of complete villages/sub-districts until 2024, adjusted to the conditions of data developments, both the availability of unregistered land and the availability of PTSL *output* in the following year, which can become the SHAT Target for the current year or the following year.
2. Determine *the roadmap* for PBT, SHAT and K4 targets (number of fields and area per year) until 2024 with the following explanation:
 - a. The PBT target is the difference between the estimated number of land plots and the number of registered land plots;
 - b. The SHAT targets are:
 - 1) The current year's PBT target is added to K2, K3 (2017 and 2018), K.3.1 and K3.3 in 2019, 2020 and 2021 as well as NIB without clusters (PBT PTSL products from 2017 to 2020);
 - 2) K2, K3 2017 and 2018, K.3.1 and K3.3 2019, 2020 and 2021 and NIB without clusters (PBT PTSL products 2017 to 2020).
 - c. For K2, K3 in 2017 and 2018, K.3.1 and K3.3 in 2019, 2020 and 2021 as well as NIB without clusters (PBT PTSL products in 2017 to 2020) whose subjects do not want to be issued a certificate or do not want to participate in the PTSL program are not the target of SHAT in the current year or the following year;
 - d. The K4 target is the number of KW4, KW5, and KW6 as well as Land Books that have not been entered. Land Books that have not been entered must be accompanied by a Land Book Entry Report that is acknowledged by the Head of the Land Office Work Unit.

Figure 2 Standard PTSL planning timeline

B. Roadmap Analysis and Review

1. Kantah prepares an analysis of PTSL location determination and workload analysis at each Land Office;
2. coordinate with district/city governments to support PTSL activities and provide relief (exemption, reduction, no fines for outstanding BPHTB) for BPHTB payments in the context of first-time land registration through PTSL;

3. In the PTSL activity planning stage, the Head of the Regional Office conducts a review to the Land Office's planning *output*. Planning is made T-1.

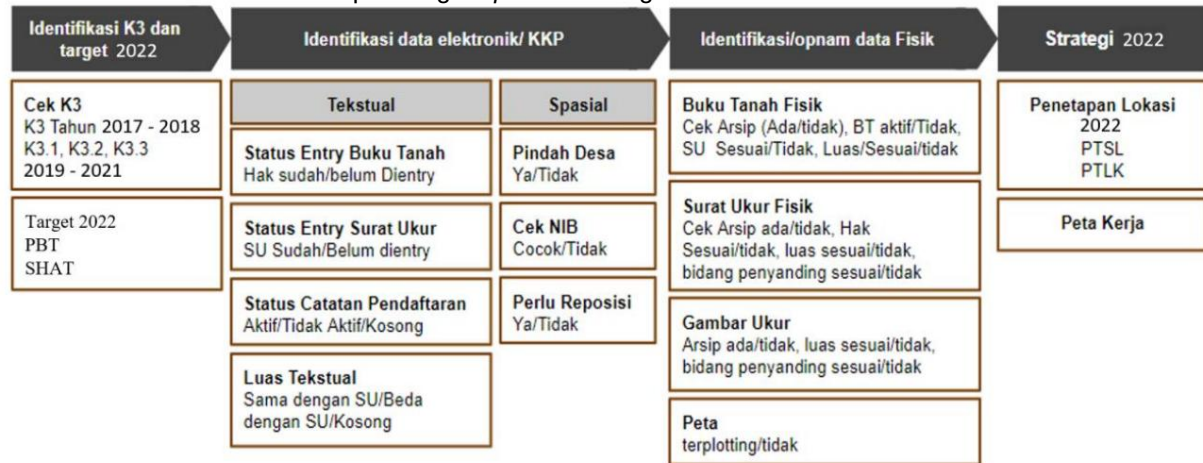

Figure 3 Determination of SHAT, PBT and K4 Target Volume Completion in planning

C. Determination of SHAT, PBT, K4 Target Volume

Determination of the Target Volume of SHAT, PBT, K4 in planning is done by conducting Identification:

1. Village/Sub-district

Estimated number of land plots in a village/sub-district area:

- The estimated number of land plots can be calculated using the DHKP data approach, the land plot census from the Central Statistics Agency Office, IP4T by delineating land plots for each village/sub-district or using other accountable methods/analyses;
- Summarize the number of Land Books that have been issued;
- Summarize K2, K3.1, and K3.2;
- Summarize K3 in 2017 and 2018, K3.3 in 2019, 2020 and 2021 as well as NIB without clusters (PBT PTSL products from 2017 to 2020);
- Recapitulation of data quality (KW 4, KW 5, and KW 6).

Based on the data above, the Land Office prepared a *Roadmap*

Complete village/sub-district development by 2024 (must be based on the above data). The Land Office's PTSL activity *roadmap* is created on a village/sub-district basis.

by setting target volumes of SHAT, PBT and K4 for each village/sub-district

until 2024 with the following explanation: a. The target volume of PBT

in the village/sub-district area is the difference between the estimated number of plots (number 1 letter a) and the number of registered land plots (number 1 letter b, letter c, and letter d);

b. The target volume of SHAT in one village/sub-district is the volume:

- PBT plus K3 and K3.3 as referred to in number 1 letter d or
- K3, K3.3 and NIB without clusters as referred to in number 1 letter d if there is no PBT budget available;

c. The target volume of K4 is the sum of the data quality recapitulation (KW 4, KW 5, and KW 6).

2. Regency/City.

a. The target volume of SHAT, PBT, and K4 in one Regency/City area is the sum of the target volumes of Villages/Sub-districts;

- b. The total target volume must be completed by 2024 and become District/City Land Office *roadmap* .
3. Province.
 - a. The target volume of SHAT, PBT, and K4 in one province is the sum of from the target volume per Regency/City;
 - b. The total target volume must be completed by 2024 and become Regional Office *roadmap* .

Determination of SHAT and PBT Target Volume must be done by filling out *the form* excel at the following link: <https://bit.ly/2JJfJEr>

</

Figure 4 Example of Determining the Number of PTSL Targets

Data entry for the target volumes of SHAT, PBT, and K4 which are set as the PTSL targets for the following year is done via the following [link](#) :

<https://ptsl.atrbpn.go.id/Target/IndexTahunDepan>

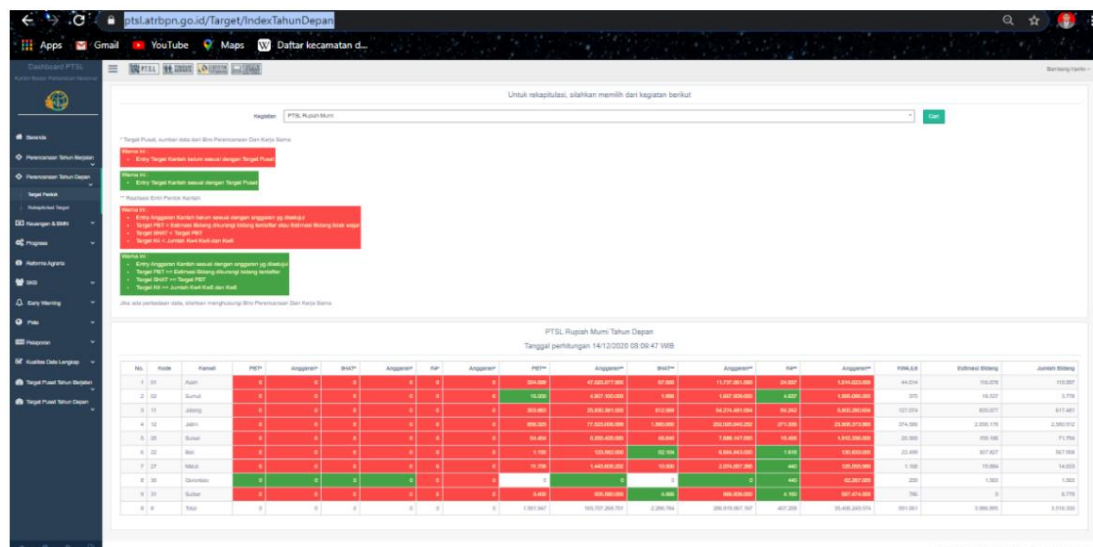

Figure 5 Next Year's Target *Dashboard*

4. Preparation of Office Workload Analysis based on all activities stated in the DIPA for the current year adjusted to the conditions of Human Resources, Equipment and Infrastructure.

Activity Results (Output):

1. List of PTSL Location Analysis & Office Workload Analysis;
2. Land registration *roadmap* (Target Number of PBT, SHAT (including K3, K3.1 and K3.3) and K4) per village/sub-district;
3. Results of the Regional Office Review of planning *output* as KPI (*Key Performance Indicator*) for the Planning stage.

LOCATION DETERMINATION STAGES

A. Priority for Determining Locations Based on Land Data Conditions

Determination of PTSL

Locations: 1. In determining locations, prioritize villages/sub-districts:

- a. Villages/sub-districts where the percentage of registered land plots is still relatively small low to produce a Complete Village/Sub-district.
- b. Determination of locations from the previous year that have not yet reached the Village/Sub-district level Complete.

2. New locations that have never been designated as PTSL locations:

- a. Must be a Complete Village/Sub-district
- b. If possible, it is located side by side with the previously designated location as a PTSL location
- c. PBT Target (Estimated land area minus registered land area), SHAT Target (same as PBT Target) and K4 Target are allocated according to budget availability.

3. Locations that have been designated as PTSL Locations:

- a. There are PBT targets:
 - The village/sub-district location does not have a Complete Village Value (NDL) or the NDL is less than 80%;
 - Must be a complete village/sub-district;
 - Allocated PBT Target (Estimated land area minus registered land area), SHAT Target (equal to PBT Target or PBT Target plus *Backlog*) and K4 Target according to budget availability.
- b. No PBT target: SHAT (*Backlog*) Target and K4 Target are allocated according to budget availability.

4. In determining the location of PTSL including Cross-Sector objects, the Cooperation Agreement or others.

B. Location Determination Procedure

1. The Land Office submits an application for PTSL or PTKL Location Determination

by attaching: a. *Output* of the planning stage;

b. Village/Sub-district administrative boundaries as depicted in the proposed Location Determination (See the *stocktaking* diagram above). Indicative or definitive Village/Sub-district Administrative Boundaries can be obtained from various sources (Geospatial Information Agency, Ministry of Home Affairs, Regional Development Planning Agency, Village Government, etc.) or through the links in the attachment.

2. The Head of the Regional Office examines and provides approval in accordance with these Technical Instructions and the PTSL completion *Roadmap* until 2024 using a form that can be downloaded at the following link: <https://bit.ly/FormJuknisPTSL2022>

3. After receiving approval from the Head of the Regional Office, the Head of the Land Office determines the location of the PTSL and PTKL, attaching a location map.

4. Villages/Sub-districts designated in the 2022 Location Determination must be completed up to the Complete Village/Sub-district level. Location determination must follow the formula: maximum number of Villages/Sub-districts in Location Determination = $N+1$, where N is the target number of complete Villages/Sub-districts according to the type of financing.

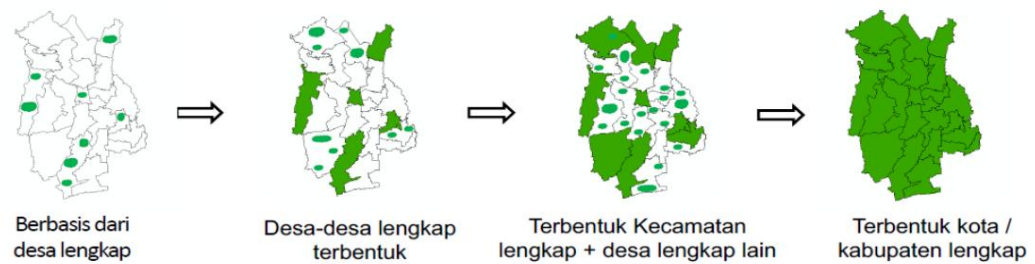

Figure 6 Principles for Determining PTSL Locations

- The determination of the location must result in a complete village/sub-district and if possible, it must be carried out using a "closer, closer and comprehensive" strategy with the concept of *moving target location* which is adjusted to the readiness of village/sub-district officials and the community or related parties in active participation.
- In locations where the SHAT target is greater than the PBT target, an evaluation of the SHAT realization achievement is carried out at the end of the first quarter (February) and the end of the second quarter (June), if the SHAT target achievement is not met, then a revision is made to the shift in the SHAT target between work units in one province or a shift in the SHAT target by the Center between provinces.
- The Land Office can increase the PBT, K4 and/or village/sub-district administrative boundary completion targets, through collaboration with the Village Government, Local Regional Government and other related parties.
- In the case of adjustments, additions and/or reductions in targets or villages/sub-districts designated as PTSL locations, the Head of the Land Office submits a request for Revision of Location Determination to the Head of the Regional Office by attaching materials in accordance with point 1 above and a description of the changes.
After obtaining approval from the Regional Office, the Head of the Land Office determines the location of the PTSL and/or PTKL, accompanied by a location map.

Activity Results (Output):

Location Determination Decree, accompanied by a Location Map with administrative boundaries.

PREPARATION STAGES

To ensure the smooth implementation of PTSL activities, the Head of the Land Office prepares:

1. Facilities and infrastructure for implementing PTSL activities, including preparing facilities for handling complaints submitted during counseling;
2. Human resources;
3. Coordination/socialization carried out before the start of PTSL by the Head of the Regional Office in each Regency/City where PTSL is located to the Regional Head and related regional apparatus, Regency/City DPRD, Forkompinda, and community leaders; and
4. Budget allocation.

To implement PTSL, the following documents need to be prepared:

1. Decree on Location Determination, which includes a map of the location for Land Registration. Complete.
2. Decree of the Implementation Team, adjusted to the composition of the Adjudication Team and Task Force in the implementation of PTSL.

Preparation of Work Map

The working map includes the following information:

1. The work map number is in accordance with the sheet index numbering in one Village/Sub-district which is made in more detail in RT/RW/Pedukuhan/Dusun blocks or adjusted to local wisdom;
2. *Overlay* the Registration Map with other Maps, for example Forest Area Boundary Map, Conservation Area Map, PBB Map, Administrative Boundary Map, LP2B Map, Indicative Map of Termination of Issuance of New Permits (PIPPIB);
3. Map type, for example Photo Map, CSRT Map, Drone Photo Map, Line Map or other map other;
4. Map Quality and Scale/Resolution (1:1,000 for urban areas, and 1:2,500 for rural areas or according to data availability);
5. Year of manufacture;
6. Origin of the map;
7. The results of the use of work maps by the physical task force and the legal task force are at least include information:
 - a. Results of mapping of measured land areas;
 - b. NIB or File Number or Field Sequence Number (NUB) per measured/mapped land plot;
 - c. List of land plot objects with sequential number information; and
 - d. File Number and or Field Sequence Number (NUB), temporary area (if already calculated), name (temporary), and land plot information.

The Work Map is a quality control tool (first QC) for the existence or availability of PTSL targets, both in unregistered areas (PBT Targets), K4, K3.3 or K3.1.

Activity Results (*Output*):

Work Map (example attached) accompanied by an Inventory List in the form of registered land plots (K.1, K.2, K.3, K.3.1, K3.2, K.3.3 and K4 List), and unregistered land plots at each location.

STAGES OF FORMATION AND DETERMINATION OF THE PTSL ADJUDICATION COMMITTEE AND TASK FORCE (SATGAS)

A. PTSL Adjudication Committee

1. The composition of the PTSL Adjudication Committee is guided by the Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 6 of 2018 concerning Complete Systematic Land Registration.
2. In the context of effectiveness and efficiency, the assignment of the PTSL Adjudication Committee takes into account distance and/or work area, takes into account workload analysis and the capabilities of the Adjudication Committee, Physical Task Force, Legal Task Force and Administrative Task Force.
3. If in certain circumstances, including limited human resources, minimal routine services, the Head of the PTSL Adjudication Committee can be held by the Head of the Land Office and the inauguration as Head of the PTSL Adjudication Committee will be carried out by the Head of the local Regional Office of the National Land Agency.
4. The PTSL Adjudication Committee is assisted by the Physical Task Force, the Legal Task Force, the Legal Task Force Completion of K4 and Administrative Task Force.

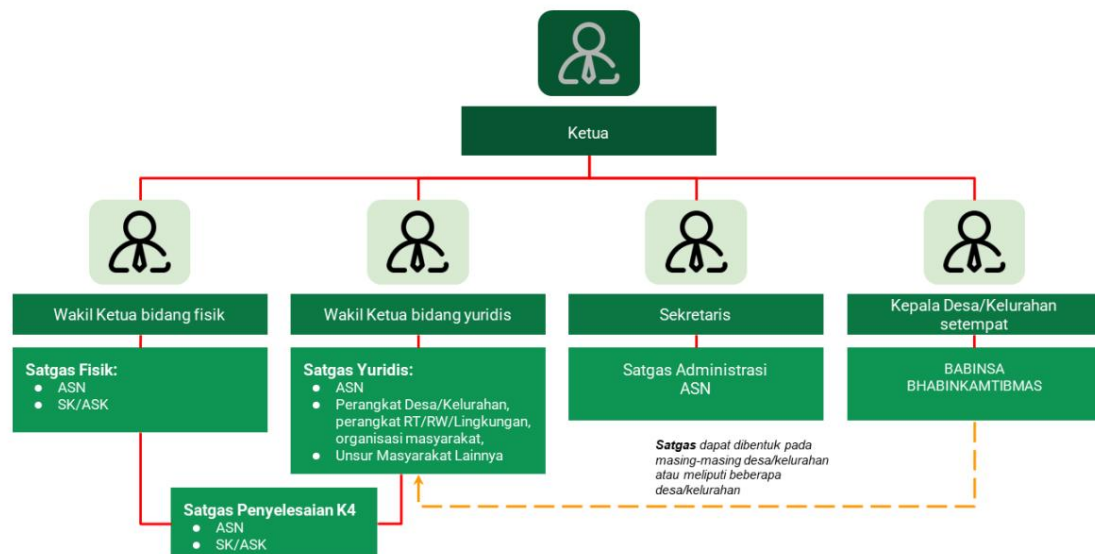

Figure 7 The PTSL Adjudication Committee is assisted by the Physical Task Force, the Legal Task Force, and Administrative Task Force

B. Physical Task Force

1. The Physical Task Force consists of elements of the Ministry's State Civil Apparatus, Non-Permanent Employees/Non-Civil Servant Government Employees of the Ministry, Licensed Cadastral Surveyors, Licensed Cadastral Surveyor Assistants and/or KJSKB chaired by the Deputy Chair for the physical field of the PTSL Adjudication Committee.
2. In carrying out its duties, the Physical Task Force as a Physical Data Collector can be assisted by Land Data Collection Officers (Puldata), namely community groups who are given supplies and assigned to be facilitators and implementers of the physical data collection process and legal data collection through procedures and financing in accordance with the provisions of laws and regulations. The results of legal data collection carried out by Puldata are verified and validated by the Legal Task Force.
3. The number of Physical Task Forces can be formed more than 1 (one) by adjusting the set targets.

C. Legal Task Force

1. The Juridical Task Force, apart from elements of the Ministry's State Civil Apparatus, Non-Permanent Employees/Non-Civil Servant Government Employees of the Ministry, may involve Village/Sub-district Apparatus, RT/RW/Neighborhood apparatus, community organizations, Village Guidance Officers (BABINSA), Community Security and Order Guidance Officers (BHABINKAMTIBMAS) and/or other community elements, chaired by the Deputy Chair for Juridical Affairs of the PTSL Adjudication Committee.
2. In carrying out the task of collecting legal data, the Legal Task Force can be assisted by elements of society including RT/RW, Youth Organizations (Karang Taruna), Community Groups, Village Guidance Officers (BABINSA), Community Security and Order Guidance Officers (BHABINKAMTIBMAS), Professionals or in collaboration with Universities in their area as Legal Data Collectors through procedures and funding in accordance with the provisions of laws and regulations.
3. In the case of legal data collection carried out by Puldatan, the legal task force is obliged to supervise the legal data collection activities carried out by Puldatan and verify the legal data collected by Puldatan.
4. The number of Juridical Task Forces can be formed more than 1 (one) by adjusting the set targets.

D. K4 Completion Task Force

1. The K4 Completion Task Force consists of members from the Physical Task Force and the Legal Task Force to form a separate team in each Adjudication Committee in the context of completing K4.
2. The K4 Completion Task Force is tasked with completing K4, preparing Complete Village/Sub-district proposals, ensuring Electronic Ready Data (DSE) and synchronizing digitalization and validation activities at PTSL locations.

E. Administrative Task Force

1. The Administrative Task Force consists of elements of the Ministry's State Civil Apparatus, and can be assisted by Non-Permanent Employees/Non-Civil Servant Government Employees of the Ministry, chaired by the Secretary of the PTSL Adjudication Committee.
2. The Administrative Task Force is under the coordination and assists in carrying out the duties of the Secretary of the PTSL Adjudication Committee.
3. The Administration Task Force helps to compile and manage the needs for facilities and infrastructure during PTSL activities.

F. Oath-taking and briefing of the PTSL Adjudication Committee and Units Task

1. The swearing-in of the PTSL Adjudication Committee and task force is carried out by the Head Land Office;
2. In this activity, the results of the planning stages, location determination and preparation of PTSL activities were also submitted to each Adjudication Committee;
3. Provision or training is carried out by the Regional Office.

G. KKP Application Access and Initial Data Entry

1. Access the KKP Application

- a. Each implementing officer is required to have a profile and access to the application based on the Decree of the PTSL Adjudication Committee and the task force by the Head of Office.
- b. For the Civil Service Physical Task Force that does not yet have a profile at the KKP, submit a profile based on the Decree of the PTSL Adjudication Committee and the task force to the Land Office admin.
- c. For the Third Party Physical Task Force, the SKB data must be verified on Partner Application (<https://mitra.atrbpn.go.id>).
- d. Accounts and *passwords* will be provided through the application, are confidential and are entirely the personal responsibility of the person concerned.
- e. Access to use the application is adjusted according to the activity flow diagram. f. In terms of collecting physical and legal data, use a survey application.
my land, then all members of the physical data collection officers and legal data collection officers who have been appointed are required to register on the My Land Survey application.

2. Initial Data Entry

The KKP Land Office Admin enters data into the KKP application based on the Implementation Decree and Location Determination as well as the Contract/Work Order (if the measurement is carried out by a Third Party). The data entered includes: area location, activity name, name of the Physical/Legal Task Force, and measurement targets for unregistered land plots and improving the quality of registered land plot data (K4) based on the Location Determination Decree.

Activity Results (*Output*):

1. Decree of the Head of the Land Office concerning the PTSL Adjudication Committee and Task Force.
2. Minutes of the Oath-taking Ceremony of the PTSL Adjudication Committee and Task Force.
3. Decree on the Establishment of Puldatan (if any).

During the Preparation Stage, the K4 Settlement Task Force within each Adjudication Committee Team conducts an inventory and completion of K4. The K4 completion mechanism can be found in the section on K4 Settlement and Improving the Quality of Registered Land Data.

STAGES OF COUNSELING

1. Counseling is carried out by the Head of the Land Office along with the PTSL Adjudication Committee, Physical Task Force and Legal Task Force by involving Village/Sub-district officials. Sub-district/Regional Government/law enforcement officers, Police, Prosecutor's Office, TNI and community leaders.
2. Counseling is carried out for the community (including prospective participants and registered land owners), village/sub-district/district/regional government officials, in 1 (one) village/sub-district designated as a PTSL location.
3. Counseling can be carried out more than 1 (one) time depending on availability. budget, with different participant provisions.
4. Extension is carried out by means of meetings (forums) with landowners. (registered or unregistered fields). Each extension package has a maximum of 200 people representing 1,000 fields. In addition to community meetings, brochures/leaflets and banners are also distributed.
5. Counseling is also carried out as a means of resolving K4 by confirming with communities whose land is indicated as K4 and socializing the use of the Sentuh Tanahku application.
6. After the outreach, the Joint Movement for the Installation of Boundary Marks (GEMAPATAS) was carried out as well as the preparation and submission of a statement letter regarding the installation of boundary marks and the consent of the neighbors who border the area.

Activity Results (*Output*):

1. Minutes of Extension Meeting.
2. Extension activity report (attached with documentation).

PHYSICAL DATA AND LEGAL DATA COLLECTION STAGES

Collection of Physical Data and Legal Data by the Physical Task Force and the Legal Task Force can be carried out simultaneously (time and location) or by each task force as long as it is at the Village/Sub-district location designated as the PTSL location with the same Work Map.

Collection of Physical Data and Legal Data was carried out using the Survey Tanahku application.

Physical Data Collection is conducted after PTSL participants submit a Statement Letter regarding the Installation of Boundary Marks and the Approval of the Boundary Owners. Examples of Statements regarding the Installation of Boundary Marks and the Approval of the Boundary Owners in a Systematic Manner and examples of Systematic Measurement Drawings are as attached.

A. Physical Data Collection

1. Physical data collection is carried out by the Physical Task Force or the winning Third Party auction.
2. Collection of Physical Data is guided by the Work Map File Sequence Number (NUB) to facilitate filing.
3. Villages/sub-districts that have been designated as PTSL locations, K4 land plots (KW 4, KW 5, and KW 6) to be completed first in the studio or at the same time with puldasik and puldadis activities.
4. Land measurement and mapping activities within the PTSL framework are carried out through two mechanisms: self-management and third-party mechanisms. Self-management is carried out by ASN measuring officers and/or individual SKBs, while third-party operations are carried out by KJSB or companies (legal entities) in the surveying, mapping, and geospatial information industry.

B. Binding to Reference Points

Measurement of all land areas must use a binding (reference) of at least 1 (one) National Cadastral Framework Technical Basic Point, hereinafter abbreviated as (TDT KDKN) or use a binding point from the measurement results by utilizing CORS data. The reference points or binding points used in the measurement activities are displayed in a list of coordinates on the map attached to the location determination decree.

C. Installation and Designation of Boundary Signs

1. Boundary markers can be in the form of boundary points/marks, fences, or other permanent boundary markers which can be identified in the field and on maps.
2. Installation and/or designation of boundary markers is carried out by the land owner or his power.
3. In order to accelerate the installation of boundary markers, it is hoped that it can be implemented through the Joint Movement for the Installation of Land Boundary Stakes.
4. Approval of the Bordering Parties and Designation of Boundaries can be represented by the Village/Sub-district Apparatus consisting of the Village/Sub-district Secretariat (Village/Sub-district Secretary, Head of Village/Sub-district Financial Affairs, Head of Planning Affairs, Head of General and Administrative Affairs), Territorial Implementers (Hamlet Head or other title), Technical Implementers (Head of Government Section, Head of Welfare Section, Head of Service Section) or RT, RW or other title, as well as Community Leaders.

D. Measurement Method

1. Surveyors can carry out land measurement and mapping work after having an account and the authority to use the physical data collection application.
2. Implementation of systematic land measurement and mapping activities is completely adjusted to field conditions and can be carried out using the following methods:
 - a. Terrestrial;
 - b. Photogrammetry;
 - c. Satellite observation; or d. A combination of the three.
3. If the NIK is still being processed, use the old KTP/KK/Certificate from local authorities. *The soft copy must be uploaded to the KKP application.*
4. Implementation of land measurement and mapping activities can be done manually or electronically and can be assisted by using physical data and legal data collection applications. Land measurement in addition to collecting X, Y coordinates, also includes Z height measurements. The height (Z) data collection can use RTK or GPS Navigation.

E. Determination of Limits and Implementation of Measurements

1. Land area measurements are carried out after the land area boundaries have been determined by the PTSL Adjudication Committee or Licensed Cadastral Surveyor (SKB) based on the Statement of Boundary Mark Installation and Approval of the Bordering Parties.
2. In carrying out land area measurements, data collection is carried out in the form of:
 - a. Owner's identity (KTP/KK) of rights (if any); b. Certificate/GS/SU (if any) for registered/certified land plots, in K4 completion framework; and
 - c. Statement Letter for Installation of Boundary Marks and Approval of the Boundary Parties and *Geotagging* of the Location
 The data is directly entered in digital form in the physical data and legal data collection application.
3. Measurement and/or mapping of land areas is carried out on:
 - a. The land plot has not been registered; and
 - b. Land plots that have been registered but cannot yet be mapped (K4).
4. Provide file numbers and/or File Sequence Numbers (NUB) in the fields measured or mapped land.
5. Recording of boundary marks and land plot information for unregistered land plots according to the GU format (DI 107) PTSL – Terrestrial Method.
6. For land plots whose subject is unknown (*no name*), not physically controlled or utilized, no boundary signs installed, indications of customary land, and certain land conditions in accordance with local wisdom, the following shall be carried out:
 - a. Delineation is carried out on the area or can be formed from the results of the measurements of the land areas that are directly adjacent, or b. Delineation can be carried out using the *general boundary* method (drawing boundaries from visible appearances); or
 - c. Superimpose delineation of mapping results by other parties. Land areas delineated as above are given a NIS (Temporary Identification Number).
7. It is not permitted to split up land plots to pursue/meet quantitative targets, ready-to-build plots, inheritance preparations and other forms that have the same subject, except for land plots that initially had a basis for control in the name of a different subject.

**Measurement Drawing Requirements:**

1. Measuring drawings (GU) must be made by every measuring officer on the same day with field measurements.
2. A GU can contain one or more land parcels. The measurement data in the GU must be usable as data for reconstructing land parcel boundaries.
3. GU includes metadata such as the measuring equipment used, measurement method, measurement data and results, accuracy of each measured point, boundary dispute resolution and other technical data.
4. In addition to depicting land areas, the Measurement Drawing can also provide information on the existence of buffer areas, water body boundaries such as river boundaries, coastal boundaries and road boundaries, conservation areas, relinquished Land Rights or other social functions/public interests in accordance with the regional spatial planning at the location of the land area being measured.
5. GU can be in electronic form in the form of measurement data supplemented by the results of biometric fingerprint recording using a *fingerprint reader* as legalization/replacement for the signature of the PTSL participant/his/her attorney, boundary marker and measuring officer.
6. Analog GU in the form of DI 107 form for PTSL, with special provisions for page 2 which can be a print *out of* the work map (can be a photo map) in A1, A2, A3 or A4 size which can contain several land plots, equipped with digital data backup.
7. If the work map is an attachment to the GU, the land owner/his/her attorney can add their name and signature on the Work Map as a form of approval or boundary agreement, this work map sheet becomes an inseparable part of the GU.
8. Information on the land plots obtained can be written in the column provided in the GU format on page 4 or in the form of a list on a separate sheet and become part of the GU.
9. GU can be created and presented in electronic format using an application that is integrated with the land information system (KKP).
10. My Land Survey is an application for collecting physical and legal data integrated in an Electronic System provided by the Ministry of Agrarian Affairs and Spatial Planning/National Land Agency.

F. Data Processing and Mapping

The Physical Task Force processes measurement and mapping data by paying attention to the following:

1. Processing the results of the binding point measurements as a reference for binding to the TDT KDKN or CORS.
2. Mapping using *Computer Aided Design* (CAD) applications.
3. Use of layers, attributes, and formats using standards in the KKP application.
4. Data entry of land area information using the KKP application.
5. Land plot cart files for quality control are submitted to the quality control officer in a format with a file naming standard using a combination of the village/sub-district name and GU number.
6. For the link process between physical data and legal data, the Physical Task Force and the Legal Task Force must use the same Work Map.
7. Specifically for measurement work carried out by KJSB or a Company Legal Entity, the work map is submitted to the ASN physical task force by attaching:
 - a. Upload the PBT draft file data (.dxf file) via the KKP Application or *flash disk*;
 - b. GU (DI 107);
 - c. List of PTSL objects and land plot information; and

- d. Photocopy of the Measurement Letter obtained from the owner for the certified land plot (K4).
8. Before printing the PBT, all results of land measurement and mapping work must meet quality control requirements.

G. Quality Control of Physical Data Collection

Quality control of the results of measurement and mapping work carried out by ASN is carried out as part of the duties and functions, both within the Land Office and Regional Offices during supervision. Meanwhile, for the results of third-party measurement and mapping work, quality control is the responsibility of the ASN.

ASN's responsibility and to avoid *bottlenecking*, the implementation of quality control is assisted by quality inspection by other third parties (Second QC).

If a third-party measuring and mapping agency requests quality control but no quality control officer is available, quality control falls under the responsibility of the Civil Servant (ASN). Quality control is conducted on each Measurement Drawing for Physical Data Collection.

1. Quality Control of ASN/Swakelola Physical Data Collection

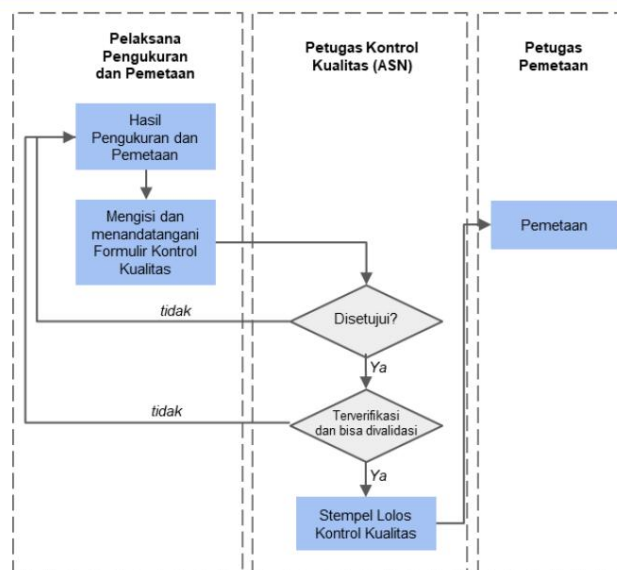

Figure 8 Quality control of ASN/Swakelola Physical Data Collection

Quality Control of ASN/Swakelola Physical Data Collection is carried out by:

1. The Measurement and Mapping Implementer fills in and signs the Form Quality Control *Checklist Data*.
2. The Quality Control Officer (who also acts as a mapping officer) checks the GU and quality control forms and checks the following:
 - a. Compliance of the form contents with the GU;
 - b. Land area information, including: location (village/sub-district), date, file number, name of field officer, land area information on page 1;
 - c. Conformity of pages 2 and 3 with the owner's identity/NIK in page 4.
3. If there are any items that are not approved, they are returned to the Measurement Officer. If approved, the quality control officer will carry out Verification and Validation.

4. The results of the quality control are made into a report attached to a list of land that has undergone quality control by the Deputy Head of the Physical Sector, signed by the Deputy Head of the Physical Sector and the Measurement Officer.

2. Quality Control of Third Party Physical Data Collection

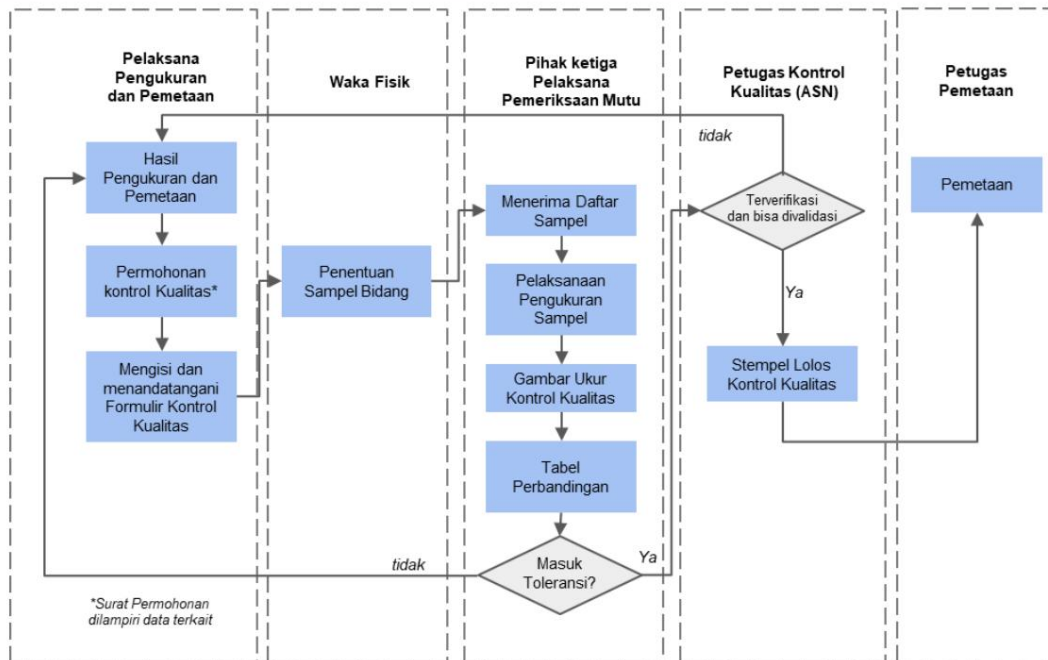

Figure 9 Quality Control of Third Party Physical Data Collection

Quality Control of Physical Data Collection conducted by Third Parties:

1. The measuring and mapping implementer submits a request for quality control of the results of the measuring, mapping and land area information activities that have been completed and will submit a request for payment;
2. The application must be submitted to the Deputy Head of Physical Affairs no later than 2 weeks before the payment is submitted;
3. Submission of a quality control request in the form of a control request letter quality by attaching: a. Land plot spatial file data (*.dxf); b. PTSL Land Plot List and land plot information; and c. GU.
4. The Deputy Head of the Physical Sector then determines the distribution of sample land plots amounting to 5% of the total land plots for which payment has been submitted by the measurement and mapping implementer, according to the *Stratified Random Sampling* and/or *Cluster Random Sampling* statistical methods using the following criteria:
 - a. Determination of land plot samples no later than 2 days after the application is received. The results of the sample determination are in the form of a Land Plot Sample List determined by the Deputy Head of the Physical Division (see example of a land plot sample list).
 - b. Ensuring that random sample measurements represent the characteristics of the area. which varies, according to field conditions.
5. The Deputy Head of Physical Affairs then submits all GUs to be inspected along with a list of Land Plot samples to the third party implementing the quality inspection.

6. The third party implementing the quality inspection receives all GUs to be inspected along with the Land Plot Sample List, then fills in the quality control form for each GU and carries out measurements on the specified samples with the following provisions:
 - a. The land area measured according to the list of land area samples determined by the Deputy Chair of the Physical Division.
 - b. Measurements can be carried out using terrestrial methods, satellite observations or a combination of both.
 - c. The measured land area can be mapped and its location, boundaries and area can be known on the map, and its boundaries can be reconstructed in the field.
 - d. Before carrying out the measurement of the sample area, the Quality Inspection implementer must coordinate with the village/sub-district apparatus to indicate the boundaries in the field.
 - e. The results of measuring land sample areas in the form of Control Situation Images Quality.
 - f. The third party Quality Inspector at Bagan is also tasked with inspecting and fill out the QC form for the amount of PBT output (100%).
7. The Quality Inspection Implementer makes a comparison between the GU results of the work of the Measurement and Mapping Implementer with the Quality Control Situation Image in the form of:
 - a. length of the side of the land area;
 - b. position of the land area;
 - c. geometric shape of the land plot;
 - d. area of land.The comparison results are presented in the Quality Control Measurement Results Comparison Table.

8. The tolerance for differences in area permitted does not exceed $\pm 5\%$ of the area stated on the GU.
Example: The sample area on the GU is 100m². If the sample area on the Quality Control Situation Drawing is 104m², then the area is accepted. Conversely, if the area on the Quality Control Situation Drawing is 109m², then the area is rejected. If it does not fall within the tolerance, the data is returned to the measuring officer, if it falls within the tolerance, it is continued to the verification and validation process.
9. Revised quality inspection results are printed on a separate sheet of paper, stamped and become part of the GU.

REVISION OF LAND QUALITY INSPECTION
(part of GU No. _____)
NUB : _____
FILE NO. _____

Figure 10 Quality Inspection Revision Stamp at GU

10. After the quality inspection process, the third party implementing the quality inspection submits the inspected GU accompanied by the Quality Control Form to the Quality Control Officer (ASN) for verification and validation.

3. Verification and Validation

1. Verification and validation of land plots is carried out by quality control officers (ASN), and is carried out no later than 2 days after passing the quality inspection (for third party poldasik) by:
 - a. Ensure data *is uploaded*;
 - b. Ensure that the shape of the field and adjacent neighbors match the data;
 - c. Ensure that the land area is mapped;
 - d. Ensure that changes to physical data, boundary disagreements and other data changes are recorded in a report and constitute authentic evidence as part of the field/GU documents.
2. If the verification and validation process exceeds the time limit/more than two days, the status in the GeoKKP will be noted as outstanding;
3. Land plots that pass verification and validation are given a NIB for PBT printing requirements;
4. The results of the verification and validation above include:
 - a. PBT file data resulting from verification and validation through the KKP Application which has been given a NIB for land plots that have passed the quality inspection;
 - b. GU (DI 107) which has been approved and accompanied by a Quality Control Form;
And
 - c. List of PTSL objects and land plot information resulting from verification and validation.
5. Electronic return receipt from the KKP printed and signed by the parties submitting and receiving.

Figure 11 Quality Control Stamp

6. Each approved field (which passes Quality Control) is stamped on the GU as shown in the image above. Meanwhile, fields that are not approved are given notes regarding the factors that caused the quality control not to be met.
Validity assessment is carried out both on a field-by-field basis and collectively within the village/sub-district area as follows:
 - a. Field-by-field validity is carried out by the local land office quality control officer; and
 - b. Supervision of collective validity in the complete village/sub-district area unit is carried out by the Regional Office monitoring team and the central monitoring team.
7. If it can be verified and validated, the GU and Quality Control Form are sent to the Deputy Head of Physical Affairs to be digitized and archived.

H. Information on Land Area Maps (PBT)

1. In order to obtain a complete map for improving physical data information, the map product from PTSL activities must include information on geographic elements found around the land area (such as roads, alleys, brandgang, lakes, rivers, forest areas, ditches, gutters), public facilities, social facilities, use and utilization of the land area. The land area is depicted in the form of a polygon in the PBT and Geo KKP.

2. X, Y, and Z coordinate information must be displayed on the PBT for at least one point within the systematic land area (example attached). Coordinates are displayed in the geographic system or TM3.
3. The physical data collection activities as referred to in number 1 can be carried out by delineation from the Work Map that has the accuracy according to the PTSL Technical Instructions, given a Temporary Identification Number (NIS). The delineation of the boundaries of geographic elements coincides with the boundaries of land parcels that directly border or with other geographic elements.
4. Plots of land whose owners are unknown (*no name*)/no one can show the boundaries of the plot in the field, are not physically controlled or utilized, no boundary signs are installed, indications of customary land, and certain land conditions in accordance with local wisdom, delineation is carried out or can be formed from the results of measurements of directly adjacent plots of land, given a Temporary Identification Number (NIS).
5. If there is a plot of land where boundary signs have been installed, but the owner or his/her representative and/or adjacent neighbor are not present, then a temporary boundary determination will be made and the temporary boundary will be drawn in the form of a dotted line.
6. The land area map resulting from PTSL does not have a validity period, however if there are changes in location, boundaries and area, re-measurements must be carried out based on:
 - a. Recommendations of the Land Inspection Team;
 - b. Objections from the bordering parties;
 - c. Application from land owner;
 - d. Settlement of disputes over control and ownership.

I. Issuance of Land Plot Maps (PBT)

PBT issuance is carried out by taking the following matters into account:

1. PBT printing is done from the KKP Application after linking with the legal data, with a display of all land plots in one area, both registered land plots (K4) and unregistered plots.
2. In the case of measurement and mapping activities carried out independently by ASN surveyor then PBT signatory:
 - a. For its creation by measuring and mapping officers; and
 - b. For use by the head of the physical task force;
3. If measurement and mapping activities are carried out by a Cadastral Surveyor/ Cadastral Surveyor Assistant then PBT signatory:
 - a. For its creation by SKB (ASK/SK);
 - b. To be known by the KJSKB leadership/survey company leadership; and
 - c. For use by the head of the physical task force.
4. For the purposes of attaching the announcement, PBT that has been signed, stamped, etc dated according to the date received by the Adjudication Committee.
5. If the PBT that has been signed has not been followed up with the process of issuing rights/certificates in the current year and there is a change in the boundaries of the land plot, then a measurement must be carried out.
6. The PBT format can be seen in the Attachment Example of the PBT Format for the ASN/Swakelola Physical Task Force PTSL and the PBT Format for the PT/KJSKB Physical Task Force PTSL.

7. PBT is printed in three copies consisting of:

- a. for announcements (original);
- b. for the Adjudication Committee (copy); c.
- for the archives (copy); and
- d. One sheet of Land Plot Map contains one or more land plots.

Activity Results (*Output*):

1. Land Area Map (PBT);
2. Land Register.

J. Issuance of Measurement Letter (SU)

SU printing is done digitally using the KKP Application by paying attention to the following matters:

1. The SU is signed by the Head of the Physical Task Force on behalf of the Head of Section in charge of Measurement and Mapping (see the PTSL SU form).
2. The SU numbering date is the same as the SU number retrieval date in the KKP application, the SU date is the same as the DI 307 date.

K. Submission of Measurement Activity Output

The output of the measurement activity is in the form of a Complete Village/Sub-district GeoKKP Map and/or a Complete Village/Sub-district Declaration (if the village/sub-district mapping is complete).

For supporting data for financial disbursement, also as archives/documents which are gradually submitted to the Head of the Physical Task Force in the form of *softcopy* (CD) or *hardcopy*, which consist of:

1. For Measurement Activities, in the form of Measurement Drawings:
 - a. Measurement work carried out by ASN and GU surveyors submitted in original form.
 - e. Measurement work carried out by a third party, the GU submitted in the original form and a printed *scanned copy*, signed by SKB and stamped. This then becomes *the minute*

as part of the relevant KJSB protocol. An example of a stamp is as follows:

Figure 12 Image of GU Stamp for Third Party Archives

2. For mapping activities, in the form of a GeoKKP Map which can be equipped with:
 - a. Land List (DI 203 PTSL), for all measured/mapped land plots, in all land plot categories;
 - b. PBT: DI 201C for PTSL or DI 201B Sporadic for Activities Complete Regency/City.
3. For data quality improvement activities (K4), in the form of:
 - a. List of BT/SU/GU;
 - b. Download results of KKP land plots before and after activities;
 - c. Updated and mapped land plot list (*online* via KKP and offline);
 - d. Minutes containing information regarding certificates for land plots that have not been mapped or mapped but there have been changes to the data, along with attachments;

- e. K4 where there are changes to physical data; and
- f. GU land plots (specifically for K4 Registered Land Plot Data Quality Improvement Activities with the implementation of field identification).

Reporting (specifically for implementation by Third Parties)

1. Initial report;
2. Monthly reports; and
3. Final report.

As supporting data for financial disbursement purposes, data on land parcel realizations is downloaded from the Ministry of Marine Affairs and Fisheries. The submission of these results is accompanied by a previously supervised report, as shown in the attached example (Attachment to the Report of Handover of PTSL Physical Task Force Products).

L. Legal Data Collection

1. Collection of legal data should be carried out as far as possible in conjunction with the collection of physical data on land plots.
2. Collection of legal data is carried out by the Legal Task Force and can be assisted by Legal Data Collector from various elements or professions.
3. Collection of legal data using a Work Map or Map/sketch of the resulting area work results of the Physical Task Force on the previous day.
4. Collection of legal data includes collecting documents as evidence of land ownership/control, including written evidence, witness statements and/or statements from the person concerned for each plot of land.
5. The Puldadis officer submits and collects the Registration Form (see registration form format).
6. Legal data collection activities can be coordinated with the Village/Sub-district Government and can be carried out collectively by involving community participation at the PTSL location.
7. Legal data collection activities should optimize participation as much as possible. public.
8. Types of evidence for collecting legal data include:
 - a. Legal basis, for example proof of taxation held before 1960;
 - b. Proof of transfer of rights, for example a deed of sale or a statement below hands; and
 - c. If a PTSL participant cannot provide proof of ownership, either in the form of written evidence or another reliable form, proof of rights can be carried out not based on proof of ownership but rather on proof of physical control carried out by the PTSL participant and his predecessor.
9. Collection of legal data in the field is carried out using the Survey application. My land and upload data (at least):
 - a. *scan* KTP;
 - b. *scan* of registration form; d. *scan* of physical ownership statement form; e. *scan* of proof of legal basis; f. *scan* of PBB; and
 - g. other required documents.

10. Before scanning, the document used as the basis for the application must be stamped or written stating that the document has been used for registration.

Figure 13 Example of Stamp/Imprint

11. The *scanned* document results are saved using the file ID number and document type, and are physically stored at the Land Office.
12. If the collection of Juridical Data is carried out by Puldatan:
 - a. Documents that have been collected are verified by the Legal Task Force before *scan* is carried out on the KKP PTSL application;
 - b. Verification is carried out for each application/per plot of land; And
 - c. All documents proving ownership/control of land are stored at the Office Land.
13. The Puldadis officer fills in the Legal Data Research Minutes (DI 201) form, namely on Column I. Identification of the land area concerned; and II. Data on ownership and control of land rights, and signed by the Puldadis officer and PTSL participant.
14. The Puldadis officer creates a Legal File on the PTSL Legal Application "create file" by ensuring that the documents uploaded via the My Land Survey application or the *scanned* results match the physical documents.
15. The Puldadis Officer determines the Service Procedures for the Legal PTSL Application:
 - a. First-Time Land Registration, Conversion, Recognition/Confirmation of Rights, for Customary Land; or
 - b. Land Registration First Time Granting Rights, for State Land.

Activity Results (*Output*):

1. List of Recapitulation of PTSL Inventory and Identification Data;
2. Registration Form;
3. Legal Basis;
4. Legal Data Research Minutes (DI 201) which have been signed by the Puldadis officers and PTSL participants (not yet reached the conclusion of the PTSL Adjudication Committee).

LEGAL DATA RESEARCH STAGES FOR EVIDENCE RIGHT

1. Based on the data collected by the Legal Task Force, the PTSL Adjudication Committee:
 - a. conduct an inspection of the completeness of the application file;
 - b. conduct research and studies regarding land status, land history and legal relationships between the land requested and PTSL participants as well as other interests;
 - c. conduct research and physical inspection of the requested land regarding the control, use/condition of the land and the boundaries of the requested land plot;
 - d. collect information/explanations from the owners of adjacent land;
 - e. examine the suitability of the requested land use with the local Spatial Planning Plan;
 - f. conduct a trial based on physical data and legal data from field examinations including other supporting data (which is a form of quality control of physical data and legal data/Third QC) and g. provide opinions, considerations and conclusions on whether or not rights can be granted, which are stated in the Legal Data Research Minutes.
2. The use of a statement letter as evidence in the context of implementing PTSL activities, is used after it has been confirmed that the evidence provided is incomplete or does not exist at all (format for the Statement Letter of Physical Control of Land Area as attached).

Activity Results (*Output*) :

The conclusion of the PTSL Adjudication Committee on whether or not the proposed rights can be granted is outlined in the Legal Data Research Minutes (DI 201) and signed by the Chairperson, Deputy Chairperson for Physical Affairs, Deputy Chairperson for Legal Affairs, 1 (one) Physical Task Force member, 1 (one) Legal Task Force member, the Village Head and Secretary (Continued DI 201) (Data Research Minutes format Legal as attached).

ANNOUNCEMENT OF PHYSICAL DATA AND LEGAL DATA AS WELL AS ITS APPROVAL

1. Recapitulation of legal data that has been included in the Legal Data Research Report (DI 201) regarding land plots that have been mapped, is included in the List of Physical Data and Legal Data for Land Plots.
2. To fulfill the principle of publicity in proving land ownership, the physical data and legal data of land plots and maps of land plots are announced using the Physical Data and Legal Data Announcement format (DI 201 B).
3. Announce the List of Physical Data and Legal Data for Land Areas (DI 201C).
4. The process of announcing physical data and legal data is given for 14 (fourteen) calendar days which is carried out at the PTSL Adjudication Committee Office and the Village/Sub-district Head Office.
5. Interested parties are given the opportunity to submit objections regarding the announcement of physical data and legal data as referred to in point 2 above during the announcement period.
6. If deemed necessary, the announcement of physical data and legal data can also be made in other places that are considered strategic in the PTSL location determination area or via electronic media.
7. After the announcement period for physical data and legal data ends, the physical data and legal data are then ratified by the PTSL Adjudication Committee which is made in the form of Minutes of Ratification of the Announcement of Physical Data and Legal Data (DI 202).
8. The Announcement Process is a form of quality control of the Physical Data List and Legal Data carried out by the public regarding the results of physical data collection by the Physical Task Force and the Results of Legal Data Collection by the Legal Task Force (Fourth QC).

PBT Revision After Announcement of Physical Data and Legal Data

1. If there are objections/objections to the land plot resulting from measurements and/or Mapping:
 - a. must be verified by the Adjudication Committee;
 - b. The objection/rebuttal may be in the form of location, shape, boundaries, area of the land plot, name of the subject or other information listed; and
 - c. Objections/rebuttals are submitted in writing by the person concerned or their attorney to the Adjudication Committee/Head of the Land Office. (see the objection/rebuttal format as attached).
2. If there are changes in the location, shape, boundaries, area of the land plot, changes in the name of the owner or NIB, the PBT revision is carried out by crossing out the revised items and initialed (with the date) by the Deputy Head of the Physical Sector, then the PBT is reprinted and signed by the Head of the Physical Task Force/Head of Section in charge of Measurement and Mapping and the Head of the Land Office.
3. Changes to the area, shape and position of land areas are made from the GeoKKP Application.
4. Land area validation is carried out from the GeoKKP Application from the map menu.

Activity Results (*Output*):

1. Announcement of physical data and legal data of the land plot and Land Plot Map signed by the Chair of the PTSL Adjudication Committee (DI 201 B and DI 201C).
2. Minutes of Announcement Approval signed by the Chair of the PTSL Adjudication Committee (DI 202).

COMPLETION OF PTSL ACTIVITIES

After the Final Conclusion of the Chair of the Adjudication Committee is signed by the Chair of the Adjudication Committee PTSL is divided into several clusters as follows:

Cluster 1 (K1)

Cluster 1 (K1) is a plot of land whose physical and legal data meets the requirements for issuing a land title certificate.

In the context of control and supervision, land object land reform whose RTRW has been changed to non-agricultural land, absentee land, maximum excess land, transmigration land that meets the provisions of Article 13 paragraph (3) letter b of Presidential Regulation Number 86 of 2018 concerning Agrarian Reform, can become K1 if the physical data and legal data meet the requirements for issuing a land title certificate.

Cluster 2 (K2)

Cluster 2 (K2) is a plot of land whose physical and legal data meets the requirements for issuing a land title certificate but there is a case in court and/or a dispute.

Cluster 3 (K3) is divided into:

Cluster 3.1, is a PTSL product that has been completed up to the stage of physical data collection, legal data collection followed by legal data research activities to prove rights and announcement of physical data and legal data, but cannot be recorded and land title certificates issued because the subject and/or object of the rights have not met certain requirements, namely the location (object) of PTSL is in the Indicative Map area for the Termination of New Permit Granting (PIPPIB) (referring to the Letter of the Secretary General HR.01/634-100/IV/2020 dated April 20, 2020).

Cluster 3.2, is a PTSL product that has been completed up to the stage of collecting physical data and collecting legal data followed by legal data research activities to prove rights and announce physical data and legal data, but cannot be recorded and a land title certificate issued because the land is an object of P3MB, Prk5, ABMAT, Ulayat Land; Class III State Houses for which the lease purchase has not been paid off; Object

Nationalization. or Subject is a Foreign Citizen, BUMN/BUMD/BHMN, Private Legal Entity; Land consolidation for which a certificate cannot be issued in accordance with the provisions.

Cluster 3.3, are PTSL products that are implemented up to the collection stage physical data because there is no SHAT budget available in the current budget year;

Cluster 3.4, is a PTSL product that is implemented up to the stage of collecting physical data and collecting legal data (filing has been carried out) without continuing with legal data research for proof of rights/Land Inspection due to: a. budget availability only for puldasik and puldadis (Puldatan);

b. The subject is not willing to have his land plot certified.

Cluster 4 (K4) is a plot of land whose objects and subjects have been registered and have land rights certificates, which have not been mapped or come from geokkp data KW4, KW5, KW6 and land books that have not been entered into the KKP system.

CONVERSION AFFIRMATION, RECOGNITION OF RIGHTS AND GRANTING RIGHT

1. The Chair of the Adjudication Committee makes a final conclusion on the application contained in Legal Data Research Report, with completion categories:

Table 1 Settlement Categories

Cluster	Settlement
K1	1. Confirmation of rights/conversion, if the evidence of ownership is complete and the written evidence is incomplete, but there is witness testimony or a statement from the person concerned; 2. Recognition of rights, if the evidence of ownership and/or control is incomplete/does not exist at all, but physical control has been proven for 20 years; 3. <u>Granting rights in the form of HM/HGB/HP, if the land status is State land.</u>
K2	<u>Land in the process of a case/dispute</u>
K3.1	The land cannot be recorded and a certificate issued because the subject and/or object has not fulfilled the requirements, namely: a. the subject is not willing to make a statement of BPHTB and/or PPh debt; b. The location (object) of PTSL is in the Indicative Map for Termination of New Permit Granting (PIPIB).
K3.2	The land cannot be recorded and a land title certificate issued because the land is an object of P3MB, Prk5, ABMAT, Ulayat Land; Class III State House for which the lease purchase has not been paid off; Nationalization Object. or the Subject is a Foreign Citizen, BUMN/BUMD/BHMN, Private Legal Entity

2. In resolving the granting of rights to State Land, the Chairperson of the PTSL Adjudication Committee proposes collectively for land plots that are State Land to the Head of the Land Office by using the Attachment List of Proposals for Granting Ownership Rights/Building Use Rights/Use Rights (DI 310), which is attached with the Minutes of Juridical Data Research, Announcement of Physical and Juridical Data and List of Physical and Juridical Data (format for proposals for granting Ownership Rights/Building Use Rights/Use Rights and format for minutes of juridical data research as attached).
3. The Head of the Land Office determines the granting of Ownership Rights, Building Use Rights, or Usage Rights for State land. The determination of the granting of these rights is issued collectively based on the granting of rights proposals from the Chair of the PTSL Adjudication Committee.
4. The Head of the Office shall determine the granting of land rights by providing a note on the last page of the Attachment List of Decision Letters on Granting Ownership Rights/Building Use Rights/Usage Rights as per the attached format (Format of Decision Letter on Granting Ownership Rights/Building Use Rights/Usage Rights as attached) and given a Land Office registration number and date and returned to the Head of the PTSL Adjudication Committee to be used as a basis for registering rights to state land.
5. The numbering and registration date of the Decision on Granting Rights are the same as the number and registration date of the Decision on Granting Rights at the KKP application counter.

Activity Results (*Output*):

1. Decision of the Chair of the PTSL Adjudication Committee which is stated in the Legal Data Research Minutes (DI 201) and signed by the Chair (Continued DI 201) for confirmation of Conversion/Recognition of Rights.
2. For State Land, the granting of rights is done by adding a note to the last page of the List of Proposals for Granting Rights to State Land by the Chair of the Adjudication Committee (DI 310) which has been signed by the Head of the Land Office.

BOOKKEEPING OF RIGHTS AND/OR ISSUANCE OF CERTIFICATES

A. Cluster 1 (K1)

1. Recording of land rights (Ownership Rights/Building Use Rights/Usage Rights) or Waqf Land in the land book and providing a rights number and printing of certificates via the KKP application.
2. The Land Book is printed using Form 206 and can be made in the form of an Electronic Land Book. The issuance of the electronic Land Book is carried out in accordance with the provisions of laws and regulations.
3. Bookkeeping of rights and issuance of certificates requires recording of:
 - a. Restrictions on land rights (*Restrictions*), in the form of:
 - 1) restrictions on the transfer of rights: whether permission is required or not;
 - 2) restrictions on land use: concerning coastal boundaries or other areas; and/or
 - 3) other restrictions according to statutory provisions.
 - b. Responsibility of the Rights Holder, in the form of: protecting and maintaining the land and its fertility and actively cultivating it;
 - c. Filling in BPHTB/PPh payable

Recording in the Land Book: Recording

of BPHTB/PPh Payable is recorded in the Land Book in the column provided (Column for Registration of Transfer of Rights, Encumbrance of Rights and other records) with the following sentence: - "Land and Building Acquisition Tax (BPHTB) Payable in accordance with the Statement Letter datedin the name of....." which is signed by the authorized official signing the Land Book at the time of recording and the stamp of the relevant Land Office/ Service Stamp.

- "Income Tax (PPh) payable in accordance with the seller's/person's statement dated In the name of " which is signed by the authorized official signing the Land Book at the time of registration and the stamp of the relevant Land Office."

d. Recording on the certificate: Recording of BPHTB/PPh Payable is recorded in the Certificate in the column provided (Column for Registration of Transfer of Rights, Encumbrance of Rights and other records), with the following sentence: - "Land and Building Acquisition Tax (BPHTB) payable in accordance with the Statement Letter dated in the name of"

- "Income Tax (PPh) owed according to the seller's/person's statement dated In the name of....."
4. The signing of the land book and Land Title Certificate resulting from the implementation of PTSL is carried out by the Chair of the PTSL Adjudication Committee on behalf of the Head of the Land Office.
5. Land books resulting from the implementation of PTSL as referred to in number 4 must be uploaded into the KKP2 application system;
6. If the BPHTB/PPh owed has been paid in full in the current year, the deletion of the record will be carried out by the Head of the Adjudication Team and if it is paid in full in the following year, the deletion of the record will be carried out by the Official/Officer appointed by the Head of the Land Office.
7. Deletion of BPHTB/PPh payable records is done by crossing them out and adding the note "BPHTB/PPH has been paid in full based on SSB/SSP dated No./Nil Certificate dated No." initialed.

8. Land Title Certificates resulting from PTSL activities can be issued using the Registration Form and can be issued electronically. Electronic issuance of Land Title Certificates is carried out in accordance with statutory provisions.

9. Validate land books in the KKP Application.

K1 Activity Results (*Output*) :

Analog and/or digital Land Books and Land Title Certificates.

B. Cluster 2 (K2)

1. Record land rights (HM/HGB/HP) or Waqf Land in the land book via the KKP application to create a rights number by leaving the name of the rights holder blank.
2. K2 caused by the case must be recorded in the Land Book regarding the case number of the court handling it.
3. For K2 land plots that are still in dispute, efforts will be made to resolve them first through mediation and if they cannot be resolved then they will be recorded in the Land Book regarding the parties to the dispute.

K2 Activity Results (*Output*) :

1. Land Book with the name of the rights holder blanked.
2. Notification letter to PTSL participants that certificates cannot be issued because there is a dispute/case.

DOCUMENTATION AND SUBMISSION OF ACTIVITY RESULTS

1. The PTSL Adjudication Committee carries out grouping, processing, storing and submitting PTSL data which includes:
 - a. Legal data documents consisting of the identity of the rights holder, basis for rights/statement letter, minutes prepared by the committee, proof of announcement, minutes of confirmation of physical data and legal data and the decision letter granting rights;
 - b. Physical data documents consisting of measurement data and calculation results measurements, measuring drawings, land parcel maps and measuring letters;
 - c. List of land registration forms and land rights;
 - d. Land Book;
 - e. Land title certificate;
 - f. Warkah K2, K3.1, K3.2, K3.3 and K3.4;
 - g. Proof of financial administration; and
 - h. Other administrative data.
2. Documents that are the basis for implementing PTSL (K1, K2, K3.1, K3.2, K3.3 and K3.4) must be digitized in accordance with the instructions for the document/document digitization process.
3. Specifically for documents outside of K1, the storage procedure is carried out digitally through a scanning process and is arranged based on the registration file number per year and stored in the Ministry's database. The original documents, after being scanned, are returned to the owner with a stamp or writing stating that this document has been used for registration with *Output*.

K2/K3.1/K3.2/K3.3/K3.4.

4. Storage of data resulting from PTSL activities must be done in electronic form.
5. The Chair of the PTSL Adjudication Committee submits the results of the implementation of PTSL activities to the Head of the Land Office at the end of the activity and is accompanied by data on the results of the implementation of PTSL activities in analog and digital form.
6. The handover of all PTSL activity results and documents is made in the form of a Handover Report signed by the Chair of the PTSL Adjudication Committee and the Head of the Land Office periodically based on the completion of each PTSL location determination.
7. Land title certificates are handed over to the rights holder or their proxy, and waqf certificates are handed over to the nadzir in stages. Certificates are handed over during the current fiscal year or no later than the first quarter of the following year.
8. The results of PTSL activities are stored, documented and archived by the Head of Office Land.
9. The form, method of storage, presentation and deletion of PTSL documents are implemented in accordance with the provisions of laws and regulations.

Activity Results (*Output*):

1. Minutes of Handover of PTSL Activity Results.
2. Results of PTSL activities.
3. Warkah.

REPORTING

A. Reporting of PTSL Activity Results

1. Reporting is carried out periodically, containing developments on progress and problems in implementing PTSL activities.
2. Reporting is carried out by the Chair of the PTSL Adjudication Committee to the Head of the Land Office to then be reported to the Head of the Regional Office.
4. The progress of the implementation of PTSL activities can be seen/monitored through the PTSL dashboard, the Head of the Land Office reports through the SKMPP of the Ministry of Agrarian Affairs and Spatial Planning/National Land Agency and is periodically reported to the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency cq Director General of Land Rights Determination and Registration and Director General of Land and Spatial Survey and Mapping.
5. Final reporting on the implementation of PTSL activities from the Head of the Land Office to the Head of the Regional Office and from the Head of the Regional Office to the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency.
6. The final report must at least include a *roadmap*, achievements, obstacles and problems, as well as a complete proposed village/sub-district declaration.

B. Reporting of Land Acquisition Tax (BPHTB) and Income Tax (PPh)

1. Reporting of BPHTB and PPh is done in April, August and December annually, the Reporting Format is attached.
2. BPHTB and PPh reports are submitted to the relevant agencies through the Head of the Land Office and copies are sent to the Head of the Regional Office and the Ministry.

C. Person Responsible for Report

1. Head of the Land Office, for the Regency/City level.
2. Head of Regional Office, for Provincial level.

Activity Results (*Output*) :

1. Periodic reports, in manual or digital form;
2. Final report, in manual or digital form.

FOLLOW-UP ON PTSL ACTIVITY RESULTS

1. **K1** originating from Absentee Land and Maximum Excess Land is followed up with notification to the rights holder/owner to immediately transfer the rights to the Absentee Land and its maximum excess to another party in accordance with statutory regulations.

2. **K2** can be followed up to become K1:
 - a. The object is a case in court
 - 1) The issuance of a land title certificate is carried out after a court decision has permanent legal force, and the decision states that one of the parties is the entitled party and is proven by the court decision.
 - 2) In the case of a Court Decision that has permanent legal force and if it is still within the PTSL implementation budget year, it will be signed by the Chair of the PTSL Adjudication Committee.
 - 3) Issuance of certificates is carried out without replacing the existing Land Book. signed by the PTSL Adjudication Committee.
 - b. Objects in dispute:
 - 1) The issuance of land title certificates is carried out after the dispute has been resolved either through mediation or other means in accordance with applicable laws and regulations, as evidenced by the Minutes of Dispute Resolution.
 - 2) If the dispute is resolved and is still within the PTSL implementation budget year, it will be signed by the Chair of the PTSL Adjudication Committee.
 - 3) Issuance of certificates is carried out without replacing the existing Land Book. signed by the PTSL Adjudication Committee.

3. **K3** can be followed up to become K1 through PNPB and APBN financing sources, as follows: a.

K3.1 can be followed up to become K1, with the following provisions:

 - 1) the location of the K3.1 object land in the Village/Sub-district which has been re-designated as the PTSL location for the completion and financing process through PTSL mechanism. If the location of the K3.1 object land is located at Villages/sub-districts that are not designated as PTSL locations for the completion process and financing through routine service mechanisms/PNPB.
 - 2) Complete the requirements, namely:
 - a) Statement of BPHTB and/or PPh debt; and/or
 - b) The Decree is located outside and/or not included in the Indicative Map area. Termination of Issuance of New Permits (PIPPB) from the authorized agency.
 - 3) If the requirements as referred to in number 2 are complete, a report of the completeness of the documents will be made and then followed up by issuing a Letter. Decision on Granting Land Rights/Confirmation of Rights/Recognition of Rights.

b. **K3.2** can be followed up to become K1 in accordance with the provisions of laws and regulations:

 - 1) P3MB and Prk 5, with stages:
 - a) In accordance with the provisions of laws and regulations that regulate regarding P3MB/Prk 5;
 - b) Fees that must be paid according to the stages of activities carried out using the Non-Tax State Revenue activity mechanism.

- 2) ABMAT (Formerly Chinese Foreign-Owned Assets), with stages:
 - a) In accordance with the provisions of laws and regulations governing ABMAT;
 - b) Fees that must be paid according to the stages of activities carried out as regulated in Government Regulation Number 128 of 2015 and Regulation of the Minister of Finance Number 31/PMK.06/2015.
 - 3) Class III State Houses that have not been paid off by rent and purchase, with stages:
 - a) In accordance with the provisions of laws and regulations that regulate regarding State Houses Category III;
 - b) Fees that must be paid according to the stages of activities carried out using the Non-Tax State Revenue activity mechanism.
 - 4) Nationalization Objects, with stages:
 - a) If there are changes or additions to the physical data, they are carried out measurement;
 - b) If there are changes or additions to legal data, a land inspection will be carried out as regulated in the Regulation of the Minister of Agrarian Affairs and Spatial Planning/ Head of the National Land Agency Number 18 of 2021;
 - c) Issuance of Decree on Granting Land Rights;
 - d) Registration of land rights;
 - e) Fees that must be paid according to the stages of activities carried out using the Non-Tax State Revenue activity mechanism.
 - 5) Subjects are foreign citizens, BUMN/BUMD/BHMN and private legal entities, with the following stages:
 - a) If there are changes or additions to the physical data, they are carried out measurement;
 - b) If there are changes or additions to the juridical data, a land inspection will be carried out in accordance with the Regulation of the Minister of Agrarian Affairs and Administration Room/Head of the National Land Agency Number 18 of 2021;
 - c) Issuance of a decision to grant land rights;
 - d) Registration of land rights;
 - e) Fees that must be paid according to the stages of activities carried out using the Non-Tax State Revenue activity mechanism.
 - 6) Land Consolidation for which a certificate cannot be issued in accordance with provisions, with stages:
 - a) Stages in accordance with the provisions of laws and regulations regarding Land Consolidation;
 - b) Fees that must be paid according to the stages of activities carried out using the Non-Tax State Revenue activity mechanism.
 - 7) Specifically for customary land, land title certificates cannot be issued. The results of PTSL activities for customary land are in the form of plot maps and are recorded in the land register.
- c. **K3.3** and Field Identification Number without Cluster can be followed up to become SHAT *output* , with the following conditions:
- 1) If the Village/Sub-district is re-designated as a PTSL location, then the process and its financing through the PTSL mechanism a) Physical data collection of land plots is carried out, if there are changes or additions to physical data, accompanied by a report on the results of field checks. b) Certification activities are carried out in accordance with the provisions.

- 2) If the village/subdistrict where the land is located is not re-designated as a location PTSL, then the process and financing are through routine service mechanisms and PNPB:
 - a) If there are changes or additions to the physical data, they are carried out measurement.
 - b) If there are changes or additions to legal data, then the legal data collection and research stages are carried out.
 - c) Issuance of Decree on Granting of Land Rights/Confirmation of Rights/Recognition of Rights.
 - d) Registration of land rights.
- d. **K3.4** can be followed up to become SHAT *output*, with the following provisions:
 - 1) If **K3.4 due to** budget availability is only for puldasik and puldadis (puldatan) and Villages/Sub-districts are re-designated as PTSL locations, so the process and financing will be through the PTSL mechanism.
In the event of changes or additions to physical data, including differences/changes in names on land plot maps, this must be accompanied by a report on the results of field checks/measurements.
 - 2) If **K3.4 is due to** the subject not being willing for their land to be certified, then the process and financing will be through routine service mechanisms and PNPB.
 - a) If there are changes or additions to the physical data, they are carried out measurement.
 - b) If there are changes or additions to legal data, then the legal data collection and research stages are carried out.
 - c) Issuance of Decree on Granting of Land Rights/Confirmation of Rights/Recognition of Rights.
 - d) Registration of land rights.
4. Notification to PTSL participants
All PTSL Products included in K2 and K3 in the current year must be notified to each participant at the end of the PTSL activity year (K2 Notification Form, K3.1 Notification Form, K3.2 Notification Form, K3.3 Notification Form and K3.4 Notification Form as attached).

FOLLOW-UP ON LAND SECTOR K3, K3.1 AND K3.3

In order to accelerate the granting of land rights, PTSL products in the form of K3, K3.1 and K3.3 are targeted to be followed up to become K1, the Land Office carries out the following stages:

1. Inventory of textual and spatial files of K3 land plots to obtain a list of land plots to be followed up to become K1 (certificates). This list contains land plots accompanied by information on the year of *output*, type of K3 and information on completeness of files;
2. Field inspections to determine the current condition of the land and indications of possible follow-up actions to become K1. Based on the results of the field inspections above, several possible land conditions will be followed up. The possible conditions of the land and their solutions are as follows:
 - a. The land plot is indicated to be located within another plot (K3 with a certified plot, K3 with a NIB, K3 with an unregistered plot (there is no legal relationship between the subject and the plot). This is resolved by:
 - 1) If after data inspection both the studio and/or field are proven to be entirely within another field and physically controlled, then research was conducted and followed up with the cancellation of one of the NIBs

- as stated in the Minutes. All land plots located within other plots are inventoried as products that have the potential to become K2 products.
- 2) If the land plot is proven to be partly within another plot, then:
 - a) confirmation is carried out with the relevant parties;
 - b) field inspections and re-measurements are carried out; c) data is *updated* based on the statement of the results of the re-verification agreed by the relevant parties;
 - 3) areas outside the land plot that are within other plots, can be continued to be upgraded to become K1 products.
 - 4) Meanwhile, if the land area is not proven to be within another area based on field conditions, then data corrections are made and continued with filing to be upgraded to a K1 product.
- b. The shape, area, and position of the land plot are indicated to have changed. This is followed up with a field inspection and re-measurement.
 - c. There are incomplete legal documents for K3 products. This matter will be followed up by coordinating with relevant parties to complete the missing documents. If the subject of the rights cannot complete the documents by the end of the fiscal year, land rights registration will be accommodated through PTSL the following year if the location is designated as a PTSL object or directed through routine services. All file deficiencies should be made into an OHS Notification Form to be given to the relevant rights subject.
3. Collection of legal documents (filing). For land areas that can be followed up with filing, legal data collection is carried out.
 4. Follow-up on land plots that remain K3. After conducting field checks, land plots can be found that are indicated to remain K3, including because the community does not want the certificate issued or the subject of the rights is located/domiciled outside the area and cannot be found, so the land plot is given a description or mark on the map.

NIB Without Cluster

NIB without clusters is a NIB issued for land plots in the context of completing PTSL activities up to the mapping stage and no filing and clustering has been carried out.

To increase the PBT *output* to SHAT, NIB without clusters can be followed up to become Cluster 1 (K1), Cluster 2 (K2), Cluster 3.1 (K3.1) and Cluster 3.2 (K3.2) as long as it has a physical file number and physical data (Measurement Drawing and PBT).

The mechanism and method for inventorying NIB data without clusters for follow-up into K1, K2, K3.1 and K3.2 by following the tutorial in the video at *the link* bit.ly/3kNqLrJ.

K4 COMPLETION AND DATA QUALITY IMPROVEMENT REGISTERED LAND PARTS

A. Stages of Implementation of Improving the Quality of Registered Land Plots

The activity to improve the quality of registered land data consists of K4 Physical and K4 Legal activities. Data quality improvement is intended to improve the quality of all land data to a valid KW 1. Data quality improvement is mandatory for all registered land plots at PTSL locations. This activity is followed up by the arrangement of village/sub-district land plots by village/sub-district, which are then submitted for the complete village/sub-district verification process.

Land Data Quality Table based on data availability

Data Availability	Data Quality					
	KW 1	KW 2	KW 3	KW 4	KW 5	KW 6
Mapped Land Area						
GS/SU Spatial						
Textual GS/SU						
Land Book						

K4 Physical activities are carried out to map/plot land parcels KW 4, KW 5 and KW 6 through field measurement activities. For land parcels KW 4, KW 5 and KW 6 after field measurements are carried out, the results are different from the data on the certificate, so changes and improvements can be made to the physical data.

Meanwhile, the Legal K4 activity involves collecting and modifying legal data. Legal K4 is implemented when there are changes to physical data that result in changes to legal data, or when there are only changes to legal data that require changes to land records, certificates, and the KKP application.

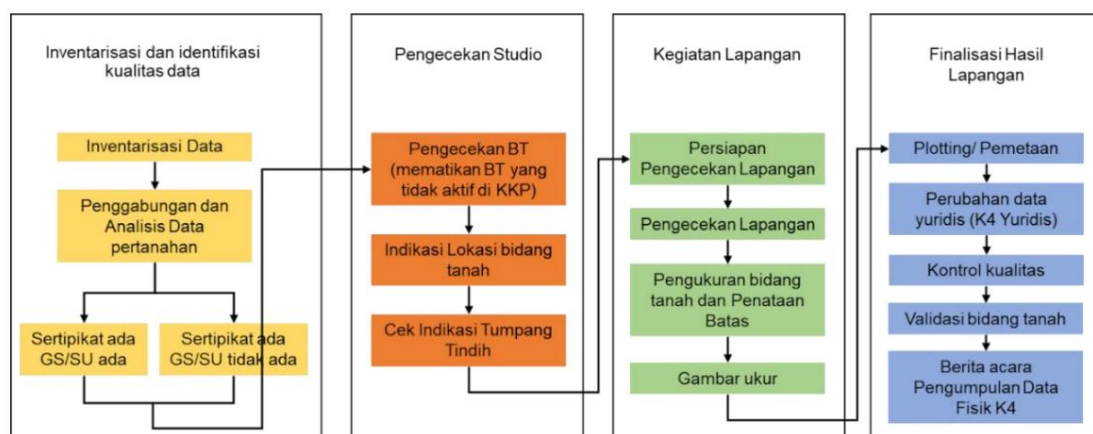

Figure 14 Flow of activities to improve the quality of registered land plot data

Based on the flow above, the stages of improving the quality of registered land plot data can be explained as follows:

1. Inventory and identification of data quality

Conducted to determine the quality of all land data at the Land Office.

Implemented by the Land Office. The data used to identify data quality are as follows:

a. Data inventory by collecting information from:

- 1) Download the KKP registration map (spatial and textual data of land plots);
- 2) Kantah Map (*offline*);
- 3) Regional administration map;
- 4) PBB map and taxpayer list (according to local conditions);
- 5) List of Land Book quality KW 4, KW 5 and KW 6;
- 6) Physical documents or scans of land books, SU, GU and warkah; And
- 7) Base Map (preferably using a CSRT map or UAV/drone aerial photography map) large scale, to facilitate visual identification of areas).

This data inventory produces a list of the qualities of each land parcel.

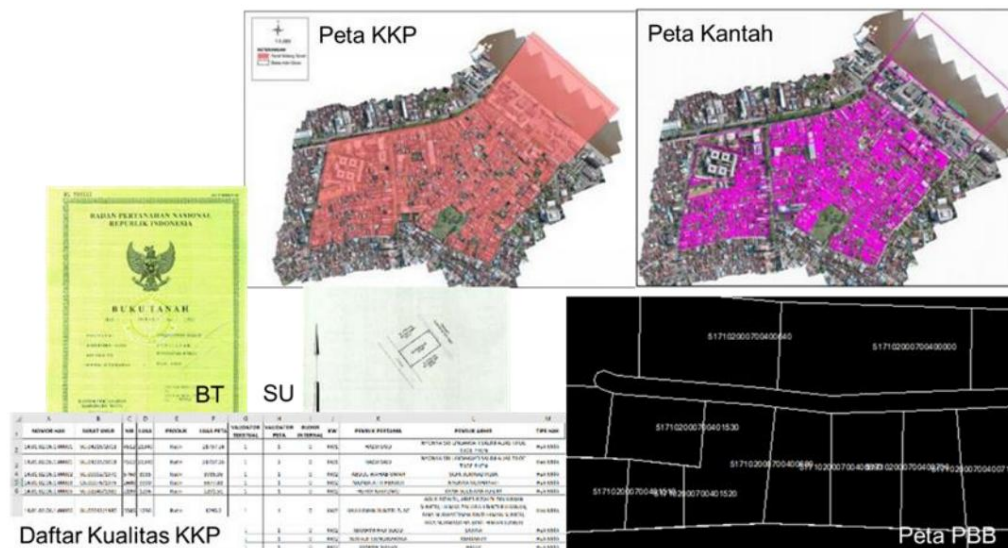

Figure 15 Example of KKP Quality List

b. Land Data Integration and Analysis (Spatial and Textual)

This activity is carried out by the Land Office. The data identified in the previous steps is then combined to obtain information on any missing attributes. The combined data includes the land title number, measurement certificate/situation drawing (SU/GS) number, NIB (National Land Registration Certificate), land area, data quality (KW), and title type.

The aim of this stage is to analyze the information contained in the physical or scanned land book and to identify the active/inactive status of land rights.

From the data combination, incomplete land plot attribute information can be obtained as follows:

	A	B	C	D	E	F	G	H	I	J	K
1	NOMORHAK	SU	NIB	LUAS	PRODUK	LUASPETA	VALIDATORTEKS	VALIDATORPET	BLOKIRINTERNAL	KW	TIPEHAK
16	11.02.01.03.1.00014	GS.04670/1990		406	Rutin		0	0	0		KW5 Hak Milik
17	11.02.01.03.1.00015	GS.00921/1972	01802	439	Rutin	401.88	0	0	0		KW2 Hak Milik
18	11.02.01.03.1.00016	GS.00016/1962		861	Rutin		0	0	0		KW5 Hak Milik
19	11.02.01.03.1.00017				Rutin		0	0	0		KW5 Hak Milik
20	11.02.01.03.1.00018	GS.00018/1962	1		Rutin	383.55	0	0	0		KW2 Hak Milik

Figure 16 Example of incomplete land plot attribute information (red box)

After identifying incomplete land plot attributes, a *query* is performed to eliminate duplication and ensure that the combined land data is integrated, as in the following example:

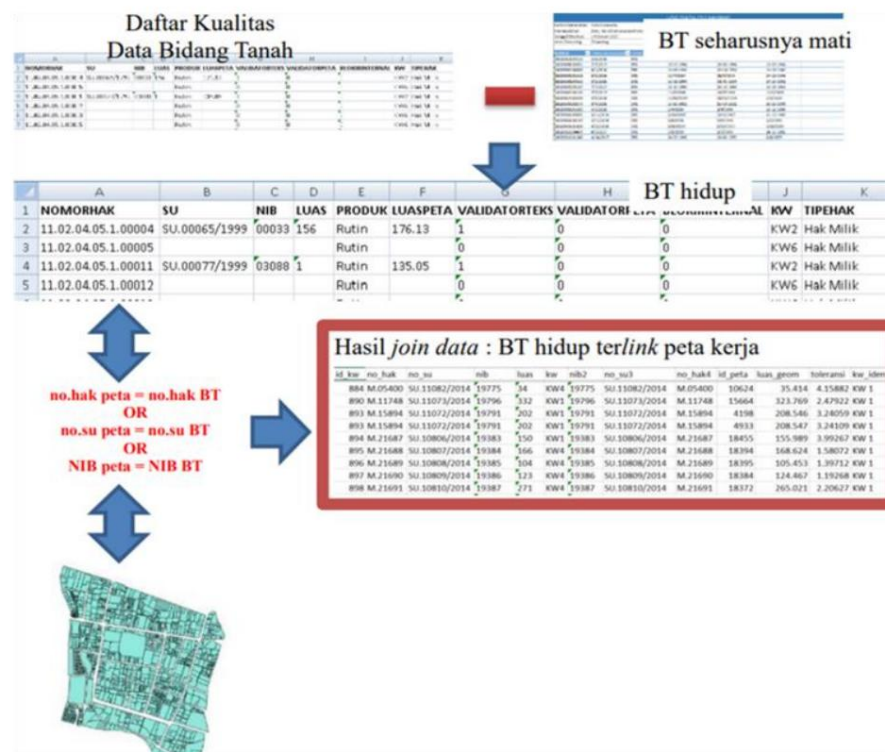

Figure 17 Example of Land Plot Data Quality List

The above steps are also carried out to find out how many BTs are still active by filtering the total number of land plots minus the land plots where the BTs are dead. This list containing the type of rights, rights number, name and area must be conveyed to the community at the outreach stage.

2. Studio Check

Based on the data that has been collected, then carry out:

- Checks are carried out on active and inactive BT. Regarding the land book that inactive land book is deactivated at KKP;
- for land areas where BT is active, there is SU/GS, plotted and then the location is identified on the map; and
- For land plots whose indicative location is already known, check for indications of overlap with adjacent land plots and then check them in the field.

3. Field Activities

In field activities, the following were carried out:

a. Preparation for field checks

In preparation for field checks, coordination is carried out with local village/sub-district officials to:

- 1) verify the land plots that have been identified in the studio;
- 2) identify land areas that cannot be *plotted* in the studio;
- 3) coordinate to support checking and measurement activities field.

b. Field Check

Field checks are carried out to find the land area to be plotted.

- 1) The subject and object of the land plot were not found (s0b0) followed up by entering the land plot into the list of land plots that cannot be followed up;
- 2) Subject found, land plot object not found (s1b0) followed up with further research, if land plot object found then continued with land plot measurement, if still not found enter it into the list of land plots that cannot be followed up;
- 3) Subject has not been found, object found (s0b1) followed up with further research. If the subject is found, continue with land plot measurement, if still not found, enter it into the list of land plots that cannot be followed up;
- 4) Subjects and objects found (s1b1) are followed up with measurements field;
- 5) For the land area that is found, measurements are then carried out land;
- 6) For land plots that are not found, it is stated in the table of land plots that cannot be followed up in the K4 implementation report that the land plot in question was not found and is followed up by submitting a notification to the relevant parties such as the Village/Sub-district Head (through socialization), or the rights holder (through sending a letter or announcement).
- 7) For land plots indicated as overlapping in the field, mediation is conducted. The results of the mediation form the basis for field measurement activities. Any mediation that fails to reach an agreement is recorded and reported to the Land Problem Handling and Control section.

c. Land area measurement

After the location of the land area has been identified, measurements of the land area are carried out in accordance with the provisions, the results of which are stated in the Measurement Drawing, where:

- 1) The designation of boundaries is carried out by the Rights Holder, or a party who has a legal relationship, or their attorney.
- 2) If during the measurement a difference is found in the shape, area or position of the land area, then boundary arrangement will be carried out as outlined in the boundary arrangement report (DI 201 A) which is approved by the Rights Holder, or the party who has a legal relationship, or their attorney, and the adjacent owner.
- 3) Changes in the shape, area or position above, including because part or all of the land area becomes a public facility/road, are recorded in the registration records at the KKP.

d. Making Measurement Drawings

The measurement drawings for K4 physical data collection activities are made in accordance with the provisions in the Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 16 of 2021, which describes the land area being measured and adjacent land areas.

4. Finalization of Field Results

At the finalization stage of field results, the following is carried out:

a. Plotting land areas

- 1) The measured land area is then *plotted* on the registration map. For land areas that already have a NIB, the NIB number is adjusted to match the NIB in the SU;
- 2) For land plots that do not yet have a NIB, a new NIB will be issued;
- 3) The measurement drawings resulting from K4 activities (new GU) are integrated with the old measurement drawings. The old measurement drawings are noted as no longer valid and are replaced with new measurement drawings;
- 4) Regarding the results of measuring K4 land plots which are larger than the area of the certificate then the legal data is checked;
- 5) Land plots indicated as being located outside the administrative boundaries of the village/sub-district area will be subject to a village/sub-district relocation mechanism;
- 6) For land areas which in reality in the field have been divided into several areas, they are described according to the initial conditions and the actual situation in the field is recorded;
- 7) Based on Article 42 paragraph (1) of the Regulation of the Minister of Agrarian Affairs and Spatial Planning Room/Head of the National Land Agency Number 16 of 2021, in the case of merging, separating, or splitting registered land plots, boundary determination and re-measurement are carried out if:
 - a) There is a change in land parcel boundaries, or
 - b) Application from the party concerned;

b. To complete digital data on land plots, you can refer to the table for Handling Electronic and Physical Data on Registered Land Plots.

Changes in legal data (K4 Legal)

Changes to the Land Register, Certificate, and the KKP are mandatory if there are changes to the legal data, either due to changes in the legal data alone or due to changes in the physical data. This activity is carried out by the Land Office based on the results of the K4 physical data collection.

c. Quality control

Quality control of physical and legal K4 activities is carried out by the Head of the Survey and Mapping Section and the Head of the Rights Determination and Registration Section to ensure:

- 1) The physical data of the land plot has been mapped and positioned on the registration map. In this case, at least 2 (two) adjacent neighbors have been positioned accordingly.
- 2) The legal data for the land plot is complete and matches the physical data.
- 3) The Head of the Survey and Mapping Section determines a quality control sample of K4 activities of 10% (ten percent) of the total K4 carried out which represents the class of land area in one village/sub-district in the form of a form as attached.
- 4) The Head of the Survey and Mapping Section and the Head of the Rights Determination and Registration Section carry out checks on the conformity of the K4 that has been plotted.

- 5) The form containing information on conformity becomes evidence of quality control of K4 activities and becomes an attachment to the village/sub-district verification application. complete.

d. Land area validation

For land plots that are in accordance with the location and shape in the field, officers will tick the *checklist* menu in the KKP field validation so that the land plot is included in the valid category (purple land plot).

Validation is carried out in accordance with the provisions for land parcel validation (spatial) and land book validation for legal (textual) data. Land parcel validation is carried out by the Land Office.

e. Minutes of K4 Physical Data Collection

After the data quality improvement work is completed, a K4 Physical Data Collection Report is prepared which contains a recapitulation of the number of land plots for which quality improvements have been carried out and is accompanied by a table listing the land plots for which data quality improvements have been made as attached.

5. Follow up

In general, the implementation of K4 for handling KW 4, KW 5 and KW 6 is as follows:

No	Improvement activities Data Quality	Initial Data Quality		
		KW 4	KW 5	KW 6
1	Measurement Letter Entry			✓
2	Scan SU		✓ ✓	
3	Scan GU		✓ ✓	
4	Layer standardization		✓ ✓	
5	Textual BT/SU Validation ✓ ✓ ✓			
6	Mapping	✓ ✓ ✓		
7	Upload SU Spatial	✓ ✓ ✓		
8	Upload Land Plots	✓ ✓ ✓		

For land plots that have BT/rights but the subject and/or object are not found in the field, they are included in the list of land plots that cannot be followed up in the K4 implementation report that the land plot in question was not found and followed up by submitting a notification to the relevant parties such as the Village/Sub-district Head (through socialization), or the rights holder (through sending a letter or announcement). Internal blocking can be carried out on the BT/rights accompanied by notes regarding the stages that have been carried out.

K4 activities produce mapped land plots and become an integral part of complete systematic land registration activities which are followed up with *block adjustments* and complete village/sub-district submissions.

6. Activity evidence

Evidence of K4 Physical activities is:

- Measurement Drawing;
- Minutes of K4 physical data collection as attached.

Legal K4 activity evidence includes:

- Photocopy/original certificate;
- Photocopy of KTP/KK;
- Minutes of K4 legal data collection as attached.

B. Handling of Electronic and Physical Data of Registered Land Plots

In order to improve the quality of registered land plot data, identification of conditions, recommendations for handling and work processes for each land plot can be seen in the following table:

Table 2 Handling of Electronic and Physical Data for Registered Land Plots

No	Condition	Handling	Process Workmanship
1	- Complete and active electronics - Physical archives are complete, but BT is no longer active - Causes inability to <i>plotted</i> (due to inactivity).	BT validation to turn off BT	Studio
2	- Complete and active electronics - Complete physical archive, but BT is no longer active <i>Plotted</i> and stacked with a replacement plot of land	- BT validation to turn off BT - Finding a suitable active plot of land to occupy the location and <i>plotting</i>.	Studio
3	- Complete electronics, BT is no longer active - Physical archives are complete, but BT is still active - Not <i>plotted</i> because it is not active electronically	- BT validation to activate electronic BT. - Finding the location of the land and <i>plotting</i>	Studio
4	- Electronics are complete and active, but area is different from SU - Complete and active physical archives <i>Plotted</i>, area and side dimensions match the physical SU	The electronic textual area is corrected according to the physical SU	Studio
5	- Complete and active electronics - Complete and active physical archives - In the physical SU there is no matching field shown, so it cannot be <i>plotted</i> yet.	Check the document archive	Studio+ Field
6	- Complete and active electronics - Complete and active physical archives - On the physical SU and work map, the matching area shown is incorrect, so it cannot be <i>plotted</i>.	- Check the document archive - Search for matching fields correct based on the available information and clues	Studio+ Field
7	- Complete and active electronics - Complete and active physical archives - On the physical SU, the rights number is written Wrong	- Correction of writing of rights number in SU physique - Check the document archive	Studio+ Field

	• The matching field shown is incorrect, so it cannot be entered <i>plotting</i>	• Search for matching fields correct based on the available information and clues	
8	• Complete and active electronics • There are no physical archives of SU and GU • Incomplete SU & GU archives mean that <i>plotting</i> cannot be done .	• Check the document archive • Confirm with the electronic SU entry officer. There is a possibility that the SU number is only a temporary SU number. • Field checks with the community	Studio+ Field
9	• Electronics: BT active, SU not entered • There are no physical archives of SU and GU • Incomplete SU & GU archives mean that <i>plotting</i> cannot be done .	• Check the document archive • Field checks with the community	Studio+ Field
10	• Electronics: BT active, SU not entered • Complete and active physical archives • Has been <i>plotted</i>	• SU entry on electronics • Re- <i>link</i> BT and SU on electronics	Studio+ Field
11	• Electronics: BT not yet entered • Complete and active physical archives • Cannot be <i>plotted</i> because the rights have not been recorded electronically	• BT entry on electronics • Re- <i>link</i> BT and SU on electronics • Finding the location of the land and <i>plotting</i>	Studio
12	• Electronics: BT not yet entered • BT physical archives do not exist • Cannot be <i>plotted</i> because the rights have not been recorded electronically	• Field checks with the community to view BT copy Created a new physical BT • BT entry on electronics • Re- <i>link</i> BT and SU on electronics • Finding the location of the land and <i>plotting</i>	Studio+ Field
13	• Electronics: BT and SU not yet entered • Complete and active physical archives • Cannot be <i>plotted</i> because the rights have not been recorded electronically	• BT and SU entries on electronics • Re- <i>link</i> BT and SU on electronics • Finding the location of the land and <i>plotting</i>	Studio
14	• Electronics: BT and SU not yet entered • There are no physical archives of SU and GU • Incomplete SU & GU archives mean that <i>plotting</i> cannot be done .	• Check the document archive • Field checks with the community to view SU copy • BT and SU entries on electronics • Re- <i>link</i> BT and SU on electronics • Finding the location of the land and <i>plotting</i>	Studio
15	• Complete electronics • BT, SU and GU archives are missing • Incomplete SU & GU archives mean that <i>plotting</i> cannot be done .	• Field checks with the community to see copies of BT and SU • BT and SU entries on electronics as well as <i>links</i> reset BT and SU on electronics • If the rights are unknown, it is recommended to simply delete them from the electronic file.	Studio+ Field

COMPLETE VILLAGE/SUB-DISTRICT AND REGENCY/CITY COMPLETE

A. Temporary Identification Number (NIS)

To meet the requirements for a Complete Village/Sub-district, Forest Areas, Waters, and HGU/HPL located within the village/sub-district are not included in the gap and *overlap* analysis for the complete village/sub-district.

Temporary Identification Numbers (NIS) may be issued for:

1. Geographical Features (called NIS FG) are land areas formed from geographical elements in the form of roads, alleys, social facilities (fasos), public facilities (fasum), lakes, river boundaries and others;
2. Non-Geographic Features (called NIS non FG) are land plots whose owners are unknown (*no name*) or there is no one who can show the boundaries of the land plot or land plots that are mapped from the results of measurements of directly adjacent land plots. NIS Non FG can also be given for land plots resulting from CSRT/Aerial Photo delineation that has been rectified;
3. For land plots whose subject is unknown (*no name*), not physically controlled or utilized, no boundary signs installed, indications of customary land, and certain land conditions in accordance with local wisdom, the following shall be carried out:
 - a. delineation is carried out on the area or can be formed from the results of measurements of land areas that are directly adjacent; or b. delineation can be carried out using the *general boundary* method (drawing boundaries from visible appearances); or
 - c. superimposed delineation of mapping results by other parties;

Land parcels delineated as above are assigned a Temporary Identification Number (NIS). NIS must be accompanied by a description of the source/basis for the NIS (FG/Non-FG). The number and area of NIS can exceed 10% of the total number and area of land parcels in a village/sub-district.

The complete video concept for establishing villages/sub-districts can be accessed via the following link: <https://www.youtube.com/watch?v=mav5VAmjyIU>

B. Complete Village/Sub-district Indicators

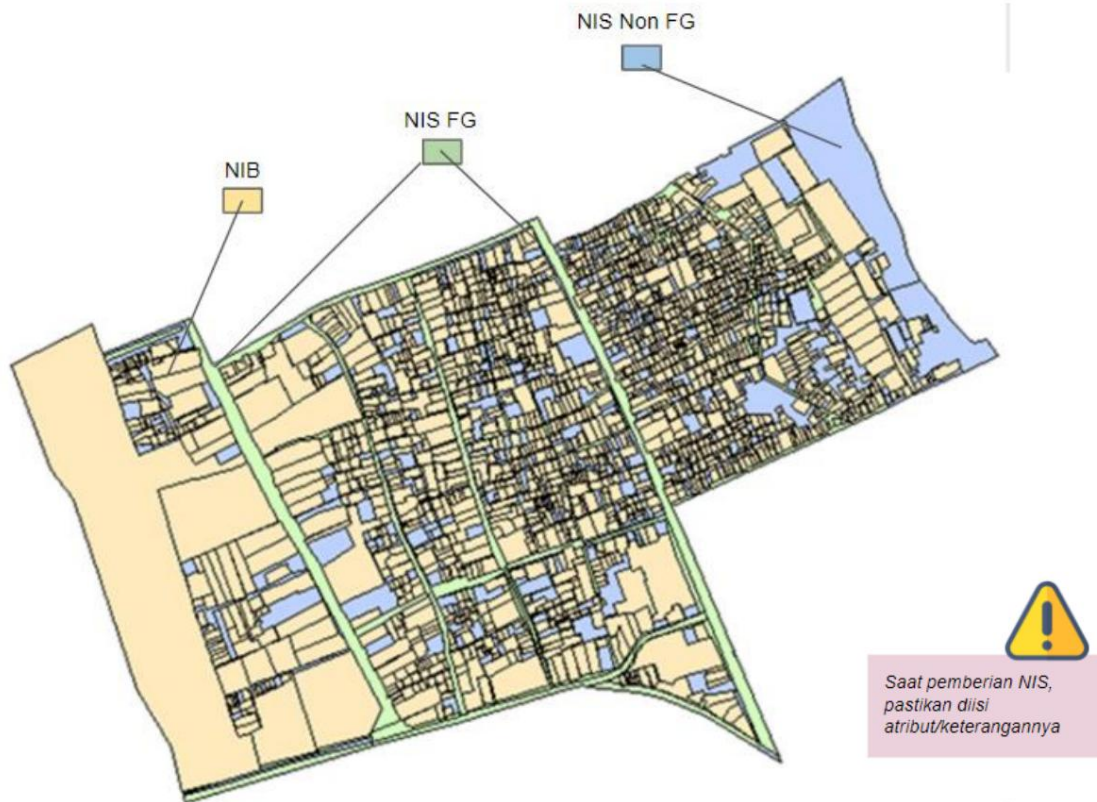

Figure 18 Example of a village/sub-district complete with land plots with NIB (yellow), NIS FG (green), and NIS non-FG (purple). When providing the NIS, ensure the attributes/descriptions are filled in.

A complete village/sub-district is formed after all land areas have been mapped. This is represented by the following formula:

$$\text{Area} = \text{NIB Area} + \text{NIS Area (FG+Non FG)}$$

The area and number of NIS in a complete village/sub-district in this case can exceed the number and area of NIB on the condition that (1) the delineation of the NIS land plot, especially for Non FG, can be accounted for and (2) the delineation is based on a Base Map that has been determined by the Ministry (has a certain level of accuracy).

Complete Village Value (NDL):

If the area of the area **is the same as** the total area of the plots then

$$\text{NDL} = \text{Average (\% BT Validation, \% Parsil Validation, \% Warkah Scan)}$$

If the area of the area is not the same as the total area of the plots then

$$\text{NDL} = 0$$

Where:

• Tolerance for the difference between the plot area and the area of the region: $99.995\% < (\text{Plot Area} / \text{Area of the region} * 100) < 100.005\%$

• Tolerance for the number of KW456: $(\text{Number of KW456} / \text{Number of BT}) * 100 \leq 5\%$

γ KW456 Area Tolerance: $(KW456 \text{ Area} / \text{Plot Area} * 100) \leq 3.5\%$

γ PTSL manuscripts are scans of files whose rights are published

Full Declaration:

(1) Not yet meeting the requirements* (2) Meeting the requirements* (3) The Declaration application has been approved.
(%Number of Valid Land Books $\geq 98\%$, %Number of Valid Plots $\geq 95\%$, %Number of Delineation Fields $\leq 10\%$,
%Scanned PTSL Documents = 100%)

1. Improving the quality of land parcels, whether KW1, KW2 or KW3, is the responsibility of the relevant Land Office official. The Head of the Land Office is obliged to repair or restore the registration map information data, measurement drawings and measurement data that are damaged or lost or contain technical errors in the measurement data or if it is found that the mapped land parcel does not match the actual conditions in the field. Data repair activities or repositioning of KW1, KW2, KW3 that require data collection in the field have the same mechanism as the K4 process.
2. Plotting of K4 fields and repositioning of Kw1, KW2 and KW3 fields is also followed by the arrangement of land plots as a whole within the village/sub-district scope and forming a complete village/sub-district using the block adjustment principle.
3. The measurement drawings resulting from K4 activities (new GU) become one unit with the old measurement drawings. The old Measuring Drawing is given a note that it is no longer valid and replaced with a new Measuring Drawing;

C. Complete Village/Sub-district Proposal and Declaration Procedures

In proposing and Declaring a Complete Village/Sub-district, the regulatory references are:

1. Technical Guidelines for PTSL 2020 Number 1/Juknis-100.HK.02.01/III/2020
2. SE Secretary General 15 July 2020 No. HR.01/1050-100/VII/2020
3. Circular Letter of the Director General of PHPT 13 October 2020 No HR.01/714-400/X/2020

Physical analysis checklist

(Checked by the Regional Office SPP Division and by the Directorate General of SPPR (Dit PPK))

1. Number of validated NIB $\geq 95\%$;
2. Number of validated BTs $\geq 98\%$;
3. There are no gaps or *overlaps* between planes (check in CAD);
4. The area of the village/sub-district is completely filled with land plots (NIB and NIS non FG) and geographical features (NIS FG);

Checklist for Juridical analysis

(Checked by the PHPT Division of the Regional Office and by the Directorate General of PHPT)

1. Link between physical data and legal data
2. Minutes of Land Book Validation Research in the format according to the SE Dirjen PHPT on

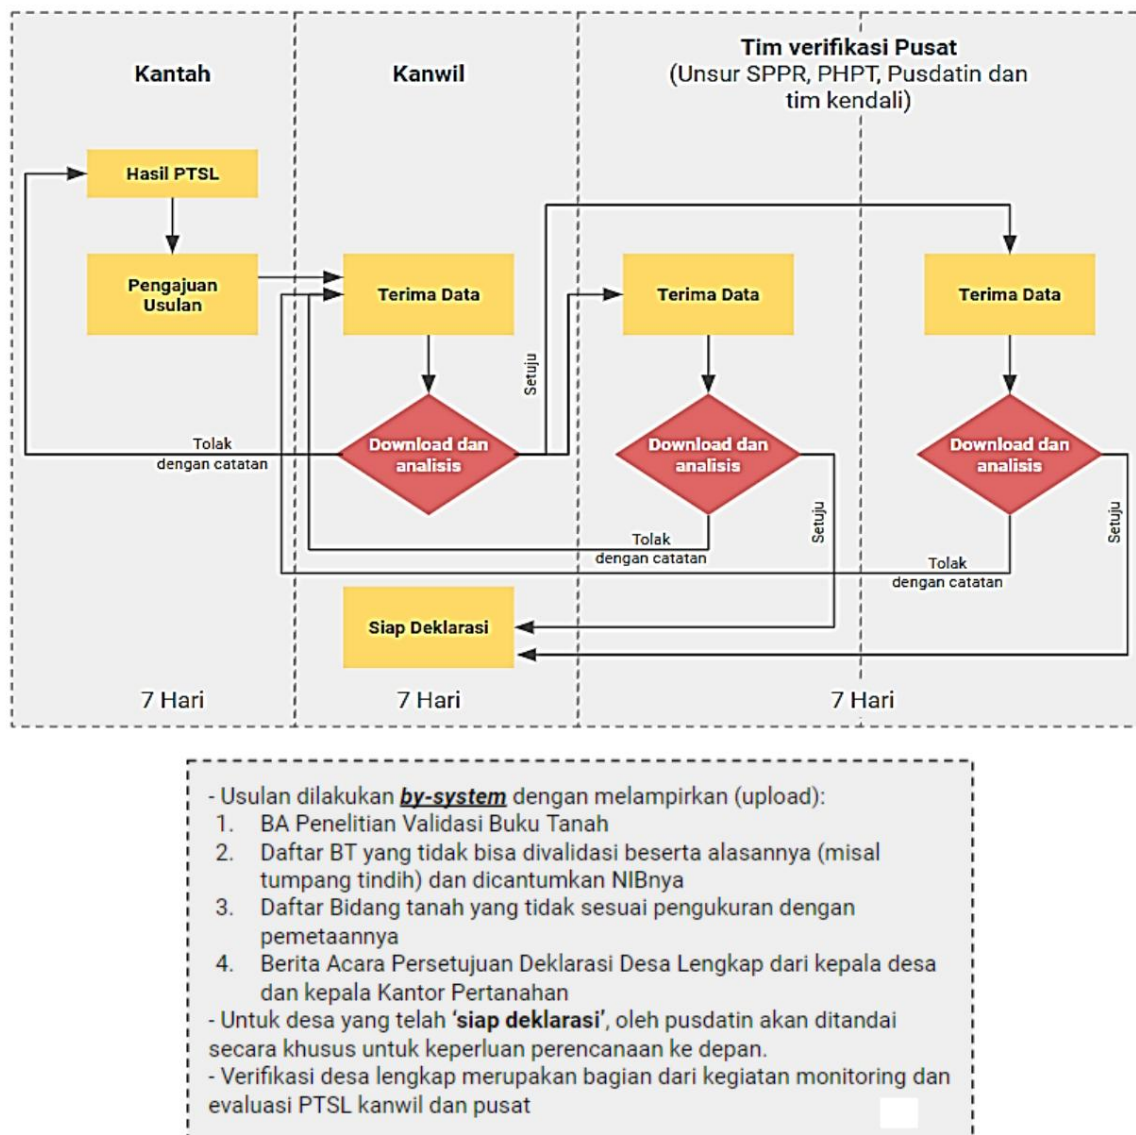

Figure 19 Complete Flowchart of Village/Sub-district Declaration Submission

For villages/sub-districts that have been declared, the data center will mark them.

Proposals are made by the system by attaching (*uploading*):

1. Minutes of Land Book Validation Research
2. List of BTs that cannot be validated along with the reasons (e.g. overlap) and include their NIB;
3. List of land plots that do not match the mapping;
4. Minutes of approval of the complete village/sub-district declaration from the Village/Sub-district Head and the Head of the Land Office. The Complete Village/Sub-district Declaration Statement is made in the form of a Complete Village/Sub-district Declaration Statement signed by the Head of the Office, Structural Officials responsible for archive services and management.

Complete Village/Sub-district Proposals consist of at least:

1. Village/sub-district polygon ID and area; 2. Number and area of registered land plots;
3. Number and area of registered land plots that do not have certificates;
4. Number and area of road polygons, public facilities/social facilities, and natural objects such as rivers, lakes, there, etc.;
5. The total area of the numbers 2+3+4 is the same as the area of the village/sub-district;
6. Number and area of land plots validated or blocked internally;
7. Number and area of land books validated or blocked internally; and
8. List of land books that cannot be mapped and have been blocked internally.

D. Complete Regency/City Land Registration

Definition, Budget, Implementation and PTKL Products

Complete Regency/City Land Registration (PTKL) is implemented using funds from the Directorate General of Land and Spatial Surveys and Mapping for regencies or cities with more than 80% of registered land plots. The PTKL implementation elements are physical K4, legal K4, and PBT (Public Land Registration), if any.

PTKL can be implemented independently by the selected Regency or City or in collaboration with a third party based on the Decree of the Directorate General of Land and Spatial Surveys and Mapping, the budget, implementers and implementation period of which are determined by the Decree.

In the implementation of PTKL activities, not only physical plotting of K4 land plots is carried out, but also improvements to legal links, mapping of land plots (PBT products), map verification and support for complete village/sub-district declarations as in PTSL.

MY LAND SURVEY APPLICATION

A. Definition and Business Process

The My Land Survey application is an application that can assist in measuring physical and legal data, integrated with the Ministry of Marine Affairs and Fisheries (KKP). The My Land Survey application can be accessed by:

1. ASN within the Ministry;
2. Non-Civil Servant Government Employees (PPNPN) within the Ministry;
3. Licensed Surveyor; and
4. Third Parties under the Contract.

- Pengumpulan data fisik dan yuridis **wajib dilakukan** menggunakan aplikasi Survey Tanahku
- Panduan penggunaan dan Troubleshooting bisa diakses melalui forum survey tanahku

Pengumpulan data Fisik + Pengumpulan Data yuridis

Mengapa Survey Tanahku?

- Memastikan kualitas Poldasik dan poldadis
- Percepatan proses pengolahan data.
- Semua data, berkas dan output berbentuk digital

Figure 20 Example of image of physical data collection and legal data in the My Land Survey application

All app users must be verified, with a limited account validity period. Each account's verification procedure must meet the following requirements:

1. Verify the State Civil Apparatus (ASN) account.
 - a. All personal data in SIMPEG has been validated.
 - b. The email registered in SIMPEG is the ministry's official email address (domain: @atrbpn.go.id).
2. Verify the PPNPN account.
 - a. PPNPN has been registered with the Ministry's working partners.
 - b. have access to the KKP application.
3. Verify the Licensed Surveyor (SB) account.
 - a. Licensed Cadastral Surveyors have been registered with the Ministry's working partners.
 - b. The Land Office has verified the work contract with the SKB.
 - c. SB has access to the physical PTSL application.
4. Verify third party accounts.
 - a. Third parties have registered with the Ministry's working partners.
 - b. The Land Office has verified the work contract with the relevant party.
 - Third.
 - c. Third parties have access to the physical PTSL application.

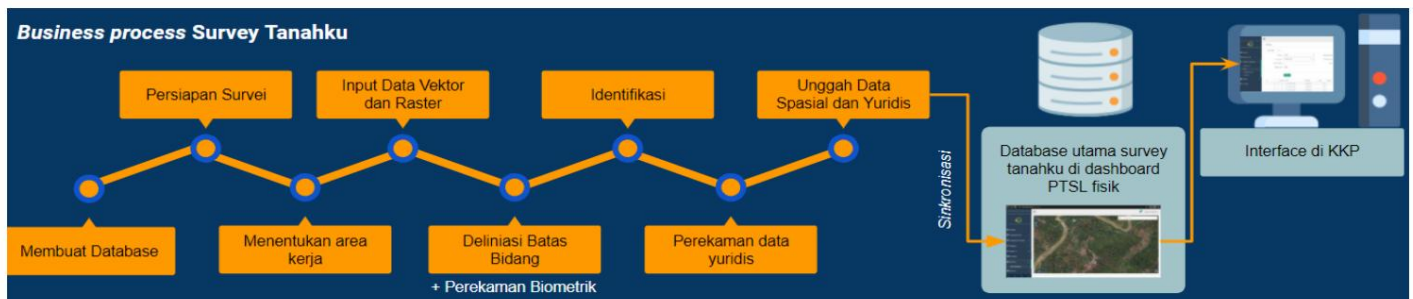

Figure 21 Business Process of My Land Survey

B. Output of My Land Survey Application

The output of the My Land Survey Application is a Measurement Image with the following format:

I. PENOMORAN

a. Nomor Unit Bidang (NUB) : 1-4
b. Nomor Berkas :
c. NIB :
Rincian nomor lihat pada hal 2, 3, dan 4 atau lembar lain yang merupakan bagian dari GU ini.

II. LOKASI

a. Kecamatan : Buay Madang Timur
b. Desa : Karang Tengah
c. Nomor Peta Pendaftaran : 49.126-13-5
d. Nomor Peta Kerja/Foto : ES

III. TANDA BATAS DAN INFORMASI BIDANG TANAH

Rincian data dilihat pada hal 4 atau lembar lain yang merupakan bagian dari GU ini.

IV. KETERANGAN PENGUKUR

1. Nama Petugas Lapangan : Mita Rachmalia
2. Status : Surveyor Kadaster
3. Nama KJSKB/PT : WEBGIS INDONESIA
4. NIP/No. Lisensi : 1-0733-17
5. No. & Tgl Surat Tugas : 3689/16.100/IX/2020, 21/09/2020
6. Alat Ukur : GPS Geodetic
7. Tanda Tangan :

Figure 22 Example of measurement image output from the My Land Survey Application

The measurement image output from the My Land Survey Application is still being developed to meet the measurement image requirements.

C. Land Data Collector (Puldata)

Land Data Collectors (Puldata) are community groups who are given training and assigned to be facilitators and implementers of the Physical Data and Legal Data collection process.

Based on the Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 6 of 2018 concerning Complete Systematic Registration Article 42, the Implementation of Complete Systematic Land Registration can be carried out based on community participation with the assistance of Land Data Collection Officers (Puldata).

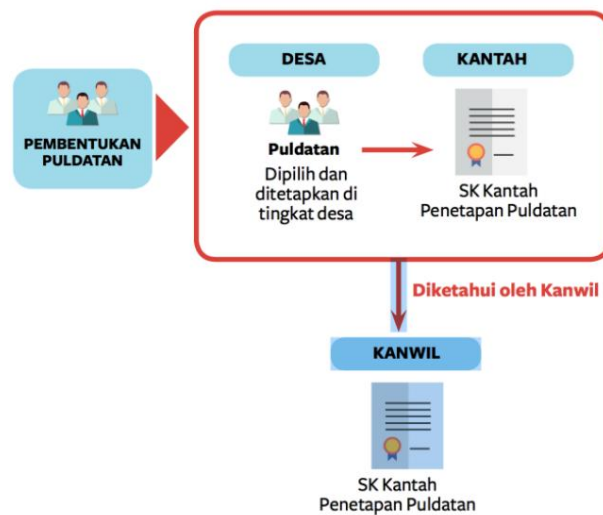

Figure 23 Puldatan Formation Flow (PTSL PHLN)

In its implementation, Puldatan is formed and determined only for PTSL activities funded through PHLN (in the PPRA project) by the Head of the Land Office.

Puldatan is supervised and directed by the Physical Task Force and the Legal Task Force.

Puldatan consists of at least 6 people consisting of 1 Village Head Village/Sub-district/Village/Sub-district officials, 1 Babinsa/Bhabinkamtibmas, 2 para-surveyors, and 2 youth leaders/youth groups/RT heads/community leaders/women's leaders.

The Land Survey Unit (Puldatan) is tasked with assisting in the collection of physical and legal data. The Puldatan measures land boundaries, collects legal data (KTP/KK, title/proof of ownership/Statement of Physical Control), completes the 201 Form (DI201) signed by the Puldadis officer and PTSL participants (the PTSL Adjudication Committee has not yet reached a conclusion), and simultaneously enters/digitizes legal data using the Tanahku survey application.

OUTPUT, EVIDENCE, AND BUDGET

A. Output and Evidence

No.	Stages PTSL Activities	Output	Evidence
1.	Planning	1. Estimate the number of plots in each village/sub-district, recapitulation of the number of land books that have been issued, recapitulation of PTSL output (clusters) (print the form for determining the number of SHAT and PBT targets); 2. Recapitulation of data quality (KW 4, KW 5, and KW 6). 3. Complete completion <i>roadmap</i>, complete village/sub-district, accompanied by village/sub-district location maps; 4. Evidence of K4 studio completion (comparison of spatial and textual data downloaded from the KKP system before and after quality improvement); 5. List of land areas that must be checked in the field;	-
2.	Location Determination	Location Determination Decree, accompanied by a Location Map with administrative boundaries. (For K3 land plots that have undergone changes in shape, position, area, or name, a Field Inspection Report must be attached).	-
3.	Preparation	1. Work Map 2. Inventory List of products K.3, K.3.1 and K.3.3 from activities PTSL.	-
4.	Formation and Committee Determination PTSL Adjudication and Task Force	1. Decree of the Head of the Land Office concerning the Adjudication Committee PTSL and Task Force 2. Minutes of the Oath-taking Ceremony of the PTSL Adjudication Committee and Task Force 3. Decree on the Establishment of Puldaten (if any)	-
5.	Counseling	1. Minutes of Extension Meeting. 2. Extension activity report (attached with documentation)	-
6.	Collection of physical data and legal data	PBT <i>output</i> consists of four categories of activity implementers, namely: 1. ASN (self-managed) 2. Third Parties 3. ASN with Community Participation 4. Third Parties with Community Participation Juridical data collection <i>output</i> 1. List of Recapitulation of PTSL Inventory and Identification Data. 2. Registration Form. 3. Right Base. 4. Legal Data Research Minutes (DI 201) which have been signed by the Puldadis officers and PTSL participants (not yet reached the conclusion of the PTSL Adjudication Committee).	-
7.	Data Research Jurisdiction for proof of rights	The conclusion of the PTSL Adjudication Committee on whether or not the proposed rights can be granted is stated in the Legal Data Research Minutes (DI 201) and signed by the Chairperson, Deputy Chairperson for Physical Affairs, Deputy Chairperson for Legal Affairs, 1 (one) Physical Task Force member, 1 (one) Legal Task Force member, the Village Head and Secretary (Continued from DI 201)	-
8.	Announcement of physical data and legal data and their approval	1. Announcement of physical data and legal data of the land plot as well as the Land Plot Map signed by the Chair of the PTSL Adjudication Committee (DI 201 B and DI 201 C); 2. Minutes of Announcement Approval signed by the Chair of the PTSL Adjudication Committee (DI 202)	-

9.	Completion of PTSL activities (Cluster)	K1: Land Book, Measurement Letter and Certificate K2: Land Book, Measurement Letter, Notification Letter K3.1 : DI201, DI201B, DI202, Notification Letter K3.2 : DI201, DI201B, DI202, Notification Letter K3.3 : PBT, Notification Letter K3.4 : PBT, DI201, Notification Letter	-
10.	Affirmation of Conversion, Recognition of Rights, and Granting of Rights	1. Decision of the Chair of the PTSL Adjudication Committee which is stated in the Legal Data Research Minutes (DI 201) and signed by the Chair (Continued DI 201) for confirmation of Conversion/Recognition of Rights. 2. For State Land, the granting of rights is done by adding a note to the last page of the List of Proposals for Granting Rights to State Land by the Chair of the Adjudication Committee (DI 310) which has been signed by the Head of the Land Office.	-
11.	Bookkeeping and/or issuance of certificates	K1: Analog and/or digital Land Book and Land Rights Certificate K2: 1. Land book with the name of the right holder blank 2. Notification letter to PTSL participants that certificates cannot be issued due to disputes/cases	-
12.	Documentation and submission of activity results	1. BA Handover of PTSL activity results; 2. Results of PTSL activities 3. Warkah	-
13.	Reporting	1. Periodic reports 2. Final report in manual or digital form	-

All *output* is presented in analog and/or digital form.

B. PTSL Budget Structure

The PTSL budget structure is divided into two categories based on output, namely Land Plot Map (PBT) *output* and Land Title Certificate (SHAT) *output*.

PBT *output* consists of four categories of activity implementers, namely:

1. ASN (self-managed);
2. Third Parties;
3. ASN with Community Participation;
4. Third Parties with Community Participation.

SHAT *output* consists of two categories of activity implementers, namely:

1. ASN (self-managed);
2. ASN with Community Participation.

Table 3 PTSL Budget Structure

PTSL		PBT			
		ASN	Party Third	ASN with PM	Third Party with PM
SHAT	ASN	ÿ	ÿ	ÿ with adjustments	ÿ with adjustments
	ASN with Participation Public	ÿ	ÿ with adjustments	ÿ	ÿ

Information :

1. In the PBT *output* implemented by ASN and Third Parties, the SHAT stage is implemented through the ASN SHAT *output* and the PM SHAT output. In the case of the SHAT stage implemented through the PM SHAT output, it is carried out by adjusting the output cost units;
2. In the PBT *output* implemented by ASN with Community Participation and Third Parties with Community Participation, the SHAT stage is implemented through the ASN SHAT *output* with Community Participation and ASN SHAT. In the case of the SHAT stage carried out through the ASN SHAT output, it is carried out with an adjustment to the output cost unit.
3. PBT ASN/Third parties with Community Participation can be continued with SHAT ASN (with the note that the puldadi budget cannot be disbursed).
4. In the PBT *output* implemented by ASN/Third Parties with Community Participation, so that the community participation component (051) can be accounted for its budget, the provision of Puldatan personnel is carried out first before the land measurement and mapping activities are carried out.

Extension Activity Budget

1. Extension activities are not included in the activities paid based on the field, therefore they are not included in the elements forming the SBK. Extension payments use the current year's SBM in the form of material expenditure (521211), inventory expenditure (521811), intra-city business travel (524113) and professional service expenditure (522151).
2. Extension activities are carried out by officers from the Land Office and Job Providers together with extension officers from the Land Office (if the activity implementer is a third party).
3. The target of the extension is all members of the community who own/control land plots in the village/sub-district area, both those who do not have certificates and those who do have certificates, including community groups and/or government agencies.

4. During this outreach phase, external speakers, including those from the prosecutor's office, local government, police, and others, are also invited to provide information to the public regarding the goals and benefits of PTSL activities. Outreach can be conducted through community meetings (forums), distribution of brochures or leaflets, or banner creation.

5. The table detailing the extension budget per zone/category is as follows:

DESCRIPTION	COUNSELING				AMOUNT (Rp)
	521211 (Rp)	521811 (Rp)	524113 (Rp)	522151 (Rp)	
Zone I	1,620,000.00	446,000.00	4,080,000.00	1,600,000.00	7,746,000.00
Zone II	1,620,000.00	446,000.00	3,380,000.00	1,600,000.00	7,046,000.00
Zone III	1,620,000.00	446,000.00	2,700,000.00	1,600,000.00	6,366,000.00
Zone IV	1,620,000.00	446,000.00	1,960,000.00	1,600,000.00	5,626,000.00
Zone V	1,620,000.00	446,000.00	1,240,000.00	1,600,000.00	4,906,000.00
Zone VI	1,620,000.00	446,000.00	12,240,000.00	1,600,000.00	15,906,000.00

C. Output Cost Standards

Standard Output Cost (SBK) is the amount of costs set to produce outputs /sub- outputs . In the context of budget implementation, SBK functions as an estimate. The estimation function is an estimate of the amount of costs that can be exceeded, among other things due to changes in stage components and/ or the use of cost units influenced by market prices. The amount of costs that can be exceeded takes into account the following matters:

- the procurement process is in accordance with the provisions of laws and regulations;
- availability of budget allocation; and
- principles of economy, efficiency, and effectiveness.

I. Budget Structure for Land Area and Zoning Map Output

Category (Zoning)	Volume and Unit Measuring	LAND MAP				Information
		ASN (Rp)	Party Third (Rp)	ASN with Participation Public *) (Rp)	Third Party with Participation Public *) (Rp)	
I	1 Field	214,600.00	360,490.00	301,560.00	437,246.00	Papua, West Papua, Nusa Southeast East, Maluku, North Maluku
II	1 Field	182,700.00	337,377.00	265,980.00	412,171.00	North Sulawesi, Sulawesi Central, Southeast Sulawesi, West Nusa Tenggara, Riau Islands, Islands Bangka Belitung

III	1 Field 151	800.00	252,682.00	231,520.00	325,601.00	West Sulawesi, Sulawesi South, Kalimantan South, East Kalimantan, West Kalimantan, Aceh, North Sumatra, Sumatra West, Central Kalimantan, Gorontalo

V	1 Field 88,800	800.00	153,661.00	160,840.00	222,546.00	Banten, DKI Jakarta, West Java, Central Java, DI Yogyakarta, East Java, Bali
VI	1 Field 231	500.00	-	=	-	Archipelago

*) including operational costs that must be paid to the Puldata Team of IDR 58,000.00/field

Information:

- 1) In the *output* budget structure of 3rd Party PBT and 3rd Party PBT Community Participation, there are Quality Control activities in the form of Quality Inspection and Land Plot Verification and Validation.
- 2) Quality Inspection of *the output* of 3rd Party PBT and 3rd Party PBT with Community Participation is an activity carried out by a Third Party to ensure that the land plot data produced in the land plot measurement activity is in accordance with the specified quality.
- 3) Verification and validation of land areas are activities carried out by ASN officers to ensure that land measurement and mapping activities have been carried out in accordance with the proper flow/stages of activities (*Business Process*).

II. Output of each Zone for Non-Systematic PBT and Non-Systematic SHAT

Non-Systematic PBT and Non-Systematic SHAT Standard Costs used for activities:

a. Complete City/District Land Registration.

- b. Cross-Sector Land Registration includes certification for Capture Fishermen, Cultivation, MSMEs and Independent Oil Palm Farmers originating from the Cooperation Agreement between the Oil Palm Plantation Fund Management Agency and the Ministry of Agrarian Affairs and Spatial Planning/National Land Agency, if the object is outside the PTSL location determination then it is resolved with Non-Systematic PBT and Non-Systematic SHAT.

Output of Non-Systematic Land Area Maps and Non-Systematic SHAT and Zoning

Category (Zoning)	Volume and Unit Measuring	LAND MAP		SHAT	Information

97,400.00	-	-	231,500.00	-	-	-	242,400.00	242,400.00

Notes:

- In its implementation, PTSL can produce K3 products with various variations, namely:
 - K3.1 is a PTSL product that has been completed up to the stage of physical data collection, legal data collection, land inspection by the committee and announcement, *output* : PBT + Land List + Legal Data of Land Plots + Legal Data Research Minutes of the PTSL Adjudication Committee + Minutes of Approval of the Announcement of Physical Data and Legal Data.
 - K3.2 is a PTSL product that has been completed up to the stage of physical data collection, legal data collection, land inspection by the committee and announcement, *output* : PBT + Land List + Legal Data of Land Plots + Legal Data Research Minutes of the PTSL Adjudication Committee + Minutes of Approval of the Announcement of Physical Data and Legal Data.
 - K3.3 is a PTSL product that has been implemented up to the stage physical data collection, *output* : PBT + Land List.
 - K3.4 is a PTSL product that has been implemented up to the stage of collecting physical data and legal data (filing has been carried out), without continuing with legal data research to prove land rights/examination, *output* : PBT + Legal Data for Land Areas.
- The maximum budget amount that can be paid for K3 is three stages (Puldadis, PBT and Land Inspection) which are supported by respective accountability/evidence documents.

4. Cluster 4/K4 Payment

Description	Improving the quality of land data/information (K4 ASN) (Rp)	Improving the quality of land data/information (K4 Party III) (Rp)
Zone I	201,800.00	283,264.00
Zone II	171,100.00	240,254.00
Zone III	141,300.00	194,210.00
Zone IV	109,000.00	146,668.00
Zone V	80,900.00	103,792.00
Zone VI	259,200.00	-

- K4 is a separate *output*, which is not part of the *output* K1, K2, K3 activities.
- Land areas that require quality improvement are: (1) old land books from before 2017 that have not been *plotted* (other than KW1, KW2 and KW3), (2) land books

land before 2017 that has never been entered in the KKP application (including land books that do not have a NIB), and (3) land books in an inactive position (temporary internal block) because they cannot be *plotted* previously.

3. Specifically for K4, *evidence* for disbursement is the Minutes of Results of Land Quality Improvement attached to the same excel *list* with the following contents:
 - a. Data on quality before (kw 4, 5 or 6), and its condition;
 - b. Data quality after the data quality has been improved (Kw 1, 2 or 3) with the latest SU link conditions;
 - c. New measurement drawings if the old GU is not found containing registered or unregistered land plots including landed land plots (k4).
 - d. K4 nominee list after announcement;
 - e. Minutes of Measurement and if there are Minutes of Mediation.
 - f. Plotting of K4 areas is also followed by the arrangement of land areas as a whole within the village/sub-district scope and forming a complete village/sub-district.

D. Budget Implementation and Accountability for PTSL Activities

1. Types of PTSL Activity Expenditures

In order to compile PTSL activities, the cost calculation analysis (SBK) of activities is carried out based on the types of expenditure, namely material expenditure, honorarium expenditure and other non-operational goods expenditure and other expenditures for the purposes of implementing technical activities carried out in the field by the physical task force and the legal task force. Administrative (secretarial) activities carried out by the administration task force in order to assist the duties of the adjudication committee secretary are not subject to analysis because these activities are office activities.

Based on the analysis of the SBK calculation, the payment for PTSL activities is used for: 1.

Material Expenditure

Account 521211: consumption costs, documentation, banners, photocopying;

2. Expenditure on Consumable Supplies Account 521811: costs of stationery, printing materials, computer support materials. Expenditure on supplies account 521811 must be included in the inventory application;

3. Expenditure on Honorarium for Activity *Output* Account 521213: Honorarium for Legal Data Research of the Acceleration Adjudication Committee (Adjudication Committee Hearing) and Honorarium for the Auction Committee;

4. Other Non-Operational Goods Expenditure Account 521219: Measurement Costs, Legal Data Collection (Puldadis), Land Data Collection (Puldatan), Land Inspection and Verification and Validation;

5. Travel Expenses Within the City Account 524113: Local Transport
Source person;

6. Professional Services Expenses Account 522151: Speaker's Honorarium in the context of Puldatan Team provision;

7. Other Service Expenditures Account 522191: Quality Control and Measurement, Mapping and Third Party Land Plot Information;

8. In the ASN SHAT implementer category, component 052 (Data Collection) of the allocated budget includes the costs of village/sub-district officers.

Rp. 10,000.00 per field, using account 521219

In the case of the secretary being assisted by an administrative task force who carries out work beyond working hours, this can be financed by employee expenses (512211) in the form of overtime pay for ASN employees, with provisions referring to the Regulation of the Minister of Finance and Input Cost Standards.

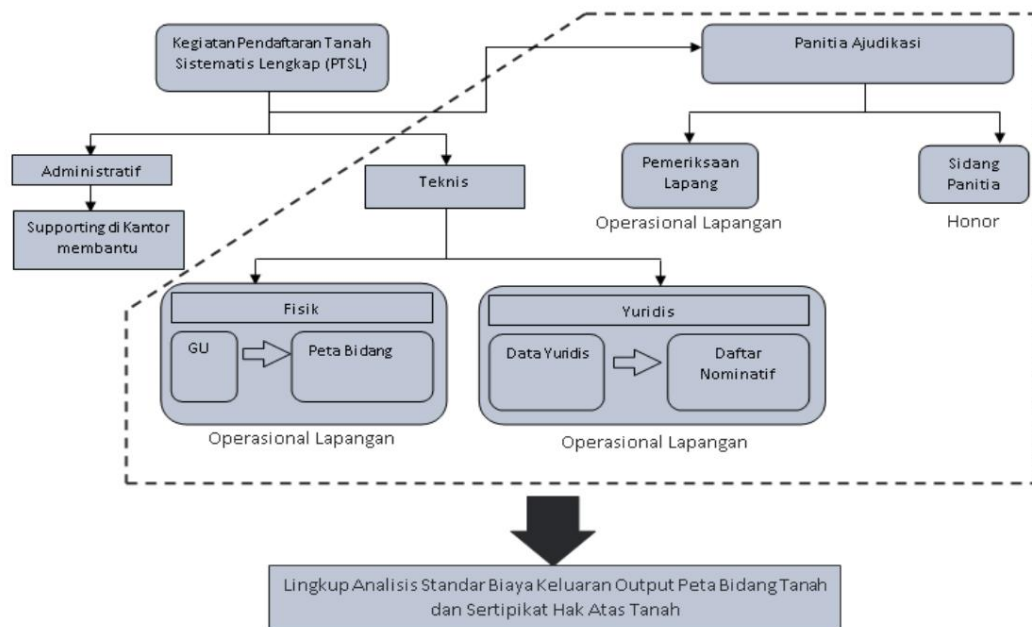

Figure 24 Diagram of the Relationship between the Adjudication Committee and the SBK PTSL Activities

2. Foreign Loans for the Agrarian Reform Acceleration Program (PPRA/One Map Project)

Procedures for Budgeting, Implementation, Accountability, and Reporting of Foreign Loan or Grant Funds (PHLN) for the Agrarian Reform Acceleration Program (PPRA/One Map Project) based on Technical Instructions Number 2/Juknis-100.KU.03.02/II/2021 dated February 17, 2021.

E. Tax Provisions

The imposition of tax on PTSL activity costs is regulated as follows:

1. Purchases of materials and purchases of consumer goods supplies on Accounts 521211 and 521811 are subject to VAT and Article 22 Income Tax, with the following amounts:
 - a. Taxation for transactions with a value of more than IDR 2,000,000.00 is subject to VAT of 10%; and
 - b. For transactions worth more than IDR 2,000,000.00, a 10% VAT and 1.5% Article 22 Income Tax are imposed. If the third party/partner does not have a Taxpayer Identification Number (NPWP), a 3% Article 22 Income Tax rate is imposed.
2. Income earned by officers from honorariums for legal data research (acceleration adjudication committee hearings) in land inspection activities Account 521213 (activity *output* honorarium) and honorariums for resource persons Account 522151 (professional service expenses) are subject to Article 21 Income Tax.
3. Other non-operational expenses Account 521219 is a series of activities paid in a lump sum with each field unit not subject to Article 21 Income Tax.
4. PTSL activities carried out by third parties for Other Service Expenditures Account 522191 are subject to VAT of 10% and Article 23 Income Tax of 2%.
5. PTSL activities using PLN funding sources are not subject to tax.

F. PTSL Administrative Application

1. The data quality control function between the PTSL KKP and OMSPAN data is the responsibility of the Head of the Work Unit. Budget disbursement control within the KKP is carried out in the PTSL Administration application.
2. The PTSL Administrative Application is used to record budget targets per village/sub-district, physical targets, unit prices for each activity, including the creation of SPM and printing of evidence.
3. The PTSL Administrative Application has a feature for creating Payment Orders (SPM), namely Operational and Non-Operational SPM. Operational and Non-Operational SPM are based on nominations submitted by technical units for both physical and legal activities.
4. After the nominations are made by the technical unit, the administration unit can check the list of nominations in the administration application, which then based on the nominations, an SPM for spending/budget disbursement is created from the Ministry of Finance's SAS application.
5. Operational SPM is used for disbursement of field activities, while Non-Operational SPM is used for disbursement of stationery, material purchases, and others.
Each stage requires at least one SPM, accompanied by physical *progress* evidence . SPM entries will determine financial *progress* on the PTSL *dashboard* .

G. Budget Revision and Optimization

A budget revision is a change to the budget details that have been determined based on the current fiscal year's State Budget and approved in the Budget Implementation List. Budget revision regulations refer to the Minister of Finance's Regulation on Budget Revision Procedures, which is issued each fiscal year.

1. Revision of PTSL Activity Budget

No.	Revision Description	Authority		Condition
		DJA	Regional Office of PB	
1	Changes in volume and budget between work units in the event of a change in the ceiling	Ÿ		a) Budget Revision proposal letter accompanied by a change matrix (originally to); b) Echelon I Approval Letter from the activity owner: - For the PBT <i>output</i> of the Director General of Agrarian Infrastructure; - For the <i>output</i> of SHAT Directorate General of Agrarian Legal Relations; c) SPTJM on stamped paper signed by the KPA, signed by the person responsible for the Activity/Leader of Echelon II Unit; d) ADK RKA-K/L DIP A Revision; e) Work Unit RKA; f) <i>Copy</i> of the Latest DIP A; and/or g) Related supporting documents (including: TOR, RAB, unit cost analysis, technical specifications, etc.); h) APIP Review; i) Echelon I Approval (Specifically for revisions to the Regional Office of PB). (points a to h specifically for Revision to DJA)
2	Changes in volume and fixed budget in 1 work unit		Ÿ	
3	Optimization	Ÿ		

Revisions to the PTSL activity budget can be made in order to:

- a. Changes in volume and budget between work units in the event of a change in the ceiling;
- b. Changes in volume and budget in one work unit in the case of a fixed ceiling;
- c. Optimization.

The complete revision process can be seen in the table above.

2. Optimization

Optimization is an effort to optimize the allocated budget to provide the greatest benefits/output in the implementation of PTSL. Budgeting for PTSL activities uses a cost unit per field with a target *output* of K1, but after conducting research on legal and physical data, the K1 target can become K1, K2, K3, because it cannot be guaranteed that all fields that have been measured can be issued certificates, so there will be unused budget remaining. If K2 and K3 are found, optimization is mandatory. In addition to the efficiency results from the difference between K1 and K2, K3, budget optimization can be obtained from the remaining Land Plot Map contract with Third Parties. In addition, there are potential sources of PTSL budget optimization which are fully described as follows:

a. Optimization Source

Optimization of the PTSL budget can be done with sources from:

1. Remaining Third Party Contract;

Land surveying and mapping activities can be carried out by a third party through a work contract. In practice, auction results reveal an unused budget surplus, representing the difference between the SBK and the resulting contract value.

2. The efficiency of the budgeted PTSL implementation compared to the actual situation on the ground.

This budgetary efficiency difference can be categorized into two categories:

a. Failure to achieve *output* K1. Land Title Certificate (SHAT) is the result of the difference between the K1 (SHAT) budget and the K2/K3.1/K3.2/K3.3/K3.4 budget.

b. If there is an old plot map that does not need to be re-measured (K3 from the previous year or IP4T location that has fulfilled the Cadastral Mapping requirements), the measurement fee cannot be paid.

The optimization results can be used to finance asset legalization at:

1. Locations where PBT is already available (K3 or ex IP4T);
2. New Village/Sub-district locations for all stages of PTSL activities starting counseling up to reporting; or
3. Location of the old Village/Sub-district for all stages of PTSL activities from outreach to reporting to fulfill "one complete village".

Notes:

If the IP4T location is used as a PTSL location and has fulfilled the Cadastral Mapping requirements, the measurement fee cannot be paid, however, if the IP4T mapping results have changed or Cadastral Mapping has not been carried out, the measurement fee can be paid, with evidence of a statement from the Head of the Regional Office/Head of the Land Infrastructure Division or the Head of the Land Office/Head of the Land Infrastructure Section.

b. How to Submit Optimization Applications

Optimization of the PTSL budget is carried out through the process of submitting budget revisions as regulated by the Regulation of the Minister of Finance of the Republic of Indonesia and other regulations governing the budget revision mechanism.

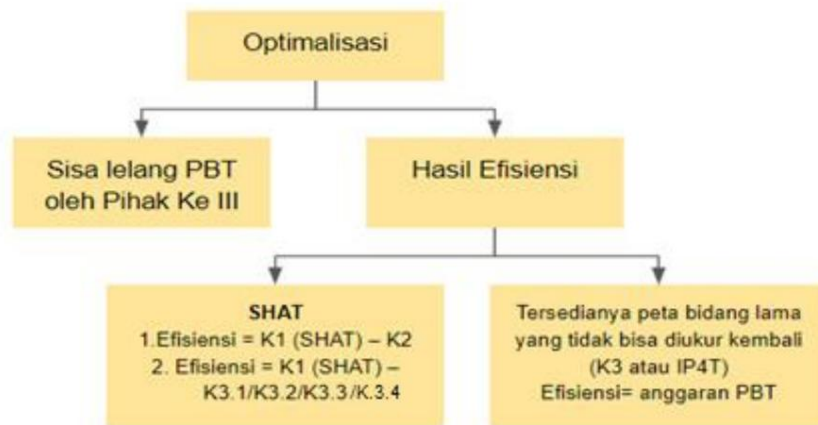

Figure 25 Optimization Chart

An example of optimization calculation (PTSL ASN Activities) is as follows:

Example of Zone V VILLAGE "B" (5,250 plots)

Stages		K1 (Rp)	K2 (Rp)	K3 (Rp)	Zone V Per Field (Rp)	Output (Information)
	SHAT					
052	Data Collection (evidence of rights/grounds of rights)	Yes	Yes	Yes	34,400.00	Legal Data on Land
053	Land Inspection	Yes	Yes	Yes	74,400.00	Data Research Paper Juridical Adjudication Committee Acceleration
054	Issuance of Letter Decision Data Rights/Authorization Physical and Legal	Yes	X	X	3,300.00	SK Rights to Land/Data Confirmation Legal Physical, Minutes Confirmation of Announcement Physical and Legal Data
055	Certificate Issuance	Yes	X	X	13,600.00	Land Book, Measurement Letter and Certificate
	Sub amount saved	nothing	16,900.00	16,900.00	125,700.00	As long as it is accompanied by evidence/ documents of accountability
	PBT					
052	Measurement Costs	Yes	Yes	Yes	88,800.00	Measurement Drawings, Field Maps Land, Land Register
	Amount saved / Optimized	Nothing	16,900.00	16,900.00	214,500.00	Saving/optimization of Rp 16,900.00

Information:

K1 ÿ Certificate issued (4,000 fields)

K2 ÿ Legal and subject data meets the requirements but is disputed (recorded/booked in the land book for 750 plots)

K3.1 ÿ PTSL has been completed up to the collection of physical data, collection of legal data, land inspection by the committee and announcement (500 plots)

The results of the optimization of VILLAGE/SUB-DISTRICT "B" are as follows:

	Description	Field	Rates / fields (Rp)	Amount Optimization (Rp)
K1	Certificates issued (4,000 plots)	X	X	X
K2	Legal and subject data meets the requirements but is disputed (recorded/booked in the land book for 750 plots)	750	16,900.00	12,675,000.00
K3.1 P	SL which has been completed until with Physical Data Collection, Data Collection Legal Data, Land Inspection by the Committee and Announcement (500 plots)	500	16,900.00	8,450,000.00
	Optimized amount from Village B			21,125,000.00

From the condition of the land plots in Village/Sub-district B, the optimization amount is IDR 21,125,000.00, for K2 and K3.1 status, the optimization per plot is IDR 16,900.00/plot, namely:

- Issuance of a Decree on Rights/Confirmation of Physical and Legal Data amounting to Rp. 3,300.00/plot;
- Certificate issuance of Rp. 13,600.00.

For areas for which a Measurement Letter has not been issued, the costs that cannot be accounted for/cannot be paid are IDR 13,600.00/area.

CLOSING

1. Thus, these Technical Instructions are to be the provisions for implementing Complete Systematic Land Registration, and to be 1 (one) guideline for regional implementers in the physical, legal and budgetary fields.
2. When these Technical Instructions come into effect, Technical Instructions Number 1/Juknis-100.Hk.02.01/I/2021 dated January 4, 2021 concerning Complete Systematic Land Registration, are revoked and declared invalid.
3. These Technical Instructions on Complete Systematic Land Registration come into effect from the date of stipulation.

STATEMENT LETTER

I, the undersigned below:

Name :
 NIK :
 Religion :
 Age :
 Work :
 Address :

I hereby declare truthfully and in good faith that I control/own a plot of land located at:

Road/RT/RW :
 Village/Sub-district :
 District :
 Regency/City Land :
 Use:
 Wide :

With the following limits:

North :
 East :
 South :
 West :

That the land in question in 1960 was controlled/owned by and I have controlled/owned it since the year from based on which until now regarding the land in question:

1. I control/own it physically and continuously; 2. It is not used as collateral for any debt;
3. Not in a state of dispute or objection from any party; 4. Not an asset of the Government/Provincial Government/District/ City/Village/Sub-district/BUMN/BUMD;
5. Not located/not included in a forest area;
6. The Land and Building Acquisition Tax (BPHTB) imposed on the acquisition of the land rights requested is my full responsibility and is a tax or duty owed to me which I am obliged to pay and will pay with the NJOP value (if there is already an NJOP)*;
7. I obtained the land through sale, inheritance, gift, or will, therefore the Income Tax (PPh) imposed on the acquisition of rights to my land is my full responsibility and is a tax or duty owed to me and which I must pay*;

8. No land rights/certificates have ever been issued on the land under control;
9. That the evidence of land rights which is the basis for this PTSL registration is truly mine and if there is evidence of ownership/control of the land in question after this statement has been made and/or the certificate has been issued, it is declared invalid;
10. Not willing to issue a certificate*
11. (Other statements that are still considered necessary).

I have made this Statement Letter truly with full responsibility both civilly and criminally, and if in the future there are elements that are not true in this statement, then all consequences that arise will be my full responsibility and I am willing to be prosecuted in accordance with applicable legal provisions, and will not involve the Ministry of Agrarian Affairs and Spatial Planning/National Land Agency, and I am willing to have the certificate I receive canceled by the authorized official.

Thus I made this Statement Letter in front of witnesses:

VI. DECISION OF THE CHAIRMAN OF THE COMPLETE SYSTEMATIC LAND REGISTRATION ADJUDICATION COMMITTEE	
	Considering Presidential Instruction Number 2 of 2018 concerning the Acceleration of Complete Systematic Land Registration in conjunction with Regulation of the Minister of Agrarian Affairs and Spatial Planning/Head of the National Land Agency Number 6 of 2018 concerning Complete Systematic Land Registration and Decree of the Head of the Regency/City Land Office dated Number. Regarding the Determination of PTSL Locations in Sub-districts, Districts/Cities and taking into account the conclusions of the PTSL Adjudication Committee as stated in the LEGAL DATA RESEARCH TEST, then: 1. Based on the physical data and legal data that were validated with the Minutes of Confirmation of the Announcement of the physical data and legal data dated Number (DI 202), the conversion of the rights to this land was confirmed to be a Freehold Right / recognized as a Freehold Right with the rights holder without / with a note that there are objections (no objections / being processed in Court with / without collateral confiscation (K1)*) 2. Based on the physical data and legal data which were ratified with the Minutes of Ratification of the Announcement of Physical Data and Legal Data dated Number (DI 202), the status of this land plot is STATE LAND. 3. To the person occupying/controlling, name can/cannot proposed to be granted Ownership Rights/Building Use Rights/Usage Rights (K1)*) 4. Based on the physical data and legal data that were validated with the Minutes of Confirmation of the Announcement of Physical Data and Legal Data dated Number (DI 202), the land plot described in this Legal Data Research Minute is in a CASE/DISPUTE, so the certificate process is postponed until the issuance of a decision by the Judicial Institution that has been has permanent legal force/results of deliberation that determine the entitled party/mediation. (K2)*) 5. Land and Building Rights Acquisition Costs (BPHTB): a. Paid off b. Owed in accordance with Statement Letter Number..... dated..... 6. Income Tax (PPH): a. Paid off b. Owed in accordance with Statement Letter Number..... dated..... If at a later date it turns out that there is stronger and more valid evidence that has been proven in accordance with statutory regulations, then this decision is declared invalid. Established in : on : CHAIRMAN OF PTSL ADJUDICATION COMMITTEE DISTRICT/CITY NAME NIP. Notes : - Circle the selected number. *) Cross out all unnecessary provisions.

Secretary General's Letter Number HR.01/634-100/IV/2020 dated April 20, 2020

		KEMENTERIAN AGRARIA DAN TATA RUANG/ BADAN PERTANAHAN NASIONAL SEKRETARIAT JENDERAL
Jalan Sisingamangaraja Nomor 2 Jakarta Selatan Telp. 021-7393939, 7228901 : www.bpn.go.id		
Nomor	: HR.01/643-100/IV/2020	Jakarta, 20 April 2020
Sifat	: Segera	
Lampiran	: -	
Hal	: Pelaksanaan Pendaftaran Tanah Sistematis Lengkap (PTSL) di Areal Peta Indikatif Penghentian Pemberian Izin Baru (PIPIB)	
Yth.	1. Para Kepala Kantor Wilayah Badan Pertanahan Nasional; dan 2. Para Kepala Kantor Pertanahan di seluruh Indonesia	
Berdasarkan surat Sekretaris Jenderal Kementerian Agraria dan Tata Ruang/Badan Pertanahan Nasional Nomor TU.01.02/1717-100/X/2019 tanggal 1 Oktober 2019 jo. Nomor HR.01/451-100/II/2020 tanggal 28 Februari 2020 dijelaskan bahwa dalam menjalankan pelayanan pertanahan Kepala Kantor Pertanahan agar berpedoman pada Peta Indikatif Penghentian Pemberian Izin Baru (PIPIB) revisi terakhir (revisi XV), termasuk dalam melaksanakan kegiatan PTSL. Berkenaan dengan hal tersebut, terhadap pelaksanaan kegiatan PTSL di areal Peta Indikatif Penghentian Pemberian Izin Baru (PIPIB), agar memperhatikan hal-hal sebagai berikut: 1. Apabila peserta PTSL mempunyai data/dokumen yuridis lengkap dan memenuhi syarat untuk diberikan hak atas tanah, namun lokasi (obyek) PTSL berada di areal Peta Indikatif Penghentian Pemberian Izin Baru (PIPIB) maka penyelesaiannya sampai dengan kategori (K3.1). 2. Apabila lokasi (obyek) PTSL sebagaimana dimaksud pada angka 1 telah mendapat keputusan terletak di luar dan/atau tidak masuk di areal Peta Indikatif Penghentian Pemberian Izin Baru (PIPIB) dari Instansi yang berwenang dan telah memenuhi syarat sesuai ketentuan peraturan perundangan maka penyelesaian kategori (K3.1) menjadi kategori (K1) dapat dilanjutkan.		
Pelaksanaan ...		

- 2 -

Pelaksanaan kegiatan PTSL di areal Peta Indikatif Penghentian Pemberian Izin Baru (PIPIB) dimaksud, agar dilaporkan kepada Menteri Agraria dan Tata Ruang/Kepala Badan Pertanahan Nasional c.q. Sekretaris Jenderal.

Demikian untuk menjadi perhatian dalam pelaksanaannya.

a.n. Menteri Agraria dan Tata Ruang/
Kepala Badan Pertanahan Nasional
Sekretaris Jenderal,

 Himmawan Anas Sugoto

Secretary General's Letter Number HR.01/1050-100/VII/2020 dated July 15, 2020

**KEMENTERIAN AGRARIA DAN TATA RUANG/
BADAN PERTANAHAN NASIONAL
SEKRETARIAT JENDERAL**

Jalan Setiabudi No. 22 Jakarta Selatan Telp. 021-7363030, 7228901 : www.bptn.go.id

Nomor : HR.01/1050-100/VII/2020 Jakarta, 15 Juli 2020
Sifat : Segera
Lampiran : 1 (satu) eksemplar
Hal : Pelaporan Output PTSL

Yth. 1. Kepala Kantor Wilayah Badan Pertanahan Nasional
2. Kepala Kantor Pertanahan
di seluruh Indonesia.

Sebagai tindak lanjut hasil monitoring kegiatan Pendaftaran Tanah Sistematis Lengkap (PTSL) pada tahun 2017, 2018, 2019 dan 2020, bersama ini kami instruksikan Saudara untuk:

- Melakukan inventarisasi kembali output PTSL KI tahun 2017, 2018 dan 2019 untuk selanjutnya :
 - Terhadap sertipikat yang belum diserahkan agar diserahkan kepada pemegang hak (menyelesaikan DI 301A);
 - Terhadap sertipikat yang tidak dapat diserahkan agar diinventarisasi kendala, permasalahan dan penyebabnya.
- Melakukan inventarisasi dan identifikasi kembali output PTSL :
 - K3.1 hasil kegiatan PTSL tahun 2019 yang dapat diprioritaskan penyelesaiannya menjadi KI di tahun 2021;
 - K3 tahun 2017 dan 2018, dan K3.3 tahun 2019 yang dapat diprioritaskan penyelesaiannya menjadi KI di tahun 2021.
- Melakukan inventarisasi terhadap produk PTSL yang tumpang tindih dengan tanah aset instansi pemerintah, kawasan hutan, tanah ulayat, tanah milik perorangan atau badan hukum, untuk selanjutnya dilaksanakan penelitian dan penyelesaian sesuai perundang-undangan.
- Menyampaikan hasil rekapitulasi angka 1, 2, dan 3 di atas kepada Menteri Agraria dan Tata Ruang/Kepala Badan Pertanahan Nasional c.q. Sekretaris Jenderal paling lambat tanggal 30 Juli 2020.

5. Sehubungan ...

-2-

- Sehubungan penghematan anggaran dan penerbitan DIPA revisi tahun 2020 yang menyebabkan perubahan target fisik dan anggaran kegiatan PTSL di seluruh provinsi, maka pelaksanaannya berpedoman pada Protokol PTSL sebagaimana terlampir.

Demikian untuk menjadi maklum dan dilaksanakan dengan penuh tanggung jawab.

Jenderal

Tembusan:

- Menteri Agraria dan Tata Ruang/Kepala Badan Pertanahan Nasional, di Jakarta;
- Wakil Menteri Agraria dan Tata Ruang/Wakil Kepala Badan Pertanahan Nasional, di Jakarta;
- Inspektur Jenderal Kementerian Agraria dan Tata Ruang/Badan Pertanahan Nasional, di Jakarta;
- Direktur Jenderal Survei dan Pemetaan Pertanahan dan Ruang, di Jakarta;
- Direktur Jenderal Penetapan Hak dan Pendaftaran Tanah, di Jakarta; dan
- Ir. Hary Noegroho S., selaku Ketua Tim Monitoring PTSL, di Jakarta.

Lampiran Surat Sekretaris Jenderal
Nomor : HR.01/1050-100/VII/2020
Tanggal : 15 Juli 2020

PROTOKOL PTSL

Sehubungan dengan penghematan anggaran dan penerbitan DIPA revisi tanggal 30 April 2020 Nomor S-771/AO/2020 hal Pengesahan Anggaran T.A. 2020 Kementerian ATR/BPN, tanggal 11 Mei 2020 Nomor S-779/AO/2020 hal Pengesahan Anggaran T.A. 2020 Kementerian ATR/BPN, dan tanggal 20 Mei 2020 Nomor S-847/AO/2020 hal Pengesahan Anggaran T.A. 2020 Kementerian ATR/BPN yang menyebabkan perubahan target fisik dan anggaran kegiatan Pendaftaran Tanah Sistematis Lengkap (PTSL) di seluruh provinsi, perlu dibuat protokol pelaksanaan PTSL sebagai berikut:

- Bahwa pelaksanaan kegiatan oleh setiap Satuan Kerja agar memperhatikan dan mempedomani target fisik dan pagu belanja dalam DIPA revisi tanggal 11 Mei 2020 dan 20 Mei 2020 masing-masing Satuan Kerja yang bersangkutan.
- Apabila secara realisasi kegiatan fisik tidak sesuai dengan DIPA revisi sebagaimana angka 1 tersebut di atas agar dilakukan penyesuaian dan pengoperan target fisik dan anggaran entitas kerja Kantor Pertanahan, Kepala Kantor Wilayah Badan Pertanahan Nasional agar mengkonsolidasikan dan mengkoordinasikan pengusulan revisi anggaran entitas kerja dan/atau subunit dan/atau subentitas kerja Kantor Pertanahan di wilayah kerjanya sesuai ketentuan peraturan perundang-undangan yang berlaku.
- Untuk menjamin keakuratan informasi realisasi penyerapan anggaran, Satuan Kerja diminta menjaga kesesuaian kemajuan pencapaian realisasi fisik dan anggaran di lapangan sebagaimana ditampilkan dalam dashboard PTSL, baik fisik dan anggaran, maupun aplikasi On Spas.
- Memprioritaskan K3.1 dan K3.3 hasil kegiatan PTSL tahun 2020 untuk diselesaikan menjadi KI di tahun 2021.

5. Penilaian ...

-2-

- Penilaian kinerja PTSL 2020
 - Penilaian kinerja PTSL sesuai dengan yang telah ditetapkan;
 - PTSL dilakukan secara sistematis lengkap;
 - Bidang NIB terpecah di tahun 2020 tervalidasi 100%;
 - Buku tanah di tahun 2020 tervalidasi 100%;
 - Warkah 100% digitalisasi; dan
 - Diupayakan untuk menghasilkan desa/keurahan lengkap, sesuai dengan DIPA revisi dan yang menghasilkan desa/keurahan lengkap akan mendapatkan bobot penilaian tambahan.
- Desa/keurahan lengkap
 - Kepala Kantor Pertanahan dapat mengusulkan Deklarasi Desa/keurahan lengkap apabila:
 - Jumlah bidang tanah yang telah ditetapkan berdasarkan penetapan batas dan pengukuran (NIB) tervalidasi >95%;
 - Jumlah buku tanah yang divalidasi >98%;
 - Tidak ada gap dan overlap antarbidang;
 - Luas wilayah desa/terdiri penuh bidang tanah dan fitur geografis;
 - Fitur geografis (sumbu, jalan, sungai, kawasan, demati, embung, rawa, situ, dan lainnya) dipetakan secara lengkap dan diberikan NIS;
 - Bidang tanah hasil delinesasi (NIS) yang diperbolehkan untuk desa/keurahan lengkap adalah maksimum 10% dari total NIB dan NIS non fitur geografis.
 - Tahapan penetapan desa/keurahan lengkap sebagai berikut:
 - Kepala Kantor Pertanahan mengusulkan kepada Menteri Agraria dan Tata Ruang/Kepala Badan Pertanahan Nasional c.q. Sekretaris Jenderal dan juga menyampaikannya melalui sistem yang disediakan oleh Kementerian Agraria dan Tata Ruang/Badan Pertanahan Nasional yang dilengkapi dokumen sebagaimana tercantum dalam Petunjuk Teknis Pendaftaran Tanah Sistematis Lengkap tanggal 30 Maret 2020 Nomor 1/Juknis-100.HK.02.01/III/2020 halaman 42 s.d. 43 Bab 12 huruf C, dan dilengkapi dengan:
 - Daftar ...

-3-

- Daftar buku tanah yang tidak dapat tervalidasi beserta alasannya;
- Daftar buku tanah yang tumpang tindih (overlap) beserta alasannya dan dicantumkan NIB overlap-nya;
- Daftar bidang tanah yang tidak sesuai antara data pengukuran dengan penataannya; dan
- Daftar bidang tanah K3 tahun 2017 dan 2018 serta K3.1 dan K3.3 tahun 2019.

- Berdasarkan usulan angka 1) di atas, Direktur Jenderal Survei dan Pemetaan Pertanahan dan Ruang dan Direktur Jenderal Penetapan Hak dan Pendaftaran Tanah melakukan verifikasi dan validasi dengan didukung oleh Pusat Data dan Informasi Pertanahan, Tata Ruang dan Lahan Pertanian Pangan Berkelanjutan untuk diumumkan melalui dashboard PTSL dalam kriteria desa/keurahan lengkap dan selanjutnya Kepala Kantor Pertanahan membuat pernyataan Deklarasi Desa/keurahan lengkap.
- Apabila diperlukan, kegiatan verifikasi dan validasi desa/keurahan lengkap dapat dilimpahkan kewenangannya kepada Kepala Kantor Wilayah Badan Pertanahan Nasional.

Jenderal

Minutes of Collection of Physical Data and Legal Data K4

NEWS

COLLECTION OF PHYSICAL DATA AND LEGAL DATA K4

NUMBER :

On this day, date month year (....-....-.....), the undersigned below:

Name :

NIP :

Position :

Explaining that field measurements have been carried out on K4 land plots and improvements in the quality of legal data in the Village/Sub-district of ..., Regency/City in a number of ..., plots with the following attachments:

1. Measurement drawings of field measurements;
- and 2. a list of details of land plots whose physical and legal data quality has been improved.

Thus, this Minutes of Meeting is made truthfully to be used as it should.

Chairman of the Adjudication Committee,
